Let's face it, NYC has _EIGHT_ 50kw signals at night (WFAN, WOR, WABC, WCBS, WINS, WEVD, WBBR, WQEW). Indiana has one. You don't mess with something like that. And I don't weep for Inner City either. Their programming on WLIB is responsible and community-oriented, yes, but Inner City already has night service in NYC on co-owned WBLS-FM. And if they wanted night service, well, WKDM on 1380 was just up for sale. No doubt Infinity would be happy to part with WZRC-1480. They don't need to callously kill off a legendary AM signal that to this day serves an important function in a huge swath of Midwestern land...just to get some piddly 2000 watts or somesuch over NYC.

Which brings me to the final point: The N-S article has a sidebar, urging readers to write to the FCC. The address: FCC, AM Branch, Mass Media Bureau, 1919 M St. NW, Washington DC 20554. At the top, indicate FCC file number BAL940311EC. I'm getting my letter off this week.

I hope Fort Wayne's community leaders realize that their pre-eminent PR voice is about to be stilled. Let's face it, before I ever visited Fort Wayne and got to know its (admittedly few :-) tourist attractions, all I ever knew about the city was WOWO. I'm sure I'm not the only one...

And oh yes...one more reason not to trust Inner City. Remember, this sale has an FCC file number. It's been in "Broadcasting" and the "M Street Journal." And when contacted by the N-S, Inner City's PR director, Charles Sutton, declined to take phone calls, but instructed his receptionist to say, "We are unaware of a pending sale at this point."

Oh yeah, the last time _I_ spent $2.3 million dollars on a radio station, I was unaware of it too... ;-)

-=Scott Fybush - fybush@world.std.com=-

[Moderator's Plea: I have been in touch with Scott on this and it is indeed ominous. It is very likely that Inner City plans to cripple WOWO's signal, in order to put a higher powered station on the air in NYC. It has been done before. Scott tells me that WINS bought a station in Little Rock, took it off the air and turned in the license, just so they could relax their pattern to the S.W. . So if anyone cares about broadcasting history and heritage, or just does not want to see a station like WOWO bought just to cripple it, PLEASE write the FCC *immediately* and protest the sale. I am planning on doing it, and I seldom listen to WOWO. It is not the loss of this *one* station which offends me, it it the idea that a good, locally produced, station is being bought NOT to run it, but to cripple it!. God that makes me mad!. Bill]

1094. IN DEFENSE OF IMUS

Newsgroup: rec.radio.broadcasting
Date: 1994-03-31 05:14:14 UTC
From: syael@aol.com
Message-ID: <2ndm76$9ht@vixen.cso.uiuc.edu>
Source record: 40550

In article <2m9e4c$gsb@vixen.cso.uiuc.edu>, N4Skv <jfaircloth@delphi.com>
writes:

"Imus hit a new low last week."

In defense of Imus:

Imus always yells at his board op (Lou) and his producer (Bernard). And they yell right back, telling him to die, chortling at his neck, etc. Two weeks ago, laconic Imus buddy and newsman Charles McCord screamed at the top of his lungs for 2 minutes at Imus, asking "WHAT IS WRONG WITH YOU?" They're using that cut as a bumper.

My feelings on Imus? The most literate show on commercial radio. We get to hear, on a regular basis, the thoughts and humor of:
(1) BROADCAST JOURNALISTS and ENTERTAINERS (Jeff Greenfield, Dan Rather, Connie Chung, Brit Hume, Tim Russert, Mary Matalin, Jane Wallace, Pat O'Brien, Marv Albert, Ruth Buzzi, Georgia Whitcomb, Ron Howard, Naomi Judd, Phil Simms, Boomer Esaison, Tom and Meredeth Brokaw);
(2) PRINT COLUMNISTS (Anna Quinlan, Frank Rich, Tony Kornheiser, Mike Barnacle, Sally Quinn, David Hackworth, Phyllis Richman);
(3) WRITERS (Pete Hamil, Joe Queenan, Kinky Freidman); and
(4) POLITICIANS and THEIR AIDES & HANGERSON (Bubba, Cuomo, Weiker, Kerry, Giuliani, D'Amato, Dole, Bradley, Carvel, Begala, Kat Brown).
I know that there are others who I have forgotten.
Admittedly, the ad hoc humor is often juvenile, but the scripted bits by Larry Kinney and Rob Bartlett are usually inspired. And then there's two-legged Fred and four-legged Fred.
The "serious" discussion is usually books, current events, and politics.

Imus himself is a former miner and railroad worker who never went to college and has worked his way up to talking to Presidents.

Finally, you can tell his worth by the enemies he's made: Howard Stern, who today, during Imus's radiothon for SIDS was abusively insulting of Imus, claiming that Imus's fiance would desert him as soon as she has her hands on his money. Don & Mike replayed his accidental obscenity on the air.

The man is hands down the best thing on commercial AM radio.

1095. WOWO and WLIB

Newsgroup: rec.radio.broadcasting

1096. Update on Kansas City AC Stations

Newsgroup: rec.radio.broadcasting
Date: 1994-03-31 05:14:15 UTC
From: Mark Roberts <transvox@tyrell.net>
Message-ID: <2ndm77$9hu@vixen.cso.uiuc.edu>
Source record: 40551

To update, amplify, and correct my previous post on this subject:

Today (Mar. 30), KMXV (Mix 93.3) appears to have shifted from a hot AC format to CHR (albeit conservative CHR).

KMAJ-FM, Topeka, Kansas, is locally owned.

The KCNW transmitter site is NOT at I-635 and State Avenue in Kansas City, Kansas. It is at Metropolitan Avenue and I-635 in the same city, but on the south side of the Kaw River.

What IS at I-635 and State Avenue is the KNHN tower, along with the old 10-element antenna for what used to be KCKN-FM (now KFKF, 94.1). s

Overview: **********

This is the weekly news digest for West Coast Live, San Francisco's Live Radio Show to the World (actually just NPR).

WCL at NPR convention next week. *******

Sedge and staff will be attending the National Public Radio convention next week. They won't be leaving for Texas until after the show on April 9th.

The upcoming schedule: **********

Our producers work overtime booking talent onto the show. Sometimes they're so busy on the phone, they don't have time to keep the rest of us up to date. So join our audience at a live show. You too may be pleasantly surprised.

April 2nd: **********

Bela Fleck and the Flecktones, Banjo jazz.

Charence Major, author, "From Juba to Jive: A Dictionary of African-American Slang".

Cynthia Heimel, author, "Get Your Tongue out of my Mouth, I'm Kissing You Good-bye".

Anne Lamott, author-in-residence.

Keith Terry and Crosspulse, body percussion.

April 9th: **********

Gamelan Sekar Jaya, Balinese (not Marty) orchestral music.

Author, Adam Hochschild, "The Unquiet Ghost".

Claire Peaslee, naturalist.

Travel tips from Karl and Carl.

April 16h: **********

Kongar ool-Ondar, Tuvan throat singer.

John Hammond, bluesman.

Meredith Tromble, artist-in-residence.

Pulp Playhouse, Improv theater.

April 23rd: **********

Naked Barbie Dolls, really hip musical group.

Anne Lamott, author "Operating Instructions".

April 30th: **********

Kronos Quartet, world renowned contemporary string quartet.

Weslia Whitfield and Mike Greensill, world renowned cabaret extraordinaires.

David Tanenbaum, singer/songwriter.

Special Offers: **********

Drawing for Free Tickets!: *****

This week marks our 13th West Coast Live show. Be the 13th person to email (see rules, below) the moderator at;

Owner-West_Coast_Live@netcom.com

and you will win two (2) free tickets to this week's live show.

Rules: **********

The contest begins as soon as the moderator sends this notice to the West Coast Live email subscription list.

The winner will be selected based on the time the entry was sent (as opposed to the time the entry was received), no sooner than 1 hour after the moderator receives the minimum number of entries, and no later than 48 hours prior to the live show.

The email must be addressed to;

Owner-West_Coast_Live@netcom.com

The email's header subject must contain the phrase; "Win Ticket Drawing".

One entry per person.

The winner will be notified by email.

If the winner can't attend this week's show, the winner may assign the tickets to a couple of friends.

The moderator's (email filter's) selection is final.

Free Coffee: **********

Wear an official West Coast Live shirt at the show, and you are entitled to free coffee.

Rules: **********

Official West Coast Live T-shirts or sweat shirts only.

For a limited time, this offer is extended to shirts from that old radio show, that are upgraded with an official West Coast Live Shirt Upgrade Kit.

This offer is good for free coffee only from the West Coast Live java bar. If anyone else offers you free coffee for wearing a West Coast Live shirt, let us know.

T-shirt Drawing: **********

On the last live show of each month, we give away an official West Coast Live T-shirt.

Rules: **********

To enter this drawing, you must drop a business card into our fish bowl. Any scrap of paper with your name, address, and phone number may be substituted for a business card.

One entry per person. You must be present to enter.

The drawing is held following the last live show of each
month. You need not be present to win.

Tip of the Week: **********

Spring those clocks forward: ***

It's that time of year again, so remember to set your clocks
forward an hour (at 2:00 am Sunday morning).

Downloading Additional Information: ****

You may download an information document giving background
information on the show and the show's Internet service, by
sending the following email message to;

1099. RadioWatcher Southern Ontario Tidbits...

Newsgroup: rec.radio.broadcasting
Date: 1994-04-01 03:40:30 UTC
From: lhpalter@nexus.yorku.ca
Message-ID: <2ng53e$5vf@vixen.cso.uiuc.edu>
Source record: 40554

It was reported today, March 30th/94...that prominent Hamilton broadcaster Jason Roberts (CKLH-FM 102.9/AC/K-Lite FM Hamilton, Ontario) was arrested yesterday at his home in Puslinch, Ontario (near Hamilton) and charged with sexual assault (three counts) and charged with possession of an unregistered handgun. Roberts, 49, whose real name is Robert Baldwin, was arrested following complaints by three Hamilton area women, who allege that they were sexually assaulted when they were 12-14 years old, a period extending from 1975 to 1984. Roberts is the morning drive personality at K-Lite FM in Hamilton. He was released on his own recognizance after a promise to appear in court. Roberts was also an announcer for CKOC-AM (now Oldies 1150) Hamilton and CFRB-AM 1010 in Toronto. (Note: Roberts was not on the air this morning - March 30th) and probably won't be heard until the matter is resolved. Will keep posted.

(With apologies in advance to Carl K. Gorney! :))

1100. Radio Watchers -- KC (Country Music)

Newsgroup: rec.radio.broadcasting
Date: 1994-04-01 03:40:31 UTC
From: Mark Roberts <transvox@tyrell.net>
Message-ID: <2ng53f$5vh@vixen.cso.uiuc.edu>
Source record: 40555

A Kansas City Star article today (Mar. 31) revealed some insights about the relative performance of some of Kansas City's country music stations.

The article was specifically about the decision by RADIO AND RECORDS to choose KBEQ and KFKF as the two Kansas City stations that report playlists to the weekly publication. KFKF was previously a reporting station, as was WDAF.

Reporting stations often get first releases of new recordings, interviews with musicians, and other perks.

The Star quoted KBEQ GM Kathy Stinehour as saying, "we just qualified for reporting relatively quickly. R&R only wants two reporting stations out of Kansas City. Of course, WDAF has been in there since the earth cooled, so it's a big deal for them."

KBEQ (104.3) switched from 20 years in CHR and Top 40 to "young country" 13 months ago. The station's 12+ ratings have nearly doubled since.

WDAF (610, stereo) has long been the market's leader, with a full-service-oriented format.

KFKF (94.1) is neck and neck with WDAF for the number-one spot in the Kansas City market.

Not mentioned is KKCJ (106.5), in an LMA with KFKF, which runs a "hot country" format that performs poorly in the ratings and does not get much promotion. It serves little purpose other than to be a spoiler against KBEQ and to serve as a dumping ground for network spots.

The article had these specific tidbits of info:

* KBEQ is #1 in the 18-34 demo (I am assuming Winter 1994, even though the book isn't out publicly yet).
* KFKF is #2 in 25-54, KBEQ is #6, and WDAF is #9. All rankings according to R&R.
* WDAF is now targeting the 35-54 demo, according to program director Ted Cramer.
* KFKF's research indicates that country listeners tune to KFKF first, then KBEQ. According to KFKF program director Don Crawley, country listeners use WDAF for purposes other than listening to music, i.e., news, service, and personalities.

With its solid, credible news image and Royals baseball (despite a play-by-play team that makes it seem more exciting to watch paint dry), WDAF will still be a force to contend with, but the focus of the industry's attention now seems to be on the impending face-off in the Spring book between KFKF and KBEQ.

I'm sure both stations have drawn their pickup trucks in a circle for the ongoing battle, while Charles Gray's WDAF news cruiser watches the firefight over the horizon....

From: jss@nrc.gov
Message-ID: <2ng53n$5vn@vixen.cso.uiuc.edu>
Source record: 40558

Following is a letter I wrote to the person who wrote the Imus defense in the latest issue of Airwaves:

Congratulations on your eloquent defense of Imus. I agree with what you wrote. I have been an Imus fan for over 20 years (with a 6-8 year break after I left New York until he went into syndication; I was always a fan, just not an active listener). In fact I am listening right now (WTEM in D.C.). I even record his show at home every day (and listen later) to be sure that I don't miss a word. I was a dedicated NPR listener until the Imus syndication started. Although I don't get the magazine format that NPR carries, I believe that I still get a very thorough treatment of the national news, many different opinions of national newmakers (admittedly some that I disagree with), and the best entertainment available on radio (maybe elsewhere too).

As for the radiothon, his approach to fund-raising should be a lesson to others. I rarely give to these causes, but I called his 800 number by 7:00 AM on Monday to give my donation.

Again, thanks for your defense of Imus. It was terrific.

Jack Schnapper

1104. LA radio, USA Mirror

Newsgroup: rec.radio.broadcasting
Date: 1994-04-01 03:40:40 UTC
From: pawars@cgsvax.claremont.edu
Message-ID: <2ng53o$5vp@vixen.cso.uiuc.edu>
Source record: 40559

Living in Los Angeles, I am constantly amazed at some of the radio formats that are sucessful. But it has given me an idea.

Based on the formats of a couple of stations that will remain call-letter-less, that I mentally refer as "secretary" stations, I think a further refinement is in order.

These staions literally play the exact same song several times per week at about the exact same time during the day... and it is really obvious because the songs are not normally played at all. For example, tunes like "Charlie Brown", from the 1950's. They stick out like a sore thumb when played at the same time each day. The stations do not even attempt to try to hide how crass they are and they only get away with it because the radios that are tuned to their station are not even listened to... maaybe people hear them, but for the most part no one is listening... which is OK, unless you are an advertiser.

Hasn't the PD's ever heard of a randomizer program for databases?

Combine this style format with big-name personalities which, some time ago, really loved their job... why even bother with them? Nowadays they are only allowed to say three or four lines anyway... when their talent completely lies in their ability to relate to the audience (save your money, SM's).

To me, these warhorses are pitiful because they are caged lions. My God, if all the stations desire is a pleasent voice, I swear, a pleasent voice can be found on every square block of every residential neighborhood. It's like building an engine for a top fuel drag racer, then forcing the motor to run on only two pistons. May as well race with a stock Pinto.

Brian

[Moderator's Note: Bravo! Glad someone else is sick of this too. In Chicago, WJMK (oldies) has some of the best of 60's air talent, but does not allow them any room to work. Pity. Bill]

1105. Re: Sugg. for getting local bands played on radio?

```

Perhaps the place to start is with the local college stations (if there are any.) There are some non-commercial "alternative" stations that will play just about anything once or twice. And then, who knows? It might just take off.

Another method would be to figure out which of the local stations would be most likely to play your music. Send them a copy of your music, and then start calling them to "check on the status" of your stuff. It's much like applying for a job, but I have seen it work (from the radio side of things... and yes, the music director does hate it when people do this, but it often works... just be polite and helpful.)

Hope this helps,
-Rob

1106. LOCAL BANDS

Newsgroup: rec.radio.broadcasting

N> station about this? From a program directors view, why would he/she
N> be interested in playing local bands??

I remember KTYD Santa Barbara (99.9) at one time had a "local band hour";
they might still have it.

What type of music are we talking about? AOR and modern rock stations, as
opposed to other formats, might be more receptive to local bands.
(Possible reason: most CHR, AC, etc. songs have rather high production
values, and the rough "garage band" sound of a local band might be
obtrusive to them.) But, anything is possible.

As far as approaching stations, I know of no magical way, just contact the
station and ask. They might ignore you, or maybe they just might consider
it.

Um...how can this be? Isn't 1370 still in a box? Also, I thought it was going to come back as KBAY (AM). Am I wrong about this? The Mardikian estate felt that the old KEEN transmitter site was worth more as a development than as a station and it's taken them over a year to locate and design a new site. I just tuned in to 1370 and it's still off. A phone call just moments ago indicated that it's not finished yet. Am I wrong here?

N> their : staff. Rumor has it that he is now working in the Miami,
N> Florida area. : You have my sympathies.

Phil Hendrie was on KLSX and KFI in Los Angeles, around 1988-89 or so. I never heard his show on KLSX, but most of his program on KFI consisted of him whining about how badly KLSX treated him, supposedly. I have a tape of part of that program lying around somewhere. In it, he likened himself to Robin Williams' character in "Good Morning Vietnam", and carped about how he was "oppressed" by authority figures or some such stuff.

I'd like to know, how was he "unethical"?

At least Tom Leykis was intermittently fun, at least initially.

1109. Looking For Talk America Radio Network

Newsgroup: rec.radio.broadcasting
Date: 1994-04-01 03:40:51 UTC
From: cjo1114@venus.tamu.edu
Message-ID: <2ng543$626@vixen.cso.uiuc.edu>
Source record: 40564

Can anybody give me a listing of affiliates for the Talk America Radio Network? They carry Sports Final talk shows overnight and I love to play Sports Final Trivia. I know that they're based somewhere on the east coast (probably Mass). I'm a student down at Texas A&M. I know that they have a weekend affiliate on WOAI, 1200 AM in San Antonio, but they only broadcast the trivia show on Sunday nights/Monday mornings since they sign off late Saturday nights/early Sunday mornings. Also, I was wondering if there are any affiliates near the Cleveland area since I live there during school breaks. They used to have an affialiate on CKLW, 800 AM in Windsor, Ontario, Canada, but CKLW dropped Talk America/Sports Final last fall, and I am forced to zero in on WOAI from Cleveland on Sunday nights.

Help would greatly be appreciated!

After reading the many articles in airwaves on WOWO, I have to respond. Why is it that when a Black company attempts to buy broadcast stations in any area of this country some people take a stand that can only remind me of the 50's. Look, if there were so much concern for this station, if would not be on the block today.... And what if Inner City is black and decides to program WOWO the way they see fit. Do you think your sister will marry one? GROW UP!!!! You let WLAC, WWKB, and many other Heritage stations slip buy without a protest, but let a Black try and it's time to bring out the pointed hoods!!! Inner City is headed by big pockets that WILL purchase WOWO., Like it or not. So enough with your pissing about WOWO. Get a grip. In the next century we'll be the minority so learn to live with all people. We'll be a better place for it!!!

1112. Radio Watch-Buffalo/Toronto(4/1/94)

Newsgroup: rec.radio.broadcasting
Date: 1994-04-03 04:40:00 UTC
From: ag365@freenet.buffalo.edu
Message-ID: <2nlhb0$3j5@vixen.cso.uiuc.edu>
Source record: 40567

First,if you sent me any mail from last Friday(3/25)to this Tuesday(3/29),I may not have received it due to the fact that I had to dump nearly half my e-mail-so if you e'd me something,please re-send it. On to business...

*WYSL(1030 AM)in Avon,near Batavia & Rochester,has filed a CP with the FCC,asking to:1.move to 1040 AM,2.increase its day power to 2.5 kW,3.add 500 W of night power,and 4.make changes in its antenna pattern. 'YSL is owned by Radio Livingston and headed up by Bob Savage,who worked in the area some time ago. It has a news/talk format,using personalities from Major Talk(Alan Colmes & Barry Farber),WOR(the Dolans),as well as news from CNN & ABC Info.,along with weather from WOKR-TV(ch.13,Rochester;ABC affil.). Even though it runs at 1 kW,I can still pick it up in my car.

*Heidi Kramer is leaving her post as marketing/promotions ace for Rich Communications(which runs WGR-AM/WGRF-FM(550/96.9)and has filed for ownership of WWWS-AM/WUFX-FM(1400/103.3))for a promotions gig with Omni America,which owns stations in Cleveland(I don't know which ones-help!). She had just recently added duties as WKBW-TV's (ch.7;ABC affil.)entertainment reporter.

*WHLD(1270 AM;5 kW-D,147 W-N;DA-2,6-tower array on Grand Island-where it's based,though licensed to Niagara Falls)will add more talk on the weekends. Wayne Mack,who has shows with Buffalo mayor Anthony Masiello and ex-mayor Jim Griffin(on the 2nd and last Sunday of the month,respectively)has added Erie County Executive Dennis Gorski and Buffalo Common Council Majority Leader Jim Pitts to the mix. Dennis' show starts April 17,while Pitts' go-round begins May 15. (BTW,'HLD has a big band/ethnic/religious format.)

*There are now officially two duopolies in the Queen City. Keymarket Communications' purchase of WWKB-AM(talk/sports,The Big 1520)and WKSE-FM(dance-based CHR;Kiss 98.5)became official on Feb.22,when the FCC OK'ed it. The other is WHTT-AM/FM(oldies;Oldies 104-AM is daytime only and also has sports talk 5 hr/wk.,and polka 6 hr./wk. And,a third may be in the offing,as I noted in the Heidi Kramer story.

*A tip of the hat to Tom Rivers,morning man at CJEZ-FM(classic hits/Leafs/Jays(if the Leafs are on The Fan 1430);Z 97.3). He helped raise $5,000-nearly 1/4th the total-for the Starlight Foundation of Canada when they ran their Jail 'n Bail promo yesterday.(You know-you get taken in on fake charges and raise bail-pledges-to get out.)

*Staying in Canada for a bit,CJXY-FM(95.3 FM;100 kW;classic rock; Classic Rock Y95)and CFNY-FM(102.1,modern rock,The Leading Edge)are

once again running band searches. Y95's is known as Future Classics while CFNY's is the New Music Search. 'FNY's is the older of the two. Last year,Y95 had six finalists gun for the prize(including cash, studio time,and a video-among other things;I have the info-but not with me),releasing a disk and cross-promoting their concert appeaarance on CHCH-TV(ch.11,indep.). At least these stations care about finding new talent-which is more than I can EVER say about 97 Slop-uh,Rock.

-Note to Tom Schuh:Thanks for the compliment,but I won't work for them-because Alternative Press(my other outlet)really nailed the News in the most recent issue. Besides,here you can't wipe stuff out. :)

More stuff later...

Message-ID: <2nlhb1$3jg@vixen.cso.uiuc.edu>
Source record: 40568

Please note that I normally would not run such flame-bait as this person's article, except that it seems important to me to dispell the misnomer that my opposition (and the opposition of Scott Fybush, who will no-doubt reply too) is based in any way on race.

} dbraze@aol.com wrote:
}
} Why is it that when a Black company attempts to buy
} broadcast stations in any area of this country some people take
} a stand that can only remind me of the 50's.

Why is it that when someone opposes a transaction like this which *happens* to involve a Black owned company, that it is presumed to be motivated by racism? Frankly I could not care less what color the skin is of anyone. Also I have no qualms with Inner City aquiring this signal... provided they are doing so in order to operate it to its best possible extent, and not to try to silence it or cripple its signal to facilitate the operation of a more profitable signal in New York, where Inner City has been trying to get nighttime signal for years.

} Look, if there were
} so much concern for this station, if would not be on the block today....

Perhaps the concern is more on the part of the listeners than the owners (which is the case in all too many stations).

} And what if Inner City is black and decides to program
} WOWO the way they see fit. Do you think your sister will marry
} one?

No, My sister would never marry a radio station.

} GROW UP!!!!

No, I believe that is *you* who should grow up. Nobody is saying anything about the racial makeup of the buyers except you. I would not feel any different if it were the Grand Ole Opry which was in the shoes of Inner City. Besides, you have no idea what race the critics belong to, do you?

} You let WLAC, WWKB, and many other Heritage
} stations slip buy without a protest, but let a Black try and it's
} time to bring out the pointed hoods!!!

I didnt let any Heritage stations 'go', my friend. I have been hollering for years about the seeming lack of concern over our radio

heritage. So, please, before you go pointing your reactionary finger at me, get your facts straight.

} Inner City is headed by big
} pockets that WILL purchase WOWO., Like it or not.

As I said, not that it matters to you, I dont care WHO owns WOWO, provided that they do so for the good of THAT signal, and not to destroy or cripple a valued, LOCALLY PRODUCED Heritage signal for the monitary gain of another operation, half way accross the continent.

} So enough with
} your pissing about WOWO. Get a grip. In the next century we'll be
} the minority so learn to live with all people. We'll be a better
} place for it!!!

Please don't include *me* in that *we* stuff. You and I share nothing in common, based upon your short-sighted and reactionary post. Had you bothered to actually *read* what was written here, instead of *assuming* that it was some neo-fascist plot to undermine African American business, you may have come to a different conclusion.

In fact MY letter to the FCC says nothing against the sale of WOWO, but urges the Commission to permit the sale ONLY if it is not connected to any plans to alter WOWO's signal in an effort to get a waiver for the New York operation.

Bill

1114. Re: WOWO Campaign Racist!

Newsgroup: rec.radio.broadcasting
Date: 1994-04-03 04:40:02 UTC
From: fybush@world.std.com
Message-ID: <2nlhb2$3jl@vixen.cso.uiuc.edu>
Source record: 40569

There's no racism involved here. Nowhere in any of my posts have
I made any reference to the race of Inner City's owners. And, frankly,
I am not concerned that Inner City's owners would take WOWO to
an urban format. They're shrewd businesspeople, and they know
as well as I do that an urban format doesn't have the potential
listenership to make it in Fort Wayne.

This is, more than anything else, about engineering. I'd feel the same
way about this deal whether it were CBS, Cap Cities, Infinity,
Clear Channel, or even my employer trying to pull it off: It stinks!
It has nothing to do with who owns WLIB, or with what WLIB programs.
It's simply the fact that the owners of a secondary service on a
clear channel, _whatever color those owners may be_, have the gall
to try to buy out the primary service on that channel. And, whatever
color they may be, WLIB's owners have compounded the problem
by lying in the press. That's poor character for a potential
licensee...be they black, white, yellow, or green.

As for WWKB and WLAC, admittedly the stations aren't what they once
were in terms of programming...but the blowtorch 50kw signals
are still there, ready to be reinvigorated at the hands of
a capable programmer. That won't be possible with WOWO if
their signal is eviscerated by Inner City.

In short, I'd be happy to welcome Inner City to Fort Wayne _if_
I believed they intended to use WOWO to serve the public interest,
convenience, and necessity of northeast Indiana. All evidence
has shown otherwise: It's clear to me at least that Inner City's
intent is to to use their ownership of WOWO to serve the
public interest, convenience, and necessity of WLIB New York.
THAT'S wrong -- no matter what color the new owners are.

Spare me the racism red herring. I've seen no concrete evidence
that it's playing any role here.

-=Scott Fybush - fybush@world.std.com - Happy Birthday WOWO 3/31/25=-

1115. W O W O Sale--the local poop

Newsgroup: rec.radio.broadcasting
Date: 1994-04-03 04:40:03 UTC
From: alo2@po.CWRU.Edu
Message-ID: <2nlhb3$3jp@vixen.cso.uiuc.edu>
Source record: 40570

Okay, kids. All this speculation from outside the Fort Wayne market has left me me more than a little amused, somewhat torqued, and really, really angry after that "racist" spin on the sale. Here it is, from the market iteslf.

WOWO employees have a huge gag over their mouths. I have talked with no fewer then three WOWO employees aboput this sale, and they are as upset about it as the rest of the broadcast fraternity. They have also all informed me that, upon opening their mouths in public, that they run the almost guaranteed risk of unemployment immediately, if not from Price, then from Inner City.

I know from which I speak: I'm the morning guy from WOWO's only News-Talk competitor, WGL. I have become the local sounding board for this plan.

At the risk of my own job, I tell you this: Any action that would reduce WOWO's power is unthinkable, reprehensible, and must be stopped at any cost. Obviously, my employer would love for their influence to be lessened, but I feel that the moral imperative is to keep this fixture of AM intact.

One argument is the fundamental property rights; rights that are being put up for slaughter for 2.3 million dollars. I assert that after broadcasting since the 20's, and being the only ambassador that Fort Wayne has (the hockey and basketball teams sure aren't doing it this year) and that WOWO belongs to the people of the city as much as it dows to price, its successors, and assigns.

The information about Inner City is indeed troubling. With respect to the author of the "WOWO sale racist" post, much to your chagrin, sir, this has nothing to do with race, and there are some broadcasters who won't tuck their tails and run with fear from any topic as soon as the word "racist" is brought into play. This is a frequent tactic used by the militant side of that argument to get their way. After all, NO ONE wants to be called a racist. You'll have to come up with MUCH stronger putdowns than that to silence this reporter. Speak only of what you know. Ignorace does not become you.

That having been said, WLIB has a track record of letting people on the air who only spew WHITE HATE. Louis Farrakhan, Al Sharpton and their ilk who seek to incite minorities into hatred and violence, if at all possible, to achieve their end. Such tactics are not welcome in the Summit City, and those who would allow this to happen are not welcome either. Be assured: The primary responsibility of ANY licensee is to serve the city of license. Fort Wayne, whose nickname is "City of Churches" has no use for the Farrakhans and Sharptons of the world, and its radio treasure should be shielded from such audio vomit.

That;s not to say that Inner City broadcasting would not be welcomed into the market as caretakers of the city's clear-channel legacy. Their only

worry is Fort Wayne as a community, which has proven itself time and time again to be a group that takes care of its own and is fiercely defensive of what it owns. ("The city that saved itself", pulitzer-prize winning series, Fort Wayne News-Sentinel, early 80's.)

Price's sale to Inner City is also suspect, in my opinion. They have had MANY sale offers, and have refused all. Now here comes inner-city, with an offer lower than most (I was loosely involved with a group ready to pay $4 million) and it is a done deal. One possible reason: Tax break for Price for selling to a minority-owned company. Remember, this is no small deal for Price. WOWO is part of their significant assets, and a major tool in their recent finfncial problems.

Technically, the latest locally is that WOWO would throttle back to 10,000 watts at night, and allow WLIB Low-power (1 kW or so) operation over their area. This, admittedly, would not affect the metro one bit, but this is tantamount to putting a Briggs and Stratton lawn mower engine in the space shuttle.

It ought to bother everyone with more than a perfunctory interest in radio that someone, ANYONE can waltz into a market, plunk down a ton 'o' money, and strip a city of an asset like WOWO. No, sir, race matters not. Any bunch 'o' honkies seeking to do the same would be equally wrong.

A agree with the moderator's comments. Please make your voice known to M street. Even our mayor, Paul Helmke, has been quoted as being quite concerned.

Imagine is someone bought WLS from Cap Cities and wanted to hold it down to 10kW night so that KCOW in Dismal Seepage, Iowa could continue its "music to graze by" program. Kinda sucks now, huh?

This issue is NOT about race, but about the removal from the air of a station that has a heritage in7 the early years of radio.

I am a strong proponent of Black-owned broadcast properties, but not in this instance, considering Inner City's indicated intent of snatching WOWO off of the air entirely. Most of the people have pointed out that if reaching NYC at night were an issue, then Inner City does own an FM signal that could be programmed appropriately -- additionally, several other NYC area properties are available to be purchased.

I wouldn't even be upset if Inner City planned to program WOWO toward urban areas in the eastern part of the country at night, as there WOULD be a potential audience among the minorities in the inner cities. But to buy a station that serves, and could continue to serve varying audiences across the eastern third of the United States and Canada, and summarily yank it off of the air is nothing short of reprehensible -- no matter what the race or political inclination of the purchaser.

And to answer your question, I am a black talk-show host and computer consultant in Gary, IN, and while I don't listen to WOWO regularly, I have done so in the past for Indiana state sports, and intend to do so again.

Not necessarily. Lack of ratings success is not the only reason a company will choose to sell a station.

>And what if Inner City is black and decides to program
>WOWO the way they see fit.

No problems there... except they may have difficulty finding an audience in Fort Wayne. :-) Then again, WOWO is a very powerful station, and they could conceivably reach a viable audience consisting of cities like Chicago, Detroit, and Toledo.

But this is a moot point. The reason many of us on this group are complaining about Inner City is not because of their programming, but because we speculate that they will take the license of a landmark station (one of the best in the country, IMHO) and turn it in as soon as they can get permission to increase the power on WLIS. That means no more WOWO- black, white, or otherwise.

>Inner City is headed by big

I understand your frustration, and would have no problems with WOWO's sale myself as long as Inner City can continue to produce the quality programming that is WOWO's legacy (again, my opinion). WOWO serves Ft. Wayne better than most stations serve their cities; and if Inner City decides to ruin this by turning in WOWO's license, I think protest is definitely in order.

> DBraze@aol.com

Mr. moderator, I ask your indulgence. I am including the entire post by "DBraze" because it is such a shining example of intolerant and out-of-control PC that it deserves additional circulation as an example of the genre.

I write as one who did not participate in the earlier discussion of the WOWO sale. That said, I realize that, upon reading what follows, I will be branded by Mr. DBraze as a racist so imbued by that maladay that I don't even know that I'm a racist. That's how these people work. You can be sure that I don't give a damn.

Now to the sale. The essence of the previous postings, it seems to me, is that the writers feel that it would be a shame if the buyers of WOWO, in order to to improve the coverage of the New York City facility, applied to the FCC to relax the separartion rules in the case of WLIB and WOWO so that WLIB could improve its coverage. The hope of the owners would be that the FCC would note that both are owned by the same party and would take a "If they don't care, we don't care" approach and grant the application. Other scenerios might involve the owners filing for a WOWO directional pattern that would reduce radiation in the direction of New York City thus paving the way for a WLIB application to increase it's radiation to the west. A third scenerio might be for the owners to turn in the license of WOWO and shut it down, thus allowing WLIB to etc., etc.

Believe me, there are a lot of people, myself included, who grew up listening to and still listen to clear (mostly) channel stations like WOWO, WABC, WHO, WWL, and so on and on. We feel that clear channel stations still

provide a valuable service. Period. The previous posters noted that the new WOWO owners are members of the African-American community who want to improve their New York facility to better serve the black community in New York. It was suggested that there might be other and better ways for them to achieve this worthy goal other than by impairing the coverage of WOWO. Period. That is all that was said or implied. Nowhere was there a hint from any poster that if WLIB were owned by, say, CBS and wished to do the same thing (impair WOWO to improve WLIB) that poster would be less concerned. To suggest otherwise is I think, a gross slander flowing from seriously misguided sensitivity. Further, IMHO, DB owes a lot of people an apology. Don't hold your breath.

After reading Mr. DB's post, my first reaction was to simply ignore this sort of thing. That's generally a good way to treat stuff like this. But, sir, you caught me on a feisty day--one on which I switched to my "this sort of garbage needs to be stomped on hard and right now" mode.

So now, I'm sure that Mr. DB has added one more name to his list of radio racists. We must racists. It's simple. We disagree with him.

Now, before casting more aspersions, I suggest that you go back and read this post again. Slowly. One more time. I said slowly. In the world of words, comprehension is everything.

Thank you for your time.

In article <2ng54a$641@vixen.cso.uiuc.edu>, dbraze@aol.com says:
>
>After reading the many articles in airwaves on WOWO, I have to
>respond. Why is it that when a Black company attempts to buy
>broadcast stations in any area of this country some people take
>a stand that can only remind me of the 50's.

I think what you are mistaking for racism is an attempt to save
a classic station with a great heritage. WOWO has been the 50,000
watt voice coming from Fort Wayne for a long time. Up and down the
east coast, you could always find your "long distance friends" by
tuning to WLS, WABC, WKBW, WNBC, and last, but not least, WOWO. As
a child growing up in Washington DC in the mid 70's, you would regularly
find me recording and listening to these and other stations. The
personalities were better. You could tell that they were having fun
on the air. Ron Gregory was my nighttime favorite every monday night.
While my friends were listening to WPGC in Washington for there favorite
song, I was listening to WOWO and the Ron and the Hollywierd Report on
a pocket transister radio. In the morning, I would listen to Harv Moore
on WPGC for the school lunch menu and weather, then switch to WKBW and
have Danny Neaverth "move my fanny" off to school. Fun on the Radio!

Now come up to 1994. WOWO is sold. Not just to any broadcaster, but
one who could potentially mess up the 1190 frequency forever. I don't
care if they are white, black, purple or red. In this particular case,
the big debate has not been that a black owned company bought it, its
just that this black company also owns a station on 1190, which MUST
sign off at night to clear the way for WOWO. Do I personally want to see
WOWO change formats? Not really, but format changes are sometimes for the
better. "Please just don't make it another satellite talk station"

What I don't want to see is WLIB apply to the FCC to make WOWO change
frequency or change power so that WLIB gets nighttime authorization.
With the FCC about to open the 1600 band and allow stations like WLIB
to move into a true clear area and not have to fight signals with WHAM
and whatever's on 1200 throughout the country, I would rather do that
then go through all the hassle.

As for a suggestion that someone last week mentioned about syncronizing
the two and simialcasting, fine, go ahead. Just please leave WOWO's
TX facility as it is!

>Look, if there were
>so much concern for this station, if would not be on the block

WOWO, WWKB and the other Price Stations were up because old man Price
stopped running the Corporation years ago and whomever is running it now
ran it into the Chapter 11 status that it's in. I would be saying
the same thing if I owned another 1520 and had just bought KB.
Format Change for KB, you bet! Put the music back, hire some FUN, not
insulting jocks. Facility change, NEVER!

> And what if Inner City is black and decides to program
>WOWO the way they see fit. Do you think your sister will marry
>one? GROW UP!!!! You let WLAC, WWKB, and many other Heritage
>stations slip buy without a protest, but let a Black try and it's
>time to bring out the pointed hoods!!! Inner City is headed by big
>pockets that WILL purchase WOWO., Like it or not. So enough with
>your pissing about WOWO. Get a grip. In the next century we'll be
>the minority so learn to live with all people. We'll be a better
>place for it!!!

Want to talk about racist remarks.....This truly is.

I don't care who buys it. If they want to program 24hours of Martian-
Polka music, they can. Just leave the Transmitter alone.

Rob

This is nonsense.

What people are concerned about is not black ownership of WOWO, but the fact that *THIS* purchaser of WOWO *MAY* be more concerned with shutting it down or crippling WOWO's signal -- in spite of the fact that WOWO is a dominant station in its market, and reaches and serves large numbers of people outside of its market with its clear channel signal. The speculation is that the owners want to do this to enable their AM station in New York on the same frequency to be on the air after local sunset.

This is in spite of the fact that (1) there are already innumerable AM stations on the air at night in New York, (2) the owners already have a very popular, full power FM station that is on the air 24 hours a day, and (3) current FCC rules would have allowed them to purchase another full-time AM or FM station in New York to gain full-time status -- even as they kept both of their other New York stations -- and others here have reported that at least one such station (and possibly two) have been available.

When I lived in New York, announcers on WLIB said over the air that their station wanted to find some way of staying on the air at night, which may be the reason for the speculation that WOWO may be brought down.

There is at least one other case of a New York station buying out an interfering stations being purchased and either reducing its power dramatically or shutting it down entirely -- one such case involved a New York station and a Long Island AM station on an adjacent channel. Perhaps the reason this case did not cause such controversy (at least controversy of which *I* am aware) is that the Long Island station did not have substantial ratings (unlike WOWO) and the area it served was already adequately served by many other stations.

WOWO was allocated 50,000 watts on a clear channel for a reason; shutting it down or crippling it does little to serve the public convenience or necessity. How would you feel if your favorite station were purchased by

someone six hundred miles away for the purpose of shutting it down?

WLIB has several other options available to it to provide nighttime service to its listeners, including the use of its own FM station if it believes such service is critical and immediate, as well as the purchase of another AM or FM signal in its local service area (which, as I said, would still allow it to continue to own and operate the other two stations). They could also lease time on another station, just as a station with a low-power AM nighttime signal does in Atlanta. And if it wanted to purchase WOWO to run it, that's fine. (I understand that some time ago, channel 7, the CBS affiliate in Boston was purchased and run by a black-owned group, and, as far as I know, nobody complained about that.)

But the practice of purchasing a live, healthy radio station with many listeners -- not only local but in many parts of the country -- primarily to sacrifice it to the benefit of some other locality far away that is adequately served by a strong, full-time signal already owned by the purchaser, invites and demands complaints -- not just from listeners of WOWO, but also from listeners of other AM stations on 1190 and adjacent channels that may also be affected. If WLIB actually intends to change WOWO's signal solely to the benefit of WLIB, they deserve whatever complaints or ill-will they get as a result, regardless of their color of their owners.

1121. Radio Watchers -- Kansas City

Newsgroup: rec.radio.broadcasting

Source record: 40576

My friend Gary called me up at 7:30 Friday morning, waking me up. "Turn on your radio! KPRS is taking over another station!" he clamored.

My brain does not have the same kind of response that solid-state equipment does, so I kind of mumbled around for a few minutes and speculated on what it could be.

We both noted that KISF ("Kiss 107.3") had been more R&B-oriented over the past few weeks and, two days ago, its irritating nighttime DJ, Boomer, had apparently left. So maybe that was one takeover possibility.

Anyway, Gary had to go to Springfield and I had to wake up, so I listened. KPRS (103.3) kept going on and on about how "we're taking over another station."

Then I realized what was up, but tuned back in between 10 and 10.30 to make sure.

Indeed, KPRS had taken over another station. You probably guessed it, too, by now. It was a gasoline station at 40th & Broadway where free fuel was being given away for the next half hour or so.

*** *** *** *** *** *** ***

An article in Friday's Kansas City Star confirmed what AIRWAVES first reported earlier this week: the format adjustment of KMXV (Mix 93.3) from AC to hot AC/borderline CHR.

Judging by remarks made by KMXV GM Fred Murr and PD Tom Land, the station also plans to add crossover modern-rock tunes to the playlist. Land told the Star, "It's more of an evolution" than a format change, including "underexposed" music by alternative bands such as the Spin Doctors and the Cranberries. (That's the Star's judgment of underexposure; doubtless these people haven't heard of the Shamen, Eskimos & Egypt, Orbital, System Seven, the Underworld, ad infinitum.)

Just to reassure everyone that nothing *too* challenging would get played, Murr said, "Nirvana or Pearl Jam--that won't happen."

Wonder if Mr. Murr was listening at 2.05 Saturday afternoon when Mix 93.3 was cranking out "Relax" by Frankie Goes to Hollywood. (The cover of the import CD-5 reissue of this has enough phallic symbolism to cause Freud to rise from the grave.)

Withal, the Kansas City Radio Watcher's Humble Opinion is that it's an OK format, and is an improvement over what was there before. Could be a lot better, though.

*** *** *** *** *** *** ***

Some mail from a listener -- er, reader -- has caused me to do some research regarding the transmitter site of KCNW (1380).

The transmitter site is indeed at Metropolitan Avenue and I-635 in Kansas City, Kansas. You can see it from the freeway. Just one quarter-wave tower.

The reader in question pointed out that the old KUDL transmitter site was at I-35 and 63rd Street (now Shawnee Mission Parkway) in Shawnee, Kansas. I remember that four-tower array myself, now that I think about it. I know they were there in 1980 and 1981, when I was making frequent visits to that vicinity.

I did a little research, and here's what I think happened.

The 1970 World Radio Television Handbook, for once in its existence, had a fairly complete list of US medium-wave stations. KUDL is listed in there as having 5 kW days, 500 W nights, DA-2. This was when KWK, also at 1380, in St. Louis, had 5 kW fulltime, DA nights only.

KWK left the air in 1973; when it returned in 1979, it had 5 kW days, 1 kW nights, DA-2 (and separate sites day and night). It lost some protection rights during that time. Probably by that time it would have been possible for KCNW (which KUDL had become by then) to have gone nondirectional during the daytime at least.

By 1990, the WRTH listed KCNW with 5 kW days, 1 kW nights, DA-2. Likewise in the 1991, 1992, and 1993 editions.

In the 1994 edition, the station is not listed. It did not appear to meet the WRTH's restrictive requirements for inclusion.

The 1994 M Street lists KCNW with 5 kW days, 30 W nights, no DA, and that is in fact what it has. Sometime in the past couple of years, the station went nondirectional in exchange for going to what amounts to daytime-only status.

Why? I have no particular knowledge of the situation, but I can speculate on two possibilities.

One: Directional antennas are a headache to maintain. KCNW is a contemporary Christian station that rarely shows up in the Arbitrons. The expense of maintenance probably became increasingly difficult to support.

Two: Land. The interchange of Shawnee Mission Parkway and I-35 is one of the hottest growth spots in Johnson County, Kansas. No doubt the land for that DA was quite valuable, and, upon selling it, the station made a nice profit.

*** *** *** *** *** *** ***

Other than the KMXV format shift and the earlier change of KBEQ(AM) from country simulcasting to satellite talk, there have been no significant format changes in the Kansas City market for the spring book.

Underrepresented or missing formats remain:

** Kids' radio.

** Modern rock (available on a spotty signal from KLZR, Lawrence, KS).

** Adult album alternative.

** 70s oldies (e.g., "Arrow").

And yet we have at last count FIVE country signals (WDAF, WHB, KFKF, KBEQ, KKCJ--seven if you count Topeka's WIBW-FM and KTPK). Makes me feel like I'm living in a radio feedlot.

Moo.

1122. SF BAY AREA Radio Watcher Report

Newsgroup: rec.radio.broadcasting
Date: 1994-04-03 04:48:07 UTC
From: matt@wni.com
Message-ID: <2nlhq7$43j@vixen.cso.uiuc.edu>
Source record: 40577

Hello Radio,

Cresent Communications, the owners of KSOL(Wild 107.7), have purchased KSRI and KSRY from Viacom. KSOL's program is now simulcast from the KSRI transmitter located on Loma Prieta mountain, giving Wild 107.7 coverage into the southern reaches of the San Francisco Bay Area and into Santa Cruz. Wild 107.7 ought to benifit from the improved coverage to south, since they are dead even with KMEL(106.1FM), both garnering a 4.3 share.

The KSRY signal on 98.9 continues to run an A/C format, however, the new group plans a major format change in the near future. It appears that they have dropped the "Star FM" and are just calling themselves "98.9 KSRY."

This change continues a tradition of tumult on this frequency. My memory had "the Quake" on 98.9FM playing "New Wave". The Quake became "The City" KKCY which was very popular during late 80s. Then Jim Gabbert bought it and turned it into KOFY-FM. Gabbert off-loaded it and the new owners(??) added 99.1FM and dubbed it "Doubble 99" with simulcast programming over 98.9/99.1FM. The station changed hands again last year and was turned into Star FM.

Other SF Bay Area FM happenings: Alliance Broadcasting has swithced KYA(93.3FM) from oldies to a "young country" format and will be competeing with KSAN(94.9FM). This move appears to leave KFRC(610AM/99.7FM) alone to play all oldies.

1123. Current AM/FM/TV list on Internet?

Newsgroup: rec.radio.broadcasting
Date: 1994-04-03 04:48:08 UTC
From: gdallas@aol.com
Message-ID: <2nlhq8$43l@vixen.cso.uiuc.edu>
Source record: 40578

They don't publish the old White's or Vane Jones radio logs any more. so I was wondering if a database of current US radio and TV stations exists anywhere on the Internet. ... Or does anybody publish any current directories? I'd love to have something cross-referenced by call, location and frequency, but I'll take whatever I can get.
The World Radio-TV Handbook only lists stations stronger than 5 KW.
Any ideas, anyone?

1124. Re: ARRO ROCK OLDIES STATIONS

Newsgroup: rec.radio.broadcasting

From: huntngathr@aol.com
Message-ID: <2nlhq9$43m@vixen.cso.uiuc.edu>
Source record: 40579

The "ARROW" format (All Rock & Roll Oldies) is probably the fastest growing niche format in commercial radio today. It will probably be in the top 100 markets in some form or another by the end of '94. CBS Radio recently switched most of their stations over to it. Basically, the Arrow targets the most ignored segment of radio listeners, the 30-40 year olds. Somehow, all those great songs from the '70s got lost in today's adult contemporary & new country formats. This format is different from station to station and market to market depending on who their competition is. The demand and momentum has been building for this one for a while (it took them long enough!). Personally, I think it's a winner!
Happy listening!
P.S. - This is my first posting to Internet, hope it goes through OK...
Sam Hall

1125. Changes at Jammin' 92

Newsgroup: rec.radio.broadcasting

From: sjsobol@tiny.com
Message-ID: <2nlhqe$43p@vixen.cso.uiuc.edu>
Source record: 40580

As noted some time ago, CHR WZJM-FM (nee WJMO) has been bought by Zapis Communications and is part owned by Bobby Rush (music director) and Lynn Tolliver (PD) of WZAK, also a Zapis property.

In the Cleveland Plain Dealer, one of them (don't remember which one) pledged that the station would strive to serve Northeast Ohio's African-American community. This was a few months ago.

A couple days ago, on "Channel X" (the modern-rock/R&B program airing from about 5:30-11 PM), host Tim Virgin invited people to come to his going-away party at Trilogy, a local nightclub. He said that he and Johnny DiModica ("Johnny D", afternoon DJ) were leaving and going to Jacksonville.

Shannon Steele (sp?) has replaced the D-Man, and I believe Lee Anne Sommers has replaced the Virgin.. tho I might be wrong about this, I haven't listened a lot in the past few days. Lee Anne is black, and, I believe, so is Shannon. I guess they figure that they can serve the Black community better if they don't have a bunch of Italian jocks running the station. :) Anyhow, I'm wondering if they're going to get rid of Channel X. It sounds like they've been *adding* more modern rock during the day, instead of phasing it out, but who knows? They seem to still be focusing on R&B and rap, which makes up the majority of the playlist (except during Channel X).

Just an observation. I personally didn't care much for the D-Man, who got really obnoxious sometimes, but I think Tim Virgin was doing a decent job. He seemed to be able to do a real good job of mixing up the rock and R&B records very well. The transitions between songs were always smooth...

PS: I'm usually not listening to radio in the morning,
so could someone who listens to 92 tell me who their morning team is now?
It was Steele and Dimodica for a little while...

Plus, can someone in Jacksonville tell me where the Virgin is now?

1126. Revised: AC Stations -- Kansas City

Newsgroup: rec.radio.broadcasting
Date: 1994-04-03 04:48:15 UTC
From: Mark Roberts <transvox@tyrell.net>
Message-ID: <2nlhqf$43r@vixen.cso.uiuc.edu>
Source record: 40581

SECOND REVISION: Updates, corrects, reorganizes. First version
actually did not make it onto the net.
**
Joining the trend toward describing adult contemporary stations, here's a
brief set of snapshots for the Kansas City area.

1190 : KFEZ (Kansas City, 5000w/250w, DA-N, stereo). More like a
traditional MOR station, some singers from the 50s and 60s mixed in with
newer material. Performs surprisingly well for an AM station though never
in the top 10. Locally owned but also automated.

1320 : KLWN (Lawrence, Kansas, 500w/250w, no DA).
Community-oriented station for college town of 60,000 people. Very safe
playlist, AC basically used as fill between information elements. Co-owned
with modern-rock KLZR(FM). Locally owned.

1380 : KCNW (Fairway, Kansas, 5000w/30w, no DA). Christian adult
contemporary, with scattered "teaching programs." Transmitter site is at
I-635 and Metropolitan Avenue, enabling it to have fairly decent coverage
of the metro area at night despite the low power operation. Apparently
abandoned fulltime, DA-2 operation within the last two years.

92.3 : KCCV-FM (Olathe, Kansas, class C3 drop-in). Relatively new.
Christian AC, some teaching programs. Co-owned with KCCV(AM), 760,
daytimer, by the Bott chain, headquartered in Overland Park.

93.3 : KMXV (Kansas City, "Mix 93.3"). Shifted the last week in March
to a hot AC with modern-rock crossovers. This can sound confusing.
Will play the Cranberries and REM in one set, and Michael Bolton and
Whitney Houston in the next. Promises not to play Pearl Jam or Nirvana.
In duopoly with KUDL(FM), owned by Apollo (KMXV was its first acquisition).

95.7 : KZTO (Ottawa, Kansas). Off the air. See note below.

98.1 : KUDL (Kansas City, "Cuddle," "98 KUDL"). Middle-of-the-road AC, has
popular morning team of Dan Hurst and Gloria Goodwin (which were moved from
Mix 93.3 when it bought KUDL). Hovers near the lower rungs of the top 10
stations. Has been reducing the number of oldies it plays.

99.7 : KLTH (Kansas City, "Lite 99.7 FM"). Very conservative AC, owned by
Bonneville, very gradually transitioned over from beautiful music. My
dentist plays this station in his office. Usually in the top 5 in the
Arbitrons.

107.7: KMAJ-FM (Topeka, "Magic 108"). Hot AC, similar to KMXV but
without modern-rock crossovers. Can be received in some parts of the
Kansas City metro area. Locally owned, co-owned with KMAJ(AM), 1440,

partial simulcast.

The station at 95.7, KZTO, that is off the air last had a conservative AC format. Studios were in Lawrence.

Realistically, KZTO should be downgraded to a C2 and moved to someplace like Lenexa or Shawnee. Its present rimshot signal cannot penetrate the cross-mod hash that prevails in much of Kansas City, Mo. What you would *do* with it once moved in is beyond me.

Also note nostalgia stations KBEA (1480, 1000w/500w, DA-2) and KJLA (1510, 10000w daytimer, DA?) which do have some AC crossovers.

1127. KFAR History ?

Newsgroup: rec.radio.broadcasting
Date: 1994-04-03 04:48:16 UTC
From: matt@wni.com
Message-ID: <2nlhqg$43s@vixen.cso.uiuc.edu>
Source record: 40582

Hello Radio,

I recently recieved a photo of a studio at KFAR, my best guess
puts the date in the early to mid 1930's. According to WRTH,
KFAR is presently located in Fairbanks, AK running 10kw on 660Khz.

I would like to know more about this station and it's history. If you have
any knowledge about station movement(physically or spectrally), or any
information on the history of the owners and the station, I would be trhilled
if you would post it or send it directly to matt@wni.com

Many Thanks,

I compared the new Denon AMAX AM stereo tuner to the Lowe 150 AM/SW
(no stereo but sync AM detection) receiver and, while the Denon was better
for local stations, much better selectivity and DX reception was
achieved with the Lowe 150.

1131. Special HCJB-690 DX Test announced by Rich McVicar

Newsgroup: rec.radio.broadcasting
Date: 1994-04-03 04:48:24 UTC
From: Werner Funkenhauser <WFUNKENHAUSER@cs1.conestogac.on.ca>
Message-ID: <2nlhqo$447@vixen.cso.uiuc.edu>
Source record: 40586
Cross-posted to: rec.radio.broadcasting,rec.radio.shortwave,rec.radio.info

---
===>> Notice of upcoming DX test on HCJB-690, Quito, Ecuador <<===

>>from: "McVicar, Richard" <rmcvicar@mhs.hcjb.com.ec>

|====> The 690 kHz DX test is on! May 29/94 at 0500 UTC (that would be late in the evening of the 28th in Western North America). You're the first to know, Werner...Please don't let it out of the bag until we announce it this coming weekend. Mauricio & I are doing an "undated" show so we can repeat it at later dates and at other times favourable to other areas of the world. We'll see how this one goes.

Rich ===
|---
- There you have it. It's been about a month since Rich mentioned to me via Internet that HCJB was planning a DX test for its 690 kHz mediumwave frequency. We discussed it after I contacted him about shortwave parallel information on HCRP-1 Radio Catolica Nacional (which is sometimes audible on 880 kHz just before its 0200 sign/off and in the occasional early morning). At the time, Rich found out that HCRP-1 SW was off the air (ex-5030) but had plans to return. The replacement equipment was already in Ecuador.

That's when he also advised me of the planned HCJB DX test! Since then, I've been sitting on it, chaffing at the bit. I have liked to include the info in April's Mediumwave International but that wasn't to be :-(I just heard the conclusion of the first broadcast of HCJB DX Partyline, Saturday 94- 04-02, from 1909 UTC on 21455 USB.

The test will consist of the National Anthem, Andean Music, Voice and CW IDs, with perhaps listener interviews, etc. The program will be in both English and Spanish, in fact Rich mentioned that it will be a program format to familiarize local listeners with the idea of mediumwave DX. HCJB-690 broadcasts from a unique transmitter site, 15 miles from Pifo (site of the SW antenna installations), and operates with 50 kW.

There will be no SW parallel frequency, so this is our shot. It sure would be nice to hear HCJB and we should have a good crack at it. HCRP-1 gets out to my location,..... I've heard it three times in the past couple of months with the "Rosary Kids" from around 0145.

Regards...

Werner Funkenhauser

1132. WOWO

Newsgroup: rec.radio.broadcasting
Date: 1994-04-05 05:54:40 UTC
From: jpatrick@vnet.net
Message-ID: <2nquf0$5e5@vixen.cso.uiuc.edu>
Source record: 40587

I am glad that someone made the observation that the first thing thrown upon this group was the charge of racism for its questioning the motivation of the WOWO deal. Using that charge is getting REAL OLD these days and I am not intimidated by the use of it; nice try, won't wash.

What did strike me as interesting was this: pick a 50,000 watt clear channel station of your choice and listen to it these days. What does it program that is worth so much that seventeen states should get the station's signal, at the expense of local service? The 50kw clears were established when America was rural, for purposes of serving urban and rural areas country wide. Today, we are saturated with FM--100kw non directional FM, incredible choices--if not diversity. BAck to AM: I listen to WGY on 810 and it sounds like a 5000 watt regional--you may have examples in your area of this. Why not cut WGY back to a power that reflects the content of its service? And then relax sundown requirements on stations on 810?

I think this issue is part of the WOWO debate---its signal goes to areas of the country it does not serve and cripples the ability of local stations to serve their own markets. The WLIB example brings this to consideration.

I enjoy the AM clears from a nostalgic point of view also--I do not deny my interest in them. But consider: these days, when WLS does an id, they give the FM call and frequency first and the AM second--they are simulcasting. WLS AM is a repeater for their FM service. WLS is not paying attention to their AM, neither are many owners as we all know. One result is lackluster programming and then resulting license attack by other groups.

Stations like WBZ and others do seem to pay attention to their programming and are good examples of high power AM used well. I assume.

1133. WOWO On The Block

Newsgroup: rec.radio.broadcasting
Date: 1994-04-05 05:54:46 UTC
From: walter.scott@hotline.com
Message-ID: <2nquf6$5eb@vixen.cso.uiuc.edu>
Source record: 40588

The following is for submission to AIRWAVES. I have attempted to send submissions to "articles@airwaves.chi.il.us" with no success in the past. So, this time, I'm sending my submission to that address and to the editor's personal E-Mail address on the NET. If this causes any difficulties, my apologies are offered. I knew of no other way to ensure my submission would arrive in the hands of those who could properly deal with it. Please delete this text and publish what is below.

---------- TEXT OF SUBMISSION ----------

As a Kentuckian by birth, I have heard more than my share of WOWO. They were fun to listen to right up until I left Kentucky in 1987. However, fun and public interest are two different issues. If the matter of WOWO's power and/or broadcast footprint are viewed in public interest terms, I doubt the argument as to WOWO's "PR" capacity on behalf of Fort Wayne has much, if any, merit. Whether the PR factor means much is a crucial consideration in that the FCC must base a decision, as to a petition, on the basis of public interest alone -- assuming there are no violations of law or FCC regulations additionally relevant. Public relations with the rest of the country does not seem particularly important to public interest NEEDS of the nation or even the Fort Wayne market.

The number of 50KW powerhouses in one part of the country, as opposed to another, should carry no weight unless we return to the logic of years and circumstances gone by -- where regional high-powered AM radio stations were considered essential, in proper proportion, to informing the NATIONAL public of disastrous events. (i.e. nuclear war or wide-ranging catastrophes of a more natural origin) Anything else was to be assessed as icing on the broadcast cake. Each high-powered station must deal with local and regional community needs. There is no mandate to do public relations for an ADI to the rest of the country, or to serve the NATION's public interest beyond the original scope mentioned above. In modern times, the need for national service is mostly outmoded since the cold war is a thing of the past while there are so many other ways for the rest of the country to find out about natural disasters and other catastrophic events.

I doubt that diminishing WOWO's broadcast footprint, and increasing WLIB's, is either in the public interest or damages it within their respective ADI. Thus, I can't see the FCC deciding to intervene. Further, I can't see that intervention is warranted in any significant way. It's FUN to DX AM radio stations at night. However,

fun is not a public interest component. Few high-powered stations provide services one can argue are ESSENTIAL to the NATIONAL public at large. WOWO is not serving truckers, as does WWL; It is not a principal source of national news for the country when local stations are dark; WOWO does not attempt to address the needs of its national listeners in any way that is relevant to whether its license could be challenged at renewal time. So, if WOWO must share more of the broadcast ether than in the past, then this is something we all may have to live with.

With the above said, it seems there could be a public interest component ->IF<- a decrease in footprint impacts local or regional service. For example: Up through the late 70s, I recall WOWO to be particularly important to Indiana farmers via its early morning block of agriculturally oriented programming. If this service still exists, and would be interfered with, such would/could be a valid point of contention. If folks in the fringes of WOWO's ADI have a vested interest in a clear signal which may be compromised once WOWO changes its footprint to accommodate WLIB, THAT would be a potential problem for the FCC to consider.

To step away from the task of assessing where a petition can work and probably won't, and to move toward some presentday facts of life: AM radio of the 50s and 60s is radically different from same in the 90s. People do not depend on or wish to listen to distant AM radio stations like they did in past decades. Unless you're a broadcast entity like WSB, WSM, WHAS, and particularly WWL, a national market is difficult, if not impossible, to cultivate and justify. Like it or not, the old-time or even current DXers are simply becoming relics of broadcast culture and history. My apologies to those DXers in this forum. However, if you're honest with yourself, you'll have to admit your ranks shrink drastically with the passing of each year.

Walter

>appears that they have dropped the "Star FM" and are just calling
>themselves "98.9 KSRY."

Maybe KSRY should switch to a CHR format. Most of Northern California
is without a CHR station right now, and KSRY can be heard up to 140
miles (in Auburn) from the transmitter if atmopsheric conditions are right.
I can sometimes get LOUD AND CLEAR here in Sacramento. KSRY would fille a
void now existing in Northern California radio if they did this. There are
a number of popular songs, including several #1 hits, which I can not get
on radio here.

Oops! Open House Party is NOT syndicated by westwood one. They are out of
Boston; distributed live by SUPERADIO NETWORK last time I had to call. BTW,
starting this weekend (4/2/94) they are switching sattelite coordinates .

New bird is still Ku, but digital transmission. Old one was analog. I'm not
sure of the exact new location 'cause I'm not the one who had to re-aim the
dish last night. (thank god)

Hi,

Does anyone either:

a) have a list of all stations carrying Jerry Brown's radio show

or

b) know if this show is on any Minneapolis/St. Paul area stations?

You can e-mail me any information you might have.
Thanks!

Mike Joy

>

The style of music could be quite varied, from electronic techno to grunge rock. Obviously, it might have to be tailored to each stations format. Basically, what I'm looking for is if someone else out there has succesfully gotten a local music show on commerical radio, and if so, how did they do it? What's their success story like?

-Jeremy

Jeremy-

I host a
nationally syndicated show that's alot like star search. It's called
"Starlightx". It's delivered to stations on a barter basis and is sponsored
by JVC Electronics. JVC offers prizes and contracts to winning bands and
comedians. Local bands or comedians can get their music and material aired
on a weekly basis. Send those tapes to: Abrams/Dawson & Associates, 9797 E.
Colorado Ave. Denver, 80231. The program airs on CHR's, AOR's, AC's & MOR's
in North America & Guam. It's a great forum for un-discovered talent.

If 'nostalgia' means 40's-50's maybe 60's ish music then add WSAI 1360
in Cincinnati. Rumor has it that this format will move to WCKY 1530 this
week with ????? going on WSAI. JACOR communications is buying up all the
Cincinnati radio stations and playing "musical stations" right now.

Matthew Bye (matt@wni.com) wrote:

: This change continues a tradition of tumult on this frequency. My
: memory had "the Quake" on 98.9FM playing "New Wave". The Quake
: became "The City" KKCY which was very popular during late 80s.
: Then Jim Gabbert bought it and turned it into KOFY-FM.

Lest anyone think that the broadcasting business is easy money, the history of 98.9 in the SF Bay Area is a study in problems. The succession of call letters since its start in the late 1940s:

1) KJBS-FM (with KJBS, now KFAX) - variety news & music, 1946-1949(50?);

2) KCBS-FM - 5 formats: simulcast KCBS with variety news & music, then simulcast all news, then automated CBS's"Young Sound" MOR format, to locally voicetracked CHR, to oldies (1949-77);

2a) 3-way frequency swap with KMPX and KEAR which moved KCBS-FM to 97.3 and allowed banker Lloyd Edwards to buy 98.9 under a minority ownership discount at $100k;

3) KMPX - big band; Edwards sold it 3 years later for $3 million, possibly the only owner to come out with a real (not paper) profit on this channel (1977-1981);

4) KQAK - ("the Quake") hard rock (1981-83?);

5) KKCY - ("the City") eclectic mix of rock, r&b, etc (1983?-85?);

6) KOFY-FM (co-owned with KOFY(AM) and KOFY-TV - rock again;

7) KDBK ("Double-99FM"), co-owned by Viacom with KDBQ in Santa Cruz which, on an adjacent channel, had caused interference problems in the big San Jose area - format was known locally as "office radio";

8) KSRY ("Star FM"), again with KSRI in Santa Cruz - some kind of 1980s-90s easy listening format.

So, 8 call letter changes, 12 formats, and I wonder if Viacom made any money on this station either?

* Greater Media's AC leader WMJX 106.7FM is looking for a new morning man again...Former WBZ Radio personality Tom Bergeron is leaving the 6-10am slot as of mid-May when he becomes a morning host at Fox's brand new cable venture, F/X channel, which is slated for launch on June 1st. Bergeron was only with 'MJX for 8 months. His witty and chatty style at a station with heavy emphasis on 'continuous soft rock, less talk' brought in very solid audience numbers. Greater Media will probably want to have an established local personality or a team to fill its mornings spot.

Speculations in the media focus on the 16-year morning voice of ARS' Hot AC outlet WBMX 98.5FM(WROR until February 1991), Joe Martelle as Bergeron's replacement. Martelle is in the middle of sticky contract negotiations with his bosses, American Radio Systems. ARS may be ready for a new morning voice at 98.5 and there are a couple of jocks in its line-up who have a bigger audience than Martelle (Dan Justin2pm-6pm and Joe Cortesse10am-2pm).

Martelle would certainly take many of his long-time morning loyal listeners to 'MJX if he was to switch frequencies. Greater Media would only benefit in such a move.

Another possibility could be the morning team of Lorren(Owens) and Wally(Bryne) who are on Fairbank's Country&Western outlet WCLB 105.7. They've been doing their show on 105.7(WVFB until February 1993) for 13 years now and most of that time 105.7 was under a hybrid AC format. So they would be no strangers to the music format and would deliver some of their long-time followers to 106.7 as well.

* It looks like NFL's Patriots radio rights will be fought over by only 2 stations - Westinghouse's news/talk monster WBZ and Infinity's AOR WBCN-FM. ARS' Red Sox flagship(and may be soon-to-be Bruins' flagship) WRKO 680 AM submitted an $800,000/year bid which was dwarfed by 'BCN's $1.7 million/year proposition...

* WRKO's morning team of Pat and Marjoree(5:30am - 10 am) was featured on C-SPAN on Tuesday morning. It's the only local talk show in town since July '93 when SportsRad WEEI dumped Doyle and Mustard in favor of InfinityTalk personality star, Donald "I-Man" Imus.

I only watched 5-7 minutes of it.(I can only take so much of lame radio :-(. I think #9 market deserves better.

Any reactions from people who caught some/most of it?

-Mark

<BLACK%HWS1%HWS.bitnet@CUNYVM.CUNY.EDU> writes:

Without quoting extensively, you say our nighttime pattern is bad---while it
may
be restrictive (especially to the west) it's actually much improved after some
adjustments made a couple of years ago that allow us to send a lot more signal
to the east. We now have good coverage of most of our prime market, especially
Monroe, Livingston, Ontario and Wayne counties, even at night---while Genesee
and the western 2/3 of Orleans counties still get lost at sunset when the
pattern
flips to protect WSPD in Toledo (fortunately they've reconfigured their pattern
a
bit to send less signal our way as well). We are one of only two Rochester
AM's audible at night in communities in our metro like Victor, Canandaigua and
Dansville...and we're re-assessing the transmitter move because it may take
away even more than it gives in terms of signal coverage.

I'm looking to find a few great radio stations interested in airing a couple of programs.

Classic Dance Traxxx is a two hour dance party with only the classic tracks from 1970-1991.

All Funked Upx is a one hour funk show with only the funkiest tracks from the 60's & 70's. It also happens to be the only syndicated funk show that I know of. You can hear it on stations from Grand Rapids to Guam.

These are the only shows in the country that are personalized to your market, your station.

Classic Dance Traxxx is set in a live dance club atmosphere with real people. The programs are hosted by Randy Mann....that's me(Power 106, KRFX The Fox, Jones Satellite), often co-hosted by celebrity guests, and are presented with the most energetic style allowed by law! And because they're p ersonalized, they sound like they're coming to your listeners live from a super secret location in your market.

Classic Dance Traxxx and All Funked Upx
are delivered free to you weekly via analog tape and on a barter basis. I will work with you on a personal level to create the sound that you want.

Each markets program is produced on an individual basis, allowing us to lean mainstream, urban or alternative and to personalize the live atmosphere specifically for your market. Both shows are available un-hosted if you wish to use your own talent.

In addition, I recently hooked up with JVC to offer giveaways to your listeners in conjunction with the programs.

There's just no reason to let Classic Dance Traxxx or All Funked Upx pass you up! I'll even pay for your board-op!

Interested? Email me.

Randee

Overview: **********

This is the weekly news digest for West Coast Live, San Francisco's Live Radio Show to the World (actually just NPR).

WCL at NPR convention next week. *******

Sedge and staff will be attending the National Public Radio convention next week. They won't be leaving for Texas until after the show on April 9th.

The upcoming schedule: **********

Our producers work overtime booking talent onto the show. Sometimes they're so busy on the phone, they don't have time to keep the rest of us up to date. So join our audience at a live show. You too may be pleasantly surprised.

April 9th: **********

Gamelan Sekar Jaya, Balinese (not Marty) orchestral
music.

Author, Adam Hochschild, "The Unquiet Ghost".

Claire Peaslee, naturalist.

Travel tips from Karl and Carl.

April 16h: **********

Kongar ool-Ondar, Tuvan throat singer.

John Hammond, bluesman.

Meredith Tromble, artist-in-residence.

Pulp Playhouse, Improv theater.

April 23rd: **********

Naked Barbie Dolls, really hip musical group.

Anne Lamott, author "Operating Instructions".

Calvin Trillin, author and humorist.

April 30th: **********

Kronos Quartet, world renowned contemporary string
quartet.

Weslia Whitfield and Mike Greensill, world renowned
cabaret extraordinaires.

David Tanenbaum, singer/songwriter.

May 7th: **********

The Hot Club of San Francisco.

May 14th: **********

The Rhythm Shieks.

May 28th: **********

Merl Saunders.

Special Offers: **********

Drawing for Free Tickets!: *****

This week marks our 14th West Coast Live show. Be the 14th
person to email (see rules, below) the moderator at;

Owner-West_Coast_Live@netcom.com

and you will win two (2) free tickets to this week's live
show. Runner-ups are allowed to buy tickets at list price.

Rules: **********

The contest begins as soon as the moderator sends this notice to the West Coast Live email subscription list.

The winner will be selected based on the time the entry was sent (as opposed to the time the entry was received), no sooner than 1 hour after the moderator receives the minimum number of entries, and no later than 48 hours prior to the live show.

The email must be addressed to;

Owner-West_Coast_Live@netcom.com

The email's header subject must contain the phrase; "Win Ticket Drawing".

One entry per person.

The winner will be notified by email.

If the winner can't attend this week's show, the winner may assign the tickets to a couple of friends.

The moderator's (email filter's) selection is final.

Free Coffee: **********

Wear an official West Coast Live shirt at the show, and you are entitled to free coffee.

Rules: **********

Official West Coast Live T-shirts or sweat shirts only.

For a limited time, this offer is extended to shirts from that old radio show, that are upgraded with an official West Coast Live Shirt Upgrade Kit.

This offer is good for free coffee only from the West Coast Live java bar. If anyone else offers you free coffee for wearing a West Coast Live shirt, let us know.

T-shirt Drawing: **********

On the last live show of each month, we give away an official West Coast Live T-shirt.

Rules: **********

To enter this drawing, you must drop a business card into our fish bowl. Any scrap of paper with your name, address, and phone number may be substituted for a business card.

One entry per person. You must be present to enter.

The drawing is held following the last live show of each
month. You need not be present to win.

Tip of the Week: **********

Spring those clocks forward: ***

No don't do it again. We did that last week.

Downloading Additional Information: ****

You may download an information document giving background
information on the show and the show's Internet service, by
sending the following email message to;

Mark Roberts <transvox@tyrell.net> writes:

> However, I don't agree with most of the rest of you, either.

I'm not so sure, Mark...because after reading your post, I find
I agree almost completely with you as well. Let me explain...

[KOB issues deleted]

Mark raises the issue of KOB/KKOB's ultimate fate as a 50kw
Class I-B clear, meaning they have to cut their pattern to the
northeast to protect WABC. This was one of many compromises that
the FCC made in the 1930s and 1940s, in the interest of providing
at least some night service to as much of the country as possible.
And it was, in the end, largely a political issue. KOB's former
1180 channel was one that was splintered in NARBA. Unlike most
of the pre-NARBA channels, which simply had all their occupants
move to another freq, 1180 was shattered. WINS went to 1010,
WDGY to 1130, KEX to 1190. KOB's owners weren't a huge
company like NBC, so when KOB ended up co-channel on 770 with
NBC's WJZ New York, it was inevitable that the Big Network O&O
would win. But this is radio politics circa 50 years ago, not
circa 1994...and the fact is that some stations won then and
some didn't. Thanks to the influence of then-owner Westinghouse,
WOWO was a winner...and that set up the pattern for the next
50 years.

> However, warm and fuzzy memories, nostalgia, and history do not
>make for good policy when it comes to the efficient allocation of the
>RF spectrum.

Agreed. And here's where I think Mark is missing the boat a bit.
The WOWO fight is not _primarily_ about the warm fuzzies. It's
about efficient allocation...and about maintaining as much clear
AM reception over as much of the country as possible. Let me
keep going here...

> And whenever I go to Columbia, Mo., I can't hear KMOX at all,
>because of phase cancellation between the skywave signals and the
>groundwave signal of KMOX. (You can sort of pick it up, but it sounds
>truly, truly awful, like listening to a misaligned radio in a wind
>tunnel.)

That's a given with any powerful AM. Try listening to WBZ after
dark in, say, Springfield or Pittsfield...same deal.

> If someone bought KMOX from CBS, say, to downgrade its signal to
>allow nighttime service to Limon, Colorado, would I be upset? Hmmm.
>Maybe. But the 'MOX is a *St. Louis* station, not a Kansas City
>station. Other than during last year's floods, it doesn't provide
>anything I can't get here.

Ahhh....but it *does* provide a clear AM signal to you on 1120
kilohertz. If someone bought KMOX to add nighttime to Limon, they'd
not only be spewing 1120 signal at you from Limon, they'd also
have to take KMOX directional, with a null towards KC. Presto...
rather than having the option of having KMOX to listen to on 1120,
you have nothing to listen to on 1120 except some weak KMOX from
off-axis, plus whatever weak signal might come in from Limon or
Eugene or wherever. Is that an improvement? I don't think so...
and if you substitute WOWO for KMOX, NYC for Limon, and Boston
for KC, you begin to see what I fear may happen to 1190 in the east.

> Then there's the case of KFRU, Columbia, purchased in 1938 by the
>St. Louis Star-Times. I have posted this station's history in
>AIRWAVES, but to summarize: KFRU had a kilowatt at 630 kHz. The
>Star-Times moved the frequency to St. Louis (KXOK) and stuck KFRU with
>a quarter-gallon at 1370 (now 1400). All perfectly legal. The
>precedent is there.

This isn't precedent at all...it's 50 year old history. 630 was never
a clear channel for starters...and Inner City isn't talking about
swapping frequencies, they're talking about cutting down a clear
channel signal to add something else co-channel in what's now a
protected zone. And there is NO precedent for that. In fact, the
precedent is just the opposite. With the blessing of the FCC, my
employer bought KBIS-AM 1010 in Little Rock a year ago to take it
dark, and EXPAND WINS-1010's signal to the southwest.

> Want something more modern? Try FM rimshots, maybe?
> Where were y'all when KSGM-FM Ste. Genevieve, Mo. got sold to
>become a St. Louis rimshot (now KPNT)? There went Ste. Genevieve's
>ONLY service.

Er...howzabout KSGM-AM 980, which, admittedly, was trashed by the
floods? And KSGM's current sister station, 93.1 KBDZ Perryville,
which serves St. Genevieve and ID's as a St.Genevieve station?
Ahhh...but I'm letting myself get caught up in Mark's tangential
FM-rimshot discussion. It's a good issue, but the only relationship
it has to WOWO is that WOWO-FM is itself a rimshot, with city of
license Huntington. It's an economic given that, barring very
strict FCC regulation, any FM with a significant signal over a
major market will serve _that_ market rather than its city of
license. Ask me about WBOS-FM Brookline-Boston, WXKS-FM
Medford-Boston, or WCGY-FM Lawrence-Boston sometime. It's
got nothing to do with WOWO. The current WOWO signal will never
be a player in NYC at night, the way a WBOS automatically
blankets Boston or a KQRC covers Kansas City. The FCC should
just admit that these signals are really metropolitan ones,

not suburban ones. Not so WOWO. It has to cover a _huge_ area
of influence, almost from Indianapolis out into a broad swath of
Michigan and Ohio. Its signal corresponds to the area it tries to
serve...and to its city of license.

> About the only FM rimshot the FCC has turned down in recent years
>was the attempt to move WHMA, Anniston, Alabama, to an Atlanta suburb.
>That 90-mile move was too much even for the allocational libertarians
>at the FCC to stomach.

And they didn't stomach it because it's the closest precedent
we have to WOWO. While stations like KQRC or WBOS are just taking
natural advantage of a happy circumstance of city of license,
WHMA's owners were trying to completely uproot the station. The
FCC didn't buy it...and they shouldn't buy the same kind of
trick from Inner City.

> FORT WAYNE'S 'AMBASSADOR'
> If WOWO is an ambassador, it's one who's always facing in a
>particular direction.

Because, like KOB, they got bigfooted in the 40s and 50s. KEX is
the class I-A on 1190, so naturally WOWO has to protect them.
What you don't see from your side of the WOWO sticks is the
incredible signal WOWO throws to the east...same way KKOB is
a killer signal in California...

> So the WOWO signal isn't as unimpaired as one might think from
>reading the articles folks have posted about it.

The west has never been the issue. 1190 has always been sort
of messy in the Mississipi River Valley...and I'm just fighting
to keep it from getting like that here as well.

> Bigger cities get by without a clear-channel ambassador. Kansas
>City, for instance. Regarding market size, Fort Wayne is ranked #124
>by Arbitron; Kansas City is ranked #27. Kansas City has no 50,000-watt
>nighttime signal at all. 'Tis true we have 5 kW nondirectional from
>WDAF at 610, but that's still no flamethrower by any stretch of the
>imagination.

Again, an accident of history. Fort Wayne had Westinghouse to
fight for high power. The KC Star had neither the clout nor the
perseverance to fight for the same for WDAF. It's a shame...but
it's something that happened 50 years ago. Is it right to knock
out the clear channels that were lucky enough to be created...just
because not every city the size of Shreveport or Fort Wayne got
one?

> CURTAILING THE ABILITY TO SERVE
> Back to KFRU for a moment.
> When KFRU suddenly went to a strictly local operation, something
>happened. It became intensely focused on its community. And has

>prospered for many years.
> True, this began in the days when it was the only game in town.
>But the intensely LOCAL image that it acquired over the years--forced
>by the move to a Class IV frequency--has helped it survive Columbia's
>evolution from a sleepy town of 17,000 to a thriving little city of
>68,000.

Ah, but KFRU is the exception. Look at all the other locals that
didn't have that same driven focus...and are now running SMN or
Unistar AM Only. WOWO has had the same kind of focus...except its
"local" area is that huge chunk of land roughly bordered by
Columbus, Cincinnati, Indianapolis, Chicago, Kalamazoo, and Detroit.
Having 50,000 watts has allowed WOWO to serve all these people,
and it's an audience that still depends on WOWO.

> WOWO isn't selling signal, or it shouldn't. It should be selling
>audience. And local heritage.
> While there may be a great amount of interest in the northeast
>corner of North America in WOWO among DXers and scattered others, I'll
>bet it's NOT selling nighttime spots to New York City advertisers, or
>to Boston advertisers, or Toronto, or Buffalo, or wherever. WOWO's got
>to pound the streets of Fort Wayne to make a buck.

And the streets of Defiance, Ohio, Coldwater, Michigan, and Angola,
Indiana, all of which would likely lose WOWO signal at night if
WLIB gets its way...

> So those of you who've lived in or been to Fort Wayne won't be able
>to hear it any more if WLIB does what we all suspect it's going to try
>to do. I must respectfully say, "That's tough. Radio is a business
>and this is a business transaction. You can try to stop it if you like
>but I don't think you have much besides nostalgia going for you."

It's also a technical move...one that would, for the first time in
50 years, seriously compromise a clear channel. The FCC has been
trying to do just the opposite, by allowing interference-creating
stations to be taken dark, and by planning the move of hundreds
of stations (likely including WLIB!) to the 1600-1700kHz band. To
reverse that by making 1190kHz another noise-filled regional
frequency in the east is what would be the big loss for all of us.

-=Scott Fybush - fybush@world.std.com=-
Save 1190 for all of us in the East!

1147. Radio Interviews For Your Band?

Newsgroup: rec.radio.broadcasting
Date: 1994-04-06 06:17:32 UTC
From: Tom Torriglia <tommy@crl.com>
Message-ID: <2ntk5s$76q@vixen.cso.uiuc.edu>
Source record: 40502

Hello:

As the (freelance) entertainment reporter for KSFO radio in San Francisco it's very handy to me when a touring band sends me some tour dates and a CD. With that information in hand I'm more likely to give their show a plug and maybe even a few seconds of airplay during my weekly segment.

As the promotions director for Those Darn Accordions, a San Francisco based band consisting of 8 accordions, bass, drums, having the name of entertainment reporters or hosts that interview bands in other towns is critical to the band's success whenever it hits the road.

Recently, the band performed in Austin (SXSW) and it was exhausting and costly to try to find stations that might want to interview the band. The only show I was able to get the band on was KUT. I tried KLBJ, KNNC, et al but without any luck. My question, with the band planning a tour this July, I would like to try to pitch the band to certain stations via the net. Is there an online resource directory of stations subscribing to this group so that I can target stations in the specific areas where the band is going to be performing rather than just sending a note net-wide?

Does YOUR station have an entertainment reporter?

Any advice would be greatly appreciated.

If you have any questions about the band, National Accordion Awareness Month or the new CD, please drop me a line.

Thank you.

BTW, I also wanted to remind all of you that June is National Accordion Awareness Month (refer to Chase's).

1148. Big Changes in Cincinnati Radio

Newsgroup: rec.radio.broadcasting
Date: 1994-04-06 06:17:33 UTC
From: john.simpson@sdrc.com
Message-ID: <2ntk5t$76s@vixen.cso.uiuc.edu>
Source record: 40503

On Thursday, April 7, Cincinnati radio will undergo a major overhaul. Rush Limbaugh will move to the far left (the far left of the radio dial that is), and WIMJ-FM, "Majic 92.5", one of three Cincinnati outlets for the likes of Michael Bolton and Mariah Carey, will disappear from the airwaves. Jacor Communications, owners of WLW-AM 700, WEBN-FM 102.7, and WLWA-AM 550, has purchased WIMJ-FM from Pathfinder Communications and will take over that station this Thursday. Speculation is that WIMJ will switch to either country or '70s pop music. Jacor has also purchased the physical and intellectual property of WCKY-AM 1530 from Pathfinder, which means, in effect, that Jacor has first rights to all programming and personnel on AM 1530. The actual license for AM 1530 was purchased by local attorney Chuck Reynolds, current owner of WSAI-AM 1360. This Thursday, WSAI and its nostalgic music format will move from AM 1360 to AM 1530, and WCKY, the home of Rush Limbaugh, will move from AM 1530 to AM 550. Bengals football games will remain on AM 550. Whatever programming Jacor doesn't want will go to AM 1360. No changes at WLW or WEBN are planned. Jacor also has an agreement with Reynolds to control all advertising on AM 1360 and AM 1530.

Dear Listener and Friend,

As you may already know from the announcements that we are broadcasting every hour, since March 27, 1994, IRRS-Shortwave on 7,125 kHz (41 metres) has been severely, and deliberately, interfered by Radio Budapest (from 14:30- 15:00 UTC) and Radio Bulgaria (after 15 UTC) in Russian. We contacted promptly both stations, and asked them to stop immediately their interference to our broadcasts. We also suggested alternative frequencies for them to use, which would not cause interference to other stations.

This interference is severely undermining our efforts in bringing listeners in Europe a balanced news and information service on behalf of UN and UNESCO Radio, and our Christian broadcasters. We have managed to keep our frequency clear of interference so far by moving early in 1991 to 7,125 kHz, and have been using this frequency on a continuous basis for as much sixteen hours a day (07-22 CET). Since then we have cordial and fruitful co-ordination in frequency management with the BBC, Deutsche Welle, Radio Nederland, Radio France Internationale, Radio Free Europe, Voice of America, and RAI. Thanks to good, professional relations, conflicts of the kind that now exist between IRRS-Shortwave and Radio Budapest/Radio Bulgaria were avoided and quickly resolved. This event is even more serious because frequencies are becoming scarce in this low-propagation period, especially for low powered stations like ours.

Recent faxes, and phone calls between NEXUS-IBA and the stations involved, however, revealed that the move to occupy our frequency was indeed deliberate, and coordinated between the two stations.

If you believe that IRRS-Shortwave is offering you a high quality and cultural service, and you do not think it is right to start a high-power transmission on top of our station, just because we are smaller than most other services, please send us your support, now! We have no 500 kWatt transmitter to oppose to the unwillingness to cooperate of some broadcasters, but with your letters we would like to attempt to reaffirm that David can beat Goliath at his own game. Listeners, and known personalities have already responded spontaneously to our appeals, and faxes of complaint have been sent already to Radio Bulgaria and Radio Budapest.

Remember, you need to act quickly if you want to give us a chance to preserve our frequency!

Please send your letters of protest to:

Radio Bulgaria,
Attn. G. Trenev, Chief Engineer,
fax: +359-2-662215

(usually a bad line, will take several retries)

Radio Budapest,
Attn. Mr. L.Ovari/Mr.J.Radnai,
fax: +36-1-1387004

Please send us a copy at:

NEXUS-IBA, fax: +39-2-70638151.

We will forward to the stations above by fax if you were not lucky to get
the line. You may also send your messages by e-mail to us :

NEXUS-IBA,
email: 100020.1013@compuserve.com
Compuserve: 100020,1013

or, if you do not have access to anything else, also by mail:

1151. Detroit station to be all sports

Newsgroup: rec.radio.broadcasting
Date: 1994-04-06 06:17:40 UTC
From: an678@FreeNet.Carleton.CA
Message-ID: <2ntk64$777@vixen.cso.uiuc.edu>
Source record: 40506

>From the 4/5 Detroit News:

Within 60 days, WWWW-AM (1130) will change to an all-sports format,
Shamrock Broadcasting announced Monday (4/4/94).

Station General Manager Phil Lamka said, "Detroit is the only major market
in the country without an all-sports radio station. We believe this
great sports town is a natural."

The station has aired a simulcast of WWWW-FM, a country station, since
September, 1992.

"The AM station doesn't have a large audience, the bulk of listening is done
on the FM station," Lamka said about the pair of stations broadcasting
from Detroit, just east of the Renaissance Center on East Jefferson. "The
AM is a powerful station being underutilized."

The AM station has 50,000 watts during the day and 10,000 at night. During
the day, Lamka said, listeners as far away as Lansing and Flint can receive
the signal.

Lorna Gladstone, a former sports/talk programmer for WGN in Chicago, has
been hired as station manager and is interviewing prospective on-air
personalities.

Shamrock Broadcasting is a privately held company, owned principally by
the Roy E. Disney family and Trefoil Capital Investors. It owns 21 stations
in 12 markets, including all -sports K-FAN in Minneapolis.

---Robert Jones byline

Just a sidenote...the major sports teams are tied into longterm contracts with
WJR (Tigers, Red Wings, UofM) and WWJ (Pistons, Lions, and UofM)...bet they
will carry lots of talk and possible Michigan State sports (who appears to be
looking for a Detroit home) and the Detroit Vipers (the town's new IHL team).

Also, they will be a good spot for backup signal for team conflicts on the other two
stations, such as Red Wings being bumped for the Tigers...but will WJR want to
give a sports station a play-by-play broadcast...encouraging their listeners to
sample?

Message-ID: <2ntk66$779@vixen.cso.uiuc.edu>
Source record: 40508

As for the sale of WOWO...I do think it's sad, yes, that this heritage station will be crippled (power wise) for the purposes of enhancing WLIB's night coverage. But I think the greater issue here is a concern that whole stations have been shut down for the same reason, and will be. (You've posted examples of this before.) IMHO, I think ANY licensee has an obligation to serve the community, and not just to own the license to improve his/her facilities in a far-away city.

While the potential reduction of 50KW WOWO's power will indeed not affect its ability to serve the city of license, I think the greater trend is what we should be concerned about here. Radio has long since stopped being a public service vehicle (commercial) and is big money now...but stations can still serve their community and make money. Inner City Broadcasting has no intention on doing anything but getting WOWO's annoying 50KW signal out of the way of WLIB. They will more than likely pay no attention to the station. Whether this means it will fall into financial ruin...I dunno. But if it did, and were forced to either shut down, be sold or simulcast another local station, THEN Fort Wayne would be affected.

More radio news week of 4/3/94

Talk station WWRC, AM 980, fired their Program Director this week. Peter Laufer has been let go after a one year stint. The well respected journalist was caught by surprise with General Manager Bob Longwell's decision. He says he is proud of his work and his staff at WWRC. WWRC has struggled during each of the last 3 ratings periods. Their overall numbers for listeners 12 and up follow:

Winter '92 1.9
Spring '93 1.6
Summer '93 1.1
Fall '93 1.1

Too early to tell if there are any plans to continue in radio. Laufer is in the process of writing a book called "TURN DOWN YOUR RADIO". Laufer has some good company in the unemployment line. His friend and former NBC and CNN correspondent Charles Jaco learned last month that his contract won't be renewed by CNN.

CORRECTION! Last week I stated that new WASH FM 97.1 morning man Kevin Gossett worked as Program Director of WLHT FM in Grand Rapids, MI. That is incorrect. Tony Brooks of B-93 sent me a message which stated: "New WASH morning host Kevin Gossett was PD only at WGRD-FM Grand Rapids besides morning drive host. WLHT Grand Rapids recently purchased the WGRD combo and Gossett left as a result of the purchase. The PD at WLHT is Steve Dirksen." Thanks to Tony for the clarification. I got my information from the WASHINGTON POST but it, obviously, was wrong.

WASH still has not resolved its dispute with former morning team Baker & Burd. Jeff Baker was let go last fall and David Burd didn't make it past Christmas. An arbitrator heard another round of testimony last week from Evergreen Media, WASH's owner, and from AFTRA, Baker & Burd's representative. The duo says they are due 3 months salary, accrued and unused vacation, and in Jeff Baker's case, 4 weeks "notice pay".

The Radio Zone, heard on WKDL AM 1050, has added "Science Scope" to its lineup. The minute long features discuss nature at the elementary school level. Science Scope is hosted by Leslie Sawyer who used to work for AP and for RKO.

1155. New York radio news

Newsgroup: rec.radio.broadcasting
Date: 1994-04-07 18:49:12 UTC
From: slutsky@tesla.njit.edu
Message-ID: <2o1kj8$r0d@vixen.cso.uiuc.edu>
Source record: 40510

Some New York radio news:

1. As you probably know Howard Stern is running for Governor of New York State on the Libertarian Party ticket. A poll on Prodigy gives Stern 42% of the vote versus 26% of the vote for Mario Cuomo and 26% for an undetermined Republican candidate.

2. Park Communications who owns WPAT AM and FM is being sold. Those stations were owned by Capital Cities before the merger with ABC. There is speculation that ABC-Capital cities would like to buy the 2 stations creating New York's first duopoly. I would like to see WPAT-AM's signal improve for better reception east of the Hudson. Perhaps some syndicated talk shows not now on New York radio can be heard. I don't see the point in simulcasting WPAT-FM's music on AM.

3. Barney the lovable or hatable purple dinosaur can be heard Sunday nights on WMXV in New York. My 6 year old son listens to it while I watch Andy Rooney on 60 Minutes. STUPENDOUS.

1156. Dallas-Ft. Worth Radio News (Rumor)

Newsgroup: rec.radio.broadcasting
Date: 1994-04-07 18:49:14 UTC
From: bnelson@netcom.com
Message-ID: <2o1kja$r0f@vixen.cso.uiuc.edu>
Source record: 40511

As most people who follow the radio scene in North Texas know, January 1994 marked the end of the Big Band format on 1310 AM/KAAM. Now known as "The Ticket", Dallas-Ft. Worth's KTCK airs a mixture of play-by-play sports along with sports-oriented talk 24 hours a day. (And with the recent happenings involving Jerry Jones and Jimmy Johnson, the station has had a lot of publicity -- even on ABC News).

Although the Metroplex has gained a new format...the loss of KAAM is notable...since there's not really a station catering to the 45+ demo in the market anymore. That, however, might be changing...

The rumor rumbling in this region is that a powerful signal from nearly 100 miles away just might be moving to the D/FW area! The word is that Wichita Falls's KWFT/620 with a robust 5,000 watts day and night will be relocating its city of license to a Dallas suburb, possibly Plano, as early as this July.

Steve Walker (stevie@netcom.com) tipped me off to a telephone number to call in Dallas-Ft. Worth that had some information about the status of KAAM. The number is 787-1311 (one more than the old frequency) features a recorded message that mentions that a more powerful KAAM will be returning to the airwaves "at 620".

Has anyone else in the area heard about this? I haven't seen it listed in the back of Broadcasting.

By the way, a station moving to Dallas from Wichita Falls is not without precedent. What is now KLIF/570 traces it roots to KGKO, a facility that moved here in the 1930's and later became part of the historic time-share arrangement that WBAP and WFAA continued through 1970. One more historical note -- the station presently at 1310, KTCK, is the first broadcaster in the state of Texas. WRR(AM) began as a city-owned radio station in 1920...and continued with those call letters until sold to Bonneville in the 70's (when the KAAM call letters were put into place). WRR(FM) continues to operate as a city-owned but commercial station offering a classical format with 100 kW at 101.1 mHz.

1157. WOWO -- Municipal Ownership

Newsgroup: rec.radio.broadcasting
Date: 1994-04-07 18:49:15 UTC
From: transvox@tyrell.net
Message-ID: <2o1kjb$r0h@vixen.cso.uiuc.edu>
Source record: 40512

Another thought:

If Fort Wayne's civic leadership thinks WOWO's clear channel status is important to Fort Wayne's community image, then why not have the city float a bond issue and buy it?

If cities can float bonds and build expensive stadia for something as trivial and pointless as professional sports teams, surely they could do it for something more meaningful, like a radio station.

It certainly would put Fort Wayne's money where its mouth is!!!

Commercial operation of municipally owned radio stations is nothing new. Jacksonville, Florida did it for many years. The city of Dallas, Texas, bastion of free enterprise, still has municipally owned WRR-FM and doesn't even dare think about selling it.

An historical note: KMOX in St. Louis was founded by the chamber of commerce in St. Louis, incorporated as "The Voice of St. Louis, Inc." One of the station's explicit goals was to promote St. Louis, using its then-1090 clear-channel frequency.

1158. Soundbites

Newsgroup: rec.radio.broadcasting
Date: 1994-04-07 18:49:22 UTC
From: tpschuh@aol.com
Message-ID: <2o1kji$r0l@vixen.cso.uiuc.edu>
Source record: 40513

Does anyone know of a free or inexpensive source for public-domain type soundbites: history/news/sports/TV/movies/etc? I work for an oldies station, and we love to put together little historical vignettes of sound and music!

I'd prefer tape, but .WAV files would be okay.

Reply back or e-mail me if you can help

Schuh

1159. Stations Airing Radio Theatre

Newsgroup: rec.radio.broadcasting
Date: 1994-04-07 18:49:24 UTC
From: chessexrp@aol.com

Source record: 40514

My name is Joe Coleman and I used to edit a magazine called MODERN RADIO DRAMA. Well, I still have a debt to my subscribers and want to make good on it. But it will require some help.

I had a list of more than 700 stations in the US carrying radio theatre; college stations, commerical stations, nostalgia stations, and even Western Stations.

Most of the stations I've contacted ceased broadcasting radio theatre in the past three years and I want to put together a new listing.

Is there a station airing radio theatre in your areas? Nostalgia? Original? Religious (UNSHACKLED is out there, as well as ODYSSEY)? Serials. Westerns. Comdy. WHATEVER.

Please send information, including call letters, day, time and the show. It will be worth a thank you in the newsletter, and I'll upload the completed list to the net.

Thanks.

1160. She has a nice voice!

Hello foes, my wife has a nice voice when she speaks
on the phone, she gets complements about it almost everyday, to the point that
people want to met her, I was wondering if she would be good on radio or how
she can take advantage of her voice (commercials etc.) please let me know

Thanks in advance
Alex

1161. Re: WOWOes (very long)

Thanks, Scott and Mark, for your great opposing posts on WOWO.

I want to respond to one of your points, Scott, based on my experience.

In article <2nth1p$sg1@vixen.cso.uiuc.edu> fybush@world.std.com (Scott D Fybush) writes:
> When KFRU suddenly went to a strictly local operation, something
>happened. It became intensely focused on its community. And has
>prospered for many years.
<snip>

Ah, but KFRU is the exception. Look at all the other locals that
didn't have that same driven focus...and are now running SMN or
Unistar AM Only. WOWO has had the same kind of focus...except its
"local" area is that huge chunk of land roughly bordered by
Columbus, Cincinnati, Indianapolis, Chicago, Kalamazoo, and Detroit.
Having 50,000 watts has allowed WOWO to serve all these people,
and it's an audience that still depends on WOWO.

<snip>
> While there may be a great amount of interest in the northeast
>corner of North America in WOWO among DXers and scattered others, I'll
>bet it's NOT selling nighttime spots to New York City advertisers, or
>to Boston advertisers, or Toronto, or Buffalo, or wherever. WOWO's got
>to pound the streets of Fort Wayne to make a buck.

And the streets of Defiance, Ohio, Coldwater, Michigan, and Angola,
Indiana, all of which would likely lose WOWO signal at night if
WLIB gets its way...

The notion of "town", as in, "I'm going into town" or "XXX is the nearest
big town", bears on a listener's choice of station.

I grew up in South Bend. I have family and friends there, in southwestern
Michigan (Dowagiac/Edwardsburg/Niles, I think all within the Kalamazoo-Chicago
line of your WOWO boundary), in Fort Wayne, in and near Indianapolis.

An uncle who lives in Fort Wayne might listen to WOWO. A college chum
from Wabash, IN, identified with Fort Wayne as "town" and tuned to WOWO.
I suspect Angola, IN and a whole bunch of tiny towns like it which look
to Fort Wayne as "town" probably listen to WOWO, too.

My parents in South Bend spend their morning with WSBT or WIWO (yes, WIWO,
ex-WAMJ), both South Bend market stations. My father listens to WLS and
WSCR/Chicago all day (on the SuperRadio III I bought him, without which WLS
is weak and WSCR is static). Chicago is "town" to South Bend.

My grandparents, who lived near Dowagiac, MI, listened to WDOW/Dowagiac, or WOOD(FM?)/Grand Rapids. (Dowagiac is closer to South Bend than it is to Grand Rapids, but I suspect the Michigan focus of WOOD was more comfortable than the "Michiana" focus of South Bend stations.)

Friends who live north of Indianapolis listen to stations like WIBC (or WFBQ or WRZX or...). Heck, people here in Terre Haute would, too, if Indy signals got into our valley. Indy is "town" to us.

I guess the point I'm hinting at is: If WOWO's service is reduced, the people most impacted would be those who look to Fort Wayne as "town". I claim the WOWO area is actually bounded more by midpoints between Fort Wayne and Indy, South Bend, Kalamazoo, Detroit, Cleveland, Columbus... all the medium and large towns which surround it. What does WOWO offer to folks who identify with these other cities? What do these folks care about Fort Wayne news and weather? Why should they listen to WOWO for music or talk when they can get the same kinds of things on stations in cities they identify with?

I didn't think I'd end up supporting Mark's position on this, because I don't want to see WOWO get clipped. I *like* tuning into WSB or WWL or WABC or even WOWO sometimes, just for grins. I'd hate to lose the ability to occasionally peer into a distant city and see what the heck's up. But none of these stations fill my daily needs like WBOW or WTHI or WZZQ or WJSH in Terre Haute. Besides, they all come in clearly in my car as I drive around town. WOWO sure doesn't!

And as a side note: Our oldest AM, WBOW, was a real full-service news and information powerhouse on 1230, reaching only barely beyond the Terre Haute border. It moved to 640 a year or so ago, now reaches well out into farmland, and could have been a great service to everyone out there who thinks of Terre Haute as "town". Unfortunately, save a live morning and afternoon show, it now runs Unistar AM Only all night and all weekend. The only reason anyone ever hears about WBOW anymore is because it carries Rush Limbaugh. Sad.

Peace,
jim grey

1162. More thoughts on WOWO

Newsgroup: rec.radio.broadcasting
Date: 1994-04-07 18:49:34 UTC
From: "George F. Davison Jr" <gfdjr@DELPHI.COM>
Message-ID: <2o1kju$r1o@vixen.cso.uiuc.edu>
Source record: 40517

The WOWO debate brings into focus a number of questions: (1) what is the future of 50,000 watt "clear channel" broadcasting in the United States? (2) should the AM band in the United States continue to have "clear channel" stations? (3) should "clear channel" stations be assigned only to major markets, or should "clear channel" stations be located in such a fashion to serve broad geographic areas? (4) should heritage stations be preserved?

From the various posts on this subject, there is no doubt that a number of persons have strong feelings about WOWO. Are these strong feelings because of nostalgia, a desire to return to "happier" times, or to preserve "clear channel" broadcasting as it has been known?

I am neither familiar with the format of WOWO nor its history, other than it appears to have a rich heritage. Likewise, I have no information regarding WLIB and its owners, other than what has been posted.

"Clear channel" stations were created to serve broad geographic areas, during a time when commercial, broadcast radio was new (experimental?), when it was very difficult to get a license, and when the public in remote areas demanded access to the radio network programming that could be received by city dwellers. The "clear channel" licensees were stations which had gotten on the air early and demonstrated an ability to survive (had a network affiliation with NBC?). While I have not researched this, I have a sense that there was an attempt to afford "clear channel" service to each state, and perhaps, at least one "clear channel" in each state.

As many who read this net are aware, WLW, Cincinnati, was authorized for a time in the early 1930s to experiment with 750,000

watts. I have been told by knowledgeable persons that on several occasions WHO, Des Moines, made engineering studies and proposals to increase its power to 750,000 watts. The concept was to afford a service, based upon the engineering concepts of the time, that was dependable and receivable everywhere.

"Local" radio service was not something that began to happen until after World War II. With the coming of television, radio networks lost their importance; radio changed. Smaller towns obtained a 250 watt or 500 watt daytimer or may-be a Class IV, eventually with 1,000 watts day and 250 watts night. Most of these stations flourished on local advertising, local news, local sports, local weather, and community service.

The 50,000 watt stations were still there, but they, too, recognized that they had to serve their community of license. The network revenues and programs weren't there. The 50,000 watt stations, too, had to sell local advertising (if they were lucky and had a good farm department, they were one significant leg up). To survive in today's market, the 50,000 watt station had better be good in its local market (ADI), and it had better have a niche. It cannot survive just because it is the 50,000 watt, clear channel voice of wherever. The future of the "clear channel" broadcaster is the same as that of any other business: if you work hard, find your niche, provide the service that the customer wants, and do it efficiently, you will survive and succeed.

Is the "clear channel" concept still valid? Do we (the public) need "clear channel" stations? I think the answers to these questions are yes, especially here in the middle west and the west. The "clear channel" stations continue to serve. In many rural communities, the "clear channel" station is the local station. Late night driving in Iowa (and elsewhere) is more comfortable with a solid "clear channel" signal.

Should existing "clear channel" or
heritage stations be preserved?
Unfortunately, the degrading has already
occurred. Mark Roberts in his post gave
excellent examples regarding WOWO's
frequency, 1190. It is always hard to see
something that you respect, like, cherish, or
just have fuzzy feelings for go away;
however, change is the one constant in life.

What should be done about WOWO? The
last time I looked at the Communications Act,
a licensee still had to perform in the public
interest. While the criteria for this
standard seems to have changed somewhat
(based upon what I hear on the air), it is
still a very significant standard of conduct.
Will it be in the public interest to allow
what some think will happen? The decision
rests with the Federal Communications
Commission. It is required to afford the
parties and the public due process which
includes appropriate hearings. Exercise your
right to petition your government, and tell
them what you think. Provide the FCC with
the information that will allow it to make an
informed, reasonable, and rationale decision.

>As for the sale of WOWO...I do think it's sad, yes, that this heritage
>station will be crippled (power wise) for the purposes of enhancing WLIB's
>night coverage. But I think the greater issue here is a concern that whole
>stations have been shut down for the same reason, and will be. (You've posted
>examples of this before.) IMHO, I think ANY licensee has an obligation to
>serve the community, and not just to own the license to improve his/her
>facilities in a far-away city.

While you and I may think this ... the only ones who really count are the
US Reps and Senators that tell the FCC what it can and cannot do.

Rather then limit responses to the FCC ... interested parties should call/
write your local Congressmen and Senators, plus those on the telecommuni-
cations committees, and other appendages of the House and Senate that
can affect any change.

>Inner City Broadcasting has no intention
>on doing anything but getting WOWO's annoying 50KW signal out of the way of
>WLIB. They will more than likely pay no attention to the station. Whether
>this means it will fall into financial ruin...I dunno.

What crying was there heard for WBIS? Did anyone file comments against
that transfer? The entire issue is one that should be more clearly
thought about than as an adjunct of WLIB's owners making a "good deal",

>> That's a given with any powerful AM. Try listening to WBZ after
>> dark in, say, Springfield or Pittsfield...same deal.

Or KDKA in the South Hills of Pittsburgh after dark! Somewhat off topic, but nontheless related, has anyone in Western Pennsylvania noticed an improvement in KDKA's signal -- particularly at night recently? I think it was earlier this week that KDKA tore down the "old" tower at Allison Park and replaced it with another of the same height.

Unless I am mistaken, KD was one of the few facilities with a Franklin antenna. Were they able to keep this design through a grandfather clause?

FWIW -- I hope that the change has improved their coverage in the metro. Last time I was up there (in December), they were getting hammered on either side by a mixture of WINS and CFRB and WBZ on the upper end. (Well, at least two out of three were Westinghouse).

>> Because, like KOB, they got bigfooted in the 40s and 50s. KEX is
>> the class I-A on 1190, so naturally WOWO has to protect them.
>> What you don't see from your side of the WOWO sticks is the
>> incredible signal WOWO throws to the east...same way KKOB is
>> a killer signal in California...

Very minor nit...KEX is also a I-B. The protection on 1190 is mutual between the two. (If you were not already aware, KEX was at one time a Westinghouse property). 1190, though, is surrounded by two I-A clear frequencies, with WHAM being the I-A at 1180 and WOAI at 1200.

>> Save 1190 for those of us in the east!

Amen.

: >themselves "98.9 KSRY."

Larry Berger will be programming 98.9. He's told some folks
it will be an urban AC.

: Maybe KSRY should switch to a CHR format. Most of Northern California
: is without a CHR station right now, and KSRY can be heard up to 140
: miles (in Auburn) from the transmitter if atmopsheric conditions are right.
: I can sometimes get LOUD AND CLEAR here in Sacramento. KSRY would fille a
: void now existing in northern California if they did this.

I beg to differ. We have two urban leaning CHRs in San Francisco...
both very successful. if "mainstream" CHR were a viable option,
someone would already be doing it. For a station with a very limited
signal to compete with street smart energetic contemporary
stations like KMEL and WILD 107 would be a silly waste of time.
They need to offer something unusual, something unique , that folks
will actively seek out. Sacramento really doesn't matter to a San
Francisco station.

Here's more stuff I didn't get to in my last post:

*As far as WYSL(1030 AM,Avon)goes,I should also note that they carry Dr.Joy Browne's show off WOR Network,as well as ESPN Radio on weekends(provided they don't sign off first).

*Thanks to Tom Schuh for noting that WBUF-FM(soft A/C)is-or will soon be-Pyramid property. I knew that,but suffered a bad case of brainlock and didn't type it in.

*WGR-AM(550,news/talk/sports;NewsRadio 55)GM Jim Meltzer confirms that his counterpart at WIVB-TV(ch.4,CBS affil.),Tony Kiernan,has asked him about allowing afternoon sports talker Art Wander about doing commentaries on News 4. I asked it before,I'll ask it again: WHY? Besides,he's one of the hosts of "Pros & Cons",a sports talk show on the Empire Sports Network. Don't you think that Empire would be just a little P.O.'ed at this? I would.

*In the Where Are They Now file:

-Chuck Lakefield,former morning man at WBUF-FM(and,most recently,OM and AM driver at WMJQ-FM(hot A/C;Q102)has resurfaced at Rochester's WKLX-FM(oldies,Oldies 98-9)as its AM driver. He's using the name Chuck Lakefield King.
-Trevor Joe Lennon,who did a stint at WMJQ when it was Majic 102,is also in the Rochester area. He does evenings at WMAX-FM (106.7 FM,3.2 kW,progressive rock-or Triple A-format)
-Mike McGowan,who was at WKSE-FM for a few years and left for a job in New Haven,Conn.at WKCI-FM(KC101)-as its midday host and MD(he was also MD at Kiss,but did PM drive),has exited KC101.

*More stuff on the CJXY-FM's(classic rock,Y95)Future Classics:

-There were over 300 entries Ontario-wide,and 50 were selected for airplay.
-The Redeemers,Tom Barlow,Nu Hippies,The Twisters,Tribal Son & T.O.Joker were chosen as the finalists.
-Four showcases were held in Burlington,Hamilton,Guelph and Waterloo.
-Money for the showcases and the Future Classics CD was raised for the Chedoke-McMaster Children's Hospital
-The winner,Nu Hippies,got $10,000 cash,a $20,000 video production, $5,000 in music equipment and a recording session at the Grant Ave. studio.

All for now...

Message-ID: <2o1lcu$sru@vixen.cso.uiuc.edu>
Source record: 40522

Radio news week of 4/3/94

How much would you pay for tickets to see Barbra Streisand? Recently a business owner in Gaithersburg, MD., a suburb of Washington, D.C., bid a whopping $7,900 for tickets to see the superstar when she comes to town next month. Actually, the winning bid will let the business owner and 17 of her friends and coworkers see Ms. Streisand perform. The seats became available when the owner of the Capital Center (a.k.a. The U.S. Air Arena) decided to auction off his sky suite and give the proceeds to the American Heart Association. In addition to the American Heart Association, Ms. Streisand has announced that the People for the American Way and the Whitman-Walker Clinic will each get a portion of the regular ticket sale profits.

>From the anyone-can-get-a-satellite department, WTEM AM 570, is now offering the All Sports station coast-to-coast. The only problem with this arrangement, in my opinion, is the station will have to offer alternative programming when its most popular programs are on the air. WTEM does not own the rights to morning man Don Imus, Infinity Broadcasting does. In addition, Washington Redskins football and Bullets' basketball will not be permitted to go up on the satellite. The station will be able to offer local talent like Tony Kornheiser (Washington Post) and Rick "Doc" Walker (former Redskin and WRC TV sports announcer). The station's ratings have been slow in coming. In the Fall '93 book the station was tied for 25th place overall with a 1.0 rating.

WXTR FM 104.1 (X-tra 104, Oldies) has hired Mike Wolfgang as their new Production Director. Mike used to work at Classic Rocker WCXR, FM 105.9, where he used the name Dan Alexander.

WARW FM 94.7 has hired Mike Kelly to work afternoons at the All Rock'n Roll Oldies station. Mike most recently worked at Classic Rocker WCXR and was working as a fill-in announcer at WQSR FM 105.7 in Baltimore. In addition to his short Baltimore stint, Mike has worked at the following area stations: WBMW FM 106.7 (now known as WJFK), WAVA FM 105.1, WPGC FM 95.5 & AM 1550, WRC AM 980, WEAM and WHON in Hearndon, VA.

Recently departed WWRC AM 980 announcer Jack Spear has already found a new job. Jack has joined the Washington Business Journal as it's on air voice...and face. He now gives live reports each afternoon on WTOP, AM 1500 (News). And he can be seen each morning and afternoon on WUSA TV Channel 9 giving the latest business news.

Congratulations to WRQX FM 107.3's afternoon jock Loo Katz. He and wife Wendy became the proud parents of an 8 pound 11 ounce boy on March 23. Max Katz and his parents are doing well. With a name like Max Katz you just know he'll be on the radio when he grows up.

From: gbsaylin@ucdavis.edu (That Acoustic Guitarist From Davis) writes:
N> We just got a new ROCK only oldies station called The Arro(w?). I
N> know of a similar one in Los Angeles. Could someone please tell me
N> what thier range of music is. I noticed they played some 60s music.
N> Do they do fifties too. Any New Wave oldies by The Police, Blondie,
N> Pretenders. Please give me a good idea of musical range with some
N> examples in the various areas of rock genres they play. Thanks. Whata
N> re they all about?

We have Arrow 93 (KCBS-FM, 92.9) in Los Angeles. They play pop and rock music from the late 60's, 70's and early 80's. No bubblegum 50's do-wop stuff, no "new waive".

A few of the songs they're playing while I'm writing this message:
"Dreams" -- Fleetwood Mac
"Already Gone" -- Eagles
"Let 'Em In" -- Paul McCartney
"That's All"--Genesis
"Rock N' Me" -- Steve Miller
"Takin' It To The Streets" -- Doobie Brothers
"Strange Way"--Firefall
"Southern Man"--Neil Young
"Woman" -- John Lennon
"Sharp Dressed Man" -- ZZ Top?
"Bungle in the Jungle" -- Jethro Tull
"Feeling Stronger Every Day" -- Chicago

In general, a mix of hard-rock (guitar oriented) and softer pop songs is played. DJ chatter is generally kept to a minimum, although there are "be the fifth caller and win a prize" type promotions.

N> I'm going to be in Nassau, Bahamas in a couple of weeks. Does anyone
N> have info on radio stations down there?

The local stations in Bahamas are (from the 1993 WRTH):
ZNS1 1540 kHz Nassau
ZNS2 1240 kHz New Providence
ZNS3 810 kHz Northern Bahamas

There's lots more to pick up from Florida, Haiti, Dominican Republic,
perhaps other Carribean islands (and, of course, Cuba, Cuba, Cuba.)

Source record: 40526

World-wide momentum strong
for digital radio

The Second International Symposium on Digital Audio Broadcasting (DAB) ended with a note of consensus among the majority of the attending countries -- the world is moving to digital radio in the next few years and its implementation is vital to radio's survival.

The symposium began on a strong note when the Honourable Michel Dupuy, Minister of Canadian Heritage, addressed the audience. "Digital technology will allow radio to play a role in the information highway. We are confident that it will revitalize an important segment of our cultural industries, thus reaffirming the vital contribution radio makes to the Canadian economy."

Minister Dupuy commented favourable on recommendations made by the Digital Radio Task Force, such as:
- priority access to new digital radio band by those stations already in business at the time of the transition;
- the establishment of a timeframe for implementation that is short enough to maintain the momentum, and to create a critical mass so that digital radios can be brought in rapidly;
- the opportunity created by digital radio in opening up new markets for broadcasters such as pay radio and datacasting.

Canadian broadcasters were very pleased with the Minister's remarks, and international delegates were given a useful model for their own introduction strategies.

Symposium co-chairs, Michael McEwen (Senior Vice-President, Radio, Canadian Broadcasting Corporation) and Michel Tremblay (Executive Vice-President, Canadian Association of Broadcasters) stressed the importance of directions taken at the symposium and the need for a strong commitment to digital radio.

"Many countries, like Canada, have formulated very aggressive plans to introduce DAB within the 1995-97 timeframe in order to rapidly benefit from the technical and business potential of the new technology," said Tremblay. "If there is one overriding objective we should set for ourselves at this symposium, it is to achieve maximum harmonization of our respective plans for the introduction of DAB."

Michael McEwen also encouraged international programmers to "seize the opportunity" that digital radio technology affords.

"It is simply not good enough to say that we are going to duplicate our existing services on this new transmission technology. The ultimate success for radio in the new multimedia world will be found in how we exploit this new technology to the consumer's benefit in providing additional services, imaginative programming and relevant information."

Michael Binder, Assistant Deputy Minister, Industry Canada, stated that the Government of Canada views digital radio as one of the wireless components of the information highway. He reaffirmed the government's commitment to support the broadcasting community's efforts to implement digital radio in the short term.

"At a time of such rapid technological development the time slots for visionary technologies are not open indefinitely." With those words, Franz Masson, from the Federal Ministry of Posts and Telecommunications, Federal Republic of Germany, urged the delegates to "just get on with it..."

According to the Director of the European Broadcasting Union, George Waters, the symposium was an outstanding success, as evidenced by the many European broadcasters who intend to introduce pilot services. "This means that DAB will have established a significant base before the year 2000."

Francis Tellier reiterated Radio France's commitment to introducing digital radio in 1996, using a global approach that includes the production of new programming.

Speaking as a Canadian broadcaster, Michael McEwen stated: "It is my view that Canada will opt for the best, most efficient and most cost-effective technology that best enables broadcasters to serve our listeners and markets."

In their concluding remarks, the symposium co-chairs noted that while many important deliberations still lie ahead, it seems certain that the radio industry is off to a bold new start as it enters the 21st century. They also pointed out that there was general agreement that wide-band technology should be adopted as the world standard. And, recognizing that quality alone will not sell digital radio, they emphasized that the added value of data services will enhance the new technology for the consumer.

Michel Tremblay summed up the mood of the event: "The symposium has confirmed that the world is now on a roll toward DAB."

Delegates from 25 countries gathered for this event which featured over 85 international presenters and speakers. Delegates and presenters alike face some of the most important considerations in the history of radio technology, as they work towards establishing world standards and developing coordinated national strategies for the introduction of digital radio in

their respective countries.

The Second International Symposium on Digital Audio Broadcasting
was held in Toronto from March 14-17, 1994.

1172. Directional Trend?

Newsgroup: rec.radio.broadcasting
Date: 1994-04-07 19:03:06 UTC
From: Mark Roberts <transvox@tyrell.net>
Message-ID: <2o1lda$stb@vixen.cso.uiuc.edu>
Source record: 40527

There seems to be a trend toward stations giving up nighttime directional authority.

So far, I've identified KCNW (1380, Fairway, Kansas; KC market) and KBCO (1190, Boulder, Colorado) as two such stations.

Now I've heard that KGNO (1370) in Dodge City, Kansas has gone back to 250-watt non-directional nighttime service. This is what KGNO had back in 1941 when it had to change frequency from 1340 because of the Havana agreement. For many years, it has had 1 kW, with a nighttime DA.

Btw, KGNO is Dodge City's only fulltime AM station.

This is an interesting trend. Are AM stations deciding that the nighttime coverage isn't worth it financially? Does anyone on here have some additional insights?

Hello Radio,

I was thumbing through the WRTH satellite broadcasting section
and I noticed numerous digital radio entries. Can you discuss
with me the technical aspects of this medium or point me in the
direction of other sources of information on digital radio data
formats ? Many Thanks.

Best Regards,
Matt Bye

1174. Re: Jesse and Gene

Newsgroup: rec.radio.broadcasting
Date: 1994-04-07 19:03:13 UTC
From: Juan Soto - BBMD/F93 <jsoto@acs.ryerson.ca>
Message-ID: <2o1ldh$suo@vixen.cso.uiuc.edu>
Source record: 40529

Actually I'm still having trouble so here's what I wrote:

There has never been a funnier duo on the Radio than Jesse and Gene.
These self proclaimed "Knobs on the radio" are the Kings or at least
princes of Morning radio in Toronto. Broadcasting on AM band, they have
at least 1/4 of the city listening in(1 million listeners at their peak).
What's their gimmick? Themselves. Their show is nothing but TalkRadio,
except for a song every half hour. Their dialy ritual begins at 5:30am,
this is their warm up, the talk about any topic that springs to mind and
what usually springs is below their belt...they usually converse in a less
than appropriate language. They harass callers, call places overseas or in
the U.S., the make fun of other Stations in the City...All in Good homesome
fun. Jesse Dylan, the distinctive lead in the show, always has something
halarious(sp) to say or do and Gene is always there to describe and ridicule
him if Jesse screws up, and Vice versa... The chemistry of the duo is
profane, and usually that's what comes out of their mouths. Don't get me
wrong they aren't always this bad, they have The Jesse and Gene
Foundation to help the less fortunate during Christmas and other times,
they help people on the air...just recently they help a Teen in Colombia,
by arranging a wheelchair for him through their listeners. and As Both
J&G say " we've got the best listeners in the world" and they do.
Because the best deserve the best...Their so popular that the Prime
Minister elect of Canada (at the time)Jean Chretien sat in with them one
morning. This Posting does not do them justice...
You would have listen in on AM 640 between 5:30 and 9:00am, to laugh your
rear off... these two can only be found in Toronto Canada...They'll have a
CD out soon produced by Sony. It's a compilation of their practical jokes,
songs, and humuorous segments.

As Jesse And Gene say " their siamese twins joined at the rear"
They preach good health and excercise, they try to entice (sp) people to
do strange, unusual things and they almost had a newsroom person scratch
his crotch on the air live for $640, but he declined saying that money
doesn't buy everything...You'd never hear about them after 9:00am because
everyone just shuts off their J&G filling but come 5:30am the next day
their tuned in to am 640 for another helping.

They also have a heaven 11 T-shirt. This t-shirt is composed of 11 words
or sayings that were somewhat banned by their boss for fear of a R.C.T.C
(or something like that) shut down. All the proceeds go to C.A.S.A, a
charitable organization, Children Against Sexual Abuse.

They may be a Rude Crude duo often but they always pull you in with their
warm hearted acts. They balance out well...

****
If you can somehow post this, I hope you do.
if you need anything else feel free to e-mail again.

No idea if it's in the Twin Cities, but the show originates from KTVU-TV (!) in Oakland, CA (yes, a TV station's audio facilities are hosting a radio show). You could probably find out by calling them, or by calling his toll-free on-air number, 1-800-298-TALK, between about 4 and 7 PM PDT.

The show airs here in Sacramento on KSTE-AM 650.

>From everything I've read, this incarnation of the station actually had some success. What happened? Just didn't make enough money?

Experimental or mixed type formats fascinate me. I was in the middle of one of them... when I worked at 95.9 WAX-FM Youngstown, OH (legally WAXF Sharpsville, PA, current incarnation is WHTX "The Bandit/Q96"), we were playing a mix of country and rock. The idea was to play stuff that was compatible with each other... a lot of rock-influenced country, upbeat newer stuff mostly, and about 20-30% country-influenced rock. We were actually picking up some minor ratings gains in late 1991 until the owner ran out of money and WAX-FM was history.

>From what I remember at the time, WAX-FM was one of the first stations in the country to try this format... anyone else have any other country/rock station examples still out there?

In article <2idoor$17i@vixen.cso.uiuc.edu>, RIOTGIRL@orange.cc.utexas.edu writes:

"What is the proprietary status" of taped broadcasts of interviews, conversations,
etc?
I think you're going to find out that once something is either broadcast, or re-
corded for broadcast, it becomes the property of the producer (if he or she is an
independent contractor) or the originating station or network (if it's a regular
or special program produced in-house by staff). I've checked...I know that all segments of my daily show are in fact the property of the company that owns the radio station I work for, and issues and signs my paycheck. They can't be resold, rebroadcast by another station (even out of market) or duplicated except for personal aircheck/archive, without the station's permission. I had a few classics
I wanted to market outside our coverage area, checked on it, and found out it couldn't be done without the station's OK.
If you're talking about sound clips or drop-ins from other shows used for sound effects or comedy bits, there are services that record these and market and furnish them for broadcast (usually at low cost)...but longer show excerpts are another matter completely. You can't even market your own in-house produc-tions, or carry them from one station to another, without the OK from the station
where you produced them. Hope that doesn't put a crimp in your plans...

For the person looking for info on Bahamas radio, there are 4 stations.

ZNS-1 (1540/107.1) -- Nassau (AM: 20 kw/FM: ?) ZNS-2 (1240) -- New Providence (1 kw) ZNS-3 (810) -- Freeport (1 kw)

My father went to Freeport a few years ago and borrowed my digital walkman. It came back with 810 tuned in. As rent, I got a stack of stickers from ZNS-3 and ZNS-TV (channel 13). Have fun!

KCWS-102.7 Merkel TX (Abilene) switched from country to a hit country/classic rock format last year as "Rockin' Country West 102." It is kind of strange to hear Billy Ray Cyrus/"Heart Of The Woman" lead into a Foreigner song. I notice that new country outlets KTST-101.9 Oklahoma City "the Twister" and KGTR-106.7 Port Sulphur LA (New Orleans) "the Gator" also use the "Rockin' Country" slogan, but I've never heard any rock on them.

KCDQ-102.1 Monahans TX (Midland/Odessa), at last check, also was rock/country mix "Texas 102."

Higher land prices? This is the way it's been in California where the property is worth far more than the station. However, a station in San Jose on 1370 is coming back soon with a totally re-engineered directional array, going from a 3-tower array to 4 towers...HOWEVER, they're piggybacking on another station's towers since it is simply too expensive for them to set up a new site. Maybe it's this way in Kansas now? I know a directional station with xmtr in Vancouver, Washington. The only reason they haven't shut it down and turned it into apartments is because the owner is taken by the "power" of radio.

Well Bruce didn't go back to small market radio ...
In the 80s Bruce worked at WYNY New York, at a time when, according to
a New York Times article on the station,
the computer would turn on the announcers microphone for ten seconds
and then turn it off...

Maybe thats why some announcers become morning men or talkshow
hosts, to avoid some of these restrictions.

TONY AND DEE JUMP

Tony Matthews makes the jump to his fourth station in the Rochester, NY market as a morning host as he and partner Dee Alexander move from WVOR "Variety 100.5" to WRMM "Warm 101.3." Teamed for the last seven years, Tony and Dee announced suddenly last week after returning from a WVOR-sponsored Caribbean cruise with listeners that they were jumping to American Radio Systems-owned WRMM. WVOR is owned by the Lincoln Group, Ltd., who also operate WHAM 1180 AM, WHTK 1280 AM, and WEZO 93.3 FM in the Rochester market.

Matthews was formerly the morning man on WCMF 96.5 FM and WMJQ 92.55 FM (now WBEE.) WVOR has begun a nation search to replace Matthews and Alexander. WRMM was 5th in the last Arbitrons; WVOR was number 6.

WHAM APPOINTS NEW N.D.

Randy Gorbman is the new News Director at 50,000 watt WHAM 1180. The station has begun a new promo campaign on both itself and sister station WHTK calling itself "News Radio 1180 WHAM" while continuing to promote itself as "Rochester's News Leader." Gorbman says in a spot introducing himself to the market that he wants to make the news coverage "more contemporary."

WCMF-AM TO BROADCAST INTERNATIONAL LEAGUE BASEBALL

WCMF and the International League Rochester Red Wings (AAA affiliate of the Baltimore Orioles) have announced that WCMF 990 AM will carry the team's games with play-by-play by Josh Lewin and Glenn Geffner. For the last several seasons, the games were carried on WPXY-AM (now WHTK). WCMF mostly simulcasts the FM side, but also carries Pete Rose's syndicated show and Buffalo Sabres hockey.

: Is there a station airing radio theatre in your areas?

KUSF, 90.3 in San Francisco airs "Shoestring Radio Theatre", a series of locally-produced radio plays. I don't know the schedule, but it's a half hour once a week, possibly on Wednesdays. Call them for more info.

KSFO, 560 in SF airs "When Radio Was" hosted by Art Fleming of early Jeopardy fame. They also air another series, hosted by some guy sho sounds more like he makes his living owning a furniture store. Anyhow, both series have a mixture of comedy, variety, and drama from the 1940s. KSFO airs this on Saturday and Sunday nights and overnight.

One minor correction: Bob Nelson implies that KEX was once a Westinghouse property. I wish it were...but my logs show it as having been owned by the "Western Broadcasting Company" into the mid-30s...then by the Oregonian Publishing Co. (the Portland Oregonian newspaper) from the mid-30s until 1962, then by Gene Autry's Golden West Broadcasting into the 70s...and by a variety of owners since. I will gladly accept the point of correction that KEX is also a I-B. BTW, KEX was one of the many stations that RCA managed, in a sort of a proto-LMA, in the late '30s (others included KGO San Francisco...and I'll think of more later on.)

I _think_ the only example of one company owning two Class I AMs on the same freq was GE...back in the days when they owned 790, and later 810, with KGO San Francisco and WGY Schenectady. Maybe Mark Roberts can lend some insight into how his hometown KCMO got caught in this "GE sandwich" and crushed out of the 50kw it might have deserved...

One other thought that's come this way: Any attempt to reduce WOWO's power or pattern to the east might also require a new transmitter site...or a change of city of license! WOWO's current transmitter site is on the south side of US-24, in the community of Roanoke, about 15 miles or so west of Fort Wayne (and about 10 miles east of Huntington). 15 miles is a decent distance for a nulled 10kw to have to travel at night...so it's conceivable Inner City might have to rebuild the transmitter array closer to the city (or maybe south of the city beaming north) if they're serious about this. Anyone else besides me actually been out to the three towers in Roanoke?

And finally for this post...let me restate my chief objection to this mess. I agree that a weakened WOWO would still be able to serve Fort Wayne and the immediate area well (with the one caveat noted above.) I'll buy Jim Grey's argument that I've drawn WOWO's sphere of influence too far out. So it all comes down to this: I don't want to see 1190 become yet another QRM-filled frequency out here. Whether or not WOWO provides a _unique_ service to the areas outside northeast Indiana, it at least provides a _distinctive_ service at the 1190kHz spot on the dial. It's more than just noise... and it's NOT Talknet or Sports Final...and therefore it's another choice at night. And I don't want to see that choice replaced by the noise of three different lower-powered signals fighting it out.

Oh? How does this explain all the stations licensed during the late 20s
through the late 30s with powers of 50 or 100 watts? KPPC in Pasadena is
one of the oldest, still using 250 watts, and they were authorized in the
late 1920s. There are countless other examples of early local service.

: Is the "clear channel" concept still valid?

The top 3 radio stations in the SF Bay Area (#4 ADI) are KGO, KCBS, and
KNBR -- all 50kw clear channel AM stations.

I've been sitting on the sidelines, resisting the urge to get involved in the whole WOWO/WLIB debate, and the various conspiracy theories being offered on AIRWAVES. However, a couple of particularly thoughtful responses in Issue #578 have convinced me to toss in my $.02.

Jim Grey writes:

>> I grew up in South Bend. I have family and friends there, in southwestern
>> Michigan (Dowagiac/Edwardsburg/Niles, I think all within the
>> Kalamazoo-Chicago line of your WOWO boundary), in Fort Wayne, in and near
>> Indianapolis.

>> An uncle who lives in Fort Wayne might listen to WOWO. A college chum
>> from Wabash, IN, identified with Fort Wayne as "town" and tuned to WOWO. I
>> suspect Angola, IN and a whole bunch of tiny towns like it which look to
>> Fort Wayne as "town" probably listen to WOWO, too.

>> [other material about real vs. potential reach of WOWO]

I grew up in Michian (near Lansing)...not as close to Fort Wayne as Jim, but definitely within the WOWO nighttime contour. I also had/have relatives who live in Indiana.

I have fond memories of tuning the dial over to WOWO in the 60's and 70's, hearing one of the well-programmed, well-run powerhouse AM stations that seemed to be the rule back then. It helped turn me on to radio.

But there are other concerns in the 90's:

George F. Davison, Jr. writes:

>> "Clear channel" stations were created to
>> serve broad geographic areas, during a time
>> when commercial, broadcast radio was new
>> (experimental?), when it was very difficult
>> to get a license, and when the public in
>> remote areas demanded access to the radio
>> network programming that could be received by
>> city dwellers.

That's my understanding, too, although I haven't studied it. In any event, we know that the 50kw giants came about at a time when there were far fewer stations out there, and reception conditions were far different than today. Take a look at an old radio dial sometime (the kind with "presets" for various stations, or with reference points painted on the dial); you'll see heritage calls from all over the country...even though that set was used in ONE place.

>> The 50,000 watt stations were still
>> there, but they, too, recognized that they
>> had to serve their community of license. The
>> network revenues and programs weren't there.
>> The 50,000 watt stations, too, had to sell
>> local advertising (if they were lucky and had
>> a good farm department, they were one
>> significant leg up). To survive in today's
>> market, the 50,000 watt station had better be
>> good in its local market (ADI), and it had
>> better have a niche. It cannot survive just
>> because it is the 50,000 watt, clear channel
>> voice of wherever.

This is really the key issue. Like tail fins, cheap hamburgers and cocktails at lunch, clear channel stations that ruled their markets by virtue of their very bigness or regional focus are a thing of the past. Real-world real-time reality in the communications marketplace of 1994 dictates that you need to find a niche, and you need to do so in your city of license...period.

Even though I live in one of the markets still dominated by a heritage station (WCCO), its slippage is obvious -- and so are the various desperate measures being taken in a vain attempt to hold on to a share in the double-digits.

The bottom line is this: There are a LOT more stations now than in 1934. There are a LOT more options for information, entertainment, companionship -- the roles that clear-channel radio used to play. Even though a 50kw station might have a slight edge in its metro area, the majority of listeners can be served as well or better by 5kw regional stations or even (gasp!) FM.

That's the reality -- and no amount of letter-writing to the FCC, station owners or anyone else is going to change that.

Despite my fond memories of WOWO, and my gratitude for the role it played in getting me into this crazy business, I won't be picking up my pen to support this quixotic crusade.

That said, I wish the rest of you all the luck in the world...

WLW never ran 750 kW ... they ran 500 kW from 1934 to 1939.

Several other stations applied for 500 kW "superpower" ... none were
ever authorized or built.

Of course, in Mexico ... some of the border blasters got as high as 850 kW.

another time.

I don't recognize the WBIS call letters...before my time?

I probably will never hear WOWO again, unless I travel back to Ohio, so it really doesn't make a difference to me personally. I'm just concerned about the implications on stations in the future.

Heck, if I thought duopolies would lead to better run stations... ;)

Message-ID: <2o55s5$dq8@vixen.cso.uiuc.edu>
Source record: 40451

>From North County San Diego:

XETRA's Jim Rome nightly sports show was delayed Wednesday by 20-minutes. The sportscaster was doing his nightly ESPN2 gig, and called ex-LA Rams Jim Everett "Chris," as in reference to the tennis star. Everett knocked Rome off stage in an on air scuffle. Camerapersons and reporters crowded the LA studios of XETRA sports.

KOGO-AM 600 (5kw U) talk line up was announced in the Escondido Times Advocate, on Friday, April 8. Here's the line up:

Time Talk Show City of Origin
---
5 a.m. 9 a.m. Don Imus New York, WFAN
9 a.m. 12 p.m. G. Gordon Liddy Washington D.C.
12 p.m. 3 p.m. Dave Dawson local, San Diego
3 p.m. 6 p.m. Peter Weissbach local, San Diego
6 p.m. 9 p.m. Michael Reagan Oceanside CA (from satellite)
9 p.m. 11 p.m. Raul Lowery Contresas Oceanside CA (from satellite)
11 p.m. 5 a.m. Art Bell Las Vegas, NV

weekends will include Morton Downey Jr, from 3 p.m. to 6 p.m.

The promos on the station call it "Hot Talk." KOGO has stiff competition from KFI AM 640, KSDO 1130, and KCEO 1000.

Thanks!

/* Written 9:02 am Apr 8, 1994 by ncra in web:amarc.radio */
/* ---------- "CKIZ FM on critical list!" ---------- */
CKIZ FM SCHEDULED TO CLOSE DOWN

It appears we have a critically ill member of the family. We have just learned that - unless some miracle funding source appears - CKIZ FM in Pincher Creek, Alberta will cease operations on April 15, 1994.

CKIZ is Canada's only rural based anglophone community radio station. The station has been struggling to maintain a funding base since the Government of Alberta cut funding through it's youth initiatives program about three years ago.

For the past year CKIZ has been kept afloat through a number of small grants, but those funding sources have dried up. The Board of Directors voted at a special meeting last week to cease operations on April 15.

Here's hoping for miracles!!!

1198. San Jose's 1370

Newsgroup: rec.radio.broadcasting
Date: 1994-04-09 03:02:32 UTC
From: john@bovine.ati.com
Message-ID: <2o55s8$dqd@vixen.cso.uiuc.edu>
Source record: 40453

Before the end of April, 1370 KHz will once again be active in the SF Bay Area. Still owned by the same partnership that owns KBAY, the new call letters will be KKSJ and the format will be a "nostalgia" variant. I called it "KBAY, circa 1968" in front of the GM and got a nod of acceptance. Sean O'Callahan will be the "morning drive" personality. The format will be locally selected and produced. A great deal of effort has been expended in finding material on CDs. A massive digital storage system will actually do the audio presentation.

The transmitting plant is brand new from the STL to the towers. The transmitter is a Harris DX10 (running at 5KW) with a brand new Harris stereo generator. Phasor and ATUs are all brand new from Kintronics. After a massive face lift to the site itself, we have installed the plant and will co-exist with KSJX on the four tower farm. It is a DA-1 (same pattern day and night). Ninety-eight percent of the construction has been completed. All that remains is some final connections and the laying on of hands by the PE.

The previous 1370 manifestation, KEEN, went dark on 12/31/92. The transmitter property had been sold years before to a redevelopment agency who finally wanted to build. Negotiations with the city of San Jose for space near the sewage treatment plant were not yet concluded. After the final sign-off, I carted away everything of value (like the MW5 transmitter, Generac standby plant, etc.), and waited for the go ahead to contruct the new facility near Alviso.

Unfortunately, some people in a trailer park about a mile away from the proposed site hired themselves a lawyer and complained about being irradiated by the proposed radio facility. Rather than show any backbone, the gutless and feckless San Jose city government chinsed out on its deal with KEEN. It was much easier to pay KEEN the $500,000 (of taxpayer money) to welch on the deal (written into the contract) than it was to stand up to the trailer park voodoomeisters.

Negotiations failed at KSJX and there were plans to diplex at KLOK's facility (even with a serious power cut). However, KSJX's engineer and I did some fast footwork and re-ignited the KSJX arrangement. We got the CP in mid-February and have done what is probably the fastest AM construction job in radio history.

So now it is going to happen. If this format and station survive (the first to come back after going dark under the same ownership), it will shake up some common wisdom about the non-viability of AM music formats. We are going to do everything as well as it can possibly be done. The technology is first class. The programming has been done with great care.

Shortly will come the acid test...

Here's a useful resource for anyone interested in developments in low-powered radio. Free Radio Berkeley has designs for FM radio transmitters from 1/2 watt to 35 watts. They will soon be adding 75 and 150 watt FM amplifiers, and transmitters for AM, shortwave and television.

Stephen Dunifer can be contacted at frbspd@crl.com for more information.

bg

Forwarded message:

> Date: 04-07-94 (16:03)
FROM: FRBSPD@CRL.COM, Stephen Dunifer
SUBJECT: Free Radio Berkeley FTP Site

We have established an FTP site with our net service provider - CRL. By the first of next week it will have schematics, board layouts, antenna designs, legal info, and more available on it.

The FTP address is: crl.com:/ftp/users/ro/frbspd

You are encouraged to post info there as well.

We would llke to know what formats would be preferred for the schematic and board layout files. By default these will be postscript, eps and DXF. Are there any other formats that would be needed by anyone ?

Thanks

Stephen Dunifer

1200. Resp re: KGNO to 250w ND/N

Newsgroup: rec.radio.broadcasting
Date: 1994-04-09 03:02:39 UTC

Mark Roberts is correct re: KGNO (AM)/Dodge City, KS reverting to 250w ND/N. I was KGNO's GM 1979-1987, and have knowledge of that situation. Our ni

KGNO's night-time facility, 1kw DA/N was, frankly, a dog. The 3 tower array produced a 4-leaf cloverleaf pattern, with lobes aligned essentially from magnetic north. The close-in communities which SHOULD HAVE received night-time service were, unfortunately, in the nulls.
I cannot COUNT the number of times, during "tornado weather", we reverted to daytime facility under emergency conditions (R&R 73.1250 or whatever) of 5kw ND in an effort to serve communities 20-30 miles distant. I even delegated permission to operate under 73.1250 to board ops, if you can believe that.
The new owner, Larry Steckline, had to move the AM facility, done earlier this year. Inasmuch as the prior night-time authorization didn't EVER adequately serve any community other than Dodge proper, I can fully understand the economics of the decision to provide 250w ND/N service. One tower, for several reasons, requires MUCH LESS maintenance. Also, a non-directional facility certainly sounds better in stereo, should the current owner ever decide to make that move.
While on the topic of Dodge City radio, after KGNO/KDCK sold in '87 and I lost my job, I had the rather depressing duty of going across town to Alf Landon's KEDD (AM), 1kw DA/D, and taking 'er dark. In the '60s and '70s, KEDD, with a rather progressive Top 40 format, used to beat the pants off of KGNO. But, it was the typical daytimer deal, and KEDD over time became a non-issue, what with FM, etc.
I was the last employee Gov. Landon ever hired. What a HOOT to drive to Topeka to meet with The Governor.
Nowadays I'm a freelance technical writer and KCUR newsdepth producer in Kansas City, and scout feature stories for Radio World, as midwestern correspondent. Email me with story ideas!
Best!

Was talking to my dad a few days ago and he told me the three-tower AM array for WCEN in Mt.Pleasant, MI is no more. Located on Bluegrass Road in the south end of the city, the towers and studio/transmitter building have been torn down to make way for a new jumbo discount store. The location was "way out in the country" when the station was built, but is primo commercial property these days!

He spoke to the current station owner, who said that the FM signal is on the air from a 1000 ft tower (I believe he said) north of town somewhere. The AM signal will be returning daytime-only from a single tower. Formerly, AM was omni directional daytime and directional at night. Apparently it isn't economically feasible to support nighttime AM programming -- probably a common problem among many AM outlets these days!

The former three-tower directional array went up in 1951, replacing a single shunt-fed 300 foot self supporting tower. He mentioned the foundation for the old 300 footer was still there -- and the only other things left on the site last week were the foundations for the three towers and the demolition debris from the building. Dad was chief engineer at WCEN back in '51 when the directional array was built. He tuned the system and put it on the air.

1204. WOWO

> it's NOT selling nighttime spots to New York City advertisers, or to
> Boston advertisers, or Toronto, or Buffalo, or wherever. WOWO's got
> to pound the streets of Fort Wayne to make a buck.

Last time I checked, people in all these places drink Coca-Cola, drive Fords, eat at McDonald's, etc., etc. So it is theoretically possible for WOWO to sell advertising of regional or national interest, presumably to pay for programming of regional interest.

I guess the discussion of whether or not the high-powered stations should have their regional footprints protected has gone on for years, since the FCC first began allowing encroachment on the "clear channels". It seems to me that it ought to be handled on a case by case basis. If the current owners of WOWO appear to have no interest in serving listeners outside Ft. Wayne, then they leave themselves vulnerable to encroachment, and this is as it should be. If their programming is clearly of regional interest then they have a valid reason to object to reductions in their service area.

While I haven't spent any significant time listening to WOWO in many years, I am familiar with other good and bad examples of programming on other 50KW stations. I have posted before about WHAS and their high quality programming which is of interest to listeners over a wide area.

Jacor recently bought WKRC (550) and renamed it to WLWA. WKRC had previously been on the Ohio State sports network, and so, presumably, Jacor inherited the rights to the OSU broadcasts. In December of last year, Ohio State sports disappeared from WLWA. So I tuned up to WLW thinking they might have moved there, since WLW is higher power and there is regional interest in OSU sports. WLW was broadcasting a basketball game, but it was Xavier University! So, rather than broadcast a team that clearly has regional interest, they chose to cover a local school that is known and followed by significantly fewer people, and for which there is little interest outside the Cincinnati area.

Thumbs up to WHAS, thumbs down to WLW. WOWO fits somewhere in this spectrum, and I have enjoyed the discussion of it here on this group.

Hey, now...

I guess now we can get into a debate about whether commercial radio stations
or sports complexes serve the public better. :)

My vote, living in Cleveland (which has a new baseball stadium and basketball
arena and no radio stations which perform any real community service, except
possibly the local public radio station) would be "Sports complexes."

Glad to see that Ed Trefzger has stepped in to take over the Rochester area-it reduces my workload a bit.
To add a bit to his post of Tony Matthews and Dee Alexander jumping from WVOR(Variety 100.5)to WRMM(Warm 101):WVOR recently took legal action to prevent 'RMM from using the phrase "Tony and Dee in the morning" to describe their show. (Gee,I wonder if the duo will do what David Letterman did...:)) Also of note:WPXY(CHR; 98PXY)recently wrapped up the B.O.Sphere,a contest where 3 people (all men,BTW)tried to see who would last the longest in order to win a new car. They only got about 7 minutes every 3 hours to do their duty,whatever was brought in the car stayed there,and no entertainment was allowed(not even a radio). All three lasted over 250 hours,so they drew straws to see who'd get the car. WKSE (dance-based CHR;Kiss 98.5)did the same thing last year,except they called their event B.O.Geo,held during the Erie County Fair. Two held out until the Fair's end,and the man-gallantly-gave the car to the woman,taking the trip that was the runner up prize.

Back to my neck of the woods:

*Seems WGR midday talker Rich "the Bitch" Michaels(which is how I will refer to him until he improves his 'act')doesn't know when to shut up. On Thurs,he got upset at a representative of the N.Y. Civil Liberties Union(who had said that he'd hate to sound like anyone else on the station),going on to insinuate that the ACLU only defends the downtrodden of our society. Does he know that the group has defended neo-Nazis and Oliver North in the past,and that former President Eisenhower was a member? Guess not.
He also may have other problems to deal with. A letter circulating among Jewish groups in the area(which I was alerted to by Karen Welch, the NYCLU executive director in the area)takes him to task for alleged anti-Semitic remarks.(I haven't seen it yet,but I'll post it when I do.)
Personal note:Rich,you may have a lot of people in this market fooled-I'm not one of them.
(Also:I've heard Mark Shneyder refer to WRKO's duo of Clapprood and Whitley as lame. That they may be(and yes,I did watch the C-SPAN simulcast)but I'd rather listen to them than this buttmunch(for all you Beavis & Butt-head fans out there).)

*The death yesterday of Nirvana lead singer Kurt Cobain led CHTZ-FM(97.7,100 kW,album rock,97.7 HTZ FM)to dispense with their regular format through most of the day,with the majority of its music interview show Music Notes at 6 devoted to calls & music from the group. PM driver John 'Gonzo' Mark took calls,as did the Music

Notes hosts,Kristi Knight(also its night jock)and someone else. Most of the calls were expressing sadness and shock,although during MN, someone called in and asked what type of shell was used. He got cut off and dissed very heavily by Knight,who called him an "asshole" and an "ignorant dick"(or something close). (Keep in mind,Canada is a bit looser with on-air language than the U.S. is.) They also opened up the phone lines at 10pm to continue. Neither WGRF nor WUFX(to my knowledge)did this. (I can only wonder how Rich"the Bitch"would handle this...)

*Finally,CKFM(99.9;contemp.mix(?),50 kW;Mix 99.9)is now airing the David Letterman Top 10 list during its morning show.

Also,the ratings will be coming out in about 2 weeks-when I get 'em,you'll get 'em.

b.j. mora (jmora@netcom.com) wrote:

: _Radio & Records_ this week (4/1/1994 issue) drops 'New Rock' moniker
: and splits it into 'Alternative' and 'Progressive.'

: Progressive seems to equal "Adult Album Alternative"; top artists
: are Bonnie Raitt, Bruce Cockburn, Elvis Costello, and Crash Test Dummies.

Ignore the trades. They're clueless. "Progressive" radio never went
away...

All this jargon is ridiculous. AAA, AA, NAC, PAC, "New" Country and
"New" rock...

Often, stations that have *nothing* in common are lumped together
because the trades feel a need to label them. Labels are
counterproductive. A good,accurate positioning statement, on the other
hand, is vital. But positioning statements are for listeners, not
for clueless category-mongers at the trades.

"the only reason they haven't shut it down and turned it into apartments is because the owner is taken with the 'power' of radio."
I'm not sure the loss of a station that just rebroadcasts a satellite service and
makes no attempt to connect with and serve its community, is a loss worth mourning. Frankly, I wish more of them would get the hell off the AM band and leave room for those of us who ARE serious about service, to spread out and serve our metro areas better. The listening public would be, on the whole, much better served as a result.
Case in point; on our frequency (1370) there's now at least one station east of us offering no local nighttime programming, but just regurgitating satellite pap that duplicates music formats heard more clearly in their area on FM. They draw no audience, and serve no purpose except to restrict our ability to serve OUR town with the only nighttime local talk programming available in a metro of over 1.1 million people--all because we have to protect their signal. We
have been able to loosen up our own pattern somewhat to improve our nighttime coverage in recent months, and that has helped...but no question, if that station went off the air after dark it would lose no significant audience or money, and parts of our metro WOULD gain service. We do well even with the restriction in the east-west axis of our nighttime pattern, but couldn't stations which are serious about round-the-clock regional service do better for the public if some of the deadwood DID clear off the band and make room?
(There's another station to the west of us in Toledo, Ohio which also forces us to restrict our nighttime radiation in that direction, but we certainly can't complain about them because they are a quality operation and a genuine community resource in their town, as we are in ours. Stations like that earn their right to their fair share of the channels they oc-
cupy.)
A station's place on the dial isn't a right...it's a privilege gained by promise of
genuine community service, and earned by continued service.

Here's what's happening in San Diego:

XETRA-AM sports reporter is working two jobs, with the San Diego kick-off of Prime Time sports network. She'll do her reporting for radio and television.

XETRA-AM (690 50kw, U, Tijuana, Baja California) has landed the Sunday night rights of CBS baseball. Both KNX, 1070 Los Angeles, and KFMB-AM 760, San Diego, passed on the broadcast rights. To hear CBS Radio Baseball, in southern California, it's the mighty six-ninety, XETRA. The station is still looking for a major league team to broadcast -- and wants to be the flagship station.

KMPC, 710, (50kw-d, 10kw -n), Los Angeles, personnel are looking for other sports jobs now that Cap Cities/ABC will take over. Joe McDonnell, who broke the story about Magic Johnson to the national media was looking at joining XETRA-AM all sports format, but has called 690s Lee Hamilton, "Garbage wrapped in skin." [looks good on a resume to bash the potential employer!]

The dismantling of once great KFMB-AM and FM continues. The trioply (including radio w/pictures channnel 8) continues to lay personnel off. Mike Trussel, who was doing sports, was told to clean out his desk on Friday. The station management is merging resources of all three outlets for one news, sports and weather team.

KGB-FM 101.5 FM Dawn Patrol will be broadcasting from several sights around San Diego county the next couple of weeks. Friday, the 'patrol was at the El Cajon Park Place, giving out T-shirts, and tickets to see "Pink Floyd" at Jack Murphy Stadium. The show, sold-out, has been a popular give-away on at least two other stations: KKOS, Carlsbad 95.9, and XETRA-FM 90.1 (91X).

: One minor correction: Bob Nelson implies that KEX was once a Westinghouse
: property. I wish it were...but my logs show it as having been owned
: by the "Western Broadcasting Company" into the mid-30s...

Is this right? And to think that all these years I'd heard that KEX was a Westinghouse station. As to the Oregonian's ownership, are you sure of this? I know the Oregonian owned both KOIN (in the 1950s and 60s) and KGW (built it I'm told) but I've never seen KEX as one of theirs. I always thought the reason KEX has such a superior facility was because Westinghouse had built it. Hmmmm...now you've got me thinking...

: point of correction that KEX is also a I-B. BTW, KEX was one of the
: many stations that RCA managed, in a sort of a proto-LMA, in the
: late '30s (others included KGO San Francisco...and I'll think of more
: later on.)

However, NBC did at one time own KGO, though it doesn't seem like very long. This was during the period they were at Radio City (420 Taylor Street, now vancant and formerly KBHK channel 44). And of course, in 1943 KGO was spun off with other NBC Blue stations into ABC.

So let's see if I have this right...

550 WCKY (ex-WLWA, ex-WKRC): owned, programmed, and sold by Jacor.
700 WLW: owned, programmed, and sold by Jacor.
1360 W??? (ex-WSAI): owned by a lawyer, programmed and sold by Jacor.
1530 WSAI (ex-WCKY): owned by a lawyer, programmed and sold by Jacor.
92.5 W??? (ex-WIMJ, ex-WWEZ): owned, programmed, and sold by Jacor.
102.7 WEBN: owned, programmed, and sold by Jacor.

Um...I don't think this is legal. When the FCC permitted
duopolies, didn't they explicitly state that an LMA would be
considered "ownership" for the purpose of duopoly?

And of course there's the ethical question of a single broadcaster
having control of quite literally every significant AM in the
city (the only others are religious WTSJ-1050 with 1000/278 w,
country simulcast WUBE-1230 [the old WCPO] with 1000/1000,
and urban WCIN-1480 with 5000/500 DA-2.) Something smells
unpleasant here.

That said -- anyone have tapes of the Big Switches?

This is in response to a question posed a few days ago by an individual
at pplace.com. Attempts to respond via e-mail have failed, so here is
a reply posted at large -- perhaps others will be interested:

> Unknown user 'jerry.lynn' at pplace.com
> ----------------

In answer to a question you posed in rec.radio.broadcasting on
29 March 1994...

Last time I saw Johnny King was in June 1992 when he was doing 7-Mid
at Richard Miller's Jukebox 96 (KRJY) in St. Louis. (I was up there for
some computing work). Mr. Miller has since sold his station to Heritage,
the same people who own WIL. Nonetheless, much of the KRJY has been
kept.

You might want to contact Jeff Allen, the PD of KRJY, who might be able
to let you know what Johnny is up to.

FWIW -- all the people I met at KRJY were outstanding. I didn't spend a
lot of time talking with Johnny -- but he was very friendly (and knew some
of the folks I worked with when I was at KAAY years ago).

KKOS, FM 95.9, Carlsbad, Morning Coffee Crew will be out in force on Friday, giving out copies of the Oceanside "Blade-Citizen," free danish, and a ceramic coffee mug with the KKOS emblem. This is the fourth Friday the station has been out in North County.

Tijuana-based XEHKY-FM, recently moved from 95.7 to 99.3 FM. That increased KKOS' reception towards San Ysidro (near the U.S./Mexico border). XEHKY-FM plays Fiesta Mexicana music; as seen on billboards around San Diego.

Carlsbad, California, is the home of the "San Diego Radio Guide," a monthly publication covering radio in San Diego, Tijuana, and the L.A. basin. Subscription is reasonable. For further information, e-mail me, or write them at 7720 El Camino Real, Carlsbad, CA 92009. {I'm not an employee; just a radio-buff}

While listening to KFI, 640 AM, Los Angeles, local personality, MR. KFI gave out his e-mail address. I dropped him a line and received several replies. He's just starting his Internet crash-course, and can be reached at MrKFI@Netcom.com or akaMrKFI@aol.com. His eclectic show is Saturday and Sunday evenings.

Here's a list of Tijuana-based stations that show up on the Arbriton books:

XETRA AM 690 all sports, English
XEMO AM 860 Spanish language
XEXX AM 1420 Spanish, plus Padres baseball in espanol
XEBG AM 1550 Spanish language

XHTZ FM 90.3 Urban Contemporary Mix, English
XETRA FM 91.1 Grunge, T-40, and new wave, English "91X"
XHRM FM 92.5 Grunge, T-40, and new wave [the Flash]-- just like XETRA-FM
XHKY FM 99.3 Fiestive Mexicana music, espanol
XELTN FM 104.5 Latin music, in espanol
XHFG FM 107.3 All sports, all espanol

Next report will have all the San Diego county stations.

[XETRA-AM is simulcast from San Fernando Valley on AM 670. Mexico id's are usually at the bottom of the hour, and I can barely receive 670 in Carlsbad. Could someone from the LA basin confirm this, please? I'd like to get the call letters and power.]

Thanks!

1225. KKSN Portland OR oldies station does over the air listener survey

Newsgroup: rec.radio.broadcasting
Date: 1994-04-10 00:55:23 UTC
From: wa2ise@netcom.com
Message-ID: <2o7ipr$kal@vixen.cso.uiuc.edu>
Source record: 40480

"KISN" 97.1 FM Wedensday night did a listener survey of about 790 oldies. They had in an ad in the local paper, a response form with 800 entries, each one for an oldie. They announced the song number and then played a 10 second clip of the oldie. I, the listener, for each oldie, mark one of several small boxes, like a multiple choice test. Entries were: N for not familiar, L = like a lot, S = like it some, o = just okay, T = tired of hearing it, D = dislike it. This took about an hour and a half to do almost 800 songs. I only had 2 songs that I wasn't familiar with, 57 like a lot, 109 tired of hearing, no dislikes, and the remainder about evenly divided between like some and just okay. I tended to vary in my responses, probably from a bit of fatigue after a while. they gave breaks every hundred songs of a few minutes.
Ten of the entries were nulls, "There is no song for #250, so mark it "N" on the form". Probably a method to screen out forms filled out without listening.
An inducement to do this is a contest to randomly win a trip to Universal City studios for a few days tour.
Part of the form is for your name, address, age, sex and such demographics.

Have other oldies stations done this or something similar? Maybe they are aware that people are starting to tire of the same oldies all the time.

All but two of 790 oldies were the ones you often hear on such stations. "KISN" does 50's to mid 70's oldies.

1226. CBC interview tapes (early 1970's)

In article <2o1lcu$sru@vixen.cso.uiuc.edu>, Tom Lacko <LACKO@ENH.NIST.GOV>
writes:

Tom---on the subject of Peter Laufer's dismissal from WWRC/980...their
morning man Mike Cuthbert tells me his replacement has already been
found. He's a fellow named Gary Burns (I think I've got that name right) from
WIOD in Miami. 'IOD is a much higher energy station, and almost all local
in content...it'll be interesting to see if Burns blows off the network fare
that
dominates 'RC's schedule after 12 noon and replaces it with local
personalities.
(Laufer wanted to do that before he left...there seems to be a consensus that
the replacement of local talk with Mutual network fare was a big reason for the
station's decline.)

>

KWFT-620 has files an application to move to Plano. It has not been granted
at last check. KWFT has a pretty daytime signal over the area and already
carrys a full-service MOR format.

I've seen it listed a few weeks ago in the M STREET JOURNAL. I made a note
in the list of Texas stations posted a week or so ago:

.
.
620 KWFT Wichita Falls full service standards
(KWFT seeks to move to Dallas suburb Plano)
.
.

KWFT won't get the KAAM calls. They were taken by a new station in Missouri,
I believe.

(On a side note, BROADCASTING's listings of such things has really gotten to be pretty sad. They discontinued call letter changes some time ago. Now, they only list some station application/grants).

> By the way, a station moving to Dallas from Wichita Falls is not without
> precedent. What is now KLIF/570 traces it roots to KGKO, a facility
> that moved here in the 1930's and later became part of the historic

> commercial station offering a classical format with 100 kW at 101.1 mHz.

WRR is having a 46th anniversary celebration this weekend.

Also of note around town...

KLOL-101.1 Houston morning team Stevens & Pruett now simulcast their show on local modern rock KDGE-94.5. S&P syndicate their show, but only KLOL and classic rock WCKW-92.3/1010 New Orleans-Baton Rouge carry it (and now KDGE). To get around the conflicting formats (KDGE is modern; KLOL is album rock), KDGE inserts their songs when S&P/KLOL play a song. S&P worked at crosstown KEGL "the Eagle" before going to Houston and KLOL in mid-'80s.

The city of Fort Worth is extremely unhappy with hit country KYNG-105.3 "Young Country." KYNG's afternoon DJ told listeners that $10,000 in cash is hiding in books at the Fort Worth library's fiction section. Apparantly, a lot of KYNG listeners tore up the library's fiction (and non-fiction) section looking for the money, destroying a lot of books. Today's DALLAS MORNING NEWS says they will file a complaint with the FCC to put this on KYNG's public record for when its license is up for renewel. KYNG has apologized and offered to pay for the damages.

All through this long post on the Second International Symposium on Digital Broadcasting, we're hearing from bureaucrats in countries where broadcasting is under government control, and practically nothing from countries such as the United States, where broadcasting is generally a commercial enterprise. Two of the issues that were not addressed:

1. Digital broadcasting is wasteful of bandwidth, and few commercial broadcasters are willing to simply let the government pull the plug to accomodate the favored few who will be allowed to usurp the spectrum.

2. AM broadcasting has been obsolete since 1935, but it refuses to die because of the enormous installed user base. Replacing that installed user base could take a generation at least -- and a government subsidy as well.

Central wastewater treatment is a much better system for handling human waste than cesspools and septic tanks -- but the fact that superior technology exists doesn't keep millions of people from doing it the old wa using it the old way. When somebody starts analyzing market factors and consumer preferences in the debate over digital broadcasting, I may be ready to listen.

: In article .... dk@crl.com (David A. Kaye) writes:

: "the only reason they haven't shut it down and turned it into apartments
: is : because the owner is taken with the 'power' of radio."

: I'm not : sure the loss of a station that just rebroadcasts a satellite
: service : and makes no attempt to connect with and serve its community,
: is a loss : worth : mourning.

What makes you think the station I'm mentioning is automated? It's not.
But even with local programming and local sales the station is still worth
less than its real estate, especially for a directional array. And this
is what I was getting at. Stations are going non-d and reducing power
because it is just too expensive to keep a directional array in operation.

: Case in point; on our frequency (1370) there's now at least one station
: east of us offering no local nighttime programming, but just regurgitating
: satellite pap that duplicates music formats....

Could be that nobody's listening anyway. I've looked carefully at
Arbitron's audience figures and most stations easily lose 80% of their
audience in the evening hours. One station in the Bay Area goes from
137,000 AQH listeners during morning drive to a piddly 17,000 at 9pm,
though they are #1 in morning drive and #2 at night. People are watching
TV or chatting online or whatever. Why should a station pay for air
talent when people aren't even there to listen?

While in Santa Barbara, CA, a couple of weeks ago, I was delighted to find KDB (FM), 93.7, a classical music station. It sounds as though it's taking a satellite feed, but was fully sold, and sounded good on the rental car radio. I'm curious about a 3-letter FM call. Is this a stand-alone FM? Is the station really old? Any other info? Thanks.

>> (built it I'm told) but I've never seen KEX as one of theirs. I always
>> thought the reason KEX has such a superior facility was because
>> Westinghouse had built it. Hmmmm...now you've got me thinking...

Using my trusty, tattered copy of Tom Kneitel's RADIO STATION TREASURY as
my resource, I see that the 1931 listings show that KEX was owned by
Western Broadcasting Company. By 1936, though, the ownership had changed
to Oregonian Publishing. KGW was also owned by the paper at that time.
In 1942, according to Kneitel, common ownership for both KGW and KEX
continued by the Oregonian. During that timespan, I show that KOIN was
operated by "KOIN, Inc.".

Using my less trusty but equally tattered memory, I am pretty certain
that I did see that Westinghouse owned KEX for a period (possibly in
the 1950's). A few years ago, I was visiting the WSM transmitter outside
of Nashville. In addition to the inherent history of that fabled site,
they also had on hand an array of Broadcasting Yearbooks dating back
through the 40's. I recall seeing an ad placed by Westinghouse (before
it was known as Group W) listing all of their properties. This was
well before they acquired either WINS or KFWB...and I am vaguely
certain that I saw KEX included. The situation is muddied somewhat
because of the other comapnies with "West" in the name that owned
KEX at one time or another -- the aforementioned "Western Broadcasting"
and the more recent "Golden West Broadcasting".

I used to work for Group W here in Dallas -- but they no longer have
a property here in town so maybe one of their current staffers can
check with an authority on Park Avenue for a definitve answer.

Here's a red herring to further prolong the WOWO thread...

Kneitel's 1936 listings show that WOWO (then owned by Main Auto Supply)
was sharing time with WWVA, both at 1160 kHz. And...to keep the
Westinghouse thread going...Barry Mishkind's OLDRADIO shows that
WWVA was once under the ownership of Westinghouse!

If only we could get former Group W president Dick Harris to post
an article, I bet a lot of these burning issues could be settled
once and for all!

>away...

I agree, Roger. Reason i bring it up, though, is that there has been a resurgence at
"(fill-in-the-blank)" and it's nice to see both cool older stations
and newer stations get their due.

>Often, stations that have *nothing* in common are lumped together
>because the trades feel a need to label them. Labels are

I think it reflects the continued narrowcasting of the media in general.
Also (and this is a weak but still true truism) if you can 'label' something,
then it really exists. That is, instead of having an 'eclectic' station
here and an 'offbeat' station there, there exists a group of such stations
which collectively might be able to, say, play 'good' music.

>(How you doin, beej ?)

I'm fine, Roger :-) Actually, i'm praying for anything progressive here in
L.A...

TAKE BACK THE AIRWAVES - THE SPRING & SUMMER OFFENSIVE

Free Radio Berkeley / Free Communications Coalition

First, we would like to thank everyone for their support of micro power liberation broadcasting and their extreme degree of patience as we get our act together on ramping up for full scale production of kits.

FRB and the Peoples' FCC invite you to take part in reclaiming the airwaves. This can be done in many ways, it is not necessary for you and your community to put a station on the air if you feel that is too great of a risk. A lot of public education needs to happen around this issue so folks understand that is a matter of free speech, constituitional and human rights. We urge you to consider conducting public forums and presentations on this in your community. Printed materials, videos, etc. can be provided for this type of activity.

Further, if you are technically inclined and would like to provide assistance as a mentor to those whose technical abilities are vastly exceeded by their enthusiasm, we would like to hear from so we can refer folks needing assistance to someone in their area.

If your are good at teaching and presenting technical matters in an understable manner, please consider leading a workhsop in your community. We can supply materials for this including a how to video that is in production.

We need any information on what happening in your community as it regards micro power broadcasting, especially regarding any actions taken by the FCC.

Micro power broadcasting will be part of the Lolapalooza tour this summer. A transmitter will accompying some foks who are part of the tour and we have been invited to have a table at each concert site. If you live anywhere close to the concert sites (most major urban areas) and can volunteer to run an info table, pleaes contact us. We will see that passes are arranged and send you the materials to be distributed along with materials you might wish to add. That would be a good time to organize a local meeting/public forum or workshop on micro power broadcasting and reclaiming the airwaves. All in all, the Lolapalooza tour was attended by 2 million people last year, a great opportunity for outreach.

Let us know if there is any way we can help you, many of us here are rather experienced community activists and organizers. We have legal support available through the National Lawyers Guild and can send legal info to supportive attorneys in your area to bring them up to speed on this issue.

If you can, come to the Bay Area for the weeekend of April 30 and May 1 and the following week. On Saturday, April 30 Food Not Bombs is putting on Soupstock 94 with lots of good bands including MDC, Mudwimmin, Clan Dyken, etc. It will be held at the Golden Gate Park Bandshell near the DeYoung Museum and starts at 12 noon. San Francisco Liberation Radio will be broadcasting it live at 93.7 FM with a possible higher power AM simulcast. On Sunday, May 1 the 25th anniversary of Peoples' Park will be celebrated with a big party and concert at Peoples' Park in Berkeley. This event will be broadcast live by Free Radio Berkeley at 88.1 FM. A whole series of workshops on media, computers, broadcasting, etc. will be held that week in both SF and Berkeley. A public forum on micro power broadcasting and radical art will be held on Thursday evening, May 5 at the Capp Street Gallery in SF. A micropower broadcasting workshop will held on Wednesday, May 4 in Berkeley and on Saturday, May 6 at the Capp Street Gallery in SF.

More article are coming out on mirco power broadcasting. The most recent issue of Option had a very good article. The May issue of Spin will feature an article as well. It is possible that Rolling Stone might be interested in this issue. Hopefully, you can get the local media in your area to do the same.

Richard Edmondson with San Francisco Liberation Radio and Food Not Bombs Radio Network is now producing a weekly show for Radio For Peace International, a shortwave station operating from Costa Rica. It is a half hour show on the best of micro power broadcasting in the US with segments from air tapes of various stations that are currently on the air. If you are on the air send us air tapes so they can be incorporated into the show.

We are setting up to record program materials onto hard disk with a DSP card in one our PCs. These will be compressed with a program from Xing and loaded into our FTP site for distribution. This will begin on May 1. If you are interested in this project, let us know

We have decided to make a major push for next 6 months to create a national movement to take back the airwaves and break the coporate/government stranglehold on the free flow and exchange of ideas, information, news, music, culture and artistic expression. If we do this in an organized, concerted way we can take back the airwaves and show what real democracy is all about. It involves taking risks and a lot of hard work but if worth the effort if one values free speech, human rights, liberty and self determination.

Thanks again.

NCRC'94
The 14th Annual Conference of the National Campus
and Community Radio Association

"ANYTHING BUT STATIC"

June 20 - 25, 1994
University of New Brunswick
Fredericton, New Brunswick

-----------------------------------------------------------

NCRC'94 - the 14th annual National Campus and Community Radio
Conference, will be held in Fredericton, New Brunswick from
June 20 - 25, 1994.

THE MAIN COURSE
---------------

The conference theme - "Anything but Static" - is meant to
represent both the dynamic and diverse nature of community based
broadcasting.

There conference itself will include over 60 sessions ranging from
discussions on issues of censorship, music, inclusion, volunteer
empowerment and training, and just about any other topic to do
with campus and community radio. There will also be special panel
discussions on crucial issues affecting community radio in Canada
and beyond.

SPECIAL THEME"S
---------------

-- people with disabilities

This years conference will see a special focus on disability issues
and the inclusion of people with disabilities within stations. A
special invitation is sent out to people with disabilities to come
together at NCRC'94.

Through grants from the Government of Canada funding is available

-- women in community radio --

Monday, June 20 will see the 3rd annual "Women in Community Radio DayS. This special focus will celebrate the contributions of women to campus and community radio, and provide an opportunity for women to network and discuss issues of concern among themselves.

For more info contact the conference organizers.

ENTERTAINMENT SERIES

We're busy putting together "Colored Noise", a diverse sampling of local, regional and national talent. The venue, the College Hill Social Club - is right on campus. Six nites of great entertainment. More info, including a line-up, to come in early May.

ACCOMODATIONS

Most, if not all, delegates will be housed on campus in student residences.

Cost is $69 per person single, $59 per person double (plus a fully refundable $25 key deposit).

To reserve space contact the conference organizers.

A limited number of billets will be available but we must know before June 1.

TRAVEL

Fredericton is easily accessible via air and train.

-- airplanes --

several daily direct flights from Montreal, Toronto and Ottawa (Air Canada/Air Nova) and Boston (Northwest Airlines) provide easy access and connections. Contact your travel agent.

-- rail --

three times weekly trains from Montreal. Overnite on Saturday, June 18 arrives on Sunday am before conference. Return overnite on saturday, June 25 to MOntreal sunday am.

Great connections to Toronto, Ottawa, west and eastern US.

QUESTIONS???

1243. Special receiver needed?

Newsgroup: rec.radio.broadcasting
Date: 1994-04-10 17:56:04 UTC
From: Karen.Deweeger@ebay.sun.com
Message-ID: <2o9ejk$lk5@vixen.cso.uiuc.edu>
Source record: 40498

I have a question about a special S.C.A. (sorry, I don't know what it stands for) receiver that is required to receive Boadcast Services for the Blind. I've talked to the BSB people, and they will loan me the receiver (I can't buy it) but I would have to go to downtown San Francisco to pick it up (not :-). I would also have to give the name/address of a close friend/relative who would be willing to hunt me down should I choose to abscond with this magic receiver.
I asked the BSB folks what frequency this service was broadcast on and they did not know (I'm not sure the person I was talking to understood what a frequency was:-), but said it was broadcast from KPFA/KPFB (People's Republic of Berkeley). They also said they weren't sure I'd be able to pick up the signal even if I did have a receiver (I'm about 25 miles away in San Jose).

My question is: is this some sort of encoded broadcast that requires a special decoder ring (receiver), or is it just broadcast outside of the normal AM/FM broadcast frequencies? I have receiver coverage from 25Khz - 2000Mhz, so if I could find out the frequency I should be able to listen to BSB (if it's not encoded) without having to go to San Francisco to pick up the S.C.A. receiver. Any ideas would be much appreciated.

Please reply via email (as I don't get much time to read the newsgroups) and I'll post a summary (and hopefully an answer). Thanks in Advance!

> 2. AM broadcasting has been obsolete since 1935, but it refuses to
>die because of the enormous installed user base. Replacing that installed
>user base could take a generation at least -- and a government subsidy as
>well.

Nope, AM broadcasting still isn't obsolete. While it doesn't have the
audio bandwidth of FM, it also isn't restricted to line of sight. Go up
into the hills of West Virginia and you'll find that all the big stations
are AM, because the FM broadcasters just can't get good signal out. With
a single AM station you can cover the whole continent from a clear channel.
While this isn't as important as it was in 1935 when the density of stations
was much lower, it's still a comparatively inexpensive way to get your signal
across the country.

AM sure isn't what it used to be, and it never will be again, but that's fine.
It still has a niche, and no doubt the existing FM band will maintain one after
DAB has arrived.

From: Andrew Paul Dickens <apd2c@virginia.edu>
Message-ID: <2od5kh$mjj@vixen.cso.uiuc.edu>
Source record: 40350

If you are talking about satellite data formats, then
you should probably start your search with SEDAT. SEDAT stands
for Spectrum Efficient Digital Audio Transmission or something
like that. It replaces the older DAT format. ABC broadcasts
all of their FM network data with SEDAT, as do many others.
Atlanta Scientific (?? maybe Scientific Atlanta???) makes recievers, and I guess you could talk
to them.

-Good luck,
Andrew Dickens

Source record: 40352

Gentle readers,

We recently got our construction permit for higher power, and we're having a new antenna made for our station which will be installed in the next month or so. We're pretty excited, even though we're only going from 360 to 720 watts.

I'm interested in personally verifying the field strength of our signal in the surrounding area. My thought was to rent some kind of field strength meter and drive around the Greater Boston Area (Rte.s 128 & 495) and take measurements, then plot all this on a map (with the help of a PC) and compare it with the predicted contours. I'd do it before and after the new antenna is installed.

Does anyone out there have any experience with this? Is there a standard piece of test equipment that is commonly used for this sort of thing? Am I oversimplifying something here? I think it would be quite a bit of fun actually, as well as a way to keep check on our antenna manufacturer.

All opinions gratiously welcomed.

Not much of a "report." We just spent a week vacationing in San Diego, our first time in the town. I just wanted to put in a VERY good word about the area's noncommercial jazz station: KSDS-88.3. The best jazz station I've ever heard. Great variety, good hosts. KSDS was one of the memorable highlights of our trip. Apparently, they've won a recent NAB award as the best jazz station in the country (they were not shy about mentioning it on the air); the award is well-deserved.

Each Sunday night between 7:00 pm and 11:00 pm WAMU-FM 88.5 in
Washington, DC presents a program hosted by Ed Walker called
"The Big Broadcast" (not to be confused with the WQEW show of
the same name).

The Big Broadcast features radio drama and comedy primarily from
the '40s and '50s. "Gunsmoke", "Lum and Abner", "Nightbeat", and
"Adventures by Morse" are regular features each week. Other shows
are rotated. The 10:00 pm hour is usually devoted to some special
feature such as "Command Performance". Occasionally theatrical
plays adapted for the radio are presented during the 10:00 pm hour.

WAMU's signal can be heard in DC, and portions of Maryland, Virginia,
West Virginia, Pennsylvania, Delaware, and New Jersey.

Just curious Jim. What is now on 1230 khz in Terre Haute. I thought when WBOW moved to 640khz that they would go silent on 1230. There is another station in Bloomington, Il (WJBC) that has a lot of co channel from the station in Terre Haute. I live in Champain and cannot hear the 1230 station in Terre Haute.
By the way I have been listening to WOWO since all of the posting have come out. I hope that they dont change a thing. From Champaign they come in well during the day and somewhat noisy at night but they are the only station on 1190 I hear.

Some notes from my latest road trip:

It's a dessert topping! It's a floor wax! Chapter Four. KMXV (Mix 93.3) continues to confound. Thursday afternoon (April 7) just after 6 o'clock, Mix 93.3, which is still sort of an AC station, played the Gap Band's "You Dropped a Bomb on Me."
If Mix 93.3 ever gets around to playing Gary Numan (and it will *have* to be Are Friends Electric?) or maybe the Shamen or the Charlatans U.K. or maybe even Big Audio Dynamite...well, somehow, I can't finish that sentence.
Anyway, I'll say this much. I never could figure out why radio stations program formats their competitors can figure out. It looks like Mix 93.3 has taken that to heart.

Just before that, on the AM band, I was listening to KIOA (940) from Des Moines and heard a familiar voice: Dic Youngs. He has been with the station since the Johnson Administration (Andrew, not Lyndon). Unlike the sad cases so often reported on AIRWAVES of air talent being confined to reading liner cards, Youngs apparently works under few such constraints. This may not have been a typical day; he was doing a remote from Sec Taylor Stadium for opening day of the Iowa Cubs. Still, there was a real personality there, working hard to make his show listenable and enjoyable.
KIOA is a simulcast of KIOA-FM (93.3), an oldies station. The AM came first; it was Des Moines' big Top-40 station in the 60s and early 70s.

KXOK (630) St. Louis appears to be off the air.
In my car, in the parking lot of Columbia Mall, I was able to pick up WOW (590), WMT (600), WDAF (610), WOI (640), WMAQ (670), and even 1,000-watt KSTL at 690 from St. Louis. This was about 2 pm Friday (April 8). But not KXOK.
Because my Columbia FM listening site is just three miles from the transmitting site of KCMQ (96.7), I could not determine whether KXOK-FM (97.1) was on the air.
(I was also having problems with the narrow-band IF filters in my tuner.)
Also on the St. Louis AM dial: based on liners on WKBQ-FM (104.1), the station at 1380 is now simulcasting the 104.1 (CHR) signal owned by Zimmer Broadcasting and not the 106.5 (country) signal owned by Zimmer. However, during a three-hour period Friday morning (April 8) I never once heard a proper legal ID for either the 1380 or 104.1 stations.

The death of Nirvana lead singer Kurt Cobain generated some notice

on a few radio stations.
Non-commercial adult-alternative/community KOPN (89.5, Columbia)
mentioned Cobain's death frequently Friday afternoon, but did not alter
its playlist except to play a couple of Nirvana selections it might
have played anyway.
Commercial adult-alternative KBXR (106.1) ignored the event altogether.
It probably didn't generate enough interest among the burnouts-in-suits
crowd it seems to be targeting these days.
Non-commercial modern-rock/student KEJJ (88.1, Columbia) did not
take notice of it on Friday but did mention it Saturday, again, though,
with little alteration of the playlist.
From St. Louis, KPNT (105.7, "The Point") aired "Nirvana A-to-Z" on
Friday night. All during the weekend, "The Point" frequently invited
listeners to call the station to get numbers of hotlines they could
call to discuss their feelings about Cobain's death if they were unduly
upset about it.

Coming soon to a newsreader near you:
* An article on my experience of listening to more than an hour of
Steve and D.C. Friday morning (April 8) on WKBQ from St. Louis
* Some thoughts on what Docket 80-90 has done to the FM dial in
this part of the Midwest
* More on the continuing problems of KEJJ, Columbia....

Source record: 40361

Bob Smith, middays WXXI/1370 Rochester, NY writes :

>Mark---any word yet on who will take Tom Leykis' place at WRKO in
>middays?

Let's deal with Leykis, first. Leykis left WRKO-AM 680 on March 9th
after 10 months of turbulent existence on and off the air in Boston.
The audience for his 10am-2pm show on the TalkStation declined
steadily since his first broadcast last May.(The winter ratings to
be released this week will support this trend according to already
published Arbitrends -- rolling averages for Arbitrons). Off the
air, Tom's marital problems with his 4th wife, Susan, were much publicized
and covered at nauseum on a daily basis by a local tabloid.

Tom knew his days in Boston were numbered. He sought a job out of the Boston
market and found one with Westwood One Radio Network in LA. He starts
his brand new syndicated show in 4 weeks -- Monday,May 9th. His show
will be heard from 6pm-10pm Eastern Time. I very much doubt that any
primary Boston market station will pick it up.

Now, onto his replacement. Right after Leykis' departure from 'RKO,
it was rumored that Gene Burns who left The TalkStation in November '92
to host nationally syndicated show on NY's WOR-AM would be coming back
to take over his old 10am-2pm. Burns reportedly expressed his displeasure
living in NYC and the only reason he made the move to the Big Apple
was because of inability to get the syndication deal in Boston(WRKO was
part of a much smaller company then). Also, WOR is for sale and who knows
what might happen to Burns' deal when the new owners take over...Burns
is still considered a long shot for his old job at 'RKO...

Currently, WRKO management is still seeking candidates. For the last
three weeks, Mark Jurkowitz,Boston Phoenix columnist, has been doing
the 10am-2pm slot. He's the frontrunner to land as the permanent host
but you never know...Jurkowitz co-hosted an afternoon talk show with
Rev. Earl Jackson(now with TalkAmerica) for a brief stretch last year
on 'RKO's sister station, WHDH AM 850(NewsTalk 850). After ARS pulled
the plug on 'Jurkowitz and Jackson', Jurkowitz has been doing occasional
fill-ins on WRKO...

-Mark

1257. Abrupt Format changes... why?

Newsgroup: rec.radio.broadcasting

Source record: 40362

Here in Peoria, IL, until 3 days ago we had:
1 Classic Rock
2 Country
2 Adult Contemp/70s,80s,90s
1 Dance/Top 40/alternative

The last one had a major target audience of teens and college students, something this town has a lot of. Well, last Friday, they changed format to a 70s,80s,90s AC. So, now we have 3 stations of artists who 'used to be good and popular' but are no more. What prompts such an abrubt change like this? A newspaper article reported that the station mgr. and program dir. (who are still the same) had a meeting at 3pm Thursday and informed all the on-air personnel that they had 30 minutes to clean out their desks and leave the premisis. It's not new ownership, either. The whole thing seems kind of strange.

Any attempt at an explanation would be helpful.

: taking a satellite feed, but was fully sold, and sounded good on the
: rental car radio. I'm curious about a 3-letter FM call. Is this a
: stand-alone FM? Is the station really old? Any other info? Thanks.

It's nice to hear that KDB is still broadcasting classical music in Santa Barbara, after so much news about other classical stations switching formats.

I don't know the current situation, but at least in the '70's, KDB-FM had a sister station KDB (AM) 1490, a "graveyard" frequency, with 1000 watts daytime, 250 watts night. During the mid 70's, at least, I recall that both stations played "beautiful music."

Sometime in the late '70's or early '80's (sorry, my memory is not perfect), KDB-FM switched to a classical music format, and KDB (AM) started playing CNN Headline News audio. The FM station apparently did quite well. However, the AM was somewhat less successful, as KDB (AM) started simulcasting KDB (FM) after a relatively short time.

That was the last I heard of KDB until now, although my rather dated 1990 M Street Radio Directory still lists KDB (AM) as 1000 watts full-time nondirection at 1490, with a format of financial news and fine arts, the latter simulcast with KDB-FM.

1261. KRNT, Des Moines

Newsgroup: rec.radio.broadcasting
Date: 1994-04-12 04:05:13 UTC

MORNING PERSONALITY RETURNS TO
DES MOINES RADIO STATION KRNT
REPLACING SYNDICATED PROGRAM

Long-time Des Moines radio personality Steve Gibbons was off the air about six weeks. He returned to the morning slot he has held at KRNT-AM (1350 khz) for the past sixteen years on Monday, March 27, 1994. The President of Des Moines Radio Group, Phil Hoover, told the Des Moines Register, "Steve came in with a proposal that made sense. We're in an era when businesses downsize without regard for the individual, but we found a way to meet the needs of the individual, the company and the listeners."

On his first day back, Gibbons thanked his listeners for their support. The decision by Des Moines Radio Group to end Gibbons' program was the subject of articles in the Des Moines Register and an editorial. The station reportedly received a number of letters from listeners asking that Gibbons be returned to the air.

Gibbons' morning show will be broadcast from 6:00 a.m. until 9:00 a.m., Monday through Friday. He will also perform sales and marketing duties for the middle-of-the-road station. Prior to his return to the air, Gibbons told the Des Moines Register, "It seemed so natural to go in every morning and do the show, and there aren't a lot of radio jobs out there right now. . . . I did not want to lose this."

Gibbons, and another long-time KRNT employee, news director and station manager Dale Woolery, were told in late January that their jobs were being eliminated. At the time, Gibbons told the Des Moines Register, "There were no real villains in this story. It's just a sign of the times."

Both Gibbons and Woolery left the air in early-February. Woolery, who began as a news reporter at KRNT in 1978, has found other employment with the state of Iowa. Gibbons has been with KRNT over twenty years. He was

morning man in the early 1970s, then left for jobs in Denver and Minneapolis before returning to KRNT in late 1977. Gibbons and Woolery were the last full-time, on-the-air staff. At one time, the news department, alone, employed six full time reporters and several part-time persons.

Saga Communications of Grosse Pointe Farms, MI is the owner of KRNT, as well as three other Des Moines stations (KSTZ-FM and KIOA-AM/FM). The stations are known as the Des Moines Radio Group.

Since Saga acquired KRNT, it has steadily withdrawn local programming and replaced it with syndicated and satellite services. The music portion of the programming comes from Unistar, news from CBS and Mutual, sports play-by-play from the Chicago Cubs and a University of Iowa network, and talk programs from Mutual.

KRNT went on the air in 1935 and was owned by the Des Moines Register and Tribune Co. The "RNT" stood for Register and Tribune. At the time, the Register and Tribune also owned KSO. Transmitting and studio facilities for the two stations were shared until the FCC imposed its duopoly rule, which prohibited ownership of two AM stations in the same market. Studios for KRNT-KSO were in the Register and Tribune building, and the transmitter site was in southeast Des Moines, along the Des Moines River. KSO was sold.

KRNT was considered the Des Moines radio station of record. After World War II, its news department featured Russ Van Dyke and Paul Rhodes. With the coming of television to Des Moines in the early 1950s, Van Dyke and Rhodes split duties between radio and television; Rhodes eventually anchored the six o'clock news on co-owned KRNT-TV (now KCCI-TV) and Van Dyke was ten o'clock anchor.

The Register and Tribune sold KRNT (and its sister FM station KRNT-FM (with the sale the call letters were changed to KRNQ(FM) and the station is now KSTZ-FM) to Stauffer Communications of Topeka, KS. Stauffer assumed control of the stations on September 1, 1974. They continued to enhance the reputation of KRNT as the station in Des Moines to listen to for news and information. During the 1970s and early 1980s, KRNT

consistently was cited by various organizations for its news, weather and public service coverage. Stauffer sold KRNT and KRNQ(FM) to Saga in 1988.

KRNT also has a live Saturday morning program, hosted by another long-time Des Moines radio personality and salesman, Ford Roberts (Robert Hufford). His program begins at 7:00 a.m. and features "big band" era music, interviews and trivia.

KRNT is full time at 1350 khz, DA-N, 5,000 watts.

Bill-

I've heard that ABC Radio had taken a look at WOR as a possible 2nd
sports outlet for NYC bue figured that even if they moved the Yankees
from WABC over to WOR there wouldn't be enough numbers to sustain it.
"The FAN" has the NYC sports-beat locked up!

Here's the latest from San Diego County!

Roman Catholic Cardinal Roger Mahony of Los Angeles is a regular caller for KNXs traffic watch reporter Jill Angel. Cardinal Mahony called the KNX, (1070 AM, 50kw, U,) last Monday when he was stuck in the Studio City area.

As reported in the Orange County Register on Sunday, "He's a super guy, and he gives great report," Angle said. "He knows exactly where he is going; and he's a great tipster."

[I don't know: a Cardinal calling an Angel on traffic reports . . . . .]

XETRA-AM has a simulcast station in the San Fernando Valley. B.J. Mora sent back a reply to my question: who is this station? It's KWNK, 670 AM. {thanks B.J.!!} It is a daytimer, because at sunset, a station from Boise, Idaho booms into western U.S.

Here's the list of FM and AM stations in San Diego County:

San Diego County based Radio Stations

Call Letters Freq Power (Kw) License

KSDS 88.3 .83 San Diego
KPBS 89.5 1.77 San Diego
KOWF 92.1 3. Escondido
KECR 93.3 2. El Cajon
KFSD 94.1 100. San Diego
KBZS 94.9 21.8 San Diego
KKOS 95.9 3.3 Carlsbad
KYXY 96.5 41 San Diego
KSON 97.3 50 San Diego
KIFM 98.1 28 San Diego
KFMB 100.7 30 San Diego
KGB 101.5 50 San Diego
KIOZ 102.1 10 Oceanside
KCLX 102.9 32 San Diego
KJQY 103.7 n/a San Diego
KCBQ 105.3 29 San Diego
KKLQ 106.5 7.4 San Diego
KBAK 107.1 3 Fallbrook

KOGO 600 5 San Diego
KFMB 760 50 San Diego
KECR 910 5 El Cajon
KCEO 1000 2.5 Vista

KURS 1040 9.5 National City
KSDO 1130 10 San Diego
KPRZ 1210 25 San Marcos
KSON 1240 1 San Diego

(AM power is for daytime only)

KFJC 89.7 FM in Los Altos Hills, California (Bay Area wide)
airs Hub City Spoke Repair, a half hour of comedy theatre every other Friday morning between 620 am and 7 am. The alternative weeks they run spoof of the Hitchhiker's Guide to the Galaxy in serial form.

1265. Two Hours of Steve and D.C. (WKBQ)

Newsgroup: rec.radio.broadcasting
Date: 1994-04-12 04:05:22 UTC
From: Mark Roberts <transvox@tyrell.net>
Message-ID: <2od6m2$pr9@vixen.cso.uiuc.edu>
Source record: 40370

Not much of a birthday present for me, but I braved static, the degraded post-80-90 FM spectrum, and a flaky tuner (since repaired) to listen to two hours of Steve Shannon and D.C. Chymes, the controversial morning team on WKBQ (104.1) from St. Louis on April 8. When the WKBQ format was at 106.5, Steve and D.C. got fired for insulting a black caller with a racial slur. Zimmer Broadcasting, which subsequently bought the 106.5 frequency and swapped the Q's CHR format with the country format then at 104.1, rehired them.

Here's what I heard:

* The station never properly identified itself with a legal ID (its city of license is Jerseyville, Illinois). At least I never heard it on my tape. It DID refer to "WKBQ St. Louis" (the AM repeater at 1380).
* Aside from talk and comedy (real or alleged), there were two songs an hour and commercial breaks of four-plus minutes of continuous spots. That was tiresome.
* In the background, Steve and D.C. played the "number one song to make love to" as identified in an ESQUIRE survey and made fun of it. Since the tune was Air Supply's "Making Love Out of Nothing at All," the ridicule was probably well deserved (even worse than Michael Bolton's truss-supported singing).
* A phone interview with Joe Cabot, author of a book on 300 bizarre lawsuits titled "So Sue Me!" Cabot got off one great line: "Attorneys are reference librarians in 600-dollar suits."
* A phony ad portraying the cartoon character Mr. Peabody as a homosexual. Bigoted.
* An in-studio interview with two representatives of "The Relationship Centers," a dating service, which amounted to a 10-minute ad for the service's 50-per cent off special. Also noted was Steve and D.C.'s participation the previous week in a bachelor/bachelorette auction benefiting the National Multiple Sclerosis Society. Clearly Steve and D.C. are now trying to polish their image with charity work.
* More image-polishing: D.C. called his home voice-mail to play back a testimonial from a listener who participated in their "Out of Work Network" the previous day. The caller, the manager of a firm called A-Little Graphics, had advertised for a salesperson on their show. She said, "I got 20 responses from the show, and half of them are really good," while, she claimed, ads in the St. Louis Post-Dispatch, Suburban Journals, and the Riverfront Times had garnered her only four applications.
* A prank entitled "Will Page/Won't Page." This consisted of calling up airports and "aksing" them to page someone by an obviously hokey name. Callers participated by guessing whether the airport operator would or would not promise to page. Correct guessers got a Q-104 t-shirt. The operators were never told they were on the air. The

first page, to Miami for "Pat MacGroin," was done. The second page, to an airport in Idaho for "Anita Hanjobb" wasn't, with the operator finishing by saying "...and I already know this is a prank."
* The third page, for "Ida Dickter," was actually the funniest one. It never happened. They first called up a reservation number in Denver--the person at the other end cheerfully provided the airport number but said he couldn't do it. (Again, he wasn't told he was on the air.) Next, they tried Seattle and got a recording saying "office hours are 8 am to 4:30 pm." Then they tried Chicago O'Hare and no one answered. As sidekick Kim Furlong said, "What if somebody DID have an emergency?" (Hey, Kim, what if people didn't make crank calls?) The participating caller got the Q-104 t-shirt anyway.
* An ad for an adult movie and "novelties" store near Northwest Plaza called "Rodeo Drive," referring to a "Dancing Banana Squirmy Fruit" and a movie called "For Your Thighs Only." Yes, this was a legitimate advertisement (with phone number).
* A segment called "St. Louis Unplugged," that features local bands playing in the station lobby. This particular band was named "Nine Days Wonder" featuring a female vocalist whose son was also in the band. The band played two of its songs live in the lobby. Mild image-polishing.
* Intensive image-polishing: a twice-weekly pet giveaway segment with Elizabeth Estes of the Animal Protective Association, introduced by a song (to the tune of the Stray Cats' "Stray Cat Strut") that finishes,
> She's got too many pets in her homeless file
> But she's got cat class and a doggie style.
She seemed quite accustomed to Steve and D.C.'s antics, even when earlier that week, after having a cat to give away in the studio, they played a song about putting a cat in a microwave. This day, she had a dog that kept barking and barking. All involved also were quite fascinated by the effect Nine Days Wonder had on the dog, who got scared by the band's music and had an "accident" as a result.
* A sketch with a character called the "Mad Hoosier" ("hoosier" is St. Louisoid for "redneck"), introduced with this tune:
> He eats some brautwurst
> And lets out some gas
> He wears his pants so low
> You can see the crack in his ass
The Mad Hoosier then went on in a humor-free sketch on "Ten Ways the World Would Be Different If Everyone Was [sic] Named Dick." Sick.
CONCLUSION: They are talented and seem somewhat chastened. But much of that talent goes to waste in trying to do shock humor. When they are funny, they are very funny. But when they are bad, they are very bad. Bob and Ray they are not.

1266. WABC-AM "Dr. Wally" Show & Jo Mader (sp?)

Newsgroup: rec.radio.broadcasting
Date: 1994-04-12 04:05:23 UTC
From: mrbaker@attmail.att.com
Message-ID: <2od6m3$prc@vixen.cso.uiuc.edu>
Source record: 40371

Hi ---

I was tuning around the AM band while driving this morning (Sunday, 4-10-94) and stumbled across the "Dr. Wally" home repair/improvement/fix-it-up callin show on WABC-AM 770. Evidentally, this Dr. Wally guy is associated with Channel Home Centers as sort of the Martha Stewart of the paint, wallpaper, and leaky basement set.

In any event, the show was moderately interesting (or more so than anything else I could find at the moment) so I listened some more. Imagine my surprise to hear Dr. Wally refer to his co-hostess, a woman by the name of Jo Mader. I think I might be spelling her name wrong...it could be Jill not Jo, and it might be Madur or something like that. The point is --- is this the same person who used to be a DJ on K-Rock WXRK 92.3 by the same name ? Sounded the same to me. If memory serves, she also used to go by "Mojo Maker" and "Rock n Roll Madam" onK-Rock. I seem to recall Howard Stern making one of his famous on-air phone call setups to her --- something about her being in a men's magazine photo spread.

Is this the same person? What a switch from playing classic rock on K-Rock to being Dr. Wally's sidekick. Of course, it probably does pay the bills.

Can anyone comment ? Inquiring minds want to know.

1267. WBZ Boston -- Victoria Jones -- why??

Newsgroup: rec.radio.broadcasting
Date: 1994-04-13 04:18:25 UTC
From: fbaker@jade.tufts.edu
Message-ID: <2ofrqh$5tp@vixen.cso.uiuc.edu>
Source record: 40372

Why is WBZ putting Victoria Jones on the air to substitute for
Bob Raleigh this week Monday and Tuesday? She's talking politics,
having serious, heavy-handed guests, and proceeding like a regular
daytime or late evening talk host -- something you do NOT do
on overnight shows! No one wants to talk politics at 3 AM!
Why did they put her in place of the normal substitute, Norm Nathan?
He doesn't talk any politics and keeps the conversation light
and has a game at 3 AM. Perfect combination
for the overnight show (12 AM - 5 AM). Whoever thinks that
lots of people want to talk dead-serious at that hour I can't imagine.
Bob Raleigh tries to get serious but hasn't an ounce of intelligence
so most people in America that have listened to his overnight show
for the past ten or so years that he's been on know what a novice
he really is when it comes to serious, politically-oriented issues.
But even he has a lighter side to his show -- trivia questions,
informal polls, and the like tend to lighten the show a bit.
Victoria Jones is another story -- and a problem. She's a transplant
from daytime "yell and scream" radio talk formats (formerly on RKO)
and for the overnights it just DOES NOT WORK. Not for live broadcasts,
not at that hour. Anyone at WBZ (no one in particular, of course)
know what 'BZ was thinking when they put her on the air?

"AM...still has a niche..."

Actually it has more than a niche, and still provides the #1 overall station in 12+ audience in a number of the top 50 markets. You know, I wonder how many station owners have prematurely given up on their AM stations because they don't realize one essential truth---that as long as the signal and sound quality are tolerable, the listener cares less about fidelity or dynamic range or any of the technical things engineers labor over, than he cares about PROGRAM CONTENT. Capital Cities/ABC did several surveys over the last 20 years and never ceases to surprise it-self with this one crucial finding...listeners don't care about AM or FM, they don't even care a hell of a lot about mono vs. stereo, and CD-quality digital sound...what's that to all but a few audiophiles? What they DO care about is the software...what we choose to put on the air, in music, talk, news. Give people something to entertain, inform and excite them and they'll listen, AM or FM, analog or digital...a well programmed AM will beat the hell out of a mediocre music FM every day (and I know first hand as a host on an AM that's beating most of the FMs in our market).

[Lifted from Telecom Digest]

In article <telecom14.170.4@eecs.nwu.edu> izzy@netaxs.com (Michael Israeli) writes:

> [TELECOM Digest Editor's Note: I suppose one can now contact the FCC
> via their new online thing with the net which we have been hearing
> about. Does anyone know if the mail can go both directions on that
> or if pen and paper still required? :) PAT]

Some of the documents list an e-mail address at the end, some do not (the one posted did not have one, just telephone a number.) I suppose if you send something, you might get a reply.

As far as sending your comments to the FCC via e-mail, note the following (from ftp.fcc.gov:/pub/Public_Notices/Miscellaneous/pnmc4001.txt):

APPLICATION OF EX PARTE RULES TO INTERNET E-MAIL

The Commission's new computer system now affords members of the public access to decision-making personnel through delivery of Internet E-Mail. The purpose of this public notice is to remind the public that the ex parte rules (47 C.F.R. 1.1200 et seq.) that apply to written presentations to any Commission decision- making personnel also apply to Internet E-Mail presentations.

In restricted proceedings (e.g., proceedings involving mutually exclusive applications, a formal complaint, or a formally opposed application), oral and written ex parte presentations are generally prohibited. See 47 C.F.R. 1.1208. Therefore, as with other written presentations, Internet E-Mail presentations to Commission decision-makers in restricted proceedings are prohibited unless they are served on all parties to the proceeding.

In non-restricted proceedings (e.g., most informal rulemakings after issuance of a notice of proposed rulemaking), ex parte presentations are permissible (except during the Sunshine Period) but must be disclosed. See 47 C.F.R. 1.1206. Therefore, as with other written presentations, if an Internet E-Mail ex parte presentation in a non-restricted proceeding is transmitted to any decision-making personnel, two hard copies of that presentation should be provided to the Secretary. The presentation (as well as any transmittal letter) should indicate clearly on its face the docket number of the particular proceeding(s) to which it relates and the fact that two copies of it have been submitted to the Secretary. The presentation should be labeled or captioned as an ex parte presentation. See 47 C.F.R. 1.1206(a)(1).

During the Sunshine Period (the period which commences when an item is placed on the Sunshine Agenda and ends when the item is released), unless specifically exempted, all presentations concerning an item on the Sunshine Agenda, ex parte or not, are prohibited. See 47 C.F.R. 1.1203. This prohibition applies whether the proceeding is restricted, non-restricted, or is exempt under the ex parte rules. Therefore, unless an exemption specifically applies (e.g., a presentation specifically requested by the Commission or staff or a presentation from Congress or another Federal Government agency, see 47 C.F.R. 1.1203(b)&(c)), no Internet E-Mail presentations should be transmitted during the Sunshine Period to decision-making personnel. See 47 C.F.R. 1.1203.

Action by the General Counsel.

For further information, contact Steve Bailey (202) 254-6530.

KDB has been there forever, yes--it's an original call. I went to college at UCSB in the mid-60s, and both KDB AM and FM were on the air then. I think (not sure cuz I only listened to rock then) they were simulcast (in those days, the FM was the throwaway) and played a pop music (Dean Martin, Ames Brothers) type of format.

Santa Barbara is a very conservative community with a large number of retired, wealthy folks. I suspect there will be a classical station there for many years. And, KRUZ in S.B. on 103.3 is the last remaining, true "elevator music" station in S.Calif.

Cheers--Jim, K6ZH
San Diego

P.S. I've been interested in the recent discussions about San Diego radio. I pay a lot of attention to the local radio media, so I'd be interested in exchanging info. Me, I'm a graying/ balding rocker who listens to 91X!! Must have something to do with going to UCSB in the 60s!

Just one new bit of info to report: After years as a CP, WXXW-FM 98.9 Webster, Mass. is on the air. The station had been testing for several weeks on and off, and turned on the transmitter for good Friday morning 4/8, playing nothing but Bob Seger's "Old Time Rock and Roll" over and over and over and over again until 6:00 Monday morning 4/11. Now they're a mix of satellite "Hot Talk" (Zippo, G Gordon Liddy) and satellite oldies. Nothing local to mention. Slogan is "98-9 Double X." The signal is pretyt good... city-grade over Worcester, listenable as far east as Framingham, and barely audible in Boston.

More later on my one-day radio blitz of Cape Cod...

Source record: 40382

Off and on over a 14-year period, I have had an FM listening post in Columbia, Missouri. I used to be able to hear Kansas City and St. Louis stations quite well from that outpost.

During my most recent visit to Columbia, it hit me that the FM dial is noisy and downright crowded these days. Stations I used to receive easily are now difficult if not impossible to get.

In 1980, there were four local stations that created some interference (KOPN, KBIA, KCMQ, KFMZ) but otherwise, the dial was fairly clear. On most days, I could easily receive most St. Louis stations (120 miles) using an outside antenna.

Kansas City reception (130 miles) was a bit more difficult, but I often had success there, too.

After a few years away, I reestablished a listening post in Columbia on Christmas Day 1986. By that time, there was another local station creating interference (KARO) and a few more class-A stations had been shoehorned onto the dial.

The receiver I had been using since 1980 had more trouble getting a clean signal from some stations, but that was offset by the move of many St. Louis stations to a 1,000-foot tower near Shrewsbury.

Starting in 1988, the full weight of Docket 80-90 hit. At first, most new signals were small-town locals who got frequency changes and power increases.

Suddenly, stations that had been clear of encroachment had interference from stations on adjacent channels. Stations I wanted to hear could no longer be heard clearly during marginal days.

In 1989, I bought a tuner that incorporated narrow IF bandwidth filtering. It helped sort out the chaos.

That was a small victory. Many of the new signals offered programming I had no interest in hearing. Many were country-and-western and farm-to-market stations in small towns that just did not need the coverage areas they had gotten. Some were just satellite repeaters. Others were of interest but were too weak to be received consistently in Columbia (e.g., KFAV, Warrenton).

In the past couple of years, 80-90 has enabled *new* stations to come on the air. We are moving from 80-90 upgrades to brand-new stations, many of which are in markets that can barely provide economic support to the stations they already have.

One new local has come on the air in Columbia (KBXR) and two others are on the way. An 80-90 upgrade from Boonville (KCLR) has effectively bestowed a new station on Columbia as well.

Yet the station operators already in Columbia were scrapping for ad dollars. The pie hasn't grown very much but the number of slices has.

(And that's not to mention markets like Springfield, Mo., which have

seen a three-fold increase in the number of local FM signals available.)
Is all that worth curtailing the coverage of big-city stations
that offer better-executed (one hopes) and more diverse formats?
A lot more watts are being thrown at the aether -- and they seem
to accomplish less in the way of quality, consistent coverage. While
regional coverage never was a primary criterion for FM broadcast
service, it certainly augmented the choices available to listeners to
bothered to invest $100 or so in an antenna.
Docket 80-90 has downgraded FM to a strictly local service. While
this goes unnoticed by most listeners in metropolitan areas, for whom
80-90 has meant at most a few new rimshot signals, listeners
in outlying areas have more local choices at the expense of no longer
having access to a broader, regional spectrum of choices.

It's too bad, so sad, that the bulk of the morning drive time is full of bathroom humor, missing bodyparts, talk of conquest of last night, and the real shock of actually finding something funny during the show.

San Diego has two shows like this: KGB Dawn Patrol, and 91Xs Morning Bash. Plus, with Howard Stern in Lost Angeles (no typo), the radio is full of - oops, I'm starting to sound like them.

I am, however, fortunate to have such great talk radio stations like KFI, KABC, KMPC (for Charlie Tuna); and even KFMB-AM (if they don't fire/let go of anyone else).

That's why it's called broadcasting.

Well, I don't know if this is still valid, but for the longest time
AM 670 in the valley was KWNK. Anyone know for sure?

WOR likely will be acquired by ABC and be converted into a format of
"young talk" (take note of what they do with KMPC in LA). You will also
have to remember that WOR also syndicates its programming (Joy Browne,
Gene Burns, Dolans) and those may look good to CC/ABC if they want back
in the syndication business (and they do).

What obsoleted AM broadcasting **as a use for the MW band** in 1935?

BTW, have any of the proposed AM DAB systems been tested over
the air, with skywave, co-channel, and the usual interference
from light dimmers, etc??

1282. WLW buys WCKY. WCKY moves to 550.

Newsgroup: rec.radio.broadcasting
Date: 1994-04-13 05:47:47 UTC
From: RICK_RODERICK.parti@ecunet.org
Message-ID: <2og123$cep@vixen.cso.uiuc.edu>
Source record: 40387

The musical chairs on Cincinnati continues. Last year, WKRC started being referred to as WLW after being bought by that giant. It then became WLWA.

This weekend, it started going by 550 WCKY. On 1530, WCKY's old home, a message is being played which is a takeoff on the telephone number-changing.

"The number 1530 has been changed. The new number is 550. Please make a note of it."

Announcements follow to the effect that 550 is the new home of Rush Limbaugh and G. Gordon Liddy.

These announcements are punctuated by hockey broadcasts and an occasional religious.

Meanwhile, on 550, the program is a blend of what was on the old WCKY and WLWA. When a local newscast came on the air, an announcement said that it was from the studios of WLW.

It appears to me that WLW has bought WCKY, but since FCC rules, as I understand them, prohibit triple ownership on AM, it is unclear what will happen to 1530.

1283. looking for material on community radio

Newsgroup: rec.radio.broadcasting
Date: 1994-04-13 05:47:48 UTC
From: resystom@web.apc.org
Message-ID: <2og124$ceq@vixen.cso.uiuc.edu>
Source record: 40388

Dear friends of Community Radio,

Juergen Moritz had the idea to produce a booklet, in cooperation with InterKonneXiones and Felix Forster of Radio Dreyeckland and the DGB-Bildungswerk e.V. Nord-Sued-Netz*, on community radio in Africa, Asia and Latin America. The booklet will contain the presentations of some examples for alternative and participative radio stations, as well as a general introduction on power relations within the dominating world information order.

This publication intends to give people working with the media and workers' unions, especially in Germany, a general idea of the media, and especially of radio, in Africa, Asia and Latin America. The booklet of around 48 pages will have to be edited by the end of May in order to be published in June.

We kindly ask you for presentations of radio work and programmes in Africa, Asia and Latin America. These presentations should include a brief description of the social and political context of your work and explain the importance of "broadcasting from the base" for emancipatory processes and the organisation of social movements.

We want to include specific experiences in networking and cooperation on the regional as well as on the international level.

Your contribution to the booklet could be:
- interviews with people working with a community radio station
- recorded programmes
- articles on media projects
- self-presentations of alternative media (radio)
- and, of course, photographs, drawings, comics.

We have been thinking about producing a tape to go along with the booklet about different radio stations in the South, carrying samples of programmes, jingles and music.

Some pages of the booklet will be reserved for women's radio projects and articles on women and communication resulting from various meetings that have been held recently. In this context it is important to underline the necessity of the massive participation of women in participative and alternative media projects in the South.

The international radio link project InterKonneXiones in Freiburg is interested in regularly publishing presentations on

and by community radio stations and projects. Therefore, material that reaches us, but cannot be published in the booklet due to the limited number of pages, will be used for the IKX LETTER as well as a reader and fact book on community radio.

We invite you all to participate in this project. Any other idea occurring to you will be welcome. Please, be aware of the limited number of pages when writing the presentations of your radio project. If necessary, we will process the material received. Finally, we kindly ask you to make your contributions by the end of april. We are aware of the fact that there is very little time left. Please do respond as soon as possible - any material we receive will be usefull.

Yours sincerely

1284. KCOU Falls Off the KEJJ

Newsgroup: rec.radio.broadcasting
Date: 1994-04-13 05:47:54 UTC
From: Mark Roberts <transvox@tyrell.net>
Message-ID: <2og12a$cet@vixen.cso.uiuc.edu>
Source record: 40389

Disclaimer: I have had some peripheral involvement in the following through e-mail communications with past and present KCOU/KEJJ personnel.
All it takes are 430 watts and student politicians playing their games and the result is a radio station in shambles.
I refer to KEJJ (88.1) Columbia, formerly KCOU. KCOU had developed a nationally known reputation for featuring new rock music and new artists. Unfortunately, its local reputation was plagued by financial mismanagement.
Last October, some ambitious student politicians took control of the board of the Residence Halls Association (RHA), KCOU's owner, and threw out the old management. As related in AIRWAVES late last year, feelings ran high. At one point, a booby trap in the form of a concrete block nearly crashed on the head of one RHA politico.
A new general manager was named, and the clean-up began. As in so many situations of this type, the dirty bathwater got thrown out, but so did the baby. The station has moved to a rather bland modern-rock playlist with less variety than I've heard on KC's nearest commercial modern-rock station, KLZR, and one that verges toward commercial heavy-metal at that.
The new general manager was himself thrown out, for reasons still not revealed to him.
In the past few months, KCOU has lost its wonderful call letters.
If you judge the station by the following excerpts from the local media, it's lost much more of its identity as well:
Excerpt #1, from "Student station KEJJ searching for identity," by Neil Swanson, Columbia (Mo.) Daily Tribune, 3-20-94:
> The real point that the leadership at KEJJ is missing is its lack
> of awareness. The station does not understand the role it can serve
in
> the community, which is exposing listeners to music that cannot be
> heard anywhere else. ...
> The station had acquired a "Morning Zoo" type of morning show,
> and the station had begun placing more commercial alternative music
> into heavy rotation.
> KEJJ is drifting too close to commercial alternative, and even
> Top 40, areas already covered by KBXR and KFMZ. Playing the latest
> Red Hot Chili Peppers is not what made KCOU successful in comparison
> to other college stations. Being on the edge of new music was. ....
Excerpt #2, from "MSA hands KEJJ another financial setback," in the "Maneater" (U. of Mo. student newspaper), 4-8-94:
> KEJJ/88.1 FM's future is hazy.
> One group refuses to lift the station's financial fog, and
> some local businesses are waiting for its future to be clearer
> before they underwrite [programming on the station] again.

> A major source of funding for the station was turned down
> at a Missouri Students Association [student government] meeting
Wednesday night.
> MSA Senate members voted against an amendment to the budget
> that would have granted the station $9,000. ...
> The money would have been used primarily for [replacing defective
> equipment, news director Julie] Kimble said. ...
The article goes on to quote from local businesses who told the
"Maneater" that they're taking a wait-and-see attitude toward the
situation before deciding to resume underwriting activities on KEJJ or
KCOU or whatever the call letters turn out to be.
I know it is an educational FM station and I'm sure all involved are
getting an education, though perhaps not what they intended! At least
it may prepare them for the lunacy of the commercial broadcasting world.

1285. KMPC's Future plans...

Newsgroup: rec.radio.broadcasting
Date: 1994-04-13 05:47:55 UTC
From: lancebkost@aol.com
Message-ID: <2og12b$cf0@vixen.cso.uiuc.edu>
Source record: 40390

It looks like KMPC will probably be switching around the first
of May to a "Hot Talk" format, geared towards 18-34 year olds.
This will be in direct competition with our own sister station,
KFI. The fire is already being stoked as former KFI and WRKO
personality Tom Leykis will be starting on KMPC in Afternoon
Drive around May 9th.
In Leykis related news: Erik Braverman, Former Producer of
"The Mark and Kim Show" on KOST 103.5 FM, will be Tom's
new producer. Erik and Tom go back many years to when
Erik used to be a "Boy Producer from Hell" at KFI while
Tom was doing Afternoon's there.....

Well I really hate to strike a blow against Mark, since I generally
respect him and totally respect and appreciate his fine articles to
this newsgroup. Plus, I agree with him about the 80-90 mess.

However, wasn't it you, Mark, who spoke negatively about how those who
bemoaned the (possible) crippling of WOWO (a large, regional, and well
executed station) to serve the local 'needs' of New York's WLIB?

Here are your words...

[...]

= However, warm and fuzzy memories, nostalgia, and history do not
= make for good policy when it comes to the efficient allocation of the
= RF spectrum.
= If someone bought KMOX from CBS, say, to downgrade its signal to
= allow nighttime service to Limon, Colorado, would I be upset? Hmmm.
= Maybe. But the 'MOX is a *St. Louis* station, not a Kansas City
= station. Other than during last year's floods, it doesn't provide
= anything I can't get here.

[Many examples of cities w/o clear channels, and other stuff deleted]

= While there may be a great amount of interest in the northeast
= corner of North America in WOWO among DXers and scattered others, I'll
= bet it's NOT selling nighttime spots to New York City advertisers, or
= to Boston advertisers, or Toronto, or Buffalo, or wherever. WOWO's got
= to pound the streets of Fort Wayne to make a buck.
= As long as WOWO's nighttime service isn't impaired in its primary
= service area, its ability to serve the market should not be harmed. It
= may even be augmented because WOWO will end up being more oriented to
= Fort Wayne and won't be distracted by the temptation to go for the big
= nighttime audience in the Northeast.
= So those of you who've lived in or been to Fort Wayne won't be able
= to hear it any more if WLIB does what we all suspect it's going to try
= to do. I must respectfully say, "That's tough. Radio is a business
= and this is a business transaction. You can try to stop it if you like
= but I don't think you have much besides nostalgia going for you."

So, except for the specifics, like band, power and such, what is the difference between impairing a long-distance AM like WOWO (which you feel doesn't matter as long as its primary area is still covered) and the encroachment on long-distance FM from KC and St Louis, by local stations, serving local audiences?

Why should the long distance reception of big city FM be an issue? After all, as long as they serve their city of license and surrounding areas, who cares? Radio is a business, right? Who cares if you *want* to hear a station from St Louis and some local rimshot is giving out Farm reports to its rural constituents? Maybe the farmers care more about those market reports than they do about progressive rock from some station 150 miles away. Maybe the new station *is* only repeating SMN, is that not "a business transaction"?

On one hand you post that it is 'tough' if listeners in the North East *enjoy* the service that WOWO provides, yet you bemoan the fact that a fringe signal (or several) which you *enjoy* are being encroached upon by local stations which are only *serving* their communities of license.

Does it matter that these stations are programming Country and Western? Would you feel as bad if they were repeating the signal of the station you are trying to get? Or perhaps were *originating* that signal? How would you feel if someone wanted to hear that farm station, but lived, say, seventy-five miles east, and were blocked by the St Louis station? Would that be *tough*, or would that be equally bothersome to you?

Mark, as I said, I respect you and the work you have done here in this group. Also, I suspect that we agree on more than we disagree on. However it just irks me when someone summarily writes off the concerns of listeners to *one* popular, well run, distant signal, yet on the other hand, crabs about how *his* favorite stations (which once were in the clear) are now in the mud.

I propose that you cannot have it both ways. If it is OK to degrade a long-time major broadcasting influence which reaches millions and and covers thousands more miles than the St Louis FM's, then please accept that it is equally OK for your personal 'listening hobby' to be degraded by local signals which, ostensibly, serve local audiences and are trying to eek out a living from those audiences.

I dislike 80-90 too, for the most part. Mainly because it authorized signals with no requirement that they even attempt to serve the communities of license. However, if someone runs an 80-90 in an agricultural community, and programs *to* that community, I say hooray for them, even if it means that you have trouble hearing KSHE or whatever from 120 miles away.

Sorry if I am ranting, but this just kinda pushed one of my buttons.

Bill

Yep... it's Jo Maeder (the correct spelling, same as ex-husband Jay Maeder of the NY Daily News) AKA Jo Weiss AKA "The Rock and Roll Madame" AKA Miami's "Y-Onic Woman." Jo does voiceovers fulltime these days (with ads running in R&R sometimes) and is the host to "Dr. Wally," the longtime advertising spokesdoctor for Channel Home Centers.

Scott D Fybush (fybush@world.std.com) wrote:

: later 810, with KGO San Francisco and WGY Schenectady. Maybe
: Mark Roberts can lend some insight into how his hometown KCMO got
: caught in this "GE sandwich" and crushed out of the 50kw it
: might have deserved...

KCMO was started in 1936 at 1450, and moved to 1480 because of NARBA.
After that, 810 in this part of the world was occupied by KOAM, Pittsburg,
Kansas. It was a 1,000-watt daytimer.

In 1948, there was what appeared to be a three-way swap that led to today's
configuration:

WHB (Kansas City) moved from 880 (1 kW daytime) to 710 (10/5 kW, DA-2)
KOAM (Pittsburg) moved from 810 to 860 (10/5 kW, DA-N)
KCMO (Kansas City) moved from 1480 to 810 (50/10 kW, DA-N; now 50/5 kW,
DA-N)

So KCMO was one of those postwar drop-ins.

Why no 50,000-watt signal in KC?

WDAF had (and has) a great signal at 610 (5 kW ND fulltime) while KMBC at
980 focused its signal expansion efforts on simulcasting on daytimer KFRM
(550) from Salina.

I will soon be posting an updated Kansas City history that, I hope, sheds
more light on many of these topics.

N> XHFG FM 107.3 Allsports, all espanol

I used to pick these stations up routinely in Santa Barbara (They
occasionally appear in certain other parts of Los Angeles County)

I remember when
XHTZ was Z-90, playing AOR type rock
XHRM did the Urban Contemporary stuff
XETRA-FM was about the same
XELTN was my favorite. It played Latin popular music, not like the older
"ranchero" type music most Spanish stations play. XHFG also used to play
music similar to XELTN some time ago.

N> [XETRA-AM is simulcast from San Fernando Valley on AM 670. Mexico
N> id's are usually at the bottom of the hour, and I can barely receive
N> 670 in Carlsbad. Could someone from the LA basin confirm this,
N> please? I'd like to get the call letters and power.]

It's KWNK-670, Simi Valley, CA, 5kw day, 1 kw night, directional same
pattern day and night

1291. Re: New PA station?

Yes...there is indeed a new planned FM station in the State College, PA area. It will be on 107.9 FM (forgot the call letters), and it will be class A with the city of license being Port Matilda, about 12 miles west of State College. The tower will be on Bald Eagle Ridge.
The format has not been disclosed yet, however. The station owners are doing this on purpose to supposedly give them an edge over the competition. I'd certainly hope this station isn't another AC station, as there's a big glut of those within 50 miles of State College. It's possible it may be a CHR/Top 40 station (since that's what 103.9 WHTO over in the Williamsport area is), though it would have to compete with 103.1 WBHV State College and 100.1 WPRR Altoona, so I have doubts to that. It could be some sort of album rock format to compete with 97.1 WQWK Univ. Park/State College and 94.3 (Q-94) Cresson/Altoona (forgot the calls) or an all classic rock (no new songs) format, for which there is none here. The best option would be either modern rock or adult album alternative, which there are no full time stations of either format (though several stations devote some of their time- anywhere from 2 hours per week on 103.1 WBHV, 4 hours per week on 100.1 WPRR to selected nights on 91.1 WPSU, Univ. Park). AAA might be a good option since it can attract a more conservative, older and more rural audience than modern rock (if it doesn't want to only aim at State College). Modern rock would be a good option too, though WPSU will split as early as next fall into 2 stations (an NPR type public radio station and a student run college music stations). This would give competition to a modern rock format. Last (and worst in my opinion) is that it would be country, since there's only one large country station here (98.1 WFGY "Froggy 98, which simulcasts on 94.5 in State College) and a small country station west of Port Matilda on 105.9 in Philipsburg (barely receivable in State College). Unfortunately, there's possibly a market for another country station here, but if 107.9 were country, they probably couldn't live up to the more powerful Froggy.
Brandt

: : Is there a station airing radio theatre in your areas?

In Los Angeles, the following radio theatre is available:

10-10:30am, 5-5:30pm, & 10-10:30pm "Storytime Theatre" on KPLS, 830; plays read by stars; on Friday 4/8, Keith Carradine read "Annie Oakley";

8-9pm old radio shows on "KJOI", which are KOJY 1260 and KJQI 540;

9-9:30pm "Tales of the Texas Rangers" on KNX, 1070;

9:30-10pm old radio theatre on KNX, 1970.

Overview: **********

This is the weekly news digest for West Coast Live, San Francisco's Live Radio Show to the World (actually just NPR).

WCL at NPR convention next week. *******

Sedge and staff are attending the National Public Radio convention this week. They will be returning to the bay area in time for Saturday's show.

The upcoming schedule: **********

Our producers work overtime booking talent onto the show. Sometimes they're so busy on the phone, they don't have time to keep the rest of us up to date. So join our audience at a live show. You too may be pleasantly surprised.

April 16h: **********

Kongar ool-Ondar, Tuvan throat singer.

John Hammond, bluesman.

Meredith Tromble, artist-in-residence.

Pulp Playhouse, Improv theater.

April 23rd: **********

Naked Barbie Dolls, really hip musical group.

Calvin Trillin, author and humorist.

Anne Lamott, author "Operating Instructions".

Ad Vielle que Pourra, French folk music.

April 30th: **********

Kronos Quartet, world renowned contemporary string quartet.

Weslia Whitfield and Mike Greensill, world renowned cabaret extraordinaires.

David Tanenbaum, singer/songwriter.

May 7th: **********

The Hot Club of San Francisco.

Kairos Children's Choir, angelic young voices.

May 14th: **********

The Rhythm Shieks.

Daniel Duane, author of "Lighting Out: A Vision of California's Mountains".

May 28th: **********

Merl Saunders.

Special Offers: **********

Drawing for Free Tickets!: *****

This week marks our 15th West Coast Live show. Be the 15th person to email (see rules, below) the moderator at;

Owner-West_Coast_Live@netcom.com

and you will win two (2) free tickets to this week's live show. Runner-ups are allowed to buy tickets at list price.

Rules: **********

The contest begins as soon as the moderator sends this notice to the West Coast Live email subscription list.

The winner will be selected based on the time the entry was sent (as opposed to the time the entry was received), no sooner than 1 hour after the moderator receives the minimum number of entries, and no later than 48 hours prior to the live show.

The email must be addressed to;

Owner-West_Coast_Live@netcom.com

The email's header subject must contain the phrase; "Win Ticket Drawing".

One entry per person.

The winner will be notified by email.

If the winner can't attend this week's show, the winner may assign the tickets to a couple of friends.

The moderator's (email filter's) selection is final.

Free Coffee: **********

Wear an official West Coast Live shirt at the show, and you are entitled to free coffee.

Rules: **********

Official West Coast Live T-shirts or sweat shirts only.

For a limited time, this offer is extended to shirts from that old radio show, that are upgraded with an official West Coast Live Shirt Upgrade Kit.

This offer is good for free coffee only from the West Coast Live java bar. If anyone else offers you free coffee for wearing a West Coast Live shirt, let us know.

T-shirt Drawing: **********

On the last live show of each month, we give away an official West Coast Live T-shirt.

Rules: **********

To enter this drawing, you must drop a business card into our fish bowl. Any scrap of paper with your name, address, and phone number may be substituted for a business card.

One entry per person. You must be present to enter.

The drawing is held following the last live show of each month. You need not be present to win.

Tip of the Week: **********

File for an extension: **********

Why stay up all night doing your taxes, when you can put if off for a few more weeks. It's easy. Just fill out the one page request for extension for both your federal and state taxes, write them checks for all the money you have left from last year, and mail in the forms. It's just that easy. The government gets your money and you get your sleep.

West Coast Live reminds you to seek professional advice from a legitimate tax specialist.

Downloading Additional Information: ****

You may download an information document giving background information on the show and the show's Internet service, by sending the following email message to;

LISTSERV@netcom.com

Michael D. Maxfield (tweek@netcom.com) wrote:

: Didn't Tom [Campbell] have some legal problems back a decade or so
: having to do with some of the commercials he did?

It's more than a decade, closer to 2. He had been doing spots for Matthews TV and Stereo City when charges were lodged against the store for bait and switch (advertising a product at a cheap price which they didn't even have in stock, with the intent of switching the customer to a higher priced appliance once they got in the store). Tom Campbell was only the hired spokesman and quickly severed ties with the company. Matthews is now out of business.

: 1978-198?(4) St Mary's College Sports broadcaster on the commercial
: side (KWUN Concord and KKIS/KDFM - all stations since renamed).

Renamed? I believe KWUN is sitting in a box somewhere. (Of course, John Higdon is probably putting it up somewhere else instead and will make me totally wrong again.) I haven't been out to the site lately (a magnificent 5-tower array impossible to keep in phase), but I'm told the station went bankrupt, the towers taken down and the property sold for a housing development. Ahhh...the memories of the little station on the hillside.

: Last time I saw Roy, was about 3-4 years ago. He was the MC for a
: parade being held at Rossmoor in Walnut Creek. I believe he was (is)
: also a resident there.

Oh, ok. He must have retired well. Have you *seen* the surroundings at Rossmoor? It's huge and quite lush. Glad to know that *someone's* made money in the radio biz.

OK, so I was close!

WYNY hasn't dropped it's country format, but last week they did take the station less-current intensive. It's now approximately 50% gold, and they've evidently dropped the `Y-103.5' moniker.

Anyone with additional details is welcome to share them!

Andy in Orlando

1298. RadioWatch-Buffalo/Toronto(4/13)

Newsgroup: rec.radio.broadcasting
Date: 1994-04-14 05:57:50 UTC
From: ag365@freenet.buffalo.edu
Message-ID: <2oim0u$9k8@vixen.cso.uiuc.edu>
Source record: 40403

Lot of stuff to get to in this go-round:

*Erie,Penn.'s WMXE-FM(103.7,50 kW,499 ft HAAT)has switched positioners and calls to WRTS-FM and Star 104. Previously,WRTS (as Mix 103.7)was in an A/C format. Near as I can tell,they shifted to a hot A/C format. (If someone in the Erie area can comfirm otherwise,e-mail me offnet.)

*WBEN(news/talk/Bills;NewsTalk 930)has 2 new P/T weekend news staffers. Mark Webster is on board as a news reader(he prevoisuly worked at WEBR before it switched calls to WNED-AM), while Winston Brown has joined as a reporter. He previously was at WKBW-TV(ch.7,ABC affil.)as a reporter,and most recently was the program director of W58AV,a low-power station in Buffalo. He also hosted Daybreak,the station's answer to the network breakfast shows.

*Staying with 'BEN for a moment,mid-morning talker Dave May co-hosted the Niagara Frontier Radio Reading Service telethon with WGRZ-TV(ch.2,NBC affil.)anchor Nick Clooney and Jennifer Farina,who did a short stint at WWKB when it was known as News First KB radio 1520. She will co-host "Fox Morning Magazine" for the local Fox affiliate,WUTV(ch.29),which will start in May.(FYI, Jennifer is the daughter of Tony Farina,who recently left WKBW as its investigative reporter.)

*WMJQ(hot A/C;Q102)is now positioning themselves as playing "the superstars of the 70s,80s and 90s."

*Maryalice Demler,ND and sidekick to Joe Chille(please,no jokes about his name :))on WJYE's(A/C,96.1)morning show;will host Artvoice on 2,a new entertainment show debuting next Sat.(4/23) after Saturday Night Live.(BTW,Artvoice is a local entertainment paper.) Demler was previously a weathercaster for channel 2 and still fills in occasionally.

*Lorey Schultz,formerly at WGR,has joined WIVB-TV(ch.4,CBS) as a general assignment reporter.

*To answer some questions asked recently in ARJ:
1.Here in upstate N.Y.,I've found 5 MRN affiliates:
-WWKB here in Buffalo
-WFWC,Springville(1 kW-U,DA-2)-A/C format
-WACK,Newark(5 kW-D,500 W-N;DA-2;1420)-A/C/sports
-WCJW,Warsaw(1 kW-D,DA-D;1140)-country/Bisons(tr.A-Buf.)
-WNNR,Sodus(3 kW,243 ft HAAT,103.5)-rock

2.To Steve Sobol:As far as Cincinnati being termed the Queen City,turns out we're both right. We've be called the Queen City of the Great Lakes,while Cinci is the Queen City of the Ohio River.

*Seems that Buffalo isn't the only place where stupid talk rules. WHAM(1180 AM,50 kW-U,Rochester;News Radio 1180)mid-morning talker Jack Kinnicutt can't seem to avoid sticking his foot in his mouth,either. In a discussion on the city's proposed domestic partnership law recently,he started the discussion with,"Elect a queer,you get queer legislation."(from a letter in the Democrat & Chronicle) Naturally,the debate went downhill from there. (This isn't the first time he's tangled with the Flower City's gay community. The Empty Closet,a paper geared to gays,tried to spearhead a boycott in response to his remarks.)

*Remember when I asked how WGR's Rich(the Bitch)Michaels would handle the death of Nirvana's Kurt Cobain? I found out on Monday.
Around 12:30,he refered to him as "Kurt Cocaine" and "Kurt Copain" and mentioned that his board op has listened to a "Canadian station"(sounds like 97.7 HTZ FM) and he couldn't believe that they were bawling over his death. Well,dude,the CALLERS-for the most part-were doing the caterwauling,NOT the jocks.
Your sister station,WGRF-FM(97 Rock),didn't say anything about it. Then again,why should it-when its playlist sounds most of the time like it's been leftover from the 70s? WUFX(103.3 the Fox)did a little better,with hourly songs from the group under the liner "103.3 the Fox remembers Kurt Cobain."

That's it for now.

The AM hasn't been KGB for some years, and the gag predates Smirnov. A single example was a Doug McClure movie some years back about a "sleeper" agent. Approached by the russians and asked if he'd ever heard of the KGB ... he replied "Yes, that's a radio station in San Diego, isn't it?"

No more..

Radio news week of 4/10/94

Yet another correction on WASH FM 97.1's new Program Director, Kevin Gossett. It didn't take Kevin long to learn that the Washington Post will print something about someone without checking to see if it is correct or not. And I was foolish enough to borrow excerpts from the Post. Here is the scoop on Kevin's departure =66rom WGRD in his words:

"I did NOT leave as a result of the sale of WGRD. I was asked to stay, but had been in negotiations with WASH during the time of the sale. They culminated shortly after the close. WLHT's consultant actually put WASH in touch with me during the time that another company was negotiating to buy WGRD. I had heard the POST (Washington Post) connected me with both WGRD and WLHT. Don't know where they got that."

My thanks to Kevin for directly contacting me with the correct information. Anyone who has radio news for metro Washington, D.C., please email me (lacko@enh.nist.gov) and let me know. I'll gladly pass the information on to other REC.RADIO.BROADCASTING readers.

Thanks to Bob Smith at WXXI in Rochester, NY., for the tip on WWRC AM 980's new Operations Manager, Gary Burns. Gary comes to the talk station from WIOD in Miami. Mr. Burns has a tough road ahead as he tries to pull WWRC out of its 1.1 quagmire.

X-tra Oldies 104.1 FM (WXTR) has signed up Wolfman Jack to do several promotions and shows on the station. The Wolfman has that face and voice that everyone knows and should offer the station a lot of visibility as it fights with WBIG, FM 100.3, for the oldies listeners. WXTR expects to start shuffling on air staff soon.=20 Stay tuned!

Modern rocker WHFS FM 99.1 recently sold tickets for its upcoming annual festival, HFS-tival. All 50,000 tickets sold in 4 hours! Scheduled to appear on May 14th at RFK Stadium are: Toad the Wet Sprocket, Meat Puppets and Counting Crows among others.

Source record: 40407

I recently saw a posting about a Peoria station changing format, one that was "alternative/top 40", and now 70s/80s/90s AC type station (gee, that's a rare format, hi). I hope this is not WKZW 93.3, "KZ93". I got a chance to go thru Peoria last August and enjoyed listening to that station starting in Eastern Illinois on US-24, all the way to Galesburg, where I stayed. It was too weak to make a clean aircheck there, WGBQ 92.7 maybe, plus seemed like KZ93 was E or SE of Peoria, judging on how its signal got out. Lost it to KIOA relatively early to the west. Anyway, would be sad to hear that it was this station, was it? Are they still "KZ93", or a new liner?

Thanks,

Greg Coniglio

WEOS and the NCAA will be offering various lacrosse broadcasts to any station that want to air them, via satellite or phone feed. This includes the NCAA Men's Championships Memorial Day Weekend. The games will also be availble to fans of Lacrosse. So, this post will give info to both stations and fans. You can skip the section that may not be of interest to you.

Stations:

The following games are availble for broadcast by ANY station nationwide via satellite:

April 23 Hobart at Michigan State 140 EDT

May 28 Men's Division I NCAA Semifinals 1145AM -? two games

May 29 Men's Division III NCAA Championship 145PM

May 30 Men's Division I NCAA Championship 1145AM

The games will also be available via a phone feed. You must have a contract to air these games. There is NO fee for any noncommercial station. The fee for commercial stations are minimal (and I do mean minimal). Also, any broadcast of Hobart Lacrosse can be made available to any station, as well. The games are set up for both commercial and non-commercial stations for sales opportunities. Please contact me for information.

Fans:

All games of Hobart Lacrosse and the NCAA playoffs are available on broadcast and on Teamline. The broadcasts are heard in central New York on WEOS-FM 89.7 Geneva, and WSFW AM 1110 and 99.3 FM Seneca Falls. WEOS is also on the Ithaca Cable system at 98.8FM.
Teamline can be reached at 800-846-4700 and the team code for Hobart Lacrosse is HWSC(4972). During the NCAA weekend, the games will be on the code NCAA(6222). Write or call for information.

1305. WLUM-FM Milwaukee - format change

Newsgroup: rec.radio.broadcasting
Date: 1994-04-14 05:58:00 UTC
From: bialik@convex.csd.uwm.edu
Message-ID: <2oim18$9kk@vixen.cso.uiuc.edu>
Source record: 40410

WLUM-FM Milwaukee is beginning to change formats. The station had a reputation of being one of the leading dance/chr stations in the country a few years back (One of the stations that got its playlist printed in Billboard on a weekly basis). In January 1993 the station switched to an Urban Contemp and usually averaged around 4th in the Arbs. I believe they were number one for younger females.. but don't quote me on that.

Program Dir, Jamie Hyatt has left for Hawaii, and night jock Dakota is heading back to Washington D.C. (according to an inside source). The station has set up a telephone number dedicated to listener feedback. They claim they are "remodeling" the station, and want ideas on how to change formats. As of today the playlist is 50% urban, 30% AC, and the rest is a splattering of 70's-90's dance (my estimates).

Mark
(all you Milwaukee r.r.b readers drop me a line!)

From: "A.J. Janschewitz" <p00445@psilink.com>
Message-ID: <2oim1e$9km@vixen.cso.uiuc.edu>
Source record: 40415

>DATE: 13 Apr 1994 04:18:45 GMT
>FROM: Mark Roberts <transvox@tyrell.net>

> Docket 80-90 has downgraded FM to a strictly local service. While
>this goes unnoticed by most listeners in metropolitan areas, for whom
>80-90 has meant at most a few new rimshot signals, listeners
>in outlying areas have more local choices at the expense of no longer
>having access to a broader, regional spectrum of choices.

It has a darker side: It has spawned a number of stations that are
nothing more than repeaters for satellite services; shoestring
operations that offer no local service to speak of.

This is heresy to the commercial broadcaster (and in that pile, I'd
have to heap most NPR stations, which have become de facto commercial
operations) to suggest this, but I think the answer can be found in
some brand of community broacasting, like the micro-power operations on
the fringe of the law that we read about occasionally from the folks in
Berkeley.

In my old age (40) I find more enjoyment listening to the sometimes
rough-hewn college stations and their very eclectic mix of programs
than I do listening to the cookie-cutter, overprocessed, over-consulted
formats of the big commercial outlets.

80-90 let the petty thieves in on the big thieves' territories. It
accomplished nothing in the way of service or community orientation.

1308. Promo copies of Squeeze This available

Newsgroup: rec.radio.broadcasting
Date: 1994-04-14 05:58:07 UTC
From: Tom Torriglia <tommy@crl.com>
Message-ID: <2oim1f$9ko@vixen.cso.uiuc.edu>
Source record: 40417

Hello:

I am pleased to announce that promotional copies of the new CD by Those Darn Accordions, Squeeze This, have just become available for consideration for airplay.

The new CD contains such TDA hits as:
The ska flavored Bowling King
The epic Story of Lawrence Welk
The chilling Grodno in the Moonlight
The haunting instrumental Autumn in Vilnius
The Hendrix scorcher, Fire, as sung by 79-year old member, Clyde, as only he can
The head bangin' We're an Accordion Band
The B-52ish Trouble in the Love Bubble
the Goodman classic Sing, Sing, Sing
...and polkas a plenty

Those Darn Accordions are a 10-piece band comprised of 8 accordions, bass, drums and are based in San Francisco.

If you'd be interested in finding out how to receive a promotional copy in return for airplay consideration, please drop me a note.

Thanks.

Tom Torriglia

Thanks to the people who have been sending me updates on radio theatre on the air.

I am planning on publishin an updated list for MODERN RADIO DRAMA #3 and would appreciate knowing the call letters, day, time and title of any radio drama, old or new, on the air. This includes classic programs, original shows, syndicated or home-grown.

The list is growing.

This just in to the Directional News Desk:

CP for KSCB Liberal (which isn't) Kansas at 1270 kHz to go from 500 watts nighttime (DA-N) to 30 watts (ND).

Will the station in Pratt be next? (I am joking, but who knows if this trend continues?)

1312. WINS: where was everyone?

Newsgroup: rec.radio.broadcasting
Date: 1994-04-14 05:58:15 UTC
From: davemackey@BIX.com
Message-ID: <2oim1n$9kt@vixen.cso.uiuc.edu>
Source record: 40414

This was odd. On Wednesday, April 13, absolutely none of the regular
air staff on WINS New York was on the air. Check this out.

:00-:20 anchor Paul Smith replaced by John Maher
:20-:40 anchor Judy DeAngelis replaced by Lee Harris
:40-:00 anchor Bob Hagen replaced by Dave Henderson
Sports anchor Steve Torrey replaced by Rich Gross
Traffic reporter Pete Toriello replaced by Jude Timillo
(Timillo had filled in for Matt Ward the day before)

I just thought it extremely strange to hear none of the morning voices
who force-feed me news and traffic information on my ride to work.

1313. Radio Watchers -- KC (KISF/KKCJ/KLZR)

Newsgroup: rec.radio.broadcasting
Date: 1994-04-15 03:51:38 UTC
From: Mark Roberts <transvox@tyrell.net>
Message-ID: <2ol30a$ag8@vixen.cso.uiuc.edu>
Source record: 40418

Some notes from the Kansas City FM bland:

The "gangsta rap" banned by urban-contemporary KPRS(FM) has
apparently found a home at contemporary-hit KISF(FM).
During its "High Five at Ten" Wednesday night (Apr. 13), tune #5
was Snoopy Doggy Dogg's "Gin 'n Juice." This is the song Tony G of
KPRS pulled from the air a few weeks earlier.
Several other tunes from that genre were heard during a 90-minute
period.

KISF appears to be making moves to fight the advent of the
reformatted KMXV(FM) (at last check, contemporary-hit/80s oldies/mild
crossover modern rock).
The station now uses the slogan "today's hottest music," has added
a few modern rock crossovers of its own, and is now engaging in that
trademark of Kansas City hit radio of the 70s and 80s: slash-and-burn
modulation.
Perhaps KISF's now heavily compressed signal is designed
to compensate for its status as a rimshot.

Hot-country KKCJ(FM) actually now seems to be doing some
promotions. Perhaps its LMA partner, country KFKF(FM), has actually
decided to make something of the station other than a spoiler against
young-country KBEQ(FM).
Wednesday night, "CJ 106.5" was heavily promoting a "Boots 'n
Boxers Male Buns" contest at the "Guitars and Cadillacs"
country-and-western bar in the Kansas City suburb of Gladstone.
Needless to say, I did not drive up there to compete.

Modern-rock KLZR(FM) (Lawrence, Kansas) is also doing some Kansas
City promotions, even though its signal is hard to hear in much of the
city.
KLZR's overnight DJ "Brian the DJ" was at a remote at the
Hurricane bar in the Westport entertainment district. However, the
remote was marred by the fact the Brian the DJ could not hear his cues
from the studio DJ. (Apparently no IFB?)
Finally, cues were given over
the phone, but the phone lines didn't sound very good, either.
Interestingly enough, KLZR has promoted its late-night DJ, Jay
Charles, to morning drive. KLZR also now has traffic reports from
Metro Traffic for Kansas City during morning and afternoon drive.
Even though it chews up the format a bit, I also applaud KLZR's
retention of local news during morning and afternoon drive, despite
its status as what I call a "reverse rimshot" for Kansas City.

In article <2og123$cep@vixen.cso.uiuc.edu>, RICK_RODERICK.parti@ecunet.org (Rick Roderick) writes:

"it is unclear what will happen to 1530."

Based on other postings here and on the Compuserve Broadcast Professionals forum, it looks like what Jacor (owner of WLW and the new WCKY/550) wanted was not the 1530 frequency and license but just rights to their syndicated talk. This one was reportedly a very sudden move...WCKY/1530 had just brought some new air talent into town only to put them back out on the street again. (Jeff Katz from WPOP/Hartford was said to be one of the victims.)
Someone else is the nominal owner of the license and facility itself...and has a choice of either letting Jacor effectively lease and program it as well (until the
FCC tells them to cut it out, probably sooner rather than later) or figuring out
what to do with it...That 1530 frequency is a nice one, and someone with a little
money and a little imagination could turn it into a hell of a good local talk outlet
and have the one signal competitive enough to challenge WLW. Will someone do it?

1316. Re: Digital Radio Momentum Strong

Newsgroup: rec.radio.broadcasting
Date: 1994-04-15 03:51:41 UTC
From: ah617@FreeNet.Carleton.CA
Message-ID: <2ol30d$agf@vixen.cso.uiuc.edu>
Source record: 40421

In a previous article, Dan.Bammes@m.cc.utah.edu (Dan Bammes) says:

> All through this long post on the Second International Symposium on
>Digital Broadcasting, we're hearing from bureaucrats in countries where
>broadcasting is under government control, and practically nothing from
>countries such as the United States, where broadcasting is generally a
>commercial enterprise. Two of the issues that were not addressed:
>
> 1. Digital broadcasting is wasteful of bandwidth, and few commercial
>broadcasters are willing to simply let the government pull the plug to
>accomodate the favored few who will be allowed to usurp the spectrum.
>

Commercial radio broadcasters from around the world were well represented at the symposium. In many instances they are the driving force behind the introduction of digital radio because they see new business opportunities. I am unaware of any country which plans to 'pull the plug' on existing broadcasters; indeed, most are following the Canadian plan that any licensed existing AM or FM station will be given the opportunity to make the transition to digital.

> 2. AM broadcasting has been obsolete since 1935, but it refuses to
>die because of the enormous installed user base. Replacing that installed
>user base could take a generation at least -- and a government subsidy as
>well.
>

Introduction of wide-band digital radio will need a transition period, precisely because of the 'enormous installed user base'. Simulcasting service on both a digital and analog transmitter means that consumers will buy a digital radio when they are ready. This is exactly the process as the planned HDTV/NTSC transition for television. And in mass production, digital radios are projected to cost about the same as analog radios.

> Central wastewater treatment is a much better system for
>handling human waste than cesspools and septic tanks -- but the fact that
>superior technology exists doesn't keep millions of people from doing
>it the old wa using it the old way. When somebody starts analyzing market
>factors and consumer preferences in the debate over digital broadcasting, I
>may be ready to listen.
>

Initial consumer research shows consumer support for digital radio. A recent study by Touche Ross found considerable consumer market potential; European sales of digital radios are estimated at 35 million receivers a year in each of the first 5 years. Education of consumers is needed, according to Touche Ross, but once informed, consumers identify a clear package which they are prepared to purchase. The most important

consumer features are:
i) freedom from interference and fading (96% stated this is the most
important benefit)
ii) quality of sound (alone, this is insufficient to warrant purchase,
although 84% stated it is 'important' or 'very important')
iii) ease of use of the radio.

Source record: 40422

In a previous article, Bob Smith <talk1370@aol.com> writes:

>Summary of a release about an international DAB conference in Canada...
>
>Don't know if this is going to have too much effect on broadcasting in the
>US. The word from engineers in the Northeastern US is that in-band,
>on-channel and compressed digital radio is the way we're going to go,
>simply because it will be infinitely easier for stations to adapt (they
>won't even have to stop transmitting their analog signals simultaneously
>with digital) and won't force listeners to change their tuning habits when
>they go digital. And as we go, so goes the western hemisphere, since the
>US has a majority of stations and receivers in the Americas...
>Bob Smith, middays, WXXI/1370 Rochester, NY

Introduction of wide-band digital radio is well advanced in most of the world. The US has not made a decision, but much effort has gone to develop in-band solutions for AM and FM. These systems are scheduled to be independently tested later this year (along with the other digital radio systems, such as Eureka-147).

Wide-band Eureka-147 system has had extensive field tests which consistently confirm deliverance of CD quality sound, a roboust, interference-free signal, and data capacity for new service opportunities (enhanced services, data). Thus far in-band has had only limited demonstrations in controlled conditions; its developers admit in-band quality is not as high as Eureka's, capacity for data is constrained, and interference characteristics are largely unknown.

Major radio manufacturers are developing combination analog/Eureka-147 digital consomer radios. Pioneer, Sony, Kenwood, Delco, as well as European manufacturers Grundig, Philips, Telefunken, Bosch and Nokia all aim to have the first models in the hands of consumers in 1996. Broadcasters in most of Europe, in Canada and in Mexico, expect to begin regular digital service around the end of 1995.

All countries considering wide-band technology envision a transition process, where existing analog transmitters simulcase with the digital transmitters. This means that listeners are not forced to buy a new radio, but will take the decision based on their perceived value of the benefits digital radio offers. The timetable in the US is less clear, pending the results of the in-band tests.

WUMD RADIO

1319. Data Point for KOB Albuquerque

Newsgroup: rec.radio.broadcasting
Date: 1994-04-15 03:51:49 UTC
From: Mark Roberts <transvox@tyrell.net>
Message-ID: <2ol30l$agr@vixen.cso.uiuc.edu>
Source record: 40424

I dragged KOB (Albuquerque, NM, now KKOB) into the discussion about WOWO some time back.

KKOB has 50 kW, DA-N, on 770, to protect WABC New York. KOB lost its clear channel in the 1941 Havana agreement, and landed first on 1030 and then on 770 with a special temporary authorization for 50 kW days, 25 kW nights, until this all got sorted out after the war. (Which war, that is?)

With that in mind, here's a paragraph from TELEVISION DIGEST of November 10, 1956:

> With court breathing down its neck, FCC took steps to resolve
> one of the oldest snarls on file--"temporary" operation on 770 kc
> of radio KOB, Albuquerque, for last 15 years. It ordered station to
> come up, within 10 days, with plan for directional nighttime
> operation
> that would protect clear-channel WABC, New York--or prepare to shut
> down at night.

Evidently the situation was resolved quickly, even though the court case wasn't. TELEVISION DIGEST of January 12, 1957 reported the sale of KOB AM and TV by co-owners Time Inc. and Wayne Coy to KSTP Inc. (Stanley Hubbard) of St. Paul, Minnesota for $1.4 million. Time and Coy paid $600,000 for the stations in 1952!

The following (soon-to-be) entries from the OLDRADIO database are courtesy of Barry Mishkind, who graciously granted permission for this excerpt:

> 3/13/57 Vol. transfer of control of lic. corp from TIME, Inc. and
> Wayne C. Coy to KSTP, Inc. Protest and Petition for
> Reconsideration filed 4/12/57 by American Broadcasting-
> Paramount Theaters, Inc.
>
> 4/22/57 Engineering report received. KOB authorized to commence
> operation with a directional night time antenna in
> accordance with Commission Order 56-1174 dated 11/26/56.
>
> 5/8/57 Memo, Opinion and Order adopted to amend the grant of
> BTC-2426 regarding the grant, subject to any action the
> Commission may be required to take to carry out the mandate
> of the Court. The licensee will carry out commitments to
> comply with the Court Order of 9/27/56, Case 12883, or cease
> all night time operation on 770kc.
>
> 6/18/60 Vol. assignment of C.P., lic., and SSA to KSTP, Inc.
>
> 8/9/62 Vol. assignment of lic. to Hubbard Broadcasting Co.
>

>10/11/63 Applied for a license to cover the C.P. which authorized a
> change in transmitting equipment, increase in power to 50kw,
> change frequency to 770kc and install directional night
> antenna.
>
> 5/21/75 Granted a license to cover the C.P., as modified, for
> 770kc, 50kw DA-N.

And even after *that*, it came up before the Supreme Court sometime around
1977 or 1978.

I believe that CP was older than I was (by a few months)~ -- and the
license finally was granted a few days before I graduated from high
school.

I've heard the slogan "the radio station you grew up with," but this
was ridiculous!

1320. Kansas City Radio History (Revised)

Newsgroup: rec.radio.broadcasting
Date: 1994-04-15 03:51:49 UTC
From: Mark Roberts <transvox@tyrell.net>
Message-ID: <2ol30l$agn@vixen.cso.uiuc.edu>
Source record: 40425

SECOND REVISION, 4/9/94: Adds dates and other information, focusing
on 1941-1980 time period. Major corrections regarding WHB and KMBC/KMBZ.
FM history added where known. Harder to read, unfortunately.

Barry Mishkind asked me for some information about early Kansas City
radio, using 1928 as the baseline. The best I could do was a 1930 base
date (using a photocopy of RaDex from 4/30). This is something I plan
to refine as time permits. For the interim, I am sharing it with the
universe in case anyone else might be interested:

Footnote Station Frequency Post-1941 Fq* Present Fq Other
(1) WIBW 580 580 580 Topeka, KS
Share-time w/ KKSU
(2) WDAF 610 610 610
(3) KFEQ 680 680 680 St. Joseph
(4) WHB 860 880 710
(5) KMBC 950 980 980 Now KMBZ
(6) WREN 1220 1250 1250 Was Lawrence, KS
Now Topeka, KS
(7) WOQ 1300 (1330) (1330) Off air in 1934
^--of KFH Wichita, had share-time w/ WOQ
(8) KWKC 1370 ---- ---- Only in RaDex

Footnotes:
(*) Most stations changed frequency 3/29/41 as result of Havana
agreement.
(1) WIBW on-air 5-8-27. 1930 owner Topeka Broadcasting Assn, controlled
by Capper Publishing Co. Topeka Broadcasting Assn bought in January 1957
(FCC approved 12-19-56) by Stauffer Publishing Co., its present owner.
Still shares with KKSU (formerly KSAC, also listed in 1930 RaDex).
KKSU (Kansas State University) has the frequency 12.30 pm-5.30 pm weekdays.
=> Has FM and TV facilities, unavailable in KC. AM: 5 kW, DA-N. Format
farm and country. Flagship station of Kansas City Royals.
(2) WDAF started by the Kansas City Star in 1922, owned by the Star
until 1957, when Star lost restraint-of-trade case and forced to sell
under a consent decree. Sold to National-Missouri TV. Inc. 5-18-58. Sold
to Transcontinental TV Co., 7-13-60. Sold to Taft Broadcasting Co. of
Cincinnati 2-19-64, predecessor of present owner, Great American Radio
and TV Co.
=> FM history: Conditional grant for KCST in 1947, never activated.
WDAF-FM (102.1) on-air 3-5-61, presently KYYS. Has TV facilities.
=> AM: 5 kW, ND fulltime, stereo. Format full-service
country. Transmitter moved to 79th & Mission Road in Johnson County,
Kansas, in 1947.

(3) KFEQ, listed in earlier Radio Service Bulletin lists at Oak, Nebr. Owned by Scroggin & Co. bank, later owned by Barton Pitts and the Bradley family, publisher of St. Joseph News-Press. Sold to Kemper Brown and Bing Crosby 12-31-55. Sold to Jesse D. Fine family 9-19-57. Sold to Panax Corp. 8-30-63. Separated from KFEQ-TV (now KQTV) by sale to KAYS, Inc. March 1969, predecessor of present owner, Beach-Schmidt Group, a chain based in Hays, Kansas.
=> AM: 5 kW, DA-2. Format mixed news/talk and country.
(4) WHB started in 1922 by Sweeney Automotive School (across from Union Station). Owned in 1928 by Sweeney and in 1930 by WHB Broadcasting Association. Purchased in 1931 by Cook Paint & Varnish Co. Changed frequency to 710, DA-2, adding nighttime service, in 1948. Enabled move of KCMO from 1480 to 810 by enabling KOAM Pittsburg, KS to move from 810 to 860. WHB sold to Midcontinent Broadcasting (Robert and Todd Storz chain) 6-14-54, in conjunction with Cook's purchase of KMBC AM and TV, thereby resolving a shared-time situation with WHB-TV and KMBC-TV on channel 9. Station(s) apparently lost CBS affiliation to KCMO AM and TV in the process. Sold to Shamrock Broadcasting (Roy Disney interests) 4-12-85. Sold to Kanza, Inc., based in Carrollton, Mo., 8-26-93.
=> FM history: WHB-FM (102.1) 1948-50. Under Shamrock ownership with KUDL (98.1) 1985-93. Presently relaying programs from KMZU (100.7), Carrollton, Mo.
=> AM: 10 kW-D, 5 kW-N, DA-2. Was stereo under Shamrock ownership. Dominant Top-40 station in 50s, 60s, and early 70s. Now farm and country.
(5) KMBC owned by Midland Broadcasting Co. in 1928 and 1930. Traces ancestry to amateur station (9XAB) started by Arthur B. Church in 1921, and claims to be Kansas City's oldest station. Went commercial in 1922 as WPE, later moved to Independence as KFIX and KLDS (owned by Reorganized Church of Latter-Day Saints). Arthur Church regained ownership (as Midland) in 1928, moved it back to KC as KMBC. Sold to Cook Paint and Varnish Co. 6-14-54, to resolve share-time TV service on channel 9 between KMBC-TV and WHB-TV. Lost CBS affiliation to KCMO in the process. Church retired because of ill health. Sold to Metromedia Broadcasting Co. (John W. Kluge, et al.) 8-29-61. Separated from KMBC-TV by sale to Bonneville Broadcasting (Utah Latter-Day Saints--Mormons) 5-12-67.
=> FM history: KMBC-FM began 1944 at 46.5, moved in 1945 to 97.9, apparently went dark 1948. Successor KMBC-FM (99.7) on-air October 1962, now KLTH.
=> AM: 5 kW, DA-N. Format news/talk. Studios and transmitter at 50th & Belinder, Westwood, Kansas. Bought KCMO-AM/FM last year, forming a duopoly. History of KCMO noted separately.
(6) WREN on-air 6-15-26. Started by Jenny Wren Co. of Lawrence, Kansas. The Kansas City Star had proposed a purchase in 1935 but was denied on grounds of monopoly by the FCC. Moved to Topeka at an indeterminable time 1948-49. Purchased by Alf Landon (1936 Republican presidential candidate) October 1952. Sold to Pat Paton and Ted Cramer 9-5-85. Paton and Cramer took station off the air in 1990. Reactivated in 1993 by Michael Glinter with southern gospel format.

=> AM: 5 kW, DA-N. Still nominally has share-time arrangement with KFKU Lawrence (as it did in 1930), but that has not been used by Kansas University in at least three years.
(7) WOQ started by Western Radio Co. in 1922, purchased by Unity School of Christianity in 1924. Surrendered license in 1934. Shared time with KFH Wichita.
(8) Only mention of KWKC is in 1930 RaDex, listed as owned by Wilson Duncan Broadcasting Corp. May be predecessor of KCMO (see below).

Other Notes:
* Station WLBF went on the air in 1925, but went bankrupt three years later. The Star cites KCKN (at 1340 in 1980) as its successor. Broadcasting Yearbook also apparently considers KCKN as WLBF's successor. KCKN was started by Capper Publishing Co. (owner of WIBW) in the mid-1930s. Sold to Cy Blumenthal (Continental Stations) 2-8-57 as part of Capper sale of WIBW AM/TV. Sold to Seattle, Portland & Spokane Radio, Inc. (later Kaye-Smith Group) 7-1-65. Purchased by Joseph L. Allbritton in 1981. Sold to Sconnix Group Broadcasting 6-21-83. Sold to KCBR Limited Partnership in 1989 (present owner). It is now KNHN, a news/talk station.
=> FM history: KCKN-FM (94.1) on-air 5-28-63. KFKF calls claimed by Sconnix. AM and FM separated by 1989 sale.
=> Present AM facility: 1 kW, ND fulltime.
* Station KCMO, now our only 50,000-watt signal at 810, did not start until 6-10-1936 (at 1450 and then 1480). It moved to 810 and its present transmitter site in far northern Kansas City (formerly a town called Nashua) in 1948.
Owned by Tom Evans (drugstore chain owner and associate of President Harry Truman). Sold to Meredith Engineering Co. 11-16-53. Separated from KCMO-TV (now KCTV) by sale to Summit Communications, Inc. 6-21-83. Sold to Pacific and Southern Co. (Gannett) 7-29-86. Sold to Bonneville Broadcasting (KMBZ) fourth quarter of 1993.
=> FM history: KCMO-FM (CP for 98.3, on-air at 94.9) on-air 1948. Never left the air, the only Kansas City FM station with that distinction.
Present AM facility: 50/5 kW, DA-N. Downgraded from 50/10 kW, DA-N during 1990 to improve nighttime pattern over suburban Johnson County, Kansas. Present format talk.
* Also of interest is the history of pioneer FM broadcaster KOZY, started by Everett L. Dillard, who later started WASH(FM) in Washington, D.C. Studios and transmitter at the Porter Building at 34th & Broadway. On-air 1942 at 44.9 mHz. Moved to 99.9 mHz in postwar band change and then to 98.1 mHz. Off the air by 1952. The 98.1 allocation was reactivated by KCMK(FM) 3-3-58, now KUDL(FM).

With a little luck I'll be able to pass along
a file I've been keeping here on Old Time Radio,
although not a fan of it myself (ie I appreciate
it but don't do anything to get copies of programs).

Somew past article ro thisgroup on the subject...

For those of you with interest, I have added an old time radio
feature to my Sunday Afternoon program on WRMR-AM/850 here
in Cleveland.

The 1/2 programs air from 1:30 - 2 pm and features any and
everything I have been able to get for broadcast.

If you enjoy that kind of stuff and live anywhere from Toronto,
Canada, to Detroit, to Youngstown, to Columbus - be sure to tune
in!

Frank Macek
Ass't Program Director/Announcer
Warm 850, WRMR - Cleveland

---

Now and then someone asks about availability of Old Time Radio shows.

I've just come across another source for them. The company that offers them is Satellite Broadcasting out of Frederick, MD and the proprietor is Fred Berney. His catalogue lists 333 reels of material and they seem to be reasonably priced (like $5.95 per tape) most reels are 2 hours, 2 tapes.

His address is 4580E Mack Ave, Frederick MD 21701 and there is a phone # 800 747 0856 and fax 301 662 4014.

>I remember reading about some old-time radio programs available on
>cassette being available for personal use (i.e., not re-broadcast).
>
John, where do you live? WBBM-AM, 780 kHz in Chicago, broadcasts oldtime radio programs every night from midnight to one (central time). They claim they can be heard in something like 38 states, and I've picked them up from Nashville, Shawnee (OK), and Washington DC. The program carries several commercials every night that tell you where to write to get catalogs of OTR cassettes.

The Radio Program Archive Collection at Memphis State University makes cassette copies of hundreds of old radio shows available for teaching and other non broadcast use for a nominal dub fee (you supply the cassettes). Contact Dr. Marvin R. Bensman, Director, for more info and a catalog at:

1324. Re: The Price of Docket 80-90

Newsgroup: rec.radio.broadcasting
Date: 1994-04-15 03:51:58 UTC
From: talk1370@aol.com
Message-ID: <2ol30u$ah5@vixen.cso.uiuc.edu>
Source record: 40429

In article <2ofrr5$5ui@vixen.cso.uiuc.edu>, Mark Roberts <transvox@tyrell.net>
writes:

"listeners in outlying areas...no longer have a broader regional spectrum of
choices."

Even in larger metropolitan areas, in the top 50 markets, 80-90 has had
some
unintended effects that are worth talking about. And most of them are not good.
The first and most noticeable, is that you get a mix of new stations
tending
largely either to mail-order religion or to satellite music network
rebroadcasts,
adding little or nothing to the available program choices for most listeners,
although in our market it also brought us our only AAA (adult album
alternative)
station and another station whose eclectic mix of jazz, new rock and folk
defies
all efforts to label it. But for every station that brought a genuinely new
format
into our market (the 36th largest metro in the country) there have been several
which broadcast either religious networks (3 stations), one of the SMN services
(2) or some other beautiful music satellite or automated format (2).
The second thing it has done, is to drive off the air almost all AM
stations that
aren't running some form of news/talk format, and cause a crowd in THAT format
that will leave all but a few of the old established talkers too little room to
survive. There is plenty of place left on the AM band for music service, and
it's especially well suited to gold or big band and standards...but there's
only one station left on the dial in our area that's now independently
programmed with any such format. (It's one of the three AMs here that still
draw enough share of the audience to be viable on their own...the other two are
the two longest-established talk stations, one of which I work for.) All the
rest are satellite talk, religion or simulcasts of a music FM. Religious
programming has a very limited appeal especially in this part of the country;
simulcasts of an FM signal on AM are a waste of wattage; and as far as talk is
concerned, only two AM talkers in this market have firmly estab- lished
themselves as competitive players over the long term, and one more carrying a
syndicated "hot talk" mix MIGHT eventually draw enough audience to make the
nut. A good half dozen others in surrounding counties are fighting over a
miniscule slice of the pie...too small a slice to show up in the Arbitrons,
hence too small a slice to assure even one of them enough revenue to remain
alive and well. More of them would be healthy, locally-originated and
independently programmed with some kind of unique music or full service format
if the 80-90 dropins hadn't come on the scene.

Did 80-90 do any real good? In our town, two of the stations that came into
being as a result of it can be said to be worthwhile new additions to the mix. But there is at least a strong possibility that the old rules could have provided room on the FM band for one or both of them, perhaps with better coverage than they now have. The rest can be said to have, on balance, done more harm than good because they fill no previously unfilled need, and sap the strength of existing FM and especially AM stations. I suspect our experience is typical. The ironic result is that we may end up with fewer healthy stations on both AM and FM, and less truly local community-oriented service, than we started with even though there are technically more signals to be heard on the dial (or maybe BECAUSE we have
more signals fighting for the same slowly growing pool of listeners). Eventually the economics of the business will winnow out marginal players, and stations on both FM and AM will go dark here as they have in other less prosperous markets already, leaving the fittest to survive. That's great for all of us now working at the
likely survivors, but does it serve the audience? Will even stations like ours which will remain on the air at the end of the battle, be weakened by the years we spent fighting it? And at the end of it all, those of us who are left standing will look around at the wreckage and say, "what was the point?"
Bob Smith, midday host WXXI/1370 Rochester, NY

Yes, it is one of about a dozen cases now, where the old three letter call
is represented only on an FM or TV.

1327. Cincinnati and Cleveland Updates...

Newsgroup: rec.radio.broadcasting
Date: 1994-04-16 02:10:59 UTC
From: an678@FreeNet.Carleton.CA
Message-ID: <2onhfj$t5o@vixen.cso.uiuc.edu>
Source record: 40432

First, an update on the 1530 "WCKY/WSAI" situation...

While listening to 1530 in the car on a drive from Detroit to Battle Creek this morning the 1530 in Cincinnati is playing a mix of big band, soft A/C and the like. For instance, tonight I've heard BB tunes as well as Sammy Davis Jr's "Candy Man" and Neil Sedaka's "Laughter in the Rain". Appears to be satellitefed at night...live in, at least AM Drive, with former TV Host Bob Braun doing AM Drive in between many, many commercials...station IDs as "15-30, WSAI" except at the top of the hour when their WCKY...apparently, the call change hasn't gone through! Looks like the programming of the old 1360 just shifts to 1530?

BTW...I saw an interesting note in someone else's post, Nick Clooney is anchoring TV news at WGRZ-TV in Buffalo. Clooney, whose sister is Rosemary Clooney, did lots of radio and TV in Cincinnatin, including the morning show at 1530, WCKY when it was beautiful music many years ago. CLooney, then switched to TV at channel 12 in Cincinnati and ended up in LA and , now apparently, Buffalo.

AND...in Cleveland say good-bye to WMMS...new owners have fired all of the air staff at both WMMS and co-owned WHK including KidLeo and Jeff and Flash after 18 years. This was one of the lead stories on WWWE news this morning and Imus even mentioned how
all at WMMS were to him when he was blown out in NY years ago and he had to return to Cleveland. I know WMMS didn't have great ratings, like in the past, but still a surprise...maybe more details will come in from Cleveland?

I would have to agree with most of what has been posted in this debate,
but in the "never say always" column, let me add that I am involved with
a Docket 80-90 dropin that is the exact opposite of what you are decry-
ing. We are locally programmed, uniquely formatted, and financially solvent.
We regularly receive calls & letters from the nearby metro area wondering
when we are going to raise our power so that we can offer them an alter-
native to the over-researched, over-processed, under-talented drek that
the (supposedly superior due to their 'regional' status) metro FMs pump
out.

Once the FM band adjusts to the new reality (too many signals, too much
competition, the digital/cable/net future) then the multitude of "2nd
rate" FM facilities may very well prove a fertile breeding ground for
alternative/experimental programming, once the 'petty theives' in search
of the fast buck have taken their aspirations elsewhere.

John Tryneski wanted to know about an up-to-date station list. The most comprehensive one I know of is _The Broadcasting Yearbook_, published by, naturally, Broadcasting magazine. Beware of the price, though.

Hope I helped...

Jerry Bookter, WVOC, Columbia

1331. Radio in Kansas City Media

Newsgroup: rec.radio.broadcasting
Date: 1994-04-16 02:11:09 UTC
From: Mark Roberts <transvox@tyrell.net>
Message-ID: <2onhft$t6o@vixen.cso.uiuc.edu>
Source record: 40436

How do the printed media cover Kansas City radio? Here are three
recent examples (I will try not to run too long):
==========
INGRAM'S Magazine in its April issue named the 100 most influential
Kansas Citians in business. Among them was Ron Carter, vice-president of
Bonneville Broadcasting.
INGRAM'S cited Carter's status as GM of KMBZ/KLTH and Bonneville's
recent purchase of KCMO AM and FM as the reasons for his inclusion.
INGRAM'S noted that the purchase gives Bonneville's owner, the Church of
Jesus Christ of Latter Day Saints (Mormons), a virtual lock on Kansas
City's talk-radio market.
No concerns were raised over the prospect of an ultra-conservative
institution that has a dismal record on women's issues, gay issues, and
inclusion of minorities having a near-monopoly on local talk radio, which
was already right-wing in orientation.
To be sure, KNHN (1340) also has some local talk and news and KBEQ
(1030) offers network talk from Chuck Harder's People's Radio Network.
KMBZ (980) is a news/talk station, while Bonneville has been slanting
KCMO (810) increasingly to pure talk.
INGRAM'S also noted the influence of three longtime media
personalities in a sidebar to its main story.
Featured were KCUR's (89.3) Walt Bodine, who has a one-hour show daily
on the University of Missouri-Kansas City station, and KNHN conservative
morning drive team Jerry Fogel and Mike Shanin.
Not mentioned was the fact that INGRAM'S publisher Robert Ingram also
owns KBEA (1480, nostalgia) and KXTR (96.5, classical).
==========
The KANSAS CITY STAR has begun a weekly radio column by entertainment
reporter Brian McTavish
The first column, "Radio Waves", Friday, Apr. 1, was about KMXV's
format
change to CHR/crossover modern rock.
The second column, Apr. 8, was about KCMO's carriage of "The House of
Blues Radio Hour" from CBS Radio Saturday nights at 8 pm. The column
quoted a CBS official as saying KCMO is the only AM talk station in the
country carrying the hourlong blues show.
McTavish also quoted KCMO program director Mike Elder as saying, "in a
lot of markets it wouldn't work. But it feels like Kansas City to me."
Blues programming in Kansas City is also available Friday and Saturday
nights on KCUR-FM (89.3), Sunday nights on classic-rock KCFX (101.1), and
in a few programs on community/variety KKFI (90.1).
The third column, today (Apr. 15) was not about local radio at all.
==========
An alternative newspaper, the PITCH WEEKLY, featured two radio

stations in its special Apr. 14 issue on "The Sizzling Music of Spring."
Black gospel KPRT (1590) was noted in an article by Shawn Edwards for the "tremendous effect" it has had on the popularity of gospel music in Kansas City.
KPRT assistant program director Ty Murrell told the PITCH, "People hear the music on the radio. Then they go to stores to purchase the music. Before, only die-hard fans bought it, but now everyone is purchasing the music because it is being exposed to more people."
Lawrence (Kansas) modern-rock reverse-rimshot KLZR (105.9) was featured in a story decrying the lack of a similar outlet in Kansas City proper.
(No, I did not write that story.)
The following paragraph will warm the cockles of many hearts on AIRWAVES:
>> Since the Lazer changed its format back to alternative in February
>> 1993, it has been a resounding success ... mainly because the station
>> has been doing things right. Alternative covers such a variety of
>> styles now ... and the Lazer plays them all, plus a full slate of
>> local signed and unsigned bands. That commitment to the local scene
>> is the biggest part of KLZR's success. This stems in great part from
>> the local ownership of the station, still owned by the Booth family
>> who began the station in 1951.
The article, by Jeffrey Drake, went on to quote KLZR program director Tim Barrett: "You can't forget where you are. ... I strive to actually have the band in the station, on the air. We do that a lot with regional and local acts.
Compare and contrast to the Procrustean playlist of heavily-leveraged, chain-owned KYYS (102.1):
>> KY-102 occasionally mixes in "safe" alternative bands like the
>> Gin Blossoms, Perl Jam or Nirvana, but almost always flanked by acts
>> like Billy Squier, Foreigner, or Rush, as if to reassure listeners
>> that nothing has really changed. Otherwise, the only real
>> alternative
>> show in town is 'Radio Free Westport' (Sunday nights 8:00 til
>> midnight),
>> the sole breath of fresh air in a town full of stale programming.
Also taken to task was KQRC (98.9), owned by the Milwaukee Journal, which allocates half an hour on Sunday nights to local bands.
The article concludes with this intriguing paragraph:
>> We can only hope that a station steps bravely forward to
>> fill the gap. Or else we'll have to cling to the Sweepstakes
>> fantasy that the Booth family, owners of KLZR, will uncover a
>> $1.5 million windfall, thus giving them the ability to boost
>> their signal into the deepest corners of the Kansas City area.
Does this mean Hank Booth has thought about it (and put a price tag on such a project)? There are some nice sites in western Johnson County that would work well, but KLZR may now be boxed in by KBXR (106.1), Ashland, Mo., among other 80-90 allocations.

tknab01@services.dese.state.mo.us (Terry Eugene Knab) writes:

>>Anybody know if there is truth to the rumor that ABC is interested in
>>purchasing New York talker WOR from Buckley Broadcasting and converting it to
>>another all sports outlet (i.e. WFAN).

>> I've heard that ABC Radio had taken a look at WOR as a possible 2nd
>> sports outlet for NYC bue figured that even if they moved the Yankees
>> from WABC over to WOR there wouldn't be enough numbers to sustain it.
>> "The FAN" has the NYC sports-beat locked up!

There has been nothing about this in any of the NY papers, and there has
been no mention on the station itself, except for all of the schedule
changes which have affected programming during the last few months.

>WOR likely will be acquired by ABC and be converted into a format of
>"young talk" (take note of what they do with KMPC in LA). You will also

One article in THE NEW YORK POST a few weeks ago indicated the present
owners were shifting some of the programming to be more attractive to
womens issues, and to make it more appealing to buyers. They also
broadcast Giants football games.

>have to remember that WOR also syndicates its programming (Joy Browne,
>Gene Burns, Dolans) and those may look good to CC/ABC if they want back
>in the syndication business (and they do).

Any ideas what will happen to the Gamblings? They have been a part of the
station for decades.

Same goes for late night host and legend Barry Gray.

>would handle that statement?

It's hogwash. With LMA and duopoly rules allowing one voice to rule a market and a bare minimum - if any - public service, the notion of a broadcast license as a privilege granted to "serve the public interest, convenience and necessity" is a museum piece, lost behind the books of consultant's studies.

What is served by plugging the output of a satellite receiver into a station's transmitter. Local commercials are not local service?

This business has sunk to a sad level when one can drive across the country and never be out of touch with the same canned shows (Stern, Imus, Limburger, Liddy, et.al.) and the same insipid liner cards and paint-by-numbers formats at the stations that have local staff. Service? Feh.

IMO, if the framers of the Constitution had envisioned the use of the airwaves for communication, to occupy space on those airwaves would be a right.

1335. San Diego County Report

Newsgroup: rec.radio.broadcasting
Date: 1994-04-16 02:11:18 UTC
From: Chris.Carmichael@artecon.com
Message-ID: <2onhg6$t7f@vixen.cso.uiuc.edu>
Source record: 40440

>From the San Diego listening post:

Noted white separatist John Metzger of Fallbrook, California (in SD county) was deported from Germany this week because of his belief there was no Holocaust.

Invited by Bill Handle, KFI (640 AM Los Angeles) to debate on the Holocaust, Metzger was deported from the Franfurt Germany airport. Also invited -- and deported -- was Canadian separatist Tony McAleer, of British Columbia.

Handle, whose grandparents, died at Auschwitz, Poland, was going to show the two men the facilities in Germany and Poland. In his Friday morning radio show, live from Poland, Handle described the feelings of walking throught Auschwitz. He also showed retraint in describing the problems of going through customs, and catching the flight from Warsaw to the airport near Auschwitz. Apparently, there was a lengthly delay because the radio station was identified as a white-supremist outlet. According the German law, no broadcast are allowed in and out of the country with that subject. The morning show host, Handle, did meet with a group of German neo-Nazis while in Germany.

The sign-on date for "hot talk" KOGO (600 AM, 5kw, U) has been delayed to April 25. The studios are still being constructed and will not be done until next week. The station is currently broadcasting the Michael Reagan show weeknights.

KFMB (760 AM, 50kw) "Sports Sunday" has reduced the number of hosts and promises to be a "cleaner, more lively" show. The show airs from 9 to 10:50 a.m., and from the end of the Padres baseball game to 4 p.m. The station will either have a game or a sports talk show every weeknight from 6 p.m. - 8 p.m. This comes after the 4 p.m. - 6 p.m., news show, "San Diego Today." Starting Monday, the slogan for the station will be "San Diego's station for news and information," replacing "entertainment and information." There has been a gradual shift from music (and a loss of personnel as reported).

Mike Berger and Jeff Prescott, currently with XETRA-AM (690, 50kw, U, Tijuana, Baja California) were "seen playing golf with KCLX-FM program director Jack Silver. The syndicated show from LA, "Mark and Brian" hasn't been the number-maker for KCLX, and they are slipping in the ratings. Berger and Prescott seem out of place at the all sports station, XETRA.

KCLX, whose program is geared to classic rock, broke the music embargo with Pink Floyd's "The Division Bell." Plus the current line up includes songs by Neil Young and Bruce Springsteen and the "Philadelphia" sound-

track.

Palamor Community College's on-campus radio station is now broadcast by
Dimension Cable's DCR. The digital radio box, which is an addition $6
per month, recently added KKSM. San Diego County cable operators
have dropped their FM service, cutting KKSM and other community college
radio outlets. But in an agreement with Palamor Community College,
the cable company put them on the digital cable service. Dimension serves
the communities of Oceanside, San Marcos, Escondido and Fallbrook.

this may or may not be in the same category, but WBBM-AM in Chicago used to run old time radio at 9 PM every night. In addition, WNIB/WNIZ-FM in Chicago and Zion used to run old time radio every saturday afternoon from Noon to Five. Show had the same host as the WBBM slot and originated from the Chicago Museum of Broadcast history. I can't remember his name, or if either program is still on the air (I haven't lived in metro Chicago since 1991). Any takers on this question?

1337. WBOW/Terre Haute (was: Re: WOWOes (very long))

Newsgroup: rec.radio.broadcasting
Date: 1994-04-16 02:27:08 UTC
From: jwg@acd4.acd.com
Message-ID: <2onids$2kg@vixen.cso.uiuc.edu>
Source record: 40442

In article <2od5l6$mo7@vixen.cso.uiuc.edu> mgarrett@prairienet.org (Mark A. Garrett) writes:
Just curious Jim. What is now on 1230 khz in Terre Haute. I thought when WBOW moved to 640khz that they would go silent on 1230.

WBOW broadcast on both 640 and 1230 ...for about fifteen minutes on the day they switched over. I snuck away from my desk with my Walkman, went out to my car, and turned on one radio at 640 and the other at 1230.

WBOW had Pete Chalos, Terre Haute mayor, in to "throw the switch". He proclaimed the day "WBOW Appreciation Day" in Terre Haute and pushed a ceremonial button (which, when I saw it on TV that night, turned out to be an unassigned button on the RCA transmitter remote box -- what a joke!) which was supposed to take down 1230 and bring up 640. They timed it to the top of the 9:00 hour; they IDed and went into ABC news right after.

What actually happened was that Bub the engineer powered up 640 at about 8:50 and powered down 1230 at about 9:05, times approximate.

Some months later, one day I showed up for my weekend shift at the company's FM, WZZQ, and found a note on the console: "Out of :50, read legal ID 'WZZQ WBFX Terre Haute'." A quick call to the then-PD told me that the company had been granted a license to resurrect 1230 as WBFX. It currently simulcasts the FM, an AOR. Internal rumor had it that the new AM would go satellite classic country soon. The #1 station by a gonzo huge margin is WTHI-FM, a hot country station. They regularly pull in 20+ shares in 12+, with WZZQ and soft-AC WMGI-FM battling for 2nd, usually around 10 shares. The classic country would hopefully pull away older listeners from WTHI and give WZZQ a better shot at #1. We're still IDing WBFX, though. They recently upgraded it to stereo. I believe WBFX uses the old WBOW transmitter and tower.

Of course, our company's owner is apparently about to (finally) come to trial in his "deviate sexual conduct" case, so all improvements are on hold. That's such a fun company to work for.

Peace,
jim grey

Source record: 40443

Yet another correction on WASH FM 97.1's new Program Director, Kevin Gossett. It didn't take Kevin long to learn that the Washington Post will print something about someone without checking to see if it is correct or not. And I was foolish enough to borrow excerpts from the Post. Here is the scoop on Kevin's departure from WGRD in his words:

"I did NOT leave as a result of the sale of WGRD. I was asked to stay, but had been in negotiations with WASH during the time of the sale. They culminated shortly after the close. WLHT's consultant actually put WASH in touch with me during the time that another company was negotiating to buy WGRD. I had heard the POST (Washington Post) connected me with both WGRD and WLHT. Don't know where they got that."

My thanks to Kevin for directly contacting me with the correct information. Anyone who has radio news for metro Washington, D.C., please email me (lacko@enh.nist.gov) and let me know. I'll gladly pass the information on to other REC.RADIO.BROADCASTING readers.

Thanks to Bob Smith at WXXI in Rochester, NY., for the tip on WWRC AM 980's new Operations Manager, Gary Burns. Gary comes to the talk station from WIOD in Miami. Mr. Burns has a tough road ahead as he tries to pull WWRC out of its 1.1 quagmire.

X-tra Oldies 104.1 FM (WXTR) has signed up Wolfman Jack to do several promotions and shows on the station. The Wolfman has that face and voice that everyone knows and should offer the station a lot of visibility as it fights with WBIG, FM 100.3, for the oldies listeners. WXTR expects to start shuffling on air staff soon. Stay tuned!

Modern rocker WHFS FM 99.1 recently sold tickets for its upcoming annual festival, HFS-tival. All 50,000 tickets sold in 4 hours! Scheduled to appear on May 14th at RFK Stadium are: Toad the Wet Sprocket, Meat Puppets and Counting Crows among others.

Buckley Broadcasting, owners of WOR in New York is making a bid for the 22 radio outlets owned by Park Communications which include WPAT-AM and FM (Paterson, NJ). If such a deal is made Buckley would control about 7.5% of New York's listeners. I hope that there would be a split of WPAT AM and FM leaving the FM to Soft music and the AM to talk shows not now heard in the New York area.

WWDJ (Hackensack, NJ) devoted to Christian music and talk is among 3 stations sold to Salem Communications for $14 million. Salem now owns WMCA, so it looks like duopoly is finally coming to New York.

WXPS 107.1 in Westchester County is now WRGX. I don't have any other information.

dk@crl.com (David A. Kaye) writes:

>It's more than a decade, closer to 2. He had been doing spots for
>Matthews TV and Stereo City when charges were lodged against the store for
>bait and switch (advertising a product at a cheap price which they didn't
>even have in stock, with the intent of switching the customer to a higher
>priced appliance once they got in the store). Tom Campbell was only the
>hired spokesman and quickly severed ties with the company. Matthews is
>now out of business.

The three main fiascos that I recall being hawked by Tom Campbell were Matthews, a large waterbed store chain (was it The Bedroom?), and Cal Stereo. For various reasons, I would bump into Tom from time to time ("Hi! How are you? I'm Tom Campbell!"). In each of the above relationships, he would tell everyone in his social circles that he was a part-owner in the business. The feel-good part for me was when indictments were issued against Matthew Steven David and other principles relating to the bait and switch. Faced with some real legal difficulties, Tom Campbell disavowed any ownership participation in Matthews so vehemently it was downright comical.

Cal Stereo (another operation in which Tom claimed ownership) was a fraud from the word "go". The idea was to get a bunch of investors, open up a chain of high-pressure stereo stores, and then pull the rug leaving "outside" investors and creditors holding the bag.

The operation did saturation advertising on every radio and TV station in the Bay Area (it even did business in the LA area). Cal Stereo ran up enormous advertising bills, being into some stations for six figures. A few weeks before the planned bankruptcy, the then-manager of KOME (Dan Tapson) got inside word of the scam. Although the spot contracts were for cash, Dan offered the Cal Stereo people "a hell of a deal". Rather than holding them to the $100,000 they owed the station, he offered to take it ALL in trade! He would immediately send some people over to the warehouse and shop. The Cal Stereo crooks could not exactly refuse the offer without creating suspicion, so they agreed. Within a day or two, offices at KOME were piled high with stereo equipment.

A couple of weeks later, true to the information given Tapson, Cal Stereo closed its doors. Print and electronic media, as well as suppliers, were left with nothing. While KOME did not get its hundred grand, it at least had lots of merchandise, which was more than the other stations got.

>Renamed? I believe KWUN is sitting in a box somewhere. (Of course, John

I am sure this has been done before, but...

Another year has passed and another set of board members have
been elected into the upper offices of our renowned college raidio
station :). Having been part of WVBU's board for two years I am famillar
with the rules and regulations that have been handed to us from the FCC.

Anyway to the point. Recently the new board has began what I can
only call a sort of witch hunt. It seems that several calls from an
unknown person/s has prompted the board to take notice of the DJ's
ussually less than stellar performance. And a banning of several DJ's
has been forthcoming(sp?).

Our current rules are the no obcenity, indecency between 12 a.m. & 6
a.m. But recently reading a book about communications law I
noticed a passege that mentioned that the D.C. circut court susspended
this ruling in 1991 and made it into a 8 p.m. to 6 a.m. untill a more
concrete and approprite time can be determined from a study underway? I
would like to take this matter up with the board but would like more
information first.

So what is the rule. 8-6? 12-6? Where would I be able to find more?

Thanks.

From: Chris.Carmichael@artecon.com
Message-ID: <2onie7$2li@vixen.cso.uiuc.edu>
Source record: 40448

>From north San Diego County:

Los Angeles AM 710 KMPC's morning show of Charlie Tuna, Marve Howard and Scott St. James have came up with a new brand of television in the wake of Jim Rome's on air-scuffle. Smack-TV. As KMPC days of an all sports station seem to be winding down, the on-hour professional talent of All Sports 710 haven't skipped a beat and maintain a bright outlook.

Meanwhile, Jim Rome of XETRA-AM 690 who was making "news" last week on the ESPN2 gig received a phone call of support from his radio boss. XETRA AM/FM president, John Lynch told Rome, "I just wanted to let you know that while I share your concern that you pushed a little too far . . . I just want you to know that you've got a lot of support here at the radio station."

[has anyone asked Chris Everett what she thinks??]

Gayle Falkenthal, who served as Roger Hedgecock's producer on KSDO-AM, 1130 San Diego, has left the station for a new job. The Hedgecock show is the highest rated San Diego-based talk show. It's on from 12 noon to 3 p.m.

Falkenthal will be the media coordinator for the San Diego Water Authority. She spent 12-years at KSDO. The decision to leave the station was her own.

1344. Terre Haute radio news

Newsgroup: rec.radio.broadcasting
Date: 1994-04-16 02:27:26 UTC
From: jwg@acd4.acd.com
Message-ID: <2oniee$2m0@vixen.cso.uiuc.edu>
Source record: 40449

1300 WJSH/Terre Haute has been sold, pending FCC approval, from Cardinal Broadcasting, Inc., to newly-formed Terre Haute Broadcasting, Inc., whose president is John Burns. Burns will move to Terre Haute from New Milford, Connecticut.

WJSH currently broadasts an eclecic mix of MOR/pop standards, mostly from Cardinal Broadcasting president/WJSH morning man Ronn Mott's huge personal collection. But by tomorrow evening, WJSH will program "traditional" or "classic" country. Tom Lisella will be the new Program Director and morning host. Tom was hired at WJSH a few months ago after serving three years at 640 WBOW/Terre Haute as morning man, two of those years also as Program Director. He was fired from WBOW, ostensibly because ratings remained flat during his tenure. Tom had been doing afternoons and then sharing morning duties with Mott at WJSH. Tom and Ronn did not discuss the news during what I heard of their show this morning. I'll tune in tomorrow as well for Ronn's last morning show. Ronn has been a Terre Haute radio fixture for many years, and is widely liked by the 50+ crowd.

WJSH's signal covers at least the whole city. Sound quality is lousy, though. WJSH simulcasts on 105.9 WMMC/Marshall, IL. This signal ranges from strong to spotty in Terre Haute, but has markedly improved sound quality.

There is no word on whether the sale includes WMMC. I look for Terre Haute Broadcasting, Inc., to try to acquire an FM in or near the market. 105.5 WWVR/West Terre Haute is rumored to be for sale, and covers the market well, though it is mono. 104.3 WCBH/Casey, IL is also rumored to be for sale. Their signal covers all but the far eastern portion of the market well. An obvious format hole in the market is CHR, which we've lacked since 102.7 WPFR went dark in (I think) 1990. (Last year, easy listening WLEZ/Terre Haute went up on 102.7.)

Peace,
jim grey

From: "Christopher J. Bessert" <343GRPW@CMUVM.CSV.CMICH.EDU>
Message-ID: <2onief$2m3@vixen.cso.uiuc.edu>
Source record: 40300

Just to add a note or two on the WCEN topic...
I attend school at Central Michigan Univ. here in Mt. Pleasant
and one night while driving into town I commented to a passen-
ger in the car that I wondered by WCEN-AM's tower lights were
out. Well, the next day I drve by and there was no tower. The
studios were also gone. Apparently the Dayton-Hudson Corp.
wanted to begin construction on their new Target store as soon
as possible. I checked 1150 and sure enough, nothing. A couple
weeks ago I was in St. Louis (a small city about 15 miles south
of Mt. Pleasant) and tuned into local country outlet WFYC-AM
1280 (a simulcast of the FM at 104.9). To my surprise, the sta-
tion ID itself as WCEN Mt. Pleasant/WFYC Alma on the hour and
as AM 1150 WCEN/WFYC at the bottom. I checked 'FYC-FM and they
were not simulcasting WCEN-FM, so I assume thet 'CEN is using
'FYCs AM frequency until they get back on the air in Mt. Pleasant.
I have not called anyone to check on this, so if anyone with
better information would post, it'd be appreciated.

Christopher Bessert

1348. Where is Scott Farrell?

Newsgroup: rec.radio.broadcasting
Date: 1994-04-17 05:09:21 UTC
From: mbrill@lonestar.utsa.edu
Message-ID: <2oqga1$5if@vixen.cso.uiuc.edu>
Source record: 40303

Until recently, a station here in San Antonio was affiliated with the Las Vegas- based Sports Entertainment Network, basically 24 hour a day call-in sportstalk. The star of the network was a DJ named Scott Farrell. He was absolutely hilarious, easily the most entertaining on-air personality I have ever seen. Then, a couple of months ago, he suddenly disappeared.
I'm interested in finding out:
1. Was he fired, and if he was, why?
2. Where is he now?
This guy is so talented that he could easily become a national personality, if he's given a format in which he can display this talent. I'm sure anyone that has ever listened to him would agree.

: performing original gay folk music...me!

It's difficult. My close friends Ron Romanovsky and Paul Phillips have been doing this (a gay Smothers Brothers-type act) for the past 10 years. While they sell out concert halls at premium prices (such as SF's Great American Music Hall at $13.50), they do not get airplay in the U.S. (I have heard Tom Robinson play them on the BBC and also heard them on Radio Australia, though.) I do suggest you contact the international lesbian and gay radio program, "This Way Out" in Los Angeles. They're heard on about 85 stations now, and distributed on the NPR satellite. (Stations: Check your NPR DACS for time and channel.) This Way Out, P. O. Box 38327, Los Angeles, CA 90038. Phone +1 213-854-2616. The program is offered free to any station wanting to carry it.

1351. FM History from 1945

Newsgroup: rec.radio.broadcasting
Date: 1994-04-17 05:09:30 UTC
From: transvox@tyrell.net
Message-ID: <2oqgaa$5j3@vixen.cso.uiuc.edu>
Source record: 40306

The following is a directory of all commercial FM stations in
the U.S. on January 1, 1945, which fit on one page of the BROADCASTING
Yearbook for 1945, sorted by state (* indicates no known association with
colocated AM station):

Call Location Frequency Owner
---- -------- --------- -----
KHJ-FM Los Angeles, CA 44.5 Don Lee Broadcasting System
KTLO Los Angeles, CA 46.1 Metro-Goldwyn-Mayer Studios (CP)
WDRC-FM Hartford, CT 46.5 WDRC, Inc.
WTIC-FM Hartford, CT 45.3 Travelers Broadcasting Service
WBBM-FM Chicago, IL 46.7 Columbia Broadcasting System
WDLM Chicago, IL 47.5 Moody Bible Inst. of Chicago (WMBI)
WEHS Chicago, IL 48.3 WHFC, Inc. (CP)
WGNB Chicago, IL 45.9 WGN, Inc.
WWZR Chicago, IL 45.1 Zenith Radio Corporation *
WMLL Evansville, IN 44.5 Evansville On The Air, Inc.
(WEOA-WGBF)
WOWO-FM Fort Wayne, IN 44.9 Westinghouse Radio Stations, Inc.
WABW Indianapolis, IN 47.3 Associated Broadcasters, Inc.
WSBF South Bend, IN 47.1 (WSBT)
WBRL Baton Rouge, LA 44.5 Baton Rouge Broadcasting Co. (WJBO)
WBZ-FM Boston, MA 46.7 Westinghouse Radio Stations, Inc.
WGTR Boston, MA 44.3 Yankee Network, Inc.*
WMTW Boston, MA 43.9 Yankee Network, Inc.*
WBZA-FM Springfield, MA 48.1 Westinghouse Radio Stations, Inc.
WTAG-FM Worcester, MA 46.1 Worcester Telegram Publishing Co.*
WENA Detroit, MI 44.5 Evening News Association (WWJ)
WLOU Detroit, MI 44.9 John Lord Booth (WJLB)
KMBC-FM Kansas City, MO 46.5 Midland Broadcasting Co.
KOZY Kansas City, MO 44.9 Commercial Radio Equipment Co.*
WFMN Alpine, NJ 43.1 Edwin H. Armstrong *
WAAW Jersey City-Newark, NJ
49.5 Bremer Broadcasting Corp. (CP, WAAT)
WNBF-FM Binghamton, NY --smudged copy--
WABC-FM New York, NY 46.7 Columbia Broadcasting System
WABF New York, NY 47.5 Metropolitan Television, Inc.*
WBAM New York, NY 47.1 Bamberger Broadcasting Service (WOR)
WEAF-FM New York, NY 45.1 National Broadcasting Co.
WFGG New York, NY 45.5 William G.H. Finch (CP)
WGYN New York, NY 44.7 Muzak Radio Broadcasting Station, Inc.*
WHNF New York, NY 46.3 Marcus Loew Booking Agency (WHN)
WNYC-FM New York, NY 43.9 City of New York
WQXQ New York, NY 45.9 Interstate Broadcasting Co. (WQXR)

WHEF Rochester, NY 44.7 WHEC, Inc.
WHFM Rochester, NY 45.1 Stromberg-Carlson Co. (WHAM)
WBCA Schenectady, NY 44.7 Capitol Broadcasting Co.*
WGFM Schenectady, NY 48.5 General Electric Co. (WGY)
WMIT Winston-Salem, NC 44.1 Gordon Gray (WSJS)
WFLD Columbus, OH 44.5 (WBNS)
KYW-FM Philadelphia, PA 45.7 Westinghouse Radio Stations, Inc.
WCAU-FM Philadelphia, PA 46.9 WCAU Broadcasting Co.
WFIL-FM Philadelphia, PA 45.3 WFIL Broadcasting Co.
WIP-FM Philadelphia, PA 44.9 Pennsylvania Broadcasting Co.
WLBG Philadelphia, PA 46.5 Seaboard Radio Broadcasting Corp.
(CP, WIBG)
WPEN-FM Philadelphia, PA 47.3 Wm. Penn Broadcasting Co.
KDKA-FM Pittsburgh, PA 47.5 Westinghouse Radio Stations, Inc.
WTNT Pittsburgh, PA 44.7 WWSW, Inc.
WSM-FM Nashville, TN 44.7 Nashville Life & Accident Insurance Co.
KSL-FM Salt Lake City,UT 44.7 Radio Service Corp. of Utah (CP)
WMFM Milwaukee, WI 45.5 The Journal Co. (WTMJ)
WDUL Superior, WI 44.5 Head of the Lakes Broadcasting Co. (WEBC)
========
This, of course, was before the move to the FM band we know and love today.
Most of the activity was in the Northeast and in Chicago. Kansas City had
an unusual amount of activity, considering its size and location.
Everett Dillard, the founder of KOZY, later founded WASH in Washington, D.C.
KOZY left the air sometime in 1951. Indiana was also well represented.
Westinghouse was the one chain that seemed quite interested in FM, at least
at the early stages of the game.

1352. Responding To Moderator's Post (was: Re: The Price of Docket 80-90)

Newsgroup: rec.radio.broadcasting
Date: 1994-04-17 05:09:31 UTC
From: transvox@tyrell.net
Message-ID: <2oqgab$5j6@vixen.cso.uiuc.edu>
Source record: 40307

Bill and I have a lot of mutual respect so it really stung to read
what he had written. I felt that what I had written on two separate
occasions on disparate issues had been stitched together to make what
I had written seem contradictory and inconsistent. (We have discussed
this in private e-mail as well.)

Normally I would have let this go, but I felt as though I were the
victim of a drive-by posting. Let me see if I can clarify, because,
I think deep down, there's a lot more agreement than disagreement.

I will try to keep quoted text to a minimum.

>> However, wasn't it you, Mark, who spoke negatively about how those who
>> bemoaned the (possible) crippling of WOWO (a large, regional, and well
>> executed station) to serve the local 'needs' of New York's WLIB?

I didn't speak negatively about anyone. My point was that the
quest to retain WOWO's nighttime coverage area despite any plans
Inner City might have for it would be quixotic, as least as judged
by the directions the FCC has taken in regulatory law over the years.
I tried to support that assertion with specific examples of actions the FCC
has taken that, at least to me, suggest that Inner City has a more
than reasonable chance of getting nighttime service for WLIB at the
expense at WOWO's nighttime service. I certainly did not view it
as a desirable thing to have happen. See my %% quote below.

>> So, except for the specifics, like band, power and such, what is the
>> difference between impairing a long-distance AM like WOWO (which you
>> feel doesn't matter as long as its primary area is still covered) and
>> the encroachment on long-distance FM from KC and St Louis, by local
>> stations, serving local audiences?

I think the specifics *are* important in this case. FM is a
qualitatively different service, designed to be interference-free
from the start. That was its purpose in being.

Also note that I said that regional reception of FM signals was at
best a secondary service. Let me quote myself from the 80-90 post:

While regional coverage never was a primary criterion for FM broadcast
service,

I fully realized that my listening over the years definitely was
the kind of thing many listeners would *not* have done.

In the original 1962 table of allocations (and even before), the FCC
set aside specific local-coverage (class-A) channels on the FM band,

much as it did for the AM band (class IV). Class-A stations, for the most part, appeared only on class-A channels.

This is a qualitatively different issue than the WOWO issue.

The 80-90 comparison is not to WOWO and the clear channels. The comparison is to the regionals and class-II clears whose coverages also have steadily been degraded. Low-power nighttime operation is now intermixed with high-power coverage in the class-II and III services.

Hence they sound more and more like the class IV graveyard channels. I think we both agree this is not desirable. 80-90 has done the same thing (on a fulltime basis!) to the FM table of allocations by intermixing class-A and class-C stations (in Zone II) and by authorizing new sets of medium-power stations.

>> Why should the long distance reception of big city FM be an issue?
>> After all, as long as they serve their city of license and surrounding
>> areas, who cares? Radio is a business, right? Who cares
>> if you *want* to hear a station from St Louis and some local rimshot
>> is giving out Farm reports to its rural constituents? Maybe the
>> farmers care more about those market reports than they do about
>> progressive rock from some station 150 miles away. Maybe the new
>> station *is* only repeating SMN, is that not "a business transaction"?

Many of these stations got put on the air because it could be done. Others were put on the air or allocated to block higher-power allocations in nearby cities. Columbia got hit with several of these. Many of the new stations are in communities that can barely sustain enough advertising revenue to support a weekly newspaper. I am not denying the value of this service; I am questioning its economic viability and questioning the need to have it on class-C2 (B in the East) or C3 (B1) signals. My argument is on economic and engineering grounds.

You will notice, regarding WOWO, that I did express the opinion that the engineering arguments against a downgrade in coverage did have merit, and I thought those arguments would be worth making.

Again, to quote myself in self-defense (from Apr. 7 newsfeed):

%% The technical points are well worth considering, and, you're right, we
%% don't diverge that much there. But I will stick to my original point:
%% if your appeal to the FCC is based on nostalgia and civic pride and
%% what-used-to-be, you won't get very far.

%% Not that I want to see something like this happen, not at all.

And also remember that I fully accept that 80-90 is here and we're stuck with it. I'm not asking the FCC to undo it. Over to you, Shana... ;-)

>> However it just irks me when someone summarily writes off the concerns
>> of listeners to *one* popular, well run, distant signal, yet on the

>> other hand, crabs about how *his* favorite stations (which once were
>> in the clear) are now in the mud.

Without getting *too* hung up on procedural issues,
I did not summarily write off the concerns about WOWO. I will admit
to having no emotional attachment to that station whatsoever. I've
only heard it twice in my life. There's no way I could judge the
quality of its service, much less get attached to it. You can't
get it here. There has been a station on 1190 in Kansas City since 1971.

>> I propose that you cannot have it both ways. If it is OK to degrade a
>> long-time major broadcasting influence which reaches millions and and
>> covers thousands more miles than the St Louis FM's, then please accept
>> that it is equally OK for your personal 'listening hobby' to be
>> degraded by local signals which, ostensibly, serve local audiences and
>> are trying to eek out a living from those audiences.

This is, in fact, the direction in which the FCC has moved on both AM and FM.
I was observing the reality of what had happened, what had been lost
in the process, questioning whether it was worth it, but fully
cognizant of the fact that a degraded FM spectrum is here to stay.

It didn't have to be this bad. I actually do think the forced C1
downgrades and the creation of class-C2 stations in Zone II were good
ideas. The "super As" and class-C3s (and, maybe, B1s) are what have
really trashed things up. (The super-As actually were authorized in a
different rulemaking, btw.)

For those of you who are still awake at this point, I believe what I'm
trying to say is that the FCC's push in recent years to
make sure that any community with a post office (it seemed) could get
a radio station has caused the loss of diverse types of formats to
many markets to people energetic enough to put up an antenna to get
them.

This is not the same issue as an already-extant station in a
metropolitan area trying to improve its coverage to a particular
community by buying another station and exercising its rights under
the law as a licensee to trade off one type of coverage not important
to that licensee in exchange for improvement to the service that *is*
important to the licensee.

>> Sorry if I am ranting, but this just kinda pushed one of my
>> buttons.

The good thing about this is, it has forced me to clarify my opinion of the
local-versus-regional-versus-clear coverage issue. I write (and speak) in
nested paragraphs that sometimes require two passes for full understanding.
But I hope we can put it to rest now.

1353. Response to Mark Roberts' Post

Newsgroup: rec.radio.broadcasting
Date: 1994-04-17 05:09:32 UTC
From: wdp@uiuc.edu
Message-ID: <2oqgac$5j8@vixen.cso.uiuc.edu>
Source record: 40308

I recently posted an article in reply to Mark Roberts' post on the "Price of Docket 80-90" in which I made some comments which offended Mark.

Since Mark has clarified his position, so will I.

My post was not intended to offend or insult Mark, though I suppose it has.

What I *did* intend to do was to challenge him on what I perceived as a duplicitous position on the relative value of local-vs-regional radio signals. I felt Mark's words vis-a-vis the WOWO situation were a tad harsh and somewhat cold. Then when I read how he felt about the degradation of the signals that *he* was interested in, I decided to challenge him on what *I perceived* as a discrepancy in his positions. Whether or not there actually WAS a discrepancy is not at issue. I perceived one and responded to that perception.

As many readers know, I sometimes get very passionate about radio, and my remarks often take the form of (what some have called) ranting. I have been accused of posting as though I was making a campaign speech (who?... me? Naw... <grin>). I just want to clarify, in public, that I never intended to make Mark look foolish or to humiliate him in any way. I spoke my mind at the time and in retrospect, may have gotten a bit carried away. If I did, it is because I am a True Believer where radio is concerned and often throw caution to the wind when I feel strongly about an issue. I apologize for offending Mark, whom I respect greatly. I thought he would read my remarks in the light they were posted, as debate material, not as personal attack or ridicule. Apparently he didn't see the post as it was intended, which is the risk one runs when one speaks passionately about a subject that one loves deeply. I *do* love radio, and am saddened (and at times angered) by some of the ways it has been allowed to 'twist in the wind' over the years.

I feel so frustrated when I see the way radio has been downgraded from "a guest in your living room" to a "satellite-fed cash register connected to an antenna" that my words carry an emotional charge which may not translate accurately to the silent world of plain ascii text. I feel confident that had Mark "heard" my words, complete with inflection and tone, he would not have taken them as a personal slam, but rather as a challenge to debate and clarify points.

All-in-all, let it be known that it is not my style to flame posters. Least of all one who has added so much valuable, informative and entertaining content to this newsgroup. However, I do reserve the

right to disagree on matters of opinion and to discuss and debate
those points of opinion. When I seem to go on a rant, it is generally
just my way of stimulating debate on a subject I am very passionate
about. If I feel the need to speak more sternly to a poster, I try
to do it in email. However those times are rare.

It appears that Mark and I have merely mis-interpreted (in a big way)
each-other's intended meaning. That happens. Life goes on...

Mark has asked that this issue be laid to rest. I agree. Please do
not post follow ups to this thread. If you feel the need to comment,
I'd appreciate it if you'd do so in private email.

Thanks.

We now return you to your regularly scheduled newsgroup :-).

Bill

Source record: 40310

Another station recently moving to the 70s-oldies format is KRJY (96.3) St. Louis. I was not able to hear it at Columbia because I am three miles from the tx for KCMQ (96.7), and it is east of me, as is KRJY.
KRJY was recently bought from longtime owner Richard J. Miller by Heritage Media, the owner of WRTH (AM)/WIL-FM.
--
Related note: In our local dance/funk/soul/jazz/just about anything record store today (Seventh Heaven), I noticed a lot of early EIGHTIES remixes.
Just watch..."retro" will be the next big format in 12-18 months.
(Starting out maybe with 24 hours of Men Without Hats and the "Safety Dance"....?!?!?)

Everybody could pick them up on their refrigerator. ;-) The
facility was not well maintained, but it did make a ton of money. I
was involved with several nearby television facilities, and we were
always fighting RF from WCEN (both AM and FM). Their own production
room had RF so bad that you could tell who was on the air when each
commercial was recorded.

Source record: 40312

* Coverage of Kurt Cobain's death.......:
Out of the area's 4 major commercial rock stations only AP WFNX 101.7FM completely abandoned its programming on Friday(4/8) to devote most of the day and night to the music of Nirvana and its late lead singer Kurt Cobain who took his own life. 'FNX's MD Nick Carter was on the air during most of DJ Julie Kramer's shift(7-12am). He was quite emotional and raving pointlessly at some stages. 'FNX did 'Nirvana's A to Z' and carried Westwood One's tribute to Cobain hosted by former MTV jock, former WBCN DJ, J.J, Jackson.

AOR WBCN-FM carried Howard Stern from 7-12am. At midnight, overnight DJ Bill Abbate came on. Bill, who ironically happens to be former 'FNX afternoon DJ(going back oh 6-7 years), had some harsh words for Cobain and called him a stupid loser and refused to pay any kind of tribute to the dead singer during his over-night shift.
On AOR WCGY-93.7FM, it was business as usual. Evening jock Andy Carlson(7pm-12pm) acknowledged Cobain's death during his shift but continued on with the programmed playlist...

Worcester's heavy metal outlet WAAF 103.7FM : didn't quite catch John Osterlitz's show from 7pm-12am. My 'AAF reception in the evening has been pretty lousy lately, so I just avoided the static. Around midnight, however, some overnight guy on 'AAF declared that the station wouldn't be doing any special Nirvana tributes to honor "the idiot who left a young baby and a wife behind"....

Surprisingly Boston College's WZBC-FM or Northeastern's WRBB-FM, which play a lot of alternative rock music, stayed with their regular programming during the course of the evening and didn't offer any special Nirvana programming...

* In the big surprise dept. : WBCN-104.1FM will sponsor 16th annual "Rock'n'Roll Rumble" afterall. The event which determines the best new local rock band takes place in May, with the finals on the last weekend of the month.
The winner of the Rumble receives a cash prize, free studio time and a chance to be heard by reps from major record labels.

The contest was in jeopardy because in the past year WBCN has dramatically cut down on its promotion of local bands and shifted away from local music scene...

* Can't get enough of Governor Howard Stern on the radio in Boston? (The winter ratings will suggest that :-). Well, seems that FOX is about to sign Bad Boy Howard to a deal to host a late night show on its brand new cable channel F/X which will be launched in June.

Hey, it's cable -- FCC won't be able to touch Howard.

* Comings and goings : On-air change on Pyramid's CHR WXKS 107.9FM.
Longtime KISS 108FM personality(liner card reader) Diana Steele who was working
without a contract for a while was let go. Lisa Traxxler who was
fired as a traffic reporter from 'Matty in The Morning' show on KISS 108
a little less than a month ago was re-hired by the station to take over the
10pm-2am slot vacated by Steele's departure. Lisa is better known for
her past work on AOR WBCN-FM and CR WZLX-FM....

Victoria Jones(oh,no! she's back) was overheard on WBZ airwaves
recently substituting for David Brudnoy during his 7pm-12am
shift. I guess there's a real shortage of quality fill-ins in the
talk radio field. I just can't come up with a better explanation
for this WBZ move...

* Monday, April 18th is the Marathon Day. Stations covering the race
from start to finish will be SportsRadio 590 WEEI and NewsRadio
WBZ-AM 1030. The latter always has 1st rate coverage.
WRKO 680-AM will be involved with the White Sox-Red Sox game which
starts at 11am.

Westinghouse's WBZ AM 1030 landed radio rights to NFL's Patriots yesterday
(4/13). The deal is only for 1 year. The cost is around $1.5 million.
WBZ's previous 3-year deal was worth $4 million. This radio
deal is part of the $2.5 million package with WBZ-TV which calls for exhibition
games and other Patriots related programming on a sister TV station.
18-year Pats radio voice and WBZ radio sportscaster Gil Santos will
return to call the action. The pregame shows for all 1pm Sunday games
will expanded to 4 hours (from 3).

The other major bidder was Infinity's AOR WBCN-104.1FM which claimed
to bid $1.7 million per season but that offer was reportedly way overinflated
and not seriously considered by Patriots' new ownership.
(Infinity stations in NYC, Philadelphia and Dallas already broadcast
local NFL action)

American Radio Networks only tried to gets its name in the press.
It tried to lure the Pats to its stations (WRKO-680 AM or WHDH-850 AM) in
a very cheap way -- $800,000 a season. ARS is now a local pro team
powerhouse with Red Sox, Celtics and Bruins on its airwaves.

1359. Radio Drama on the air

Newsgroup: rec.radio.broadcasting
Date: 1994-04-18 04:22:03 UTC
From: "Michael Black...WEOS-FM" <BLACK%HWS1%HWS.bitnet@CUNYVM.CUNY.EDU>
Message-ID: <2ot1tb$1um@vixen.cso.uiuc.edu>
Source record: 40314

Just to add:

WEOS airs a block of Radio Drama on Sunday Nights, between 6AM and 8PM. THis is contemporary drama, from National Public Radio and other sources. In addition, WEOS also airs JOE FRANK: In the Dark at 8PM.

WRVO, 89.9FM in Oswego, airs old time radio dram each night M-F at 8PM.

From: UASR74A@prodigy.com
Message-ID: <2ot1tk$1vf@vixen.cso.uiuc.edu>
Source record: 40316

Die-hard Imus fans will remember several months ago that the I-Man did a bit for Ron Howard's new movie "The Paper". Recently, he spoke to Mr. Howard and found out that his part was "woven into the fabric of the background environment," which Mr. Howard defined as hardly there at all, kind of like a "Where's Waldo" book. Well, I just saw "The Paper" last evening (a fine picture, by the way). Unfortunaltely, without the clue from Mr. Howard, it would have been easier to find Waldo in this picture than hear Imus. He is credited in the special thanks category at the very end of the credits. Sorry Imus!! Big dissapointment for the fans!!

Keep watching the tube though: Imus will be on C-Span this Thursday, 4/21 and again on equal time on Friday, 4/22.

I am sure it was a typo, but you can only air indecent material from 8PM-6AM and not have the FCC come after you, at the present. This was the reverse of what you typed. Obscene material is not permitted at any time.
Of note: Evergreen reached a settlement with the FCC concerning its indecency fines, according to Broadcasting Magazine. As part of the settlement, the FCC is to revamp its definition to make it more "user friendly." We will have to see.

1363. JFK assassination broadcasts

Newsgroup: rec.radio.broadcasting
Date: 1994-04-18 04:22:15 UTC
From: gdallas@aol.com
Message-ID: <2ot1tn$1vq@vixen.cso.uiuc.edu>
Source record: 40318

I am studying how local and network radio and TV covered the Kennedy assassination in 1963 -- with an eye, certainly, to the nuances of that particular event but mainly as a milepost showing the state of broadcast news in that period, and how -- or IF -- that awful weekend helped TV news "come of age."
What I have so far is:
-- the first 4 1/2 hours of NBC-TV coverage, 11/22/63, plus snippets from that evening's coverage, from an A&E network special in 1988.
-- snippets of CBS-TV coverage from the weekend, from a CBS special in 1988.
-- snippets of local Dallas radio coverage from a 1964 album, "Four Days that Shocked the World."
-- snippets (and just barely that) of NBC radio coverage from a 1964 album, "1963: A Time To Keep."
Anybody know where I can come up with any more -- especially ABC radio and TV or any more local coverage?

Thanks
Dallas Heltzell

1364. KZZT adds another simulcast

Newsgroup: rec.radio.broadcasting
Date: 1994-04-18 04:22:17 UTC
From: Neil Griffin <J735%NEMOMUS.bitnet@ACADEMIC.NEMOSTATE.EDU>
Message-ID: <2ot1tp$1vt@vixen.cso.uiuc.edu>
Source record: 40319

Mark Roberts and other Missouri readers will be interested to hear that 105.5 KZZT--Moberly ("The Z") has added another station. Their Hot AC programming is now on 103.9 KMCR--Montgomery City. I got word of this from Greg Coniglio. Sure enough, they've squeezed it into the ID along with the Brookfiled stations. The stations run SMN's Hot AC format during most dayparts, and go local mornings and afternoon drive.

I believe the Montgomery City station has simulcasted 104.3 KLRK--Vandalia in the past, and has not been too healthy financially. All in all, probably a good move for them. KZZT picked up Brookfiled's 97.7 KZBK and the AM at 1470. There's no question that it has improved since they bought it from Dwight Carver. The AM is a daytimer, and really serves no purpose simulcasting. I hope someone will buy it (maybe 1450 KIRX--Kirksville?). All four stations are true simulcasters, carrying the same commercials and ID together.

I think we'll see a lot more of these 80-90's bought out as simulcasters. I don't even think it's necessarily bad as long as each community is still served. KZZT has done a reasonably good job of that. It's no secret that they're in Moberly, but they have done news and remotes from Brookfield. They've performed a service by simply cleaning up the signal of KZBK (new feedline has made a noticeable difference).

1365. A satellite-fed cash register?

Newsgroup: rec.radio.broadcasting
Date: 1994-04-18 04:22:28 UTC
From: talk1370@aol.com
Message-ID: <2ot1u4$20p@vixen.cso.uiuc.edu>
Source record: 40320

In a prior message in another thread, Bill Pfeiffer made a telling comment that so much of radio has now become not a local service, but a "satellite fed cash register."

I couldn't agree more, having watched a number of the stations in our market (about 1.1 million people in six counties "served" by 22 stations) become just that. Not so long ago, perhaps a decade ago, radio in this town (and other markets in the top 50) was predominantly a locally based, personality-driven community service. And it prospered.

Today, it's no exaggeration to say that most of the stations are financially marginal, precisely because they decided to try to do it on the cheap. We've seen radio in market after market become so concerned with cost-cutting that they've depreciated the quality of the service to the point fewer people use it. If you look at the radio listening universe in most Arbitron surveys, you find something very interesting. A smaller percentage of people appear to be using radio now, than 10 or 15 years ago. A smaller universe means fewer total advertising dollars devoted to the medium in any market (and more devoted to print, broadcast TV and cable). Billing in our market hasn't risen as fast as inflation, and that's true of most markets except those Southwestern and Southern markets where population has exploded. But even then, radio billing doesn't match the growth. The stations that still ARE enjoying some revenue growth are the ones that continue to offer people something local, personality-driven and unique. Those that don't? Look at WRC in Washington, which scrapped much of its local talk format for syndicated programming in the late spring of 1993 to save money and improve the bottom line, and promptly saw its AQH fall in half. (The general manager of that station who made that decision, and the PD who had to implement it despite his own very strong objections, are both out now, replaced by a new crew of people who are about to recruit new blood for middays and afternoons for a locally oriented talk format.)

It will probably take several more years for most station managers to realize their future is in their own communities rather than on a geostationary satellite 22,000 miles over their heads. By that time it will be too late for some of them; we've already seen numerous stations go dark already, including some FMs now. More will go silent before it's over. In many towns much of the damage has already been done by people who thought they could print money by doing radio on the cheap. Satellites have their place in supplementing local programming with material no one station could afford to produce by itself. But as a staple of programming around the clock, they will go the way of the automation machines that FM stations bought by the hundreds in the 70s only to put on the scrap heap a few years later when the numbers

and the dollars didn't come.

To All-

I was wondering whether or not anyone out there know any information about the founding of, previous frequencies, owners, power and format of WHP-AM and WHP-FM (now WRVV-FM) in Harrisburg, PA. I have always been amazed by the power of these two stations (especially WHP-AM). I'm curious how old the two stations are and what they programmed and how powerful they were in the past. Also, has WHP always been at 580 AM and 97.3 FM?

Thanks for helping answer my curiousity.

Sincerely,
Mike

Hi Bill,

I got your email address from Tom Lacko, when I wrote to him concerning the number of nationally syndicated computer talk radio shows. He referred me to you.

I am preparing an article on computer talk shows. I have listened to and spoken with the hosts of Computer America, On Computers, and Online Tonight. Before I state that these are the only nationally syndicated shows, I would like to check on that. BTW, I'm defining "nationally syndicated" as four or five separate markets.

Let me know if you can help me on this. I don't expect you or anybody else to do my legwork for me. I know how to find the library and use the telephone. I just don't know where else to look. The hosts of the shows I've talked to already are close-mouthed on the subject of the competition, naturally, and here in the DC area, PD's are tough to get in touch with and even tougher to pry answers out of. I still haven't been able to determine why On Computers disappeared from WWRC AM, for instance.:-)

Thanks in advance for any help you can offer. If you think it's appropriate, feel free to post all or part of this message,

as you see appropriate in the interests of expediency, or let me know, and I'll post directly. I've been working on this piece for almost two weeks now, and probably should start to wrap it up. (LNGG)

1369. FM History from 1945

Newsgroup: rec.radio.broadcasting
Date: 1994-04-18 04:22:39 UTC
From: a.reninger@genie.geis.com
Message-ID: <2ot1uf$21r@vixen.cso.uiuc.edu>
Source record: 40324

> The following is a directory of all commercial FM stations in the U.S. on
> January 1, 1945, which fit on one page of the BROADCASTING Yearbook for
> 1945,
>
> Call Location Frequency Owner
> ---- -------- --------- -----
> WOWO-FM Fort Wayne, IN 44.9 Westinghouse Radio Stations, Inc.

Interesting that WOWO-FM was one of the first FM's in the country. Even more interesting is that despite it's heritage, now it's a 3,000 watt station in Huntington, IN.

Following the move to the current FM band (88-108) did they wind up on 103.1 or was there an intermediate move? I would think that an older FM allocation like this would be likely to be high-powered and still licensed to Ft Wayne, as is it's big brother WOWO-AM.

Anyone have more information?

>except at the top of the hour when their WCKY...apparently, the call change
>hasn't gone through! Looks like the programming of the old 1360 just shifts
>to 1530?

Most of the stuff that was on 1530 (WCKY soon to be WSAI) is now on 550 (WLWA soon to be WCKY). Resuscitating a failing station.

Nearly all of the stuff that was on 1360 (WSAI soon to be ????) is now on 1530. Moved from a 5 KW transmitter to a 50 KW.

I heard that 1360 is going to be a station geared towards children.

I think that while AM is not yet totally intolerable here in Cincinnati, it definitely sucks a lot worse than it used to. Jacor has totally gutted what was a good station and left several people jobless. One was Jeff Katz, who moved here from Connecticut NOT EVEN A MONTH AGO to take Mike McMurray's old spot from 3-6 PM. Jeff and Mike, I thought, were pretty good. Jeff is now probably not even fully moved in, yet jobless. I hope Jacor took care of him, but I bet they didn't...

Now the only local talk in Cincinnati is Bill Cunningham, a loud-mouthed conservative (gives 'em a bad name!). Jeff Katz and Mike McMurray were at least not loud-mouthed. Cincinnati is a very conservative town, for the most part, and we had no liberal or MOR talk to speak of. The sports talk on WSAI (before it changed format in January) was not well received. Now it's Rush, G.Gordon, and Cunningham. OK for national issues, I guess, but not much of a choice for local issues.

Dayton's premier talk station, WHIO (1290) seems to have had some shifting too (I fall back on the Dayton stations when there is nothing local worth listening to). They had an afternoon guy (local talk) give up his show, (Wes Minter?) then the morning guy went to afternoons (Kent Voss?), and now they're playing reruns of the previous night's Bruce Williams show in the mornings. So when Dr. Joy Brown (YUCK) is on WCKY (WLWA?) from

9-12, at least Bruce is mildly interesting. Anybody know what really went on at WHIO?

Anyway, I think overall Jacor did Cincinnati a disservice by gutting WCKY.

Following on the discussion of radio drama, be advised that HCJB carries radio drama on shortwave, and we will be expanding it come September. For now, you can hear Unshackled Saturday mornings to North America at 11:00 A. M. Eastern Daylight Time, Thursday morning at 2:30 Eastern Daylight Time, and Sunday afternoon at 4 P.M.. EDT. We also offer Adventures in Odyssey at 9 .A. M. Saturday--this is designed for children, but we get positive letters from adults. Then there is Radio Reading Room Saturday morning at 11:30 EDT. Starting September 1 Unshackled will run two evenings per week at more convenient times, and Odyssey and Radio Reading Room will also be on at night when reception is better in North America. We are currently looking for other dramatic programs from a Christian perspective, and would welcome suggestions. --Ken MacHarg

I am planning on being in Kansas City, Kan. for the Jazz and Blues Festival in July. I was planning on bringing along a radio to do some DXing when not at the festival.
I was wondering what stations are in the area that have: Jazz, Blues, Classical music, Folk, and R&B programming?
Do any of the stations allow visitors?
I use to be a volunteer at KCHU (FM) here in Dallas. I was wondering whether there are any community access stations in the area?

1376. Ode to WMMS

Newsgroup: rec.radio.broadcasting
Date: 1994-04-19 08:42:13 UTC
From: sjsobol@tiny.com
Message-ID: <2p05h5$ql3@vixen.cso.uiuc.edu>
Source record: 40331

Yes, I wrote a poem to mourn the death of the late, great WMMS... but some format notes about the new WMMS first!

The mighty Buzzard seems to be going modern rock (that's what the positioners and most of the playlist are now pointing to). It seems to be undergoing the format change much the same way as WENZ did two years ago.

Also, joy reigns in Cleveland as venerable WMMS personality and announcer Len "Boom Boom" Goldberg returns to the air. The image of the Buzzard and the distinctive voice of the Boom have defined WMMS for over twenty years, and I hope they keep him. He was off the air awhile due to illness.

Ironically, 'MMS was sold by a Cleveland company and ends up in the hands of a company owned by Carl Hirsch, a native Clevelander...

Now, the Ode to WMMS.

Ole 'MMS
was quite a mess;
the ratings... they were dropping.
Now Hirsch is here
Salvation is near
For the Buzzard there's no stopping. (Yes, the Muse was sitting on my shoulder!)

I hope WMMS returns to its previous status as an innovator. It would be great.

RandeeMann@aol.comm
Organization: Abrams/Dawson & Associates Syndication

Changes in Denver AOR Heritage KBPI & KAZY took place as KBPI switched it's frequency from 105.9 to KAZY's 106.7. KBPI is retaining it's old moniker only changing the dial position. This follows Jacor's purchase of KBPI. Jacor has managed to purchase 5 stations in Denver. As you may know, with the insurgence of LMA's, stations are only permitted to operate 2 FM's and 2 AM's in any one market. KBPI has retained all the KAZY jocks and KPBI Steve Cooper and the morning team of "Dean & Rog"....longtime competition. The old KAZY, also owned by Jacor, had been running with no morning show since it's purchase. The addition of Dean & Rog" should be a ratings booster. Both stations were head to head with identical heavy AOR sounds. They've kept the same sound.

Early Tuesday morning Dean & Rog left their old stations and went to KBPI during their show. They gave the illusion that they were taking over KAZY (to the contrary of what really happened), announced the changes and blew into a parody of the Brady Bunch song called "Jacor Bunch". And now they're one "happy family".

Finally, speculation as to what format KBPI's old frequency will be. Tomorrow we find out if it'll be a CHR up against KS-104 & Mix 107.5 or another Country format (just what we don't need) or even perhaps an Alternative format.

More to come....

My syndicated dance party is clearing
more markets every day. If you would like a demo of Classic Dance Traxxx .....just E-mail. Each show is individually produced for the sound of your station and market. All of my shows are available FREE to your station on a barter basis . International inquiries gladly accepted.

I lived in Birmingham for 3 years up until last fall, and he was on WAPI-FM
in Birmingham doing mornings, I believe, a couple of years ago.

The last I've heard of him, he was at WZBQ/Tuscaloosa, AL -- you might track
him down through there... Good luck!

1381. The Silent Cry

Newsgroup: rec.radio.broadcasting

Press Release

QUITO, ECUADOR--As he looked out of the window of his car in Lima, Peru, Sandro Pinhiero of Compassion International's South American office saw a child in tears. He couldn't hear the child's cry, but the tears, the contortions of the face were obvious. Pinhiero describes the plight of that street child as a "silent cry".

Throughout Latin America, and around the world for that matter, thousands of children work daily in the streets or even live there. Some, says Ecuadorian anthropologist Jimena Ortiz of Care International, live in the doorways, in vacant lots, anywhere they can be safe and secure. Yet, Ecuadorian sociologist Carlos Luzuriaga says, the problem is not limited to Latin America, he has worked with similar children in Philadelphia.

Calling the indiscriminant killing of street children in Brazil "a game", Pinhiero says that he has seen children transformed through projects in Brazil, Colombia, Peru and other nations.

The plight of street children tugs at the hearts of all who experience the phenomenon. HCJB, The Voice of the Andes in Quito, Ecuador will present a special documentary on these children. "The Silent Cry" will air on Monday, April 25.

The documentary describes the plight of children, and explores the conditions which lead to their situation. It demonstrates that programs for these children must involve not only emergency assistance, but preventative measures as well.

In addition to Mr. Pinhiero and Drs. Ortiz and Luzuriaga, also appearing on the program are Silvinia Doulon of UNICEF and Maria Esponosa, a sociologist and media commentator. The producer and host of "The Silent Cry" is Ken MacHarg.

"The Silent Cry" will be broadcast by HCJB on the following shortwave frequencies:

TO EUROPE: 8:00 UTC on 6205 and 11835 kHz
19:30 UTC on 17790 and 15270 KHz

TO SOUTH PACIFIC: 8:00 and 10:30 UTC on 11925 and 9745 kHz

TO MIDDLE EAST: 17:30 UTC on 17790 and 15270 kHz

TO THE AMERICAS: 01:00 UTC (9 P.M. EDT) and 3:30 UTC (11:30 P.M. EDT) on 15155 and 9745 kHz
5:30 UTC (1:30 A.M. EDT Tuesday) 11925 kHz

All programs will also be transmitted on 21455 and 17490 kHz Single Side Band.

1382. Empire State Building FMs

Newsgroup: rec.radio.broadcasting
Date: 1994-04-20 06:29:39 UTC
From: Mark Roberts <transvox@tyrell.net>
Message-ID: <2p2i4j$k7k@vixen.cso.uiuc.edu>
Source record: 40337

I just heard about this from a friend who was visiting New Jersey
when this happened, and was wondering if anyone could confirm.
He reported that all the FMs on the Empire State Building went off
the air on or about 1 am on April 7. The only stations with backup
transmitters on were WRKS, WNEW (in mono), and WCBS-FM.
This seems to me to be a weak point of common antennae: is it true
that if one station leaves the air, all the others must as well?

>older FM allocation like this would be likely to be high-powered and still
>licensed to Ft Wayne, as is it's big brother WOWO-AM.
>
>Anyone have more information?

Sure do...and it's not what it looks like. The current WOWO-FM goes back
only to 1965, and what's more, has been co-owned with WOWO(AM) only
since 1986!

WHLT-FM came on in September 1965, co-owned with WHLT-AM 1300 Huntington.
By the mid-70s, the station had become WHUZ, "Z103," and in 1986, it was
purchased by WOWO's owners, Price Communications, who flipped it
first to WIOE (get it...W103?) playing automated soft rock, and then
in 1989 to the WOWO simulcast as WOWO-FM.

Transmitter is on US 24 east of downtown Huntington, about 5 miles
west of the WOWO-AM transmitter site, also on US-24. I have video
of both.

WIOE/WOWO-FM had at one time a CP to go to 102.9B1, I think. I don't
know why it was never activated. The 103.1 signal is fine in
Allen and Huntington Counties, but is gone pretty fast after that.

And now you know.....the rest of the story.

Good day!

-=Scott Fybush - fybush@world.std.com=-

PS -- One other Fort Wayne note: WKQM-FM 96.3, licensed Churubusco,
is reportedly on air with a jazz format. Studios are with co-owned
WGL Am-FM, 2000 Lower Huntington Rd, Ft Wayne. Transmitter is in
the Fort Wayne antenna farm on Hillegas Road. Paul Phillips
can supply additional details if he's reading.

For what its worth, the 1000 watt driver stage of the WLOU transmitter was moved to Jackson, MI and converted to operate on the present band. This truly was a marvel to behold. For some semblance of stability, the entire exciter stage had coils of wire around it, something analogous to a crystal oven.

We had to keep modulation less than 20%, otherwise the frequency took off in time to the music. Interestingly enough, polka music didn't bother it. No, I don't know why. Same studio, same sources.

Anyway, this unit was still used up until about 1968, then it was donated to the Community College.

1386. Re: KZZT adds another simulcast

Newsgroup: rec.radio.broadcasting
Date: 1994-04-20 06:29:47 UTC

Neil Griffin (J735%NEMOMUS.bitnet@ACADEMIC.NEMOSTATE.EDU) wrote:

: Mark Roberts and other Missouri readers will be interested to hear that
: 105.5 KZZT--Moberly ("The Z") has added another station. Their Hot AC
: programming is now on 103.9 KMCR--Montgomery City. I got word of this
: from Greg Coniglio. Sure enough, they've squeezed it into the ID along
: with the Brookfiled stations. The stations run SMN's Hot AC format
: during most dayparts, and go local mornings and afternoon drive.

I knew about the Montgomery City simulcast, which started two weeks ago, but have not heard it myself yet. Didn't know about Brookfield...thanks for the tip.

: I believe the Montgomery City station has simulcasted 104.3
: KLRK--Vandalia in the past, and has not been too healthy financially.

The 103.9 allocation is a pre-80-90 class-A drop-in. It should have gone in Warren County, just to the east, but Vern Kaspar of KWRE was not interested in FM at the time. (I worked for him for a couple of summers, and I asked him about it.) Since then, his son Steve has more than made up for it with KFAV, a C3 at 99.9, which essentially is a rimshot into St. Charles County which, itself, has the KXOK-FM transmitter site in O'Fallon and KIRL at 1460 in St. Charles rimshotting into St. Louis!

Montgomery City was essentially trying to rimshot into Hermann and Warren County. But KWRE (at 730) has great regional coverage in that area. The station also had to fight KXEO/KWWR (1340/95.7) out of Mexico. Montgomery County has long been part of Mexico's regional trade area.

<re: KGNG Brookfield at 1470, daytimer...>
: really serves no purpose simulcasting. I hope someone will buy it
: (maybe 1450 KIRX--Kirksville?). All four stations are true
: simulcasters, carrying the same commercials and ID together.

I don't think Alvina Britz would want it. She has long been associated with the Kirksville area, first as the longtime GM of KTVO Channel 3, and, since 1983 or so, as the owner of KIRX/KRXL, which she bought from Vera Burke (widow of the founder, Sam Burke, and sister of beloved Missouri football coach Don Faurot).

I believe the Brookfield stations were dark for several months in 1989 or 1990 but I don't know any more than that.

The Kirksville stations have had a very, very good reputation for a very long time as professional, community minded broadcasters.

Minor trivia: I got my first FM radio in 1967. The first FM station I heard on it was KRXL, which really was the only local to Centerville, Iowa, where I had the dubious privilege of residing at the time.

Are the studios and transmitter still on Highway 63 (right next to a sharp curve in the highway, if I recall correctly)??

1387. Permutations of 0, 1, 2

Newsgroup: rec.radio.broadcasting
Date: 1994-04-20 06:29:53 UTC
From: Mark Roberts <transvox@tyrell.net>
Message-ID: <2p2i51$kav@vixen.cso.uiuc.edu>
Source record: 40342

What do two 1's, one 2, and a zero get you on a Sunday night in
Kansas City?
==========
Tuning to 1210 on the AM dial brought me KGYN from Guymon, Oklahoma.
This is a 10 kW DA-N station that, for some reason, was coming in Apr.
17 instead of the CBS station from Philadelphia (whatever its call
letters are this year).
Perhaps the station forgot to turn on its DA or perhaps conditions
were freaky (just before this, I caught the legal ID of WVNN
Athens-Huntsville, Alabama (770 kHz, 10k/500w, DA-N)).
Right at the 9 o'clock hour, KGYN was airing a long
(two-minute-plus) announcement on its efforts to be an
affirmative-action, equal-opportunity employer. Either the station is
very cautious or it was bitten at some time in the past.
Then came the first of several announcements regarding the Guymon
junior high school, and its sudden decision to go to a "closed campus."
The announcer urged people to call the school superintendent AT HOME if
they had any questions. (Apparently this was authorized.)
Then came the music, alternating country-and-western and AC. At one
point the station announced itself as "1210 AM Stereo--Mixing the Music
Just the Way You Like It." It certainly was a mix, that's for sure.
And it wasn't lying about the stereo part either. I hauled out my
Sony SRF-A100 and confirmed the stereo broadcast. The quality was quite
good, although I could not switch to wideband IF because of the local
(KFEZ) at 1190.
In the middle of my half-hour of listening, the station played Bruce
Springsteen's "Streets of Philadelphia." I first kept wondering, "do
the good people of the Oklahoma Panhandle know what this is ABOUT? And
what movie it is FROM?" (before you flame me, yes, I have been there as
a visitor and have some idea of the cultural conservatism that
prevails).
Then I marveled at the irony of this tune playing on the station
that broke down WCAU's clear-channel rights back in the early 60s.
==========
The next and final stop for the evening was at 102.1 on the FM dial,
KYYS, and its "Radio Free Westport" show.
Most weeks, it is a tepid mix of crossover modern rock with some
mild attitude and posturing.
But this week (and now hold on, I am about to say something NICE
about KY-102), the hosts, Joel and Stan, devoted all four hours of their
show to early and mid-80s "new wave."
Yes, Thomas Dolby, Peter Schilling, the Go-Go's (the Go-Go's?),
Blondie, the Human League and others wrested control of the studios at
3020 Summit for a good four-hour mix of rock nostalgia.

And, as if to confirm the theory I've expressed earlier of 80s
oldies as being the next big format, Joel and Stan reported receiving
more than 100 calls to the station (about ten times normal) during the
first hour of the show alone. Subsequent to that report, they announced
plans to have a weekly half-hour segment of "new wave" oldies.
They weren't perfect (no Pete Shelley, no Stranglers, no Simple
Minds) but it was a fun four hours of listening.

: but in the "never say always" column, let me add that I am involved with
: a Docket 80-90 dropin that is the exact opposite of what you are decry-
: ing. We are locally programmed, uniquely formatted, and financially solvent.
: We regularly receive calls & letters from the nearby metro area wondering
: when we are going to raise our power so that we can offer them an alter-
: native to the over-researched, over-processed, under-talented drek that
: the (supposedly superior due to their 'regional' status) metro FMs pump
: out.

Sounds exactly like the situation with KLZR Lawrence, Kansas (pre-80-90 but
got downgraded from class C to C1 because of 80-90), about which I have
posted quite a bit.

There are always going to be exceptions (KPIG doubtless being another) but,
I fear, they are exceptions that prove the general rule.

barry mishkind (barry@coyote.datalog.com) wrote:
<re: KGB-FM San Diego>
: Yes, it is one of about a dozen cases now, where the old three letter call
: is represented only on an FM or TV.

St. Louis had two of these for several years: KSD-FM (93.7) and WIL-FM (92.3). When EZ Communications bought KUSA(AM) and KSD-FM last year, it restored the KSD calls to the AM.

The present WIL(AM) calls, WRTH, originally were on the station at 590 in Wood River, IL. WIL picked up the calls to trade on WRTH's longstanding reputation as an easy-listening station.

Totally lost to the market now is KWK (1380).

Despite several changes in ownership, Kansas City's WHB (710) has hung on to the calls, which were on FM only from 1948-50.

1392. alt.fan.greaseman FAQ

Newsgroup: rec.radio.broadcasting
Date: 1994-04-22 00:14:53 UTC
From: jcastro@mason1.gmu.edu
Message-ID: <greaseman-faq_766913231@rtfm.mit.edu>
Source record: 40347
Cross-posted to: alt.fan.greaseman,rec.radio.broadcasting,alt.answers,rec.answers,news.answers

Archive-name: greaseman-faq

The Greaseman is a radio personality on the Infinity Broadcasting network. He broadcasts from Los Angeles to New York City, Washington, Atlanta, Philadelphia, and San Jose. He is known for his bits and song parodies. He also has his own vocabulary which he uses to avoid trouble with the FCC. Before, he broadcast out of DC on DC/101 where he competed and beat Howard Stern on a consistant basis. The Greaseman is on by himself most of the time, though sometimes you hear his producer, Bill Scanlan cackling in the background.

Q: What is the Greaseman's real name?

A: Doug Tracht. He prefers to keep his radio life and his personal life separate. His radio name is Nino Greasemaneli.

Q: Why does Howard Stern hate the Greaseman so much?

A: Howard worked for DC/101 until he got fired. When the Greaseman was hired to take Howie's place he not only held on to Howie's audience but increased it. Then when Howard syndicated in DC he competed with the Grease until the Grease moved to Infinity where they now are co-workers for the Broadcasting Giant. Now, mentions of the Greaseman on the Howard Stern show appears to be just an act in part of Stern.

Q: Which one was the Grease in the Village People?

A: He was not really in the Village People. But in the bit, he was the construction worker.

Q: What is this Bingo that the Grease dislikes so much?

A: The Greaseman's college nick name... Ask him about it.

Q: How can I get in touch with him?

A: Call him between 1730 and 2200 EST at 1-800-544-9294 and 1-213-850-0986 (FAX) and BTW do not address him as "dude".

Q: What bits does the Greaseman do?

A: Fudgeman- Fudgeman and his chicken assistant throbin
save the world from deviant behavior

Watch out Alex Trebek, here comes the Greaseman
Hobo-doo-ga-ga Handbook-

Methods to which recieve ingus.
Damien- The Grease has occasion to run into the "dark master"
while he is trying to perform his duties.

Q: What is the alarm that is sometimes heard in the background when the
Greaseman talks?

A: The Geeze alarm. This goes off when the greaseman starts geezing.

Q: What other gigs did Grease do on the radio?

A: Like any other up-and-coming DJ, Grease worked at other stations in
other markets to develop his unique style. They include:

Washington DC (WRC-AM 980) 1974 - 1976
Jacksonville, Florida (WAPE) 1976 - 1981
Washington DC (WWDC-FM 101.1) 1981-1993

Q: Did he always leave on good terms?

In almost all cases, yes. The one notable exception was WRC, when
management decided his morning personality wasn't quite right, and gave
him a choice between dropping the "Greaseman" character and leaving.
Grease chose the latter. If you ask about it today, he will joke about
the time he was collecting unemployment insurance in DC and would "stay
up to watch the moon rise and CURSE THE NIGHT!" although I'm sure at the
time it was somewhat unsettling.

Although he left Florida voluntarily to take the better offer at DC-101,
he did offend some bible-belt types during his stay. The Florida gig
was important to developing the Grease as a "god-fearing, truck-driving
redneck," though. The Florida station has since gone to religious music
("From Grease to Grace" was their motto for a while). Their loss.

Q: Are there any good biographies or other comprehensive stories about
the Greaseman?

A: Grease is a very private person, and spent a number of years in DC
before finally consenting to an in-depth story about him in the
Washington Post Magazine Fall 1987. It's a good resource to summarize
his past gigs and overall life story. Also the Washingtonian Magazine
did an article on him in the January of 1993 in commemeration of his
departure from DC.

Grease also appeared on the Larry King Show (early to mid-80's) to talk
about morning radio in general. The only down side was that he was
teamed with a "Morning Zoo" DJ as a co-interviewee, a format that has
become annoyingly ubiquitous on the radio landscape. Transcripts may be
available (don't know how to get them, sorry). This is the old
Mutual show that ran all night (Grease probably got up early to do it :-),
and not the current CNN TV talk show.

Q: Are there any albums or compilations of Grease bits?

A: There was a 4-part "Best of Grease" compilation, available on cassettes. These became unavailable shortly before he left DC-101. They are now prized collectors items and can only be obtained from private owners. Part of Grease's popularity on a national basis before he went into syndication (and hence part of the motivation for this newsgroup) was the creation and exchange of bootleg tapes among an extended network of fans. Some of his best work has never been republished (although you can occasionally talk him into doing them again on his current show).

Q: Did Grease ever serve in the military?

A: Like John Wayne, Grease has a deep and abiding respect for everyone who serves in uniform, but never served himself. During the Vietnam war, he was attending Ithaca College in New York, and his draft number never came up.

Q: But Grease did serve as a policeman?

A: Yes, he did. While working at his gig in Florida, he worked as a reserve police officer on the night shift. Morning staffers would be jolted out of their bleary-eyed state by the sight of Grease doing his show in full uniform with a 44 Magnum strapped to his belt.

Q: Is Greaseman a bigot/homophobe?

A: Certainly not. Like the program "In Living Color" or even rec.humor.funny, Grease parodies what's funny in everyone, and winds up defusing hatred as a result. Grease respects all of his fans, and wishes well even those who don't like him.

Q: But there was that "Martin Luther King, Jr." incident in DC?

A: Yes, sometimes there's a fine line between parody and cruelty, and Grease crossed the line only once during his otherwise unmarred broadcasting career spanning over 2 decades.

Sometime in the late 80's, he was noting the passing of Martin Luther King Jr.'s birthday (which had then only recently become a national holiday). Grease said something about "killing 4 more and getting rest of the week off." Grease was suspended, and apologized for the incident on an "Editorial Rebuttal" on WRC-TV in DC.

Haven't the rest of you made mistakes or are you all perfect?

Q: What does AMF mean?

A: Adios my friend.

Q: What is the "Bit without an Ending?"

A: When Grease was working in Florida, he would be prevented from getting a good day's sleep after his morning gig by thoughtless model-airplane enthusiasts who would buzz their models outside his window.

Grease came up with a revenge skit with a model plane of his own that would shoot the others out of the sky. The plane became posessed by Damien and started chasing after him. Grease then got too deep into this bit without a way out (and tried to incorporate this into the bit). After fumbling with the sound-effects, and trying a foray South of the Border, and then calling in Big-Dick Brannigan, he finally gave up groping for a punch line. Grease can usually be counted on to do some of the most impressive ad-libbing and improvisation on the radio today, but at that time his talents failed him. The bit originally aired in the Fall of 1982 from WWDC FM Washington, DC/101.

It's considered a classic, and is on Vol. 1 of the "Best of Grease" tapes. He owns the rights to all his bits, and may rerun it on his current show from time to time.

Q: What stations carry the Greaseman?

A: City Station Time

Recently CHUM-AM in Toronto had a spot something like "watch for the 1050 CHUM/Chrysler all digital van for a demonstration of the future of radio..."

I don't know if they are just running a demo DAT tape in it or are actually doing test broadcasts.

1394. RE: Empire State Building FMs

Newsgroup: rec.radio.broadcasting
Date: 1994-04-22 04:21:39 UTC
From: JOHN SCHMIDT <schmidt@auvax1.adelphi.edu>
Message-ID: <2p7jcj$4l8@vixen.cso.uiuc.edu>
Source record: 40349

They have been installing a new master antenna at the Empire State Building. The old one didn't meet the ANSI radiation standards, particularly for those in the 102nd floor observation deck, who could literally stare at the elements of the old antenna only feet away, with something like 11 stations with about 10 KW or so of transmitter output each... The new antenna will also handle more power, and is further up the mooring mast, where some of the TV stuff used to be before it moved to WTC, giving increased HAAT.

Anyway, I don't remember whether April 7 was cutover night, or was for some of the (many) required measurements to make sure everything is well, no intermod products or spurs, etc.

There is no requirement for all stations to leave the air if one does. It is true that a failure in the master antenna (or a fire in the building, it happened a few years ago) will shut everyone down. Those that are concerned enough and can afford it will install backup antennas, possibly at alternative sites. Remember, however that FM was considered a very secondary service by most AM/FM operations until a very few years ago.

Actually the old ESB master antenna was pretty reliable. There were several diplexer failures in the 20 some-odd years it was there, and a few screw ups with control and interlock wiring which shut everyone down and the fire.. But then, con-edison croaked a few times too, and at least once the ESB electricians pulled the wrong breaker and knocked everyone off.

You should have also picked up WPLJ, and whatever they call what used to be WYNY these days, they, together with WCBS are, or were the last I knew, on a seperate shared antenna at Empire. WRKS has a backup antenna. What used to be WTFM (WHTZ??) is on World Trade, together with what used to be WPIX, and I think a couple of others. As you can see, I cant even keep track of the call letters, anymore, to say nothing as to where there transmitter lives.

It is possible that some of the non-master antenna stations shut down for brief periods to facilitate intermod product measurements.

An interesting tidbit: A few years ago, one of the occasional failures knocked everyone on the master antenna off for a brief time. There was a brief story in the _TIMES_ the next day reporting the outage. While the list of stations affected as printed in the story looked to most people to be in random order, they were in perfect order to anyone who was familiar with the diplexer system. They were in the order the diplexers were stacked, starting with the one nearest the antenna (WQXR) and working back. The list obviously came from one of the Chief Engineers involved. (actually probably from the Chief of WQXR, since they are owned by the _TIMES_.)

Source record: 40253

A couple of comments:

WTAG-FM was the FM half of WTAG(AM) also worcester, owned, as you commented, by the Worcester Telegram and Gazette. The FM operation was sold off in the mid '60s and became WSRS, when the FCC enforced the rule that newspapers couldn't own both an AM and FM in the city they published in. Since I don't have my Broadcasting yearbook or my M Street here, I don't know what the current calls are. A lot of the early experimentation with WTAG, etc was done by Hobart Newell, who was the professor for many of my EE courses (in particular my Communications Engineering courses) at WPI, my undergraduate alma mater.

Don Howe also was a Consulting Engineer for many of these stations. Hey was also a professor at WPI, and a good friend of mine during and after my stay at WPI.

WMTW, while licensed to Boston, was actually on top of Mount Washington, in New Hampshire, over 100 miles away. There is still a station there, and the last I knew, the call was still WMTW.

The Yankee Network owned WNAC, 680 AM when I was growing up in Reading, in the Boston suburbs. I don't know if they owned it in 1945.

For whoever commented about WOWO-FM being relatively recent, a fair number of stations gave up when the FCC moved the band to 88-108 after WWII. Also others gave up in the '50s when the audience was nil. It is quite possible that they had a station, gave up the operation, and then years later re-applied and got a new license.

WSHS, licensed to Sewanhaka High School, a few miles from here, started on 90.3 in, as I recall, 1947, and continued until the late '60s. (with the original transmitter) When they stopped operating, Adelphi and Nassau Community College both applied for 90.3. We now share the frequency. You might look in the 1948 issue of the Broadcasting Yearbook, if it is there, and see how many stations were on then.

1399. NY FM

Newsgroup: rec.radio.broadcasting
Date: 1994-04-22 04:21:48 UTC
From: Holmes <aholmes@ultrix.ramapo.edu>
Message-ID: <2p7jcs$4lg@vixen.cso.uiuc.edu>
Source record: 40254

Responding to Mark Roberts article on New York FM stations, I have to first state that common antennae are a way of life for a lot of areas due to building or tower height, location, cost and lack of qualified engineers for maintenance. In New York City most stations are on the World Trade Center tower #1. The "Nike Missle" has separate antenna for some stations but some share a common antenna and are combined on the transmitter floor. If one station goes off the air the others do not have to shut down. If all stations go off the air I suspect that either there was a power problem or there was a routine maint. shutdown.(I forgot if you said AM or PM)

The old home of the transmitters was The Empire State Building. Some stations obviously still keep transmitters there. If anyone remembers the World Trade bombing, WCBS-TV fired up their transmitter and were back on the air.

The history of World Trade and the New York broadcaster has not been a smooth one. Once upon a time I worked for WXTV Canal 41. I fondly remember many nights on the 110th floor.

1400. Reaction to KLZR Article

Newsgroup: rec.radio.broadcasting
Date: 1994-04-22 04:21:49 UTC
From: transvox@tyrell.net
Message-ID: <2p7jct$4lh@vixen.cso.uiuc.edu>
Source record: 40255

Earlier this week, I had posted some quotes from the PITCH WEEKLY that were laudatory of modern-rock KLZR (105.9) in Lawrence, Kansas. This is the station I refer to as a "reverse rimshot" -- there are some Kansas Citians who tune in the station, despite the weak signal, because the format is not offered in the big city itself, choked as it is with country-and-western, hard-rock, "lite," and right-wing talk programming.

A couple of Lawrence residents wrote letters to the PITCH that indicate some adverse reaction to the article from Lawrence residents, who pointed out that Lawrence's music scene was around long before KLZR unplugged its satellite feed last year.

First, Patrick Quinn of Lawrence wrote:
--quote---------------
Somehow, I think KLZR's programming is less a cause than an effect of the success of the <Lawrence music> scene. We had a pretty good handle on this rock 'n roll thing back when KLZR was playing a lot of Wilson Phillips and Michael Bolton, and I suspect we'll have a pretty good handle on it even after Hank Booth wakes up one day to discover that his radio station is playing devil music.
--snip---------------

Background: until last February, KLZR was rebroadcasting "The Heat" CHR satellite service (I think it was from SMN, though not sure). When "The Heat" suddenly cooled off (i.e., SMN or whoever dropped it), KLZR decided to go with modern rock. Hank Booth is the owner. I suspect he *is* well aware of what is going on; he occasionally is heard on the station reading news or sports.

Finally, Steven Greenwood of Lawrence wrote:
--quote-------------
In a two page article, <Jeffrey> Drake dismisses KJHK <90.7> and KKFI <90.1> in one brief sentence, sniffing, "They don't have the financial clout to make an impact on the local club scene." I'm not sure exactly what Drake means by a radio station's "financial clout" (Stan 'n Joel's weekly four-hour commercial for their own financial interests <on KYYS, 102.1>, perhaps?) Drake conveniently neglects to
consider what it might've been that attracted 1000-plus "alternative" bands to Lawrence from around the globe during the 15 years <actually, it was more like eight or nine> prior to KLZR's format change.
--move on to.............
By the way, are KLZR's ratings since last February truly the high octane, nonstop rocket ride that K.C. rock writers have been supposing? And how about an article examining KLZR's politics pertaining to "black" alternative music (rap, hip-hop, reggae, etc.?)

--snip--------------

Background: KJHK is the Kansas University student-run station; KKFI is the community-access station in Kansas City. KKFI's impact on alternative rock is limited by the odd hours to which the station relegates that type of programming (after 10 pm or midnight). KJHK's impact is limited in Kansas City because of its 100-watt signal, which barely makes it past Lawrence. Stan 'n Joel are the hosts of "Radio
Free Westport," a usually bland modern rock show Sunday nights on KY-102. "Stan" also has financial ties with the Hurricane nightclub in Westport.

As I mentioned a few months back, KLZR plays almost entirely guitar-based music, except for a couple of hours of ambient and techno on Sunday nights. Otherwise, any tune that even comes close to having a beat does not get on KLZR's airwaves.

Got all that? This may be on the semester finals. Or it may not.

I have a copy of the 1992 Broadcasting Yearbook which is taking up valuable space on my bookshelf. I would like to trade it for something much more compact. If anybody wants this great reference, I would trade it for a copy of a schematic of an interesting piece of tube era broadcast equipment. Let me know if you have anything interesting to trade for it, a schematic of the early 60's RCA Stereo Generator would take it without question.

Regards,

John Byrns

1406. MBD/Chancellor acquires 11 stations

Newsgroup: rec.radio.broadcasting
Date: 1994-04-22 04:26:38 UTC
From: parth2@aol.com
Message-ID: <2p7jlu$55p@vixen.cso.uiuc.edu>
Source record: 40261

Dallas, TX-based MBD Broadcasting and Chancellor Communications is (announced today) acquiring 11 stations across the country from American Media, Inc.. (MBD and Chancellor are essentially under the same control.)

Chancellor currently owns KFBK-AM/KGBY-FM in Sacramento, CA, and as a part of the deal, is also acquiring crosstown KHYL-FM. KFBK is the market-leading 50KW news/talk station, and KGBY is the market's top adult contemporary station, with the top-rated morning drive show. KHYL has an oldies format. (Trivia buffs - until fairly recently, KHYL was co-owned with KAHI-AM Auburn, CA, and located with KAHI in that town in the Sierra Nevada foothills, about 35 miles outside of Sacramento.)

The other acquisitions, all made by MBD, include -
WUBE-AM/FM and WYGY-FM, Cincinnati
KTCJ-AM/KTCZ-FM, Minneapolis
WALK-AM/FM, Nassau/Suffolk, NY
KMEN-AM/KGGI-FM, Riverside/San Bernadino, CA
WOCL-FM, Orlando, FL

The reported price of the combined sales are $150 million. Chancellor acquired KFBK/KGBY from Group W in January of this year, at a reported price of $48 million.

Stepping away from the official info for a bit...I have been fortunate to have some contact with KFBK/KGBY since moving to Sacramento, and all indications have been that they haven't skipped a beat since being taken over by Chancellor, and are still quite well run. In this duopoly world, I'm sure the acquisition of KHYL ("Cool 101") will only enhance their local market position...already pretty fantastic.

|> I just heard about this from a friend who was visiting New Jersey
|>when this happened, and was wondering if anyone could confirm.
|> He reported that all the FMs on the Empire State Building went off
|>the air on or about 1 am on April 7. The only stations with backup
|>transmitters on were WRKS, WNEW (in mono), and WCBS-FM.
|> This seems to me to be a weak point of common antennae: is it true
|>that if one station leaves the air, all the others must as well?

Depends on the design of the antenna. The master antenna on empire, built
back 20 or more years ago (you can see it if you go up to the 102nd floor,
just look out the windows at the 45-degree tilted "T" elements...) has
(theoretically) interlocks at each diplex unit installed in each xmtr room.
If there is a problem with an individual station's plumbing or diplexer, there
is supposed to be an automatic mechanism to switch out the offending station
(yes, there have been attempts to circumvent the system by a couple of stations
over the years..usually, peer pressure and public pilorying of the offendor
have minimized that occurance...) to ensure the rest of the stations aren't
dinged by one station. For more information on multi-station antennas,
I wrote an article for BM/E magazine (RIP) in the March '85 issue about
this technology.

What sounds like happened is that the system itself went off line, and the
stations with backup antennas on empire were able to switch over to them,
or something like that. I seem to recall from my days in NY radio and
chapter 15 of SBE, that these three (or their predecessors) were lucky enuf
(or their ce's were foresighted enuf) to not have dismantled the individual
station antennas when they went on the master.

moral of the story: backups, like good looks or money, you can never have
too many of...

That's a big if. If the power supply to the building or to the roof went out, sure. But, if an individual transmitter went down, no problem. Just because they're sharing antenna space, heck, they could even be multiplexed on the same actual antenna, but they would still be separate; one would not affect another.

Ummmm. I think it's Brandt. And Brandt won't have to drive to Fort Lee, because the I-Man will be in DC.

1412. Whatever happened to 70's AM in INDY?

Newsgroup: rec.radio.broadcasting

I remember back in the mid to late 70's Indianapolis had several top 40 am stations (Wnde "Windy" and WIFE). These stations had several good DJ's (Marvelous Mark McClure, J.J. Kennedy). Does anyone know whatever happened to these stations or people? Those stations and people were my first intro to rock and roll 70's style!

Hello:

I am finally making that move.

I am moving out of my home of 30 + years in Chicago, to a more rural environment (destiantion announced later).

So... from the 22nd through the 24th I will not be logging in to deal with mail and news.

So Please hold all articles till after the 25th or so. I will be logging in from a friends house (long distance) at that time to deal with the group news, so I would appreciate it if mail/news could be held back for thonse two - three days.

Thanks

Bill

Archive-name: greaseman-faq

The Greaseman is a radio personality on the Infinity Broadcasting network. He broadcasts from Los Angeles to New York City, Washington, Atlanta, Philadelphia, and San Jose. He is known for his bits and song parodies. He also has his own vocabulary which he uses to avoid trouble with the FCC. Before, he broadcast out of DC on DC/101 where he competed and beat Howard Stern on a consistant basis. The Greaseman is on by himself most of the time, though sometimes you hear his producer, Bill Scanlan cackling in the background.

Q: What is the Greaseman's real name?

A: Doug Tracht. He prefers to keep his radio life and his personal life separate. His radio name is Nino Greasemaneli.

Q: Why does Howard Stern hate the Greaseman so much?

A: Howard worked for DC/101 until he got fired. When the Greaseman was hired to take Howie's place he not only held on to Howie's audience but increased it. Then when Howard syndicated in DC he competed with the Grease until the Grease moved to Infinity where they now are co-workers for the Broadcasting Giant. Now, mentions of the Greaseman on the Howard Stern show appears to be just an act in part of Stern.

Q: Which one was the Grease in the Village People?

A: He was not really in the Village People. But in the bit, he was the construction worker.

Q: What is this Bingo that the Grease dislikes so much?

A: The Greaseman's college nick name... Ask him about it.

Q: How can I get in touch with him?

A: Call him between 1730 and 2200 EST at 1-800-544-9294 and 1-213-850-0986 (FAX) and BTW do not address him as "dude".

Q: What bits does the Greaseman do?

A: Fudgeman- Fudgeman and his chicken assistant throbin
save the world from deviant behavior
Back in time with an uzi-
the Grease uses the equipment in the radio
studio to return to key moments in history

with his uzi
Carlos the International Terrorist-
Episodes of running into the famed and heavily
armed terrorist, Carlos
Medical Man- Stories about when Nino was the pompous
Dr. Greasemaneli
Bet the Bomb Bays-
Try to stump the Grease, but if you don't, you best
drop them pants....
Sgt. Fury- the Grease relives his time in Viet
Deliverance 101-
a class in which the Grease analyzes the movie
Deliverance.
Clinton- a look at how life would be if the Grease and
Clint Eastwood got a knock on the head and decided
to live alternative lifestyles
Law Man- the Grease tells about life as a law man
Big Dick Brannigan-
the Grease tells about his flashback to his past
life as a private dick
Emperor Tocasfacius-
the Grease tells about his flashback to his past
life as a ruler of the Holy Roman Empire
Irving Greasemanawitz-
the Grease tells about his flashback to his past
life as the first Yiddish Lawman
Wheel Chair Warrior-
Super Hero fights for the rights of the handicapped
West Virginia- Greaseman shows his respect for the people of WVA
My Daddy- Description of how Oscar Greasemaneli gets into trouble
Ugly Women- Recounts of how The Grease and his daddy picked up
and enjoyed ingus with ugly women
Good Ship Grease-
stories about how the Grease spends his lesiure time
in his boat.
South of the border-
stories about how the Grease spent time in Mexico
Toe Monster- The dreaded Toe Monster is exposed for trying to
eat the Greaseman's toes
Blastapiece Theatre-
stories told by Sly Stalone
Sylvester Stalone sings the classics-
Sylvester Stalone sings the classics.
Rag Nad- stories about Grease's half space alien love child
Six Minute Workout-
A unique workout for men
Baby talk- Conversations with the unborn
The Greaseman Quiz (formerly the morning quiz)-
Watch out Alex Trebek, here comes the Greaseman
Hobo-doo-ga-ga Handbook-

Methods to which recieve ingus.
Damien- The Grease has occasion to run into the "dark master"
while he is trying to perform his duties.

Q: What is the alarm that is sometimes heard in the background when the
Greaseman talks?

A: The Geeze alarm. This goes off when the greaseman starts geezing.

Q: What other gigs did Grease do on the radio?

A: Like any other up-and-coming DJ, Grease worked at other stations in
other markets to develop his unique style. They include:

Washington DC (WRC-AM 980) 1974 - 1976
Jacksonville, Florida (WAPE) 1976 - 1981
Washington DC (WWDC-FM 101.1) 1981-1993

Q: Did he always leave on good terms?

In almost all cases, yes. The one notable exception was WRC, when
management decided his morning personality wasn't quite right, and gave
him a choice between dropping the "Greaseman" character and leaving.
Grease chose the latter. If you ask about it today, he will joke about
the time he was collecting unemployment insurance in DC and would "stay
up to watch the moon rise and CURSE THE NIGHT!" although I'm sure at the
time it was somewhat unsettling.

Although he left Florida voluntarily to take the better offer at DC-101,
he did offend some bible-belt types during his stay. The Florida gig
was important to developing the Grease as a "god-fearing, truck-driving
redneck," though. The Florida station has since gone to religious music
("From Grease to Grace" was their motto for a while). Their loss.

Q: Are there any good biographies or other comprehensive stories about
the Greaseman?

A: Grease is a very private person, and spent a number of years in DC
before finally consenting to an in-depth story about him in the
Washington Post Magazine Fall 1987. It's a good resource to summarize
his past gigs and overall life story. Also the Washingtonian Magazine
did an article on him in the January of 1993 in commemeration of his
departure from DC.

Grease also appeared on the Larry King Show (early to mid-80's) to talk
about morning radio in general. The only down side was that he was
teamed with a "Morning Zoo" DJ as a co-interviewee, a format that has
become annoyingly ubiquitous on the radio landscape. Transcripts may be
available (don't know how to get them, sorry). This is the old
Mutual show that ran all night (Grease probably got up early to do it :-),
and not the current CNN TV talk show.

Q: Are there any albums or compilations of Grease bits?

A: There was a 4-part "Best of Grease" compilation, available on cassettes. These became unavailable shortly before he left DC-101. They are now prized collectors items and can only be obtained from private owners. Part of Grease's popularity on a national basis before he went into syndication (and hence part of the motivation for this newsgroup) was the creation and exchange of bootleg tapes among an extended network of fans. Some of his best work has never been republished (although you can occasionally talk him into doing them again on his current show).

Q: Did Grease ever serve in the military?

A: Like John Wayne, Grease has a deep and abiding respect for everyone who serves in uniform, but never served himself. During the Vietnam war, he was attending Ithaca College in New York, and his draft number never came up.

Q: But Grease did serve as a policeman?

A: Yes, he did. While working at his gig in Florida, he worked as a reserve police officer on the night shift. Morning staffers would be jolted out of their bleary-eyed state by the sight of Grease doing his show in full uniform with a 44 Magnum strapped to his belt.

Q: Is Greaseman a bigot/homophobe?

A: Certainly not. Like the program "In Living Color" or even rec.humor.funny, Grease parodies what's funny in everyone, and winds up defusing hatred as a result. Grease respects all of his fans, and wishes well even those who don't like him.

Q: But there was that "Martin Luther King, Jr." incident in DC?

A: Yes, sometimes there's a fine line between parody and cruelty, and Grease crossed the line only once during his otherwise unmarred broadcasting career spanning over 2 decades.

Sometime in the late 80's, he was noting the passing of Martin Luther King Jr.'s birthday (which had then only recently become a national holiday). Grease said something about "killing 4 more and getting rest of the week off." Grease was suspended, and apologized for the incident on an "Editorial Rebuttal" on WRC-TV in DC.

Haven't the rest of you made mistakes or are you all perfect?

Q: What does AMF mean?

A: Adios my friend.

Q: What is the "Bit without an Ending?"

A: When Grease was working in Florida, he would be prevented from getting a good day's sleep after his morning gig by thoughtless model-airplane enthusiasts who would buzz their models outside his window.

Grease came up with a revenge skit with a model plane of his own that would shoot the others out of the sky. The plane became posessed by Damien and started chasing after him. Grease then got too deep into this bit without a way out (and tried to incorporate this into the bit). After fumbling with the sound-effects, and trying a foray South of the Border, and then calling in Big-Dick Brannigan, he finally gave up groping for a punch line. Grease can usually be counted on to do some of the most impressive ad-libbing and improvisation on the radio today, but at that time his talents failed him. The bit originally aired in the Fall of 1982 from WWDC FM Washington, DC/101.

It's considered a classic, and is on Vol. 1 of the "Best of Grease" tapes. He owns the rights to all his bits, and may rerun it on his current show from time to time.

Q: What stations carry the Greaseman?

A: City Station Time

ANNOUNCEMENT

Shortwave & Radio Hypertext Catalog on the World Wide Web (WWW)

AVAILABLE NOW
Issue #4

A catalog of hypertext links to FTP, GOPHER, and WWW files and services
for the Shortwave Listener and Radio enthusiast is now on-line. This issue
includes links to broadcaster schedules, digital audio files, graphics,
mediumwave, shortwave, FM, Ham Radio, FCC, and other files associated with
radio. Ralph Brandi's FAQ material in hypertext form will soon be available from
Ralph, so stay-tuned. All these available with a click of your mouse via NCSA's
Mosaic (return key for NCSA lynx users).

The URL to put in your hotlist/bookmark file:

http://itre.uncecs.edu/radio/

If you have a site or know of a site that maintains up-to-date information
on radio topics, send me e-mail.

If your club would like to participate, (provide program schedules, club
events, maintain files on individual broadcasters, etc.), send me e-mail.

If you are a radio broadcaster and have internet ftp files, gophers or WWW
servers with program schedules, audio-on-demand files, or other information
to share, send me e-mail.

I am also looking for UNIX software programs that could create propagation
information in graphic form (GIF, JPEG, ???) that would be adapted to use WWW
forms to send the graphic to the WWW user. If you know of a tool (read free
program), send me e-mail.

My thanks to Jay Novello for providing his public access WWW server and to
Ralph Brandi for providing the FAQ html files!

* Overview of the winter raings : As expected news monster WBZ-AM 1030 had a fantastic winter
ratings book. Bostonians turned to the 'snow station' to get all the vital weather information and it reflected in its great showing with the general audience(12+). The bad weather also helped other major AM station -- WHDH AM-850 -- to crack into Top 10. WHDH runs all-news format from 5am-9am. It competes with WBZ in the morning but 'HDH's format is more of a healine news variety with frequent traffic, weather and sports updates.

WBCN took the # 1 spot in the most desirable 25-54 group. Dinosaur of morning radio, Charles Laquidara, had vaulted into #2 spot in the morning-drive race(WBZ is the #1 morning station) after a really weak showing in the fall book.

Other News Market News :

*WJMN jammed?: Report in the last week's edition of R&R regarding WJMN 94.5FM dumping its CHurban/Dance format as soon as it's acquired by Pyramid Broadcasting is
quite frankly old news. Earlier this year, they(Pyramid) conducted a market study to find what new format could work+make money in Boston. Obviously they didn't do that for their CHR powerhouse WXKS-107.9FM or low-power nostalgia outlet WXKS-1430AM :-).
Just in case,I'm preparing a blank tape for sometime in May because I have a feeling Richie Balsbaugh(Pyramid CEO) will be cleaning house at a Waltham station as soon as FCC gives him the green light to take over his new $22 million invsetment in the Boston market. If anyone out there has any inside stuff on what Pyramid new top-secret plans(i.e. format) are for 94.5, please drop me a note....

* Speaking of WXKS-107.9FM, its 14th annual KISS Concert. which creates more hype for the station and gives it a summer ratings boost. is scheduled for June 4th at Great Woods in Mansfield,MA(outside Boston). The KISS concert includes mostly CHR acts who dominate Top 40.(MeatLoaf headlines this year's show) All proceeds from the show go to support the Genesis Fund.

* AP rocker WFNX-101.7FM is reportedly blackballing any local band appearing at a rival AOR WBCN-sponsored 'Rock'n'Roll Rumble' in May. WFNX devotes a lot of air-time to local music but extending out the radio war onto local acts by not playing their music because of their links to WBCN is simply absurd. The ironic part of this mess is that WBCN devotes only 2 hours to local music (Sunday nights) and ignores local bands on its daily playlists altogether...

* Hot AC WBMX-98.5 now carries David Letterman's Top Ten every morning at 7:40am. CBS Radio Group packages TopTen from the night before and distributes it to stations across the country...

* Imus is now #3 among males 18-34 and 25-54. Not a bad showing considering he's on a weak signal,financially troubled 5KW station(WEEI 590AM) and they didn't spend a dime on print or TV ads in the first 8 months he was on the air....

-Mark
"Looks like a butterfly...Stings like a bee...WBCN,Boston'

1418. DALLAS/FORT WORTH ARBITRONS

Newsgroup: rec.radio.broadcasting
Date: 1994-04-29 03:14:33 UTC

Abrams / Dawson Radio Syndication
Re: Denver Radiowatch

It's been 4 days since Rock Heritage KBPI moved it's frequency to KAZY's, leaving it's old frequency for a brand new station. Everyone speculated on what the new stations format would be. The stations been on the air for 3 days and most of us still don't know what it is. The station switched over by playing 22 hours of Alice's restaurant over & over. Then it went into a female leaning mainstream CHR playing everything from Gabrielle to John Cougar & Michael Bolton. The station is calling itself "Alice at 106". I'm hoping they'll fine tune the format to a more tolerable sound. More to come.....c

Hey, folks. This is my first ever post to a news group, so bear with me . . . well, you've probably heard all that before.

Anyway, I have a question that's been bugging me for over two years now. Is anybody familiar with Bob "Mad Dog" Lassiter, who used to have a talk show on Chicago's WLS-AM (now AM and FM)? I understand he also worked in Tampa Bay and other markets prior to Chicago. As I recall, he left WLS--or WLS got rid of him--in about October of 1991. Since then, I've been wondering where he is, or if he's even in radio anymore. I was a HUGE Mad Dog fan, and I'd be thrilled to death to hear about what he's up to now.

Any help is much appreciated.

. . . and I have no tagline or whatever, so this is basically it.

Cross-posted to: rec.radio.broadcasting,alt.california

The Internet works, folks! Don and Roger emailed me some
good leads (they're free to post my email back to them if
they so choose), and I followed up on them. This is what
I learned:

Tom Leykis is indeed going to be on KMPC 710-AM Los Angeles,
from 3:00 PM - 7:00 PM (drive time!).

I called KMPC AM 710, and found out something very interesting:

They are being bought out by KABC 790-AM, which is currently
the number one station in the L.A. SMSA and has been going up
against KFI 640. So Tom is going to be competing with the
station he used to work for, and who fired him over perks and
bennies and contract crap. This should be interesting.

Tom gets there in about two weeks or so. The Program Director
at KABC says she isn't sure if he will be syndicated or not,
or if he'll be broadcasting from KMPC studios, KABC studios,
or from L.A. at all. She just didn't know offhand.

I wonder how I can pick up KMPC 710 from Austin ....
thanks again to Don and Roger.

1423. WANTED: RE-20 Shock Mount

Newsgroup: rec.radio.broadcasting
Date: 1994-04-29 03:14:42 UTC
From: holloway@uxa.cso.uiuc.edu
Message-ID: <2ppu32$lnh@vixen.cso.uiuc.edu>
Source record: 40291

WPGU-FM, a not-for-profit, educational college station is looking
for a shock-mount for an ElectroVoice RE-20 microphone. We already
have a boom, just nothing to hold the mic. H-A has them for $80 or $90,
so we're looking around for a used one.

If anyone has such a beast and would like to part with it, please
contact me. Thanks!

1425. SF BAY RADIOWATCH

Newsgroup: rec.radio.broadcasting
Date: 1994-04-29 03:23:41 UTC
From: matt@wni.com
Message-ID: <2ppujt$naf@vixen.cso.uiuc.edu>
Source record: 40289

Hello Radio,

"Star FM" is history. The station on 98.9FM uses the positioner "98.9 KSOL" however at the top of the hour the legal id is "KSRY SAN FRANCISCO." They are now running an adult urban format with hints of AC.

The real KSOL(Wild 107.7) on 107.7FM is simulcast over 99.1FM covering the southern reaches of the SF Bay Area. The programming on KSOL is a younger urban.

Two blocks up the street from KSOL, construction is coming along nicely for the studios for KPIX-AM/FM ?? It looks like the days are numbered for KKHI. Word is that KPIX-AM/FM will be on the air sometime in July or August.

Best Regards,

1426. Minneapolis/St. Paul News

Newsgroup: rec.radio.broadcasting
Date: 1994-04-29 03:23:42 UTC
From: SGRIFFITH@murrow.mpr.org
Message-ID: <2ppuju$nak@vixen.cso.uiuc.edu>
Source record: 40200

I've been lurking around for quite a while...time to pass along some Twin Cities news.

It appears that CBS-owned and operated WCCO-AM is on the verge of losing its traditional dominance in the market. After nearly six decades of being the unquestioned Number One station in practically every demographic you can think of, the Good Neighbor is probably one ratings book away from second place behind ABC/Cap Cities KQRS-FM.

The Winter book numbers follow:

Listeners 12+, 6am-midnight, Monday-Sunday

STATION FORMAT WINTER 93 WINTER 94
WCCO-AM news/talk 16.1 12.7
KQRS-FM classic rock 7.9 11.9
KDWB-FM CHR/urban 7.2 6.9
WLTE-FM A/C 7.1 7.3
KSTP-FM A/C 6.9 6.3
KEEY-FM Country 9.2 5.8
WBOB-FM Country --* 5.4
KSTP-AM Talk 4.7 4.7
KQQL-FM Oldies 5.3 4.5
KEGE-FM Alternative 5.5# 4.2
KTCZ-FM Alternative 5.6 3.9
KJJO-FM Country 3.8 1.7
KFAN-AM Sports 1.4 1.6
KCFE-FM Alternative --% 0.9

* - format change from religious programming summer '93
# - format change from hard rock to alternative winter '94 - now co-owned with KQRS
% - new signal first on air summer '93

In other news, Midcontinent's KDWB-AM (630) is now dark after the transmitter site was sold to an insurance company. The ownership says they are dedicated to AM and are searching for a new tower site in the eastern Twin Cities area. (Yeah, right...the area they're looking in is the fastest growing suburban area in the metro. IMHO, it'll be a LONG time before AM 63 goes back on-air).

Cargill Communications is in the final stages of testing before launching their simulcast adult alternative signal on two small rimshot FM's - WLOL-FM in Cambridge (about 30 miles north of Mpls/St. Paul) and WTCX-FM Lakeville (about 30 miles south). The signals do not overlap. I know some of the people involved in this project, and, well...good luck.

The story of the Edge...ABC/Cap Cities spent an estimated $12 million to buy hard-rock KRXX-FM and change it into 'alternative' KEGE-FM. Why? Not because they believe in the format...but to protect their franchise on classic rocker KQRS. A reported condition of the deal was re-signing overweight loudmouth morning idiot Tom Bernard to a new five year contract at a guessimated $2 million. (You can't tell I like this guy, can you?) >From the Arb numbers above, the strategy seems to be working.

The country boom appears to have gone bust in the Cities, with former #2 KEEY-FM losing nearly 50% of its audience over the past year, and new gun in town WBOB (Turn Your Knob To Bob) has shown no growth over the three full ratings periods its been around. Winner of the Most Likely To Change Format award is 'Country Thunder' KJJO-FM, which has lost two full ratings points they can't spare.

About the only hope WCCO-AM has for the spring/summer period is for the Twins to get hot, and for there to be a lot of severe weather. 'CCO is the automatic tune-in station for weather info...I think it's something in Minnesotan's genes. One wonders how long the CBS corporate folks will wait before heads start rolling...even though the place is still disgustingly profitable.

And that's how I see it...

1427. The best of Chicago

Newsgroup: rec.radio.broadcasting
Date: 1994-04-29 03:23:43 UTC
From: gdallas@aol.com
Message-ID: <2ppujv$nar@vixen.cso.uiuc.edu>
Source record: 40298

I'm going to be paying Chicago a visit in the next 10 days. During my downtime I'd like to explore the radio dial a bit.
My transistor has 9 presets for AM and 9 for FM. Help me set them in advance, folks!
What's the Best of Chicago?
Any suggestion will be appreciated! Best news, best talker, best CHR, best AOR, best oldies, best urban contemporary, best blues, best classical, best quirky, best morning team, anything I just shouldn't miss?

Thanks!
Dallas in Colorado Springs

1428. Are you there? Also W. NY update

Newsgroup: rec.radio.broadcasting
Date: 1994-04-29 03:23:50 UTC
From: talk1370@aol.com
Message-ID: <2ppuk6$nc3@vixen.cso.uiuc.edu>
Source record: 40288

Anyone in the Western NY area with inside knowledge may want
to comment on/confirm/deny the following rumors...
1)That the arrival of a new GM for WWKB/Kiss 98.5 means a probable
scrapping of at least some of the syndicated programming which has been
on the station (and underperforming Howard Stern's morning shares) and
hiring of new local hosts for late mornings and part of afternoon drive;
possibly a move for Rush Limbaugh from WBEN to now co-owned 'KB
in early afternoons (and replacement with all local programs on 'BEN before
8 PM) as well...anyone at Keymarket have the definitive word on this?
2)That Rich Communications, owners of WGR, 97 Rock, 3WS/1400
and 103.3/The Fox, are looking to sell the whole quadropoly either to one
buyer or to separate buyers and get out of the radio business, and at least
one potential buyer has already been targeted...and this is the reason why
'GR is dragging its feet on replacing departed PD/OM Chuck Finney (re-
portedly no candidates have been interviewed yet,two months after Finney
booked out and went to Cincinnati, and the stack of applications has only
gone through a preliminary screening at last word). Any new owner will want
its own people in charge of programming and research...
3)Over here in Rochester, rumors abound of at least one full power FM
mulling, and researching, impact of a possible change to a talk format
aimed at younger listeners (like WHTK "hot talk 1280" but more localized);
but the station in question seems to vary with who's telling the story.
It makes sense, with one in five Rochester radio listeners choosing one of
the existing AM talkers. Any truth to this, or is it just speculation? And is
it also true that someone is looking into providing format competition for
WBEE/92.5 in the country realm, given that station's current format
monopoly and 13% AQH share? With that strong a performance, there
certainly seems to be room for two profitable modern country outlets in this
town...
Love to hear what people have to say about these rumblings on radio
street in Western NY.
All in all an interesting spring ahead even if no big changes happen right
away...

Bob Smith, WXXI/1370 Rochester

1429. Re: KMOX and Rush Limbaugh perspective

Newsgroup: rec.radio.broadcasting

In article <2kureq$3vv@vixen.cso.uiuc.edu>, barnhart@MCS.COM (Aaron Barnhart) writes:

>Does anyone know if KDKA in Pittsburgh carries Limbaugh? WOR in New
>York? KOA Denver? I'd be surprised if any of these did.

>Aaron

Hello from Colorado Springs. Yes, KOA does; they picked him up in January from a weaker AM talker, KNUS. But what KOA chose to do with Rush once they got him was a boneheaded move typical of the declining quality of management decisions the station has experienced since 1987.
They have an established local conservative talker, Mike Rosen, who runs from 9 a.m. to noon. To carry Rush live (from 10 a.m. to 1 p.m. in this time zone) they could have either changed Rosen's time slot or moved either him or Rush over to their newly-acquired duopoly station, KTLK 760. But no, I guess they thought they would be "dividing" the audience for conservative talk if they ran Rosen against Rush, so instead they TAPE DELAY Rush, starting him at noon -- two hours late.
Certainly it's almost impossible to call in to the show, but what self-respecting ditto-head is going to wait two hours for his messiah? Nobody. Instead, the Rush fans in north Denver will simply tune in KIIX 600 from Fort Collins, and those in south Denver will tune in KVOR 1300 from Colorado Springs. Sure, their signals are weaker, but they carry Rush live.
... It's as if KMOX were to tape-delay the Cardinals! Redbird fans wouldn't wait; they'd just strain to hear the live signal from places like Springfield, Ill., or Union, Mo., or wherever the closest affiliate carrying the games live would be.
I predict KOA is going to be -- or is already -- disappointed in the numbers they're getting for Rush's show ... another in a series of decisions that seem to be endemic to AM radio, and which are killing it softly.

-- Dallas in Colorado Springs

Overview: **********

This is the weekly news digest for West Coast Live, San Francisco's Live Radio Show to the World (actually just public radio).

We're back to the Bayfront this week: **

Like last week, a dance troupe matinee has pre-empted us from the Cowell Theater. We'll be back at the Bayfront Theater (formally Life on the Water) which is located on the 3rd floor of Landmark Building B at Fort Mason in San Francisco.

WCL gets a live satellite uplink: ******

After nearly 4 months on the air, we finally got a live satellite uplink. Since our first show on January 8th, we've had a two hour delay before the show went up to the satellite. Now we'll be broadcasting across the country in real-time. Ya!

The upcoming schedule: **********

Our producers work overtime booking talent onto the show. Sometimes they're so busy on the phone, they don't have time to keep the rest of us up to date. So join our audience at a live show. You too may be pleasantly surprised.

April 30th: **********

Diane Hidy's Birthday Today!

Kronos Quartet, world renowned contemporary string quartet.

Weslia Whitfield and Mike Greensill, world renowned cabaret extraordinaires.

David Tanenbaum, singer/songwriter.

Karl and Carl, travel tips.

May 7th: **********

The Hot Club of San Francisco.

Kairos Children's Choir, angelic young voices.

May 14th: **********

The Rhythm Shieks.

Daniel Duane, author of "Lighting Out: A Vision of California's Mountains".

Raymond Kane, Hawaiian slack key guitarist.

Claire Peaslee, naturalist.

May 21st: **********

Gerald Haslam, author "Condor Dreams and Other Fictions".

May 28th: **********

Merl Saunders, Bay Area keyboard legend.

Yellow Wood Junctiopn, original acoutic music.

Winnie Smith, author "American Daughter Goes to War".

Special Offers: **********

Drawing for Free Tickets!: *****

This week marks our 17th West Coast Live show. Be the 17th person to email (see rules, below) the moderator at;

Owner-West_Coast_Live@netcom.com

and you will win two (2) free tickets to this week's live show. Runner-ups are allowed to buy tickets at list price.

Rules: **********

The contest begins as soon as the moderator sends this notice to the West Coast Live email subscription list.

The winner will be selected based on the time the entry was sent (as opposed to the time the entry was received), no sooner than 1 hour after the moderator receives the minimum number of entries, and no later than 48 hours prior to the live show.

The email must be addressed to;

Owner-West_Coast_Live@netcom.com

The email's header subject must contain the phrase; "Win Ticket Drawing".

One entry per person.

The winner will be notified by email.

If the winner can't attend this week's show, the winner may assign the tickets to a couple of friends.

The moderator's (email filter's) selection is final.

Free Coffee: **********

Wear an official West Coast Live shirt at the show, and you are entitled to free coffee.

Rules: **********

Official West Coast Live T-shirts or sweat shirts only.

For a limited time, this offer is extended to shirts from that old radio show, that are upgraded with an official West Coast Live Shirt Upgrade Kit.

This offer is good for free coffee only from the West Coast Live java bar. If anyone else offers you free coffee for wearing a West Coast Live shirt, let us know.

T-shirt Drawing: **********

On the last live show of each month, we give away an official West Coast Live T-shirt.

Rules: **********

To enter this drawing, you must drop a business card into our fish bowl. Any scrap of paper with your name, address, and phone number may be substituted for a business card.

One entry per person. You must be present to enter.

The drawing is held following the last live show of each
month. You need not be present to win.

Tip of the Week: **********

Please register to vote: *******

Today marks the first free election in South Africa. Over
the years, millions people across the world have
suffered for the right to vote, which many of us take
for granted. Postage paid voter registration forms are
available at most post offices, government buildings,
and every live West Coast Live show. Why delay,
register today.

Downloading Additional Information: ****

You may download an information document giving background
information on the show and the show's Internet service, by

Greetings:

Thanks for your patience for the past several days of silence.

I have sold my house in Chicago and was off line a little less than a
week while I got situated.

Things should be OK from now on, except that I have a back queue of
over 150 messages to get out...

So AIRWAVES digests wqill be a bit bigger than usual, and I will
publish the remaining backlog giving priority to time sensitive and
broadcast-professional traffic.

Thanks for your patience... again.

Bill

Here's some stuff for you while we're still recovering from
the Sabres 4 OT game on Wednesday:

*WECK-AM(1230,1kW-U;MOR/Canisius Coll.sports)and WJYE-FM(96.1,
50kW,A/C)have been bought by Boston,Mass.-based American Radio
Systems for a price rumored to be $9-10 million. ARS' co-COO,David
Pearlman,was quoted in last week's Business First that neither
station would be changing format,and that the three stations
eventually would share one area in the Rand Building downtown
(WECK is the only one that isn't downtown,with its studios and
xmtr at 2900 Genesee in Cheektowaga). It would create the area's
fourth duopoly(joining Keymarket's WBEN/WMJQ and WWKB/WKSE,as well
as Pyramid's WHTT-AM/FM and WBUF-FM;Rich Communications' deal to
acquire WWWS-AM and WUFX-FM in addition to WGR/WGRF is pending)as
well as ARS' second in the state(Rochester's WCMF-AM/FM & WRMM-FM).
It owns two stations in Binghamton,but they can't buy others due
to the fact that they have a 33% share combined.(BTW,Business First's
reporters contribute to WGRZ-TV(ch.2)'s Thursday 6pm news.)

*John Otto,who was forced out as WGR's late-night talker,has
returned as its movie critic. He'll review movies for Tom Bauerle's
morning show on Wed.

*Lou St.James,morning news anchor for the Wake Up Club,has been
let go from that post after 10 years,but is still there part time.

*Terrence Rodda is the new GM at WWKB-AM(talk/sports;The Big 1520)
and its sister station,WKSE-FM(dance-based CHR;Kiss 98.5). He has
been in radio 23 years.

*In reference to Randee Mann's post in ARJ600:Bob Richards,who was
PD at WUFX-FM,has left to take over the same duties at KBPI(106.7 FM).

1433. San Diego Radio Watch

Newsgroup: rec.radio.broadcasting
Date: 1994-04-30 03:19:59 UTC
From: Chris.Carmichael@artecon.com
Message-ID: <2psiov$np1@vixen.cso.uiuc.edu>
Source record: 40272

Here's the buzz:

KMPC-AM 710 days as a sport station will officially end on Sunday. The last morning show of Charlie Tuna, Marv Howard, Scott St. James and Jill Plum went out on a very professional note. Since the Tuna-crew started six months ago, the ratings in the morning have doubled, but not enough to catch the eye of Capital Cities/ABC. It is unclear where Charlie Tuna will show up next; but he still does a daily Armed Forces Radio show; and voice over for telev -- opps, radio with pictures.

With the change, KMPC is trying to unload their sports lineup of baseball, football, and basketball. UCLA is talking with XETRA-AM (690, 50kw, U) of Tijuana/San Diego to carry their program.

KMPC has been airing promos for their new lineup, and advertising for talk-show hosts. On Monday, they will have an "on-air" audition.

Back to Tuna, his last guest on KMPC was Maureen McCormick. The former Brady Bunch girl debut her Nashville produced record.

So long Charlie, I'll stay "Tuna-d!"

In San Diego, KCLX-FM (102.9) has the syndicated show of Mark and Brian. The problem is, that the shows ratings have dropped faster than the duos Friday bunge jump from an MTV balloon. The show was recently dropped by the Las Vegas, affiliate. Mark and Brian were in Temacula, California, for the annual wine and balloon festival. They received keys to the city, and did an on-air jump from the balloon.

KOGO-AM (600 5kw) debut into "Hot Talk" happenend on Monday, April 25. The first show was Imus in the Morning. The afternoon drivetime of Dave Dawson, a former KSDO (AM 1130) is perfect for this moderately right-wing county. Dawson goes against KSDO's Roger Hedgecock.

KIOZ (102.1 FM, Oceanside, 10kw) has starred airing "Highest Degree: College Music and Life." It's an one-hour and interview show hosted by college student Al Guerra. It airs -- in a coincidence -- during the mandantory "Mexican National Hour," on Sunday at 9 p.m. That's when XETRA-FM (91.1 100kw) and XHRM-FM (92.5, 50kw), based in Tijuana, Baja Mexico, broadcast the Spanish language show.

that's it from north San Diego County! If you would like a radio log, e-mail me, and I'll gladly send one back. The host I'm on will not allow a "finger" from outside the local LAN. E-mail: chris.carmichael@artecon.com

Thanks!

1434. Buffalo winter Arbitrons

Newsgroup: rec.radio.broadcasting
Date: 1994-04-30 03:20:00 UTC
From: ag365@freenet.buffalo.edu
Message-ID: <2psip0$np3@vixen.cso.uiuc.edu>
Source record: 40274

Here are the winter '94 Arbitrons,as sent to me by Tom Schuh,
PD at WHTT-AM/FM. Unfortunately,only the top 10 are listed. When
Billboard puts their list up,I'll post it as well. Enjoy!

Stn./freq. Format/postitioner W94 F93 +/-
---
1 WYRK(106.5) Country 11.0 9.7 +1.3
2 WBEN(930) News/talk/Bills(NewsTalk 930) 9.7 9.9 - .2
3 WJYE(96.1) A/C 9.2 8.2 +1.0
4 WGR(550) News/talk/sports(NewsRadio 55) 7.3 7.7 + .4
5 WHTT-A/F* Oldies(Oldies 104) 6.9 7.0 - .1
6 WKSE(98.5) Dance-based CHR(Kiss 98.5) 5.9 6.5 - .6
7 WUFX(103.3) Album rock(103.3 the Fox) 5.4 4.8 + .6
8 WBLK(93.7) Urban contemporary 5.1 7.1 -2.0
9 WMJQ(102.5) Hot A/C(Q102) 4.8 5.2 - .4
10 WGRF(96.9) Classic rock(97 Rock) 4.7 5.8 - .9

According to Tony Violanti's column in today's Gusto section
of the Buffalo News,there may be a format change in the offing for
'GRF(how about ARROW,since that's they seem to play most of the
time anyway...:)).

1435. Re: The best of Chicago

Newsgroup: rec.radio.broadcasting
Date: 1994-04-30 03:20:06 UTC
From: paulm@merle.acns.nwu.edu
Message-ID: <2psip6$npt@vixen.cso.uiuc.edu>
Source record: 40275

> I'm going to be paying Chicago a visit in the next 10 days. During my
>downtime I'd like to explore the radio dial a bit.
> My transistor has 9 presets for AM and 9 for FM. Help me set them in
>advance, folks!

> Any suggestion will be appreciated! Best news, best talker, best CHR, best
>AOR, best oldies, best urban contemporary, best blues, best classical, best
>quirky, best morning team, anything I just shouldn't miss?

>Dallas in Colorado Springs

Dallas:

This should get you started:

Best news - WBBM, AM 780 (oldest news station; weather/traffic on the eights)
WMAQ, AM 670 (upstart competitor, weather/traffic on the ones)

Best talker - WGN, AM 720 (upper demographic appeal)
WLS, AM 890 or FM 94.7 (variety, including Rush)

Best CHR - strange town it is, with no straight-ahead CHR, only flavors
WBBM, FM 96.3 (dance CHR - "Party Radio")
WPNT, FM 100.3 (slightly less exciting than adult CHR)

Best AOR - WLUP, FM 97.9

Best oldies - WMGK, FM 104.3 (I think that's the right dial position)

Best UC - WGCI, FM 107.7
FM 102.7, though, is an urban AC, and is more unique (hits &
dusties)

Best NAC - WNUA, FM 95.5 (billed as "smooth jazz")

Give John Brandmeier a listen on WLUP, FM 97.9 weekday afternoons - he's
been around a while, and though I haven't listened in a while due to my
schedule, you might enjoy...

Enjoy your stay!

Source record: 40277

(GDallas) writes:

> My transistor has 9 presets for AM and 9 for FM. Help me set them in
>advance, folks!

No doubt you've already received responses to this, but here are
some suggestions:

WBBM (780) is the best news station in town. WLS (890/94.7) is
the top talker in town. WNUA (95.5) is the best "lite jazz-light
urban' station. WNIB (97.1) is a nice classical station which
features old-time radio on Saturday afternoons (do not miss this!),
and is far less snooty that the top classical station here, WFMT (98.7).
WBEZ (91.5) is the local public radio station. WLUP (97.9) is the
comedy/talk/rock station that's more of a shell of its former self
than when it was at its best.

For rock/alternative/modern music, nobody beats WXRT (93.1).
The sole country station in the market is WUSN (99.1). We
have about fifty (it seems, at least :-) stations that play
the middle of the road stuff, so Michael Bolton will be an easy find□,
if that's what you're into.

In the morning, I listen to WBBM as I'm getting ready for work. During
the day, I listen mostly to WXRT and WNUA, and at night it's any of
a number of stations.

If you are actually staying in the suburbs, there are many stations
that are out there that don't reach into the city that are very good.
Let me know where you'll be staying, and I can offer more suggestions.

Good luck!

The last I heard, Lassiter was out of broadcasting entirely...selling real estate or something like that. He has done some fill-in stuff at WOC in Davenport in the past...but that's the last I heard from him. It's a shame... he really was great!

He's on 620 WSUN, the Cox-owned talk station in Tampa-St. Petersburg, where he does afternoon drive; Ron and Ron now originate their regionally syndicated morning show there, and WIOD's Neil Rogers is simulcast middays...

Lassiter is doing afternoons at WSUN St Petersburg/Tampa. He returned a little over a year ago for mornings, then went to afternoons when Ron & Ron came to WSUN. The rest of the day is simulcast with co-owned WIOD/Miami.

Radio news week of 4/25/94

The winter ratings are in and here are the top 21 stations. These
numbers are for listeners age 12 and up.

RANK STATION/FREQ/FORMAT WINTER 1994 FALL 1993

1 WPGC/FM 95.5/URBAN 9.1 10.1
2 WMZQ/FM 98.7/COUNTRY 6.1 5.9
3 WGAY/FM 99.5/EASY AC 5.2 4.4
4 WMAL/AM 630/LOCAL TALK 4.8 4.8
5 WHUR/FM 96.3/URBAN 4.7 4.5
6 WJFK/FM 106.7/TALK/STERN/DON & MIKE/GREASEMAN
/LIDDY/JAZZ WKNDS 4.4 4.5
7 WRQX/FM 107.3/AC MIX 4.3 5.1
8 WGMS/FM 103.5/CLASSICAL 4.0 3.1
TIE WKYS/FM 93.9/URBAN 4.0 4.4
9 WASH/FM 97.1/AC 3.7 2.4
TIE WHFS/FM 99.1/ALTERNATIVE ROCK 3.7 3.7
TIE WMMJ/FM 102.3/URBAN AC 3.7 4.1
10 WTOP/AM 1500/NEWS 3.4 2.5
11 WBIG/FM 100.3/OLDIES 2.7 4.2
12 WWDC/FM 101.1/ROCK 2.6 3.1
13 WOL /AM 1450/LOCAL TALK 2.5 1.0
14 WARW/FM 94.7/OLDIES (ARROw) 2.0 2.2
TIE WXTR/FM 104.1/OLDIES 2.0 2.2
15 WCXR/FM 105.9/CLASSIC ROCK 1.9 1.9
16 WWRC/AM 980/LOCAL & NET. TALK 1.3 1.1
17 WTEM/AM 570/SPORTS+REDSKINS 1.2 1.0

The way I see this book there are four big stories. The first is
the Don & Mike afternoon ratings on WJFK. Although 'JFK as a whole
held firm with a respectable 4.4, D & M's ratings are huge. Don
read them on the air the other day and I ran a tape on him. In
most of what follows I have no raw numbers, usually just rankings.

MEN & WOMEN 18-34: #3 MEN 18-49: #1
MEN & WOMEN 18-49: #2 MEN 25-34: #1
MEN & WOMEN 25-34: #2 MEN 25-44: #1
MEN & WOMEN 25-44: #1 MEN 25-49: #1
MEN & WOMEN 25-49: #1 MEN 25-54: #1
MEN & WOMEN 35-44: #1 MEN 35-44: #1
MEN & WOMEN 18-34: #1 MEN 18+: #1

Huge numbers for a very unique radio show. Don also mentioned two
Baltimore numbers and they follow.

MEN 25-54: #5 with a 2.5 (up from last books 1.7).
MEN 18-34: 4.5 (up from a 1.9)

Congratulations Don & Mike and crew on a great book!

The other stories in this book include a fall for WBIG FM 100.3. The oldies station, which is almost a year old, had a big drop in this book. Here's what the station has done over the past 5 books.

WINTER '93: 3.0 [as WJZE a Contemporary Jazz format]
SPRING '93: 2.4 [Jazz format during part of this book]
SUMMER '93: 3.7 (Tied for 9th place overall)
FALL '93: 4.2 (9th place overall)
WINTER '94: 2.7 (11th place overall)

Don't get me wrong, a 2.7 and 11th place in this market is very respectable. It's just that with all the hoopla in this city over the format change from a well supported Contemporary Jazz format to Oldies, one would expect bigger numbers. Especially when you consider all the TV ads which are still running heavily on all the TV stations. I guess I still miss that Contemporary Jazz station.

WARW, ARROw 94.7 FM, went through it's first book with its All Rock & Roll Oldies format and came out of it with a 2.0. When CBS decided to do away with the WLTT call letters and its Lite Rock/ Less Talk format, the listeners went to WGAY and WASH for their Lite Rock fix. Obviously, one book doesn't make a format. But, this is one station that I do ear everywhere I go. I know most of my friends are listening to it too. It will be interesting to see how many listeners this format will take away from WCXR FM 105.9. 'CXR is playing, for the most part, the same music as WARW. Only WCXR is using a Classic Rock moniker.

And speaking of WCXR, as you can see above they've had yet another disappointing book. Here's how they've done over the past 5 books.

WINTER '93: 2.1
SPRING '93: 2.6
SUMMER '93: 2.5
FALL '93: 1.9
WINTER '94: 1.9

Time will tell if WCXR's owners, Viacom, will be willing to continue with the Classic Rock format. May I suggest a Contemporary Jazz format? :-)

As always any opinions expressed are mine, not the Federal Governments's.

1444. remote start for Technics SL-PG440 ???

Newsgroup: rec.radio.broadcasting
Date: 1994-04-30 03:20:28 UTC
From: UCSKJM@uwplatt.edu
Message-ID: <2psips$nrf@vixen.cso.uiuc.edu>
Source record: 40284

I am trying to make some Technics SL-PG440 CD players
remote start for a radio station aplication. The methods I am
using is to just parallel some wires off of the <PLAY> switch
on the front panel. When I simply momentarily short the wires
the CD player starts and nothing is wrong.

However when I try to connect this to the remote start
function of the audio board, it locks up all of the front panel
controls that are on the same column of the scanning matrix
of the front panel controls. The start module simply provies
a "contact closure" using a transistor. I thought that this
might be the problem so I isolated the board by having the
board provide the switching signal to a HAMLIN reed relay and
the same problem still exsists. Does anyone have any ideas????

Please mail replies and I will post a summary if there
is interest. Thanks!!!

1445. radioprep mailing list ready!

Newsgroup: rec.radio.broadcasting
Date: 1994-04-30 03:20:29 UTC
From: Norm Gregory <normg@halcyon.com>
Message-ID: <2psipt$nrh@vixen.cso.uiuc.edu>
Source record: 40285

I have introduced the next step in my Internet show prep service. The radioprep mailing list. It's aimed at those air personalities whose target audience is 25+.

It's simple and it's potiential is great.

And how much does it cost you to add this feature to your current online status? NOTHING! I've set it up . . . and we all use it!

To subscribe to Norm Gregory's radioprep mailing list sent a message to:

majordomo@halcyon.com

(the "Subject:" line is ignored.)

In message text put this single line:

subscribe radioprep

That's it!

You then should be notified, via return email, of being added to the radioprep list.

When you want to post to the list send mail to:

radioprep@halcyon.com

When you do everyone on the list will see your message.

I think this is going to be very useful and fun.

Thanks..

****
NEW STATION ON AIR
KWIC (99.3, A) Topeka on-air this week. Topeka media reported planned format as mixed all-news and gospel; signal has not been heard in Kansas City area so far. Owner is former KTRH Houston programming employee Margaret Escriva. (4/21/94)
++++
MORE ON KWIC (New station in Topeka, Kansas)
I heard this station yesterday while in Lawrence. Apparently it is "all news some of the time." "Quick 99.3" promotes "Quick News" beginning at 6 am Monday through Saturday but this news block apparently does not last all day. This weekend, the station was relaying the same satellite service as KSAJ Salina, Kansas (I believe it's "The Oldies Channel" -- someone with better info on satellite services, feel free to e-mail me with more info). Other slogans were "Topeka's News and Sports Leader" and "Topeka Talks to Topeka on Quick 99.3." (4/24/94)
++++
CONFIRMATION OF KXOK'S SILENCE
Legacy St. Louis station KXOK (630, 5 kW, DA-2) is indeed off the air, as I reported in AIRWAVES April 8. The St. Louis Journalism Review confirmed that KXOK left the air upon its sale to gospel broadcaster Crawford Communications. The SJR also reported that Crawford has bought nearby gospel/polka station KSTL (690, 1 kW, ND, daytimer) for $525,000. (4/24/94)
++++
QUOTE OF THE YEAR
From former KTVI (Channel 2, St. Louis) news director Ian MacBryde, in the SJR:
"The airwaves seem to be full of mean-spirited people, critical, confrontational, carping, some of them funny, some of them merely ridiculous, some of them with a point to make and some without." (4/24/94)
++++
IS THERE AN ECHO IN HERE?
No, but if you're listening to KLRQ (96.1, Clinton, MO), you *will* hear...REVERB!
Because of our recent heavy rains, FM reception has been better than usual and KLRQ has been able occasionally to make it through the cross-modulation noise that afflicts central Kansas City. While listening last night, I noted REVERB under the announcer's mike! KCMO-FM has had it for five years, but it is an oldies station. KLRQ appears (at least at night) to be sort of an adult-alternative station. (4/28/94)
++++

LONGTIME NEWSCASTER RETIRES
In St. Louis, radio news veteran Gene Hirsch has announced
his retirement.
During his entire time in St. Louis (34 years), Hirsch has been
the news director of WIL. Hirsch started at WIL when it was a
rock-and-roll station at 1430. He stayed through the station during
its switch to country and its later move to WIL-FM (92.3). The AM
is presently WRTH (nostalgia).
(Some information on Hirsch from the St. Louis Journalism Review)
(4/28/94)
++++
UNCOMPROMISING TALK-SHOW HOST FEATURED
The PITCH WEEKLY alternative newspaper in Kansas City features
KKFI (90.1) talk-show host Shiriki Unganisha in its current issue.
Unganisha's show airs Sundays from midnight to 5 a.m. According
to the newspaper, she refers to racist whites as "crackers" and
"cave-dwellers," and refers to less militant African-Americans as
"lip-tremblers" and "sellouts." The newspaper also says she often
refers to the United States as "Amer-Klan."
Unganisha also is critical of black-oriented media, as noted in this
quote from the newspaper:
> She notes that some black media outlets are not only <
> lacking in coverage of black issues, but in coverage <
> of ANY issues. "There's no news given on the Negro <
> stations, none, zilch," Shiriki says. "All they get <
> is 'Flip you baby, lick you up and down,' that's it. <
(Of course, the same criticism can be levelled against MOST radio
stations, regardless of the audience they're targeting.)
Also reported in the article: Unganisha is also an opponent
of gun control, complains that prisons "perpetuate homosexuality"
(her words), and refers to President Clinton as "Bubba Bush." (4/28/94)

(KHTK-AM 1140) 1.5 1.8 -0.3 Talk/Sports/Imus *KRAK/KNCI

(Ratings info courtesy of Dan Vierria's Broadcasting column, Sacramento Bee, 4/30/94)

Notes -

* "Arrow 108" was AC-formatted XTRA 107.9 for all but a few days of the survey. They are currently airing the "Arrow" rock-oldies format.

* The proposed sale of KHYL-FM 101.1 (Cool 101) to the owners of KFBK/KGBY was announced this past month.

* KHTK has been talk since just before the survey began... they were a traditional country format station as KRAK-AM until then. They still run the "Interstate Trucker's Network" (country/truckers info) in overnights.

* KFBK had the NBA's Sacramento Kings broadcast rights through this season, which just ended in April. KHTK picks up the Kings starting next season.

* KCTC is the local rights holder to the Oakland A's broadcasts. KSMJ-AM 1380 (urban, not listed above) broadcasts the San Francisco Giants. KFBK holds rights to the CFL Sacramento Gold Miners football team and also broadcasts Sacramento State (California State University, Sacramento) baseball and basketball.

Among others not listed above are KSAC-AM 1240 (sports), KFIA-AM 710 (religious), KEBR-AM/FM (religious), KRCX-AM 1110 (Spanish), KXOA-AM 1470 (oldies, not simulcast with KXOA-FM), and KRFD-FM 99.9 (recently changed to Spanish from alternative rock... it is now simulcasting KRCX-AM).

Message-ID: <2q0p6h$12r@vixen.cso.uiuc.edu>
Source record: 40204

While I'm waiting for the ratings to come out,here's some stuff for ya:

*John Otto,relieved of his duties as WGR's late-night talker last October,has resurfaced as the station's movie critic. He'll be reviewing movies during its morning show,Breakfast with (Tom) Bauerle. He replaces Michael Calleri,who continues his duties as WIVB-TV's movie critic,and for Rama Publishing's papers(Metro Community News,Metro Weekend,and City Edition).

*Lou St.James,the news reader on WBLK's Wake Up Club,has been dropped from the show after 10 years,but is still there as a part timer.(BTW,to add to what Steve Sobol noted about WZJM in Cleveland, this station-though geared to blacks via its urban contemporary format-is owned by whites.)

*WECK-AM(1230;1 kW-U;MOR/Canisius Coll.sports)and WJYE-FM(96.1; 50 kW;A/C)have been sold to Boston,Mass.based American Radio Systems;price is unknown. ARS' co-COO,David Pearlman was quoted in the April 20th Buffalo News business section as noting that both stations have enjoyed success with their respective formats. If tyhe FCC OKs the sale,it would make for 4 duopolies in Buffalo:Keymarket's WBEN-AM/WMJQ-FM and WWKB-AM/WKSE-FM,Pyramid's WHTT-AM/FM and WBUF-FM are already confirmed,while Rich Communications(owners of WGR-AM & WGRF-FM)is waiting for FCC approval to buy WWWS-AM/WUFX-FM. Using the Fall '93 12+ Arbitrons,ARS would have 23% of the listening audience.

*WLVL(1340;1 kW-U;DA-D;oldies/talk)has recently added two nationally syndicated talk shows to its lineup:Mutual's "Pat Buchanan & Co." from 1-3pm weekdays(which has Pat co-hosting with a rotating panel of guests from the left(or what passes for it these days))and Major Talk's Alan Colmes from 3-4pm Tues.-Fri. (not on Mon.due to Dial a Deal Plus,a swap shop show).

*In reference to Mark Roberts' note about Crawford acquiring another station,it's known as Crawford Broadcasting,not Communications. They own WDCX(Buffalo,99.5;110 kW);WDCZ(Webster,1.5 kW,102.7)and WDCW(1390 AM;5 kW-U;DA-N,Syracuse)in this state alone, as well as 6 others-and I don't need to tell you what they program.

*The Buffalo Common Council Radio Access Committee recently released a scathing report on the state of area radio stations in regards to local music,with virtually all the stations getting their lumps. WBNY-FM(91.3,100 W;alternative)and WBFO-FM(88.7,24 kW-with Olean's WOLN-FM;91.3 FM at 115 W and Jamestown's WUBJ at 88.1,

operating at 265 W;jazz/news),however,were awarded for being the stations that devoted time to local music. Today's(4/22)Gusto section in the News had a cover story regarding this-I'll ber getting to it soon.

bruces8852@aol.com wrote:
> The Radio Hall of Fame has announced nominations....

I note what appears to be an East Coast bias in those nominations. No room for some of the many radio people on *our* coast who did so much in/for the radio business, to wit:

Casey Kasem, Wolfman Jack, Tom Leykis, Michael Jackson, Wink Martindale, Jim Dunbar, Les Crane, Al Jazzbeau Collins, Robert W Morgan, Alex Bennett, Marilyn Pittman, Bill Drake/Gene Chenault, and even Herb Jepko.

Each and every one of these was an innovator in some form of radio, and many on this list have been heard nationwide, not just in their markets. In the case of Leykis, Jackson, Dunbar, and Crane, these were all talk radio innovators. Jazzbeau, Kasem, Wolfman, Wink, and Morgan did a unique kind of DJ work. Bennett and Pittman have brought good comedy and live studio audiences to morning drive radio. Drake/Chenault made radio a driving force in the 1960s and their mark is still felt today. And Jepko had the first nationwide talkshow (and certainly a unique one).

>Huntington, IN.

There may not be any connection -- other than ownership -- between the two.
A lot of FMs turned in their tickets in the late 40s and all through the 50s,
especially AM simulcasters; the latter often found themselves buying FMs later.
One example is WHAS in Louisville, one of the 1-A clears; they had an old-band
CP (never activated commercially, so it wouldn't have been on Mark's list) which
they brought up in early 1946 on 99.7. This was shut down around 1950. Another
group started WLVL on 97.5 around 1960; they had financial difficulties and
were bought out by WHAS in the mid-1960s. 99.7 was reactivated by then-WKLO in
the early 60s as a simulcast.

Perhaps I should have been a bit clearer. The modulation in FM will cause the frequency to deviate above and below the center frequency by a certain amount. In our case, it was the center frequency itself that was changing.

1457. KMPC

Newsgroup: rec.radio.broadcasting
Date: 1994-05-01 17:34:33 UTC
From: lancebkost@aol.com
Message-ID: <2q0p79$170@vixen.cso.uiuc.edu>
Source record: 40211

From: Lance Ballance (lancebkost@aol.com)
Subject:RadioWatchers - Los Angeles/KMPCABCLOS

Well, It's official.
Cap Cities has given Gene Autry $17 million for KMPC (710)
and will take over the station in an LMA on May 1st until the
sale goes thru the FCC. Sister Station KLIT (101.9/K-Lite) is not effected by
the sale. Speculation is that KMPC will be moved
into the shiny new studios of KABC & KLOS by May 1.

Interestingly, KMPC will continue to run California Angels
baseball for the time being, effectively giving Cap Cities a monopoly
on Major League Baseball in L.A. Yes, the Angels are still owned
by The Cowboy, so that will be a situation to watch for a awhile.

For the longest time, everyone thought that KLIT would be the first
station to go in the KMPC/KLIT combo up for sale. The 101.9 FM dial position
has been a ghost town in L.A. for a long time. It's last real success was
when it was KUTE-FM many years ago. The big problem there is with the stick.
I know that you're saying "But it's an L.A. FM!" L.A. is a BIG place. KLIT is
up on Mount Wilson along with every other station in town, but while the
other stations are up to 12.5 KW, 100KW, or 66KW (all examples) KLIT has a
whopping 640 watts coming out of the transmitter building! ERP= Not enough.
Out east the signal is fine, (Pomona, etc.) But in the San Fernando Valley it
ain't so great. There is also a station at 102.1 in Oceanside (San Diego
County) that is right where most L.A. FM's still sound somewhat coherent. And
on top of that, There is a 101.7 in Big Bear City. (In The Same Mountains as
Mount Wilson) KLIT has a decent enough signal if you never tune away, but if
you are on the fringes, Don't hit that seek button and expect to land there.
(By the way, NOBODY never tunes out of K-Lite. They're all listening to me.)

Submitted for the approval of no one......

I read in today's LA Times (4-30-94) that Tom will be broadcasting from Westwood One's studio in Hollywood. He also does a syndicated show from there. Yes it will be very interesting to see how he does vis-a-vis KFI.

It is also interesting Cap Cities is setting up KMPC to compete with KABC. They claim that KMPC will be "Young Talk" and not compete directly with KABC....should be interesting!

: (Nitpicking alert) Cap Cities/ABC are the new owners of KMPC
: and also the owners of KABC.

I think you make an excellent point, and something which needs to be stressed. KABC will be at the same level as KMPC -- a competitor. In the case of ABC-owned KGO (in SF) versus KABC, there is a fierce competition, so much so that when KGO needs a feed about things such as LA quakes, fires, riots, or mudslides, they call on KFWB, *not* KABC, with whom they have no relations at all, even though they're ultimately owned by the same company. But because they compete at night (KGO has a big LA audience), it appears that KGO would rather deal with Group W instead. Who knows what will happen now that Group W's been cleared to purchase KKHI here, which will do a news format. I guess KGO will have to go shopping for another feed, but I doubt it'd be KABC. Maybe it'll be KFI?

How about a little earlier? WISH became WIFE, and overnight AM radio was
the talk of the town as the new station gave away thousands of dollars
worth of prizes, announcing phone numbers and if yours was called you had
ten minutes to call in and claim your prize. A new number every hour for
a month or more, and EVERYBODY listened. Some of the jocks then were Reb
Porter, Jay Reynolds, Ron Hofer, Joe Light, Barney Pip for a while (by
the way, he was killed in an auto accident a couple of weeks ago).
Anybody else remember and cherish those days?

FYI, the call letters WIFE now belong to an AM country radio station in
Connersville, IN. They are simulcasting the FM (WCNB) and have been
planning for some time to swap the AM/FM calls. You can imagine there
are a lot of cool jingles you could come up with for WIFE.

"Listen to your WIFE"

is one of the best I've heard in a while.

They may pay outright, but usually such local relay agreements are
reciprocal. Station B relays locally for the target audience of Station A,
while Station A relays locally for the target audience of Station B.

For instance, NHK and CBC (Radio Canada), BBC and Radio Canada, etc. etc.

Hello

I have noted a few changes in my market....
**WBUF 92.9: Just today I noticed that they are now calling themselves "The All New B-93". The format does not really seem all that different though ,although I don't listen to them a whole lot. Maybe they are slightly more upbeat. They brag about playing the "best music from the 70s, 80s, and 90s" (but who doesn't nowadays :)), but almost every song I have heard has been from the 80s or 90s. They sound similar to WMJQ 102.5, a little lighter I guess. I was hoping a format change there would have been a little more innovative, more than just changing the name and pretending like it is a new station!

**WKSE 98.5: They have modified their format somewhat. They are a top 40 station, dance oriented. A promo I heard now brags that they play "alternative freestyle, and pop, and hip hop". I would say maybe 40% or so alternative, although so far the alternative has been "safe", Pearl Jam, Counting Crows, etc It reminds me a bit of the fomrat at the old WKZW 93.3 Peoria. The playlist sounds awfully small by how much repitition I have heard, but hopefully that will change. They still have their "Post Modern Sunday" program Sunday evenings at 9pm, which is excellent, IMHO

This has nothing to do with Buffalo radio, but I noted two changes during an FM E-skip opening heard here on Saturday....

WJDB Thomasville, Alabama, has moved from 95.3 to 95.5
KLRZ Larose, La. is on the air with hard rock/rock 40 type music, "Z100"
This is not too far from N.Orleans, SW of there near Houma.

Also, withthe GUlf States in, I heard a 98.7 with urban music "98 Jams"
Anyone know who this might be? Thanks!

I enjoy the programming on KLBJ, in the Spring and Fall, I often find myself listening to KLBJ-FM, since it is more enjoyable than listening to KTXQ which gets stuck in a rut. I like the fact that KLBJ-FM will play some Blues and Jazz in their format ; which makes it more like what I consider good progressive radio. I find it a shame when a Rock version gets played and never a trace of the original by the great Texas Bluesman/s who created the songs.
I also enjoy KUT (FM) which is superior in programming to KERA-FM which seems to forget that there can be more to radio than being a Jukebox.
I was wondering does KLBJ-FM recieve very many DX Reports?

WFMT has been mentioned several times in this run down of Chicago radio for Dallas as a classical (if not THE classical) music station. One of the things that has made WFMT truely great over the years has been its willingness to air The Studs Terkle Show and Satruday night's Midnight Special - (three hours of folk music, farce, show-tunes and satire).

It's been a long time since I was in Chicago but I sure hope these two wonderful programs still grace the airwaves. If so they should not be missed.

Scott,

The CRTC (Canadian equivalent of the FCC (sort of!) has been doing demonstrations/tests of digital radio for over a year. I work for a CHUM-owned station in Montreal, CHOM-FM, and we got a digital van demonstration about 18 months ago. It was live. The signal was converted to digital transmission through some kind of repeater. They set it up to demonstrate every station on the band.

BTW, I believe that CHUM Ltd. here in Canada has committed itself to beginning digital radio broadcasting in its major market stations by 1995. I know that at CHOM we're already gearing up to go digital.

>of the Chief Engineers involved. (actually probably from the Chief of WQXR,
>since they are owned by the _TIMES_.)
>
Probably from 'Doc' Massoomian, who was the chief back then. Retired
now, I think, and one of the old-time 'gentlemen' of the business.

Another interesting tidbit in the saga of the ESB master was a system
hit that took everyone down >except< for a well-known urban-contemp.
station whose CE was forced under PD direction to bypass the interlock
circuit. Nasty, when the riggers showed up to take a look at the
array and found it was still active...but, then, you could still hear
the backbeat in the coax lines...:)

The ESB master antenna system is a marvel of cooperation and engineering
(two words that don't often go together, especially in NY...) skill.

In article <2p7jck$4l9@vixen.cso.uiuc.edu>, thompson@csulb.edu (Ron Thompson) writes:

"can anyone give...an opinion of the Fairness Doctrine?"

There are those of us in the talk radio field who are motivated to use words we can't say on the air with regard to the Fairness Doctrine. It gives government potential power to intimidate stations who are thinking about airing programs and hiring hosts who question the wisdom of government policy or the integrity of government officials...all necessary elements in free political discourse.
Having said that, I think broadcasters have brought on a lot of the clamor for reinstatement of the doctrine themselves. Talk stations, the probable target of such legislation, have tended overwhelmingly to tilt far to the right politically, and exclude discussion of any alternate view of the world. You would never know, listening to some stations, that George Bush got only 37% of the vote in 1992---the conservative view gets about 80% of the vote from talk radio hosts and their often very carefully screened callers. This has caused two things. One, the more moderate majority that feels left out, has complained to everyone from station managers to members of Congress that their voice is not being heard. (And Congress is receptive because, having been elected by a more moderate majority, it tends to be more moderate itself, and stings from the hardballs thrown at it from the deep right field of talk radio.) And two, the stations that program talk, which were growing rapidly through about the end of 1992, are watching their audience and revenue growth stall out and even backslide. Is it any accident that ALL of the stations carrying Rush Limbaugh in the top 10 markets in this country are down in the winter Arbitrends? Is it any coincidence that Rush's cume has dropped significantly nationwide, and using my own market as an example, he's lost a third of his AQH listenership (and whatever local cash advertising billing he had left) in the last 9 months here in Rochester, NY, a top 50 market of over 1.1 million people? I think not...

Bob Smith, midday talk host WXXI/1370 Rochester, NY

>another feed, but I doubt it'd be KABC. Maybe it'll be KFI?

IMHO, that's not _quite_ the reason KGO always turns to KFWB for reports from Los Angeles. (1) KFWB is an all-news station, affiliated with the ABC Entertainment Network (nonetheless, still ABC). (2) KABC is affiliated with ABC's Infomation network, as is KGO, but have you ever heard the local news on KABC? Just AP wire read every half hour during drive time. No field reporters. Just an anchor. That's whay KABC is TALKRADIO, whereas KGO is NEWS/TALK radio.

Having lived in Los Angeles for three years, I've noticed that often times when news is breaking in Los Angeles, and ABC's own reporter (Jane Platt) isn't "on the scene" or whatever, they'll have a reporter from KFWB file a report for the ABC News Networks. It's really funny to hear a KFWB reporter doing a story on an ABC News Newscast on KABC.

You do bring up a good point, David, about what might happen when Group W starts up KKHI with news. I seriously doubt group W would continue feeding reports to a competitor, but they already do that is Los Angeles.

With the coming of nice weather again, I've had the chance to do
a bit of radio-traveling...including Cape Cod and Eastern Connecticut.
Here are some of the highlights...and as always, everything is
meticulously logged on audiotape (airchecks) and videotapes
(studio buildings and towers)...

CAPE COD: This was a one-day expedition with a few other radio
buddies...on what proved to be a VERY rainy Sunday. The trip
began at W221AG, 92.1 FM in Wareham, a translator owned by one
of the day-trippers. We drove the entire (5 mile or so) signal
contour of W221AG, and then moved on to the Cape itself. We began
in Falmouth, where 101.9 WCIB has abandoned its short-lived
"Thunder 101.9" satellite-country format and returned to
satellite AC "Lite 101.9" WCIB's transmitter is right behind the
studios, in a small Cape-style wood-shingled house. We never found
the WFAL-101.1 transmitter. WFAL was purchased by WFXR-93.5
Harwich a couple of years ago, and the two stations simulcast
a hot country format off the satellite. WFAL gets its signal
over-the-air from WFXR, about 35 miles away, and it sounds awful --
plagued by adjacent-channel interference from WSNE 93.3 Taunton-
Providence. A real mess. From Falmouth, we went north again to
Sandwich High School, where we found the first of three small
noncomm stations that are now part-time relays of WBUR 90.9 Boston.
WSDH-91.5 Sandwich does local programming only for a few hours
after school. Of the other two, WKKL-90.7 at Cape Cod Community College
in West Barnstable was doing local rock almost all day, with a very
clean, well-processed signal. WCCT-90.3 at Cape Cod Vocational
Technical High School in Harwich apparently never does local
programming, just relaying WBUR. Among the 3 stations, WBUR gets
pretty good coverage of the Cape.

Transmitters for WPXC-102.9 Hyannis and WQRC-99.9 Barnstable, as well as the dark WCVX-TV 58, are on a tower just of Route 6 in West Barnstable, the second-highest tower on the Cape. WPXC, classic-rock "Pixy," is part of a duopoly now with WRZE-96.3 Nantucket, CHR "96-3 The Rose." Both are in a modern building in Hyannis. WRZE's STL is on a tallish tower just down the street...aiming some 30 miles out into the ocean at WRZE's transmitter on Nantucket Island. WQRC, a soft rock station, was notable for its local news committment...a full local live newscast every hour on Sunday afternoon! And WCVX-TV will soon be back on the air, relaying WABU-TV 68 Boston.

Also in Hyannis are the studios for WCOD-FM 106.1, playing soft rock, and their newly purchased WFAL/WFXR combo. WCOD's transmitter is the tallest tower on the Cape, in North Dennis on Hokum Rock Road. This tower also has W08CH, a translator for WGBH-TV 2 Boston.

We found the former studios for WATB-FM 103.9, the relatively new station co-owned with WATD-FM 95.9 Marshfield MA. The studios had a bankruptcy notice on them...it seems the people who had been LMA'ing WATB as oldies "B104" went bust. We never found the WATB transmitter...but the audio was really bad, a scratchy over-the-air pickup of WATD.

News/talk WXTK-94.9 (in mono) operates from ten bays atop the tower of co-owned WUOK-1240, which broadcasts CNN Headline News with almost no local breaks. The studio is there too...out by the ocean in West Yarmouth.

Out near the "elbow" of Cape Cod, we found the transmitters for country WFXR-93.5 and classical WFCC-107.5...two towers about a quarter-mile from one another down the same dirt road in Brewster. Also in Brewster were the WFCC studios, in a house shared with a real-estate company.

At the very "elbow" sits WKPE AM-1170/FM-104.7 Orleans. Both are completely automated...there was literally nobody there on Sunday afternoon! WKPE-AM, with an incredibly weak signal, is standards. WKPE-FM is "Oldies 104."

Heading out the Lower, or Outer, Cape, we came to the old Marconi site in Wellfleet. This is a must-see...you can see the original footings of the wooden towers. We didn't stay long, because the wind and rain out on the dunes made it hard to stay outside. This is on the list for a return trip in the summer!

Finally, we came to Provincetown, home of community-oriented WOMR-91.9, which was off the air when we found the antenna on the side of the water tower. A visit to the studios, in a house at 14 Center Street, showed us why: there was a sign on the door saying "Transmitter is Broken: We Won't Be Back Today"! We did hear the exciter with a very low-powered dead carrier,

but that was all. WOMR is about to increase power and move to 92.1, a move engineered by co-channel WUMB-91.9 in Boston. WUMB is adding new 91.9's around the state...including the just-on WBPR Worcester, and soon a new CP in Falmouth. The WUMB-WOMR rivalry has been an intense one...but it's apparently been settled.

So, to recap,

THE CAPE COD MARKET LIST:

1170 WKPE Orleans - standards, automated
1240 WUOK W. Yarmouth - CNN Headline News
90.3 WCCT Harwich - // WBUR 90.9
90.7 WKKL W. Barnstable - // WBUR 90.9, also local rock
91.5 WSDH Sandwich - // WBUR 90.9 except weekdays 2-5pm
91.9 WOMR Provincetown - community folk, rock, etc.
92.7 WMVY Tisbury (Martha's Vineyard) - AAA
93.5 WFXR Harwichport - country "Cape Country" (co-owned w/WCOD)
94.9 WXTK W. Yarmouth - talk, including King, Liddy, etc.
96.3 WRZE Nantucket - "96-3 The Rose" CHR (co-owned w/WPXC)
99.9 WQRC Barnstable - soft rock
101.1 WFAL Falmouth - country "Cape Country" // WFXR
101.9 WCIB Falmouth - adult contemporary "Lite 102"
103.9 WATB S. Yarmouth - a.c., rock, talk // WATD Marshfield
104.7 WKPE Orleans - "Oldies 104", automated
106.1 WCOD Hyannis - soft rock
107.5 WFCC Chatham - classical

and on to...

EASTERN CONNECTICUT

The weather this day was much better. On the way down, I heard some of the new 98.9 WXXW "Double-X" in Webster, MA. It's ALL satellite... some talk host named "Zippo" in the morning, followed by Liddy and Don and Mike, then into satellite oldies evenings and weekends. The signal is good for a Class A...I heard them well into Connecticut.

Stopped at WINY-1350 in Putnam, whose studios are right alongside the Quinebaug River in the middle of town. The transmitter is on a hill..a single tower visible from I-395. The 5000-watt daytime signal is very strong and in stereo. The 79 watts at night are good if you can see the tower...other than that it's pretty bad.

In Norwich, I saw the WICH-1310/WCTY-97.7 studios, a well-maintained building just north of the center of town. The three AM sticks are right out back...I never found the FM. Both stations are quite local, with local jocks in place even on Sunday afternoon.

East of Norwich, on a hill in Bozrah, Connecticut, is the Connecticut Public TV/Radio transmitter site...a single tower with WEDN-53 at the

top and WNPR-89.1 just below. The FM bays look old and poorly maintained. The main CPTV link from the studios in Hartford is via microwave...but there's a UHF antenna on the roof of the building that I suppose is used to pull in primary WEDH-24 Hartford if the microwave goes down.

Heading south, I found the transmitter for WTWS-26 New London, on route 85 in Waterford. It's a very tall tower with nothing on it except the TV antenna way up top.

Also in Waterford, on a side road near the Crystal Mall, is WNLC-1510/WTYD-100.9. WTYD is automated soft rock, "The Tide." WNLC was doing baseball, then went into CNN Headline. The WNLC transmitters are there as well...EIGHT towers, six in a row and two more alongside, like this:

x x

x x x x x x

It creates a VERY tight directional east-west, to protect co-channel 50kw WSSH-1510 Boston. I could barely hear WNLC just 15 miles north in Norwich!

I could hear quite a few eastern Long Island stations, including 92.1 WLNG, 101.7 WBAZ, 96.7 WEHM, and 104.7 WBEA. The New York AMs boom in as well.

Newly on the air was 98.7 WXZR East Lyme CT, with a satellite feed of "Z-rock." I never heard a legal ID the whole time I listened. In fact, legal IDs were in short supply...I also heard "illegal" top-hours from WCTY and WTYD (no city of license mentioned on either!)

The market looks like this:

EASTERN CONNECTICUT (NORWICH/NEW LONDON):

980 WSUB Groton - satellite talk, daytimer
1310 WICH Norwich - adult contemporary, Bruce Williams at night
1350 WINY Putnam - adult contemporary, stereo
1510 WNLC New London - CNN Headline, sports
89.1 WNPR Norwich - Conn. Public Radio, classical, news
90.3 WRIU Kingston RI - Univ. of RI, various
91.1 WCNI New London - Connecticut College, various
97.7 WCTY Norwich - country
98.7 WXZR East Lyme - Z-Rock
100.9 WTYD New London - soft rock, "Tide 101"
102.3 WVVE Stonington - satellite oldies, "the Wave"
103.7 WWRX Westerly RI - classic rock, "103-7 WRX"
105.5 WQGN Groton - CHR, "Q-105"
106.5 WBMW Ledyard - soft AC, "The Mix 106.5 WBMW"

Finally...I'm preparing a new list of audio and video airchecks...let me know if you're interested in a copy for trading purposes!

1477. RadioWatch-Buffalo/Toronto(5/3)

Newsgroup: rec.radio.broadcasting
Date: 1994-05-03 22:39:22 UTC
From: ag365@freenet.buffalo.edu
Message-ID: <2q6jqq$t54@vixen.cso.uiuc.edu>
Source record: 40231

Some stuff heard:

*You might recall some time ago when I mentioned that Rogers Communications and MacLean-Hunter would merge and the trouble it would cause for its Toronto stations. It cleared up a bit when Rogers announced on Friday that it would sell CKYC-AM(590,50kW-U, DA-1;country;Country 59)to an arm of Montreal-based Telemedia, worth about $5 million(Cdn.),according to Harvey Enchin's report in Saturday's Toronto Globe & Mail. Telemedia plans to move its sports format on CJCL(1430,50kW-U;The Fan 1430)to the 590 frequency to give it a larger potential audience(as 1430 has a limited range outside T.O.;BTW,I can pick it up in my car,but not my home). The fates of 1430 and CKYC(after the sale-if approved)are unknown. What is known is that Country 59 had been suffering financially after the introduction of CISS-FM(92.5,country;92.5 CISS FM)last year,playing generally the same music.
Don Pagnutti,executive VP of Telemedia,expects a CRTC hearing by early fall and a decision by the end of the year.
Rogers also sold off a station that might have been in its portfolio with the merger,MacLean-Hunter's CFNY-FM(102.1,Brampton, 35 kW,modern rock;The Leading Edge),to Shaw Communications of Edmonton(which owns 4 AM and 5 FM stations in markets such as Vancouver,Edmonton and Barrie,Ont.).

*Regarding Greg Coniglio's post in ARJ606 re WBUF:Yes,I also heard the change(today,however). It's simply known as B93. The switchover cost quite a few their jobs:the morning team of Jon Summers and Mark McCormick,GM Ken Spitzer(wait,isn't-or,wasn't-Chuck Hill the GM? If so,Alan Pergament screwed up again.)and some of its sales staff. Ron Rice,GM at WHTT-AM/FM(oldies;Oldies 104) Chris Whittingham is handling AM drive until Dan Kelley returns on May 16 for the morning shift. It's his second go-round at 'BUF;he was last at WNUC-FM(107.7,15kW,licensed to Wethersfield-satellite w/Unistar's Hot Country format;new country),from which he resigned as its PD yesterday.
As far as the sound goes:seems straight-ahead A/C,not hotter A/C as Perg says in his column today;WMJQ(Q102)has that format. It also seems jock-less(memo to Tom Schuh:true or not? Let us know!).

*WWKB welcomed back Jay R.Gach and his wife Suzie back yesterday in the 2-4pm shift. Question:Has The Big 1520 lost their minds? Was new GM Terry Rodda aware of his reputation? FWIW,in the year and a half he was at WGR,he managed to get half the city gunning for his scalp. Some groups he antagonzied included:Native Americans, blacks,the gay & lesbian community,postal workers,customs officers

and Catholics. He left 'GR under weird circumstances last July,
claiming that he was returning to Florida to care for his parents
while he was actually preparing to take a job with New Orleans'
WWL-AM(870,50kW). He's still there;the show is being done by satellite
from N.O.(BTW,'KB and WWL are owned by Keymarket.)
Ironic,considering that when Gach left,KB had some bumpers from
their feedback line asking listeners to "audition" for a talker
position at 'GR.

*Memo to Perg.:In regards to Bob Richards leaving WUFX to head to
Denver,the station is *K*BPI,NOT WBPI.(FWIW,I had it first and correct.)

1478. Radio AAHS-& the left?

Newsgroup: rec.radio.broadcasting
Date: 1994-05-03 22:39:24 UTC
From: ag365@freenet.buffalo.edu
Message-ID: <2q6jqs$t5b@vixen.cso.uiuc.edu>
Source record: 40232

While scanning the radio BB on Prodigy(via an area library)I
came upon a message talking about Cincinnati and the changes on AM.
The author,Jeffrey Galbaugh,was talking about what is now on AM
1360-Radio AAHS-thusly(BTW,I saw it for myself and printed it out
to verify it):"the radio format I hate more than any other,with its
leftist indoctrination of our youth."
If anyone would like to reply to him(who has heard it),his
address is:fsjw53a@prodigy.com . Question to our esteemed moderator:
do you want to be the first one to let him know otherwise?

[Moderator's Note: Naw, I dont want to get into a pointless discussion
with somone who obviously has his mind made up to see a liberal or
leftist under every rock... Radio Aahs is a great resource and I wish
them a ton of success. Bill]

1480. Arrow 94.7 VS. WCXR

Newsgroup: rec.radio.broadcasting
Date: 1994-05-03 22:39:25 UTC
From: mh5260@ARK.SHIP.EDU
Message-ID: <2q6jqt$t5v@vixen.cso.uiuc.edu>
Source record: 40235

I'd like to make a couple of comments about Arrow 94.7 VS. WCXR here in Washington, DC. This topic was discussed in the last Washington, DC radio watch.

I was very surprised to see that Arrow 94.7 didn't do better. They have a much better presentation of the music they play. They concentrate on the music and not the hype. They are easier to listen to because they just play thge music and don't intersperse it with "100 songs in a row" or "be my 25th caller to win"..... Also, I think that Arrow's music is better. They seem to concentrate more on songs that were popular and don't play alot of strange music. Yes, they play off beat stuff, but I seem to recognize more of the music that is played on Arrow as opposed to WCXR. This is all just my opinion.

I'd also be interested in hearing what other Washingtonians (sp?) think about this subject.

Mike H.

PS- I have to also say that like others have said, if Arroe Arrow 94.7 keeps coming on strong, there may be a format change down at WCXR. We'll have to see....

>WLS' afternoon program of Ty Wansley and former alderman Ed Vrodolyak
>(did I spell it right?)

Almost. I think it's Vrdolyak. I grew up in St. Louis in the '60s -- and because its selection was pretty lame, I grew up with 'LS, back in the days when it was a legendary Top 40 rocker with Clark Weber, Larry Lujack (after whom Limbaugh patterned his delivery), Ron Riley, Art Roberts, Don Phillips, Lyle "the voice of doom" Dean, etc. Before Riley came Dick Biondi -- is he still on the air anywhere?

>Hope this helps out...
>Take care...
It does indeed! I can now set all my presets. I'll be there Saturday morning; thanks for all your work!
--
>Michael H. King - Talk Show Host/News Reporter - WLTH-AM/Gary,IN

WHAT? After all that big list, you didn't even list your OWN station?!!! Can't it be heard outside Gary? :-)

IMHO:

1. News--WBBM AM 780

2. Talker--WGN AM 720

3. CHR--WBBM FM 96.3

4. AOR--WKQX FM 101, WXRT--93.1 FM

5. Oldies--WJMK 104.3 WYSY--107.9 (all 70's)

6. Urban Contemp.--WGCI 107FM

7. Blues--WBEZ

8. Quirky--WXRT--93.1 FM (see #4)

9. Morning Team--Kevin Matthews (& Jim Shorts?)--WLUP 97.9 FM

Jeff

>Freelance Writer - Computer Consultant - Small Business Consultant
>"I make my livin' on the evening news..." --Don Henley
>"Take Five..." --Dave Brubeck

Thanks for the mention, Michael...but your WDCB listing is a tad incomplete:

>Since WBEZ eliminate all but one of its acoustic music programs
(actually, even before), WDCB became the primary outlet for the music late
this winter with over 20 hours weekly of folk, bluegrass, country, Celtic and
blues.
>WDCB News (he said, humbly) is the ONLY source of west suburban
news and information with two (count 'em) two daily news magazine programs and
15 locally produced newscasts.
>WDCB also offers programs you can't hear anyplace else- Pipe
Dreams (for pipe organ ehthusiasts), 51% (a program devoted to women's news),
Monitor Radio from the Christian Science Monitor and lots more.

We usually say we're a Jazz/News & Information Station peppered with a lot of
other interesting programs.

But then, I'm biased.

I'm the News Director there ;-)

In article <2p7jck$4l9@vixen.cso.uiuc.edu>, thompson@csulb.edu (Ron Thompson) writes:

>"can anyone give...an opinion of the Fairness Doctrine?"

The problem with the fairness doctrine is that it penalizes "controversial" speech relative to noncontroversial speech. Even worse, it gives the government the authority to decide which speech is "controversial" and which is not.

I can think of three *content-neutral* alternatives to the so-called Fairness Doctrine:

1) Require *all* broadcasters to provide some amount of public access time on their station. Contrast this with the fairness doctrine which only requires free public access only on "controversial" stations.

2) Allow broadcasters to sell broadcast time on a common-carrier basis. Currently broadcasters are responsible by law to the FCC for everything broadcast on their station. Put another way, they are required by law to take editorial responsibility for everything they broadcast. If they were allowed to sell sometime on a common-carrier basis (first-come, first server; no prescreening; no legal responsibility by the broadcaster), more viewpoints would be heard. Currently the law only gives one group this kind of access to the airwaves: politicians running for office. Think about what phone service would be like if the phone company had to prescreen all calls because it responsible for their content to the FCC.

3) Treat broadcast rights like real estate rights; allow subleases and subdivision. Real estate is New York City is expensive, but most people can afford to at least lease a little bit of it. This is because big parcels have been subdivided and offered for lease. In broadcasting, the government gives (or now sells) broadcasters big "broadcast estates", but then forbids the broadcasters from subdividing these estates into smaller plots. The so-called Fairness Doctrine says the way to fix the problem is to give the peasant a few special access rights to the giant estate. I think the best fix would be for the government to allow the creation of small plots that peasents could afford to by.

I certainly would like to have an engineering job in Austin. Or anywhere in Central Texas. If any of you happen to know of an opening, I would appreciate a short note to let me know.

I am a Texas native and have lived in the Austin area before.
I have over 10 years of Radio Engineering experiance from the component level of cd players up to full Class C tranmitting facilities. Mutli-tower AM streo also.

C'mon...someone help me move back home :)

>the old WHFM survives as WKLX/98.9.

Close...but not quite. WHFM did indeed stay on the air on 98.9
for three more decades, being sold in 1985 to become WZKC (country
KC99) and then in 1986 classic rock (now oldies) WKLX. But WHEF
died in 1950...and the 96.5 freq wasn't resurrected as WCMF until
1960.

Some other early FMs:

(this from a 1946 list:)

WFMN 98.9 Alpine NJ (also known as KE2XCC on 92.1) died in 1954,
after its owner, FM pioneer Edwin Armstrong, committed suicide.

WNBF-FM 96.3 Binghamton NY evolved into WQYT on 98.1, later WHWK.
WBZ-FM 100.7 Boston was turned off in the early 50s, later revived
on 106.7 in 1957. WBZ-FM 106.7 was sold in 1982...now WMJX.
WBBM-FM 99.3 Chicago still on as 96.5.
WDLM 99.7 Chicago evolved into 97.9...later WSDM and WLUP-FM.
WEHS 100.1 Chicago...dead?
WGNB "98.0" (really 98.7?) Chicago was WGN's FM, sold off a year or
two later to become classical WFMT, still on the air.
WWZR 98.5 Chicago was Zenith's station, later WEFM on 99.5,
now WUSN.
WELD 94.5 Columbus OH -- dead?

That's just a smattering from the start of the list. Clearly,
many of the early FMs, especially outside the big markets,
died a quick death.

The Boston and Hartford
>stations listed also continue to operate, in many cases under the
>same owners or their corporate descendants.

As we've seen, WBZ-FM actually *didn't* survive, but was later
revived. The other Boston FMs were WTAG-FM 102.7 Worcester,
which I believe to be an ancestor of present-day WSRS 96.1,
and WGTR 103.1, which I think evolved into WAAF 107.3.
And yes, Hartford is an exception...both WDRC-FM and
WTIC-FM made it to the present day alive.

BTW, the noncomm FMs actually made it through much better.
WATX 42.1 Ann Arbor MI became WUOM 91.7, WNYE 42.1 Brooklyn
stayed alive on 91.5, WBEZ 42.5 Chicago also moved intact
to 91.5. KSUI Iowa City IA moved from 42.7 to the regular
band an lived, KUSC 42.9 Los Angeles made it to 91.5,
WBGO Newark NJ (a CP in 1946) came on and survived at 88.3,
KALW San Francisco made the move from 42.1 to 91.7
and lived...and WIUC 42.9 Urbana IL moved to WILL-FM 90.9
and lived. The only dead ones were WLSU Baton Rouge LA
(a CP), WCAH Buffalo NY on 42.9, KICR Kansas City (a CP),
and KOKU Norman OK (a CP). Oh, and WBKY Beattyville KY
on 42.9. How many FM receivers do you think there were
in greater Beattyville in 1946? ;-)

The early FM pioneers
>needed patience, but eventually many of them prospered once
>stereo, and the fragmenting of the top 40 audience through the emer-
>gence of album rock, gave new life to the band.

Very true...but waiting 3 decades took LOTS of patience,
and the presence of a deep-pockets AM next door!

Source record: 40245

Hello!

I have created a computer program in C which should run on just about any system (eg PC, UNIX etc) to produce cart labels in PostScript. So, if you have access to a PostScript laser printer and would like to be able to generate 32 labels per A4 sheet which look rather splendid, then contact me and I shall send details.

If people would like me to, I could post the program to this newsgroup.

The subject line pretty much says it all. My E-skip catch of the day came in my car, as I was driving around looking at the broadcast towers of Springfield, Mass. As WHJY-94.1 Providence RI passed out of range, I began hearing country music...then the ID "Froggy 94, WOGY". Yep, WOGY Germantown-Memphis Tennessee, which just recently moved down from 94.3!

Other big catches heard by me and others in the area that day included WMJJ 96.5 "Magic 96" Birmingham AL and 89.3 WYPN Memphis TN.

We'll see how fast WOGY QSL's...

nhmas@gauss.med.harvard.edu (Mark Shneyder 2-4219) writes:

>Big news is that Howard Stern is not only eating the night-time competition
>alive

Howzat again? Let's go to the tape, folks:

We'll start with the LESS impressive set of numbers, 25-54:

Station Estimate Winter 1993 Fall 1993 WINTER 1994

WBZ-AM Share 4.9 (7th) 4.5 (8th) 8.9 (1st)
Cume (00) 712 (7th) 748 (8th) 893 (5th)
AQH (00) 61 (7th) 67 (8th) 117 (1st)
AQH Rtg 0.4 (2nd tie) 0.4 (5th tie) 0.7 (1st)

WBCN-FM Share 5.8 (3rd) 13.5 (1st) 7.0 (2nd)
Cume (00) 735 (6th) 1311 (1st) 989 (1st tie)
AQH (00) 72 (3rd) 203 (1st) 93 (2nd)
AQH Rtg 0.4 (2nd tie) 1.2 (1st) 0.5 (2nd tie)

OK...8.9 beats 7.0, we all know that. So how about 12+?

WBZ-AM Share 6.8 (2nd) 9.0 (2nd) 10.3 (1st)
Cume (00) 1766 (3rd) 2095 (4th) 2023 (2nd)
AQH (00) 192 (2nd) 272 (2nd) 290 (1st)
AQH Rtg 0.6 (2nd tie) 0.9 (1st tie) 0.9 (1st)

WBCN-FM Share 6.1 (4th) 9.8 (1st) 7.9 (2nd)
Cume (00) 1557 (5th) 2083 (5th) 1714 (4th)
AQH (00) 173 (4th) 298 (1st) 220 (2nd)
AQH Rtg 0.5 (4th tie) 0.9 (1st tie) 0.7 (2nd tie)

Eating alive? The only one doing _that_ is BZ and David Brudnoy. Just
'cause the Boston radio columnists (far from the nation's best, I might
add...) don't get the whole story right in the papers, doesn't make it the
truth...

A few other samplings? How about AM drive? Shares 25-54:

1. WBZ Morning News (9.0)
2. WBCN Charles Laquidara (7.2)
3. WXKS-FM Matty Siegel (7.1)
4. WBMX-FM Joe Martelle (6.0)
5. WZLX Ken Shelton (5.0)
WMJX Tom Bergeron (5.0) [Bergeron's gone now...to the new f/X cable net]

And 12+ it's WBZ (13.0!), WXKS-FM (7.6), WRKO Clapprood+Whitley (6.3), WBCN (5.1), WBMX (4.6).

The papers here devote all their attention to the rockers, but there's a lot more to the story when you have ALL the facts...

Radio news week of 5/2/94

The Don & Mike Bowl II will be held this week, Thursday, May 5th, at Prince William County stadium in Virginia. D & M, and their cast of idiots, are expecting anywhere between 5,000 and 10,000 spectators. This year the game of choice is softball (last year it was football) as Don & Mike and their entire staff play against professional football players. All money raised will benefit the Have A Heart Foundation for abused kids at Washington's Children's Hospital. The goal is to beat last years total of $50,000. Actually, they've already topped last years total thanks to T-shirt sales so, all the rest of the money raised at the softball game is icing on the cake. Joe Theisman, Monte Coleman, Gary Clark, John Friese, Chip Loemiller, Ron Middleton, Mark Rypien, Brian Cox, Frank Wycheck, Brian Balldinger, Ray Bentley, Darrel Moore, Ray Rowe and, maybe, Jim McMahon are among the professional football stars expected to show up.

WASH FM 97.1 and WTOP AM 1500 may be going on strike. Talks between Evergreen Media, WASH & WTOP's owners, and AFTRA have been going on for almost 10 weeks but nothing is settled yet. Somebody will have to make a decision soon. The current contract is up Tuesday, May 10.

Former WASH afternoon hostess Marilyn Thompson has been hired by X-tra Oldies 104. She'll be performing several chores behind the scenes as well as substituting for vacationers. Next week X-tra 104 will introduce its new morning show and perhaps make some additional staff changes.

The Committee to Bring Back Jazzy 100 is still alive and well. (Yes, I'm a member! :-)) Former WJZE Program Director, Bob Linden, says there are several investors waiting for a competitive FM signal to go on sale. Currently none are available so the group keeps busy with off-air activities. On Saturday, May 7, the committee is sponsoring a concert at the Washington Marriott starring Greg Karukas (one time member of the Rippingtons). Also, Ken Philmore will be performing and tickets will be available at the door.

As always any opinions expressed are mine, not the Federal Government's.

1497. Radio Watchers -- KC (KCTE-AM)

Newsgroup: rec.radio.broadcasting
Date: 1994-05-05 05:59:45 UTC
From: Mark Roberts <transvox@tyrell.net>
Message-ID: <2qa20h$823@vixen.cso.uiuc.edu>
Source record: 40101

Independence daytimer KJLA has switched satellite channels and call letters.

The station at 1510, which had been relaying a nostalgia satellite format, changed Monday (May 2) to an all-sports format from a different satellite service.

The station's call letters are now KCTE; its slogan is "KC TEAM" (get it?--KCTE-AM)

General manager Steve Dinkel told the Kansas City Star, "We felt Kansas City is a real good sports town; there's a lot of interest in sports, so we thought putting on all sports all day might find a niche."

As a nostalgia station, the 1510 signal never registered in the Kansas City Arbitrons.

KCTE is relaying the signal of all-sports station WTEM (570, Bethesda, MD, serving the Washington, DC market). Morning drive broadcasts that I have heard include a 20-minute-long "sports ticker" as well as talk segments. There are already some local spots, although these may have been sold in combination with KCTE's FM LMA partner, contemporary-hits KISF (107.3).

According to the Star, KCTE is the "largest" of five affiliates that have joined the month-old WTEM network. Not explained was whether "largest" mean the largest market in which WTEM has an affiliate, or whether "largest" refers to the station's transmitting power (10 kW in this case).

The WTEM network carries separate programming from WTEM whenever the Bethesda station carries Washington Redskins or Washington Bullets games.

In Kansas City, KCTE's main competition will be KMBZ, which features an afternoon sports talk block, and WDAF, which carries Royals baseball.

The Star article, in the sports section, makes much of KCTE's daytime status and how "it will never be able to carry anything as big as the Royals," but considering the plodding quality of the Royals' play-by-play team, the satellite talk programming would be more interesting, in my opinion. (Jack Buck they're not.)

KCTE's switch is the third format change in the Kansas City market this year. Other changes have been KBEQ(AM)'s switch from FM simulcasting to relaying the People's Radio Network, and KMXV(FM)'s transition from adult-contemporary to a borderline contemporary-hit/adult-contemporary/modern rock crossover format.

Wow. A bunch of CREATIVE high school kids putting on what has become a quite popular show -- I love the concept! I saw a feature on them once on "Tom Snyder" on CNBC and have had the opportunity to hear them a few times since. Oh, yeah -- politics was the first thing that came to my mind!
Come on, let's lighten up and leave our harsh political judgementalism out of places it simply does not belong. It's too bad that any time someone feels the need to bash a worthwhile cause, they feel groundless political statements will do the trick.

I'll get off my soapbox and write Jeff Galbaugh (as I hope you will) at fsjw53a@prodigy.com .

I am in a quandry and thought I would appeal to those experts out there. My office has recently relocated to a new building. Although I am physically less than one mile from the studios of WTEM (DC; actually Rockville MD), since I am inside a relatively large office building (not near a window; flourescent lights, computers, etc), I am unable to receive the signal at all. As a long-time Imus listener, this has presented a major problem. Although I can tape-record the program and re-play it the next day at work, much of the news on the program loses its timeliness. Does anyone have any suggestions for me (not to include giving up listening to Imus!) that will allow me to receive the program?
PLEASE SEND YOUR REPLIES TO MY PRODIGY ACCOUNT UASR74A@PRODIGY.COM

Maybe during the Bluesfest and on Ultra Late Weekend evenings otherwise
my vote would go to WNIB's (Sorry forgot the frequency since I have
presets) Mr. A who does a good overnight blues show. Or if you are in
it's range WSSD 88.1 is a small blues station that also features jazz
and gospel.

Just an update for Tom fans outside of Los Angeles. Yes, it's true, Tom is back on the air in LA on 710 during afternoon drive time.

The really great part, however, is that his deal with Westwood 1 includes him going nationwide on Monday, May 9. I don't have a list of stations at this time but I do know he will be on in many Calif. markets, including San Diego, Bakersfield, San Francisco, etc. I also understand he will be on in Cleveland, Norfolk, Madison, somewhere in Texas. Altogether, I understand, there will be about 35 markets to start with.

Will post more as I find out.

Kat

1511. Re: YOUNG TALK

Newsgroup: rec.radio.broadcasting

Message-ID: <2qa21f$8f6@vixen.cso.uiuc.edu>
Source record: 40115

Hmmm...I'm really curious, as I'm sure are others, about this format name. A "left-wing Rush" (Tom Leykis), a couple-hosted "relationship-oriented" show...who is the actual target for this programming? Men and Women 18-34? "Yuppies?" I'm curious simply because it seems like it could be a nice break in the local action (where I'm from) of largely conservative-oriented talk and it seems as though it would be more competitive with "younger" formats, such as the slew of music stations (AC, CHR, AOR, etc.) that want that demographic. Is this format starting to spread?

Is Leykis really broadcasting his "show" this week or are they just running promos? For what i gathered from newpapers Tom's "show" will not go into to full swing until next week. Any info anyone has about the actuall date Tom will start would be of great interest to me.

best regards all,
gregory

(about Buffalo/Toronto radio)

Carl; have you heard the rumors I've been hearing, that the reason Chuck Finney hasn't been replaced at WGR after three months is that the whole 4-station Rich combo is going to be sold, either as separate AM/FM combos or as a total package?
Rumor is that Rich exercised its purchase option on 4WS and Fox 103.3 in order to make the whole thing a more attractive package (or two attractive packages for resale).

Source record: 40118

You might want to check out, or see if you can get permission to reprint the above-mentioned article by Rebecca Piirto. The abstract is "Traditional radio formats adapt quickly to changing listener needs. New technology may change radio, but its personal, adaptable nature is the secret to its survival."

The article talks about different formats, listener habits being akin to subscribing to magazines, and the low cost of advertising.

American Demographics can be reached at 607-273-6343. I don't think they have an email address.

1515. KMPC LA change

Newsgroup: rec.radio.broadcasting
Date: 1994-05-05 06:00:24 UTC
From: Chris.Carmichael@artecon.com
Message-ID: <2qa21o$8j1@vixen.cso.uiuc.edu>
Source record: 40119

I've been listening to the `new' KMPC, Los Angeles for the past couple of days. Currently, the station is running promos on a loop about the new line up that starts on Monday, May 9. Tom Lyekes is on from 3 p.m. to 7 p.m. Here's an aircheck.

The afternoon drive of Tom Lyekes on Monday, had former police chief, Bill Gates on. Lyekes asked him about the current trial with Rodney King (Gates is a hostile testifier) and gave indication if there is a monentary award, he'll file bankruptcy.

Tuesday show was low brow. Lyekes opened up the phone lines to listeners on what was wrong with cross-town rival, KFI. Lyekes had worked previously at KFI before being fired/let go. While the first five minutes was funny, it got out of hand. Lyekes pledged $400 if someone would call KFI and say his name over the air. He said that it wouldn't happen because of tape delay, and the discontent of KFI and Lyekes. To sharpen the blade, he imiatated KFI's morning show host, Bill Handle, calling him a part-time lawyer and part-time talk show host. (Handle is a lawyer, and hosts a Saturday morning "Handle the Law" program.) Several callers used religious and other attacks on Handle and other talkshow hosts.
He then called all the weekend talkshow hosts "$5 an hour junkies." and promised to have his name broadcast on KFI.

While his show is fast paced, and very vocal, sophmoric attempts to belittle the competition shows true light what Lyekes is all about. There will be a switch to 710Talk, KMPC, but further vocal attacks on the other area talkshow hosts will fall back into their face. (Interesting, he didn't put down other LA talkshow hosts (i.e. KABC), just KFI.)

(KMPC is a 50kw directional station that is marginal in north San Diego County.)

Thanks!

>case of ABC-owned KGO (in SF) versus KABC, there is a fierce competition,
>so much so that when KGO needs a feed about things such as LA quakes,
>fires, riots, or mudslides, they call on KFWB, *not* KABC, with whom they
>have no relations at all, even though they're ultimately owned by the same
>company. But because they compete at night (KGO has a big LA audience),
>it appears that KGO would rather deal with Group W instead. Who knows
>what will happen now that Group W's been cleared to purchase KKHI here,
>which will do a news format. I guess KGO will have to go shopping for
>another feed, but I doubt it'd be KABC. Maybe it'll be KFI?

I don't know, but the reason KGO has turned to KFWB News 98 is that
because KFWB is an ABC News affiliate - they take the "Entertainment"
feed - although they never run a network newscast, just use reports and
sound bites from the network feed throughout their broadcast. Since KABC
doesn't really _have_ a news department (there's a reason they're
_talk_radio_, not _news_talk_radio_ as KGO is), it just makes sense for
KGO to turn to the other ABC affiliate that does. I do have to agree
with David, however, that KGO might _have_ to start a relationship with
KFI (KTVU-Channel 2 in Oakland is owned by the same company, Cox).

On a related note, rumor has it that Cap Cities/ABC is looking at buying
KSFO Talkradio 560 here in the Bay Area - since KYA has been sold off to
KFRC's owners, it's just s single station - and you see it all the time -
a station _buying_ the competition.

1519. Monterey/Salinas changes

Newsgroup: rec.radio.broadcasting
Date: 1994-05-05 06:17:13 UTC
From: wgsmith@netcom.com
Message-ID: <2qa319$d8r@vixen.cso.uiuc.edu>
Source record: 40123

*KMBY AM/FM (1540 10kw DA-2; 107.1 1.85kw) was abruptly yanked off the air by the company - a financial subsidiary of AT&T - that held the paper on the station. Evidently an agreement has been reached whereby the stations will be managed by the company which owns KLOK/KBRG - a Spanish AM/FM - in San Jose. Rumor has it that the same company has also agreed to purchase KSUR AM/FM (700 2.5kwD/0.7kwN;99.5 30kw) from Mt. Wilson Broadcasters (Sol Levine et al), owners of KKGO/Los Angeles.

KMBY-AM is dark as of Friday 4/29 & KMBY-FM has been repeating a single CD - with no IDs of any kind - since Saturday morning 4/30. KMBY-AM had been alternative, KMBY-FM had recently moved from a mainstream AOR format to a more adult-oriented 'AAA' format. Both stations had _very_ poor showings in the Winter 94 Arbitron. Speculation has both stations changing to Spanish (perhaps a simulcast of KLOK & KBRG) - making them the 6th & 7th local Spanish signals.

KSUR AM/FM continues to simulcast KKGO (105.1 Los Angeles) - Classical.

KSRI-FM Santa Cruz (99.1 1.2kw) - recently sold to the owners of Urban/Top 40 KSOL/SF has flipped from simulcasting KSRY/SF to simulcasting KSOL (soon to be KWLD). This means that two adjacent Class B FMs in this market are simulcasting outside signals - a disturbing trend to say the least.

Big winners in the Winter Arbitron: KBOQ (new Classical outlet); KRQC (new AOR - the old KBOQ facility); A/Cs KWAV & KOCN; Spanish KKLF AM/FM; KPIG (wierdo Progressive rock/country); Urban/Top40 KMXZ

Slipping somewhat: Country KTOM AM/FM

Bad news: Urban Top40 (& former market leader) KDON

1520. Contributors wanted for Canadian radio program

Newsgroup: rec.radio.broadcasting
Date: 1994-05-05 06:17:18 UTC
From: boycec@access.mbnet.mb.ca
Message-ID: <2qa31e$d95@vixen.cso.uiuc.edu>
Source record: 40124

Got something to say?
Want to say it to a few hundred thousand Canadians?
We're looking for international contributors for our national radio show heard across Canada...

What kind of show you ask?
Well, it's called Brand X and it's heard on the CBC AM network. We like to think of it as a 90 minute collage of ideas, sound and music. We cover pop culture. Music, movies, books, TV, technology or anything else that interests us. The show has no host, just lots of tone and attitude. We like to experiment...re-define how radio sounds.

We're looking for contributors to write and perform short commentary type items. You know, 1-3 minutes / 500 words or less. We want a strong international point of view. Write in the first person, be personal, be direct, be conversational. Communicate one-to-one with the audience. Don't be afraid to try something strange, different or creative.

So what do we want to hear? Some ideas...

1) What's the next big thing where you live. The trend, fad, rage, style or craze that's just about to break. What's on the cutting edge? We want to hear about it before the rest of the world.

2) We want to start a travel column. Not the Holiday Inn...we want to hear about off the beaten path. What are the weirdest, most interesting places to visit in your city or country. Tell us about them. We want the hitchhiker's guide to the weird and strange. Your best kept local secrets.

3) A commentary about what TV and radio is like in your country. What makes it different from North America?

4) A short commentary dealing with what you think Canada is all about. Your perceptions, insights, opinions...

5) Have some other idea? Pitch it to us.

So you're interested?
Well, first we'd like to see a script. If you're not sure about an idea, run it by us before writing anything. If we like it, you must be able to record it yourself and get it to us. Our preference is is for you to digitize it into a computer soundfile and transfer it to us via the Internet. If this is out of the question, we'll also consider stuff recorded onto tape and mailed

in.

So what do you get out of it?
Well, if we run your item on-air, we'll pay you $100.00 (Canadian of course). You'll also get the pleasure of indoctrinating thousands of innocent Canadians with your ideas.

So send us your scripts, ideas and questions. The Internet address is: boycec@winnipeg.cbc.ca

Here's a few excerpts from stuff we've run on the show in the past...it'll give you an idea of the writing style.

Hi, I'm Nora Young in Toronto. Every Monday, nose pressed against the window, I watch the fully employed head off to work with a collective case of performance anxiety. You've got to use it or lose it , be all that you can be, just do it, all the way to Friday. It's no wonder I've been hearing more and more about brain food -- smart drugs, nutrients, herbs...all designed to make the brain work more efficiently. Well, I'm always up for a little hands-on experience, and besides, my brain can use all the help it can get, so I've decided to check it out...Memory Fuel powder arrived today. Of course they try to hook you with the hi-tech, latest-scientific-discovery angle, but once you get past the hype and the warnings, it's basically high doses of choline, and an assortment of other vitamins and nutrients. I hate to admit it, but I do feel more alert, more tuned in. The problem is, you're using your brain to think about your brain. You can't be objective...

Hi, I'm the disabled guy. I'm not handicapped, I'm not physically challenged, I'm in a wheelchair. It's a chair with wheels, two small ones at the front, two big ones at the back. I push the big ones. Want some advice? You're going to get it anyways. After all, I have to listen to all your comments and opinions about me, like I'm some sort of object or something. So listen up, here are some things on my mind...why do you and all your friends assume that I have something in common with every other cripple and derelict in the world? What's that all about? I got my problems, you got yours, I don't want to share or talk about mine with anyone, whether they're in a wheelchair or not. My wheelchair is not my identity, my hair is. I've got great hair. It stands up very tall, and I never use mousse. Well, just once. Laughing behind your back, I'm John Wyndels, the disabled guy.

There you go, a few examples. So start writing, we'll be waiting to hear from you.

Chris Boyce
Brand X, CBC Radio Winnipeg

From: kwgs_fc@vax1.utulsa.edu
Message-ID: <2qa31g$d97@vixen.cso.uiuc.edu>
Source record: 40126

We're exploring the possibility of using one of our FM subcarriers to broadcast data to the public, a "skyway" extension of our university's community-wide information system. We're seeking information and leads on:

- leads to equipment manufacturers / suppliers
- practical baud rate limitations
- cheap receivers, data-dedicated / radio modifications
- transmission / reception software with packet redundancy
- clever low-budget systems

I'd especially appreciate hearing from anyone who has tried or is currently broadcasting data non-RDS data. Thanks.

William A. Goldsmith (wgsmith@netcom.com) wrote:
<snipping specific artists--well, not literally.... >

: Let's get one thing clear. The people programming your local CHR, AOR,
: AC, or Country station do *not* audition everything that is released and
: then select what they feel to be the cream of the crop. They program what
: they are *told* to program - by the record labels, trade magazines, and
: national consultants/researchers.

More likely, it is that they program what they are told to program by their consultants, based on the outcomes of statistically suspect research. Many stations subscribe to CD services based on their consultants' recommendations. If a tune is not on the week's shipments of CDs, it does not get played.

Consultants are even used on AAA stations. The difference of perniciousness seems to be one of degree only.

If consultants were used to verify ideas, if they were used as a source of new ideas, if they were used as a source of information, then they would be a good resource. But most station managements, out of insecurity (which seems to be directly proportional to the amount of debt service involved), abdicate decision-making to consultants. Hence we get what I call "fast food radio."

: If you're in the 30something plus demographic, think back to the kind of
: relationship you had with radio as you were growing up - when each radio
: station had not only personalities, but *personality*, the unique stamp
: of the program director/manager/staff who were doing their best to create
: excitement in you, the listener, and who - if they were talented & daring
: enough - were willing to look to even the most unlikely sources. I'm
: talking about the great Top 40s (WMCA, WLS, KFRC, KOMA, etc) - the best
: free-form AORs (KSAN, WBCN, etc) - even the full service MOR station that
: my parents listened to when I was growing up (KSFO/SF).

: Do you really believe that the time is past for any kind of risk-taking
: and adventure in radio? Do you really believe that the kind of lowest-
: common-denominator broadcasting that clutters up the dial today is going
: to be able to survive the kind of specialized narrowcasting that the fu-
: ture is sure to bring?

Again, I agree with you that radio's long-term viability is at stake; in the short term, however, I think it's only going to get worse as LMAs and duopolies proliferate and as debt service pyramids ever higher.

: I'm not saying that my opinion is the word of God. I'm saying that I'd
: rather hear a wide spectrum of talented people (artists & radio folks both)

: expressing their opinions on the dial - even though they'd have to (shud-
: der) take the chance of being wrong - than to watch as a bunch of cor-
: porate fools clutching their Arbitron books, R&R, and research trash a
: business and *artform* that I love dearly.

I think we all would, but most of the talented people who could make it
happen are either too poor to make it happen and/or got chased out a long
time ago. The exceptions prove the rule.

>Very true...but waiting 3 decades took LOTS of patience,
>and the presence of a deep-pockets AM next door!
>
I vaguely remember that the FM stations that were "kid brothers" of the
big New York City AM's used to simucast the programming of the AM on
FM. Untill around the mid 60s ('65, '66?) the FCC made a rule saying
that the FM had to do its own programming half the time.
WABC-FM (now WPLJ) used to simucast WABC 770 AM (I used to tape record
top 40 songs off the FM, incidently captured some DJ talking). WNEW-FM
used to simulcast WNEW 1130 AM, than the FM started playing progressive
album rock, though I think they had the same newscast for a while.
My father had set up an old Pilot FM tuner (mono, vacuum tubes) and a
small tube amp, and a speaker, back in the early '60s. Guess that makes
me and my brother early FM listeners.

1525. Frank (Little David) Jolle

The best source that I have come across is the World Radio TV Handbook.
It does not list all the stations; but gives the majority of stations in
the countries in Central and South America. It has addresses and the personnel
that are important to contact, as well as power, and times of transmissions.
It sells at most bookstores for $19.95.
For stations in Mexico, Spots Rates and Data puts out a very through edition for
Radio and Television stations.

: 94.5, East Lansing) which has been mainstream CHR since it went on
: the air in '63 has begin airing a "Retro Saturday Night" program.

<...etc.>
I did get to hear some of KRJY St. Louis in the car this weekend. This is the station Heritage (WRTH/WIL) just bought to create a "duopoly" and flipped to "K-Hits."

It is now an all-70s station. There is one curious omission.

Disco!

That's right. None of that dance music which was either loved or despised (sometimes by the same people, depending upon time of day).

It is a curious omission, considering how dominant many of those artists were at the time (some days it seemed like KSLQ had nothing but the Bee Gees on).

Re: CHRs -- Kansas City now has two again with the transition of KMXV to the format. KISF seems to have responded by leaning urban. In St. Louis, WKBQ's survival strategy (now that it has been flipped from 100 kW 106.5 to 50 kW 104.1) seems to be to lean modern with weekend mix shows. Q-104 is the only St. Louis CHR.

Yes, the City of Fountains can have two CHRs and five (yikes!) country stations, but no modern rock, no alternative, no full-time jazz.......

>>to rock and roll 70's style!

A lot of the 70s rock is now played on WFBQ (94.7), the sister station of WNDE, along with more "modern" rock like U2, Pearl Jam, etc. WNDE is now a talk and sports station, the home of the Pacers, Colts, Ice, and Purdue sports. (If they could only get the IU games, ...) Anyway, WFBQ has a much clearer signal, being on FM, and has the best morning show in the nation, bar none, so they naturally would tend to take [Any other Bob and Tom fans out there? Anybody know what day their new cd is coming out this month?]

1533. 70's/80's music, The ARROW thing, etc.

Newsgroup: rec.radio.broadcasting
Date: 1994-05-05 06:17:47 UTC
From: "SCOTT GILBERT, JAMES MADISON UNIVERSITY" <STU_SJGILBER@VAX1.ACS.JMU.EDU>
Message-ID: <2qa32b$d9v@vixen.cso.uiuc.edu>
Source record: 40137

I have a quick word about the "new & exciting" format of ARROW, or Rock'n'Roll Oldies, or 80's classics from my (as if you couldn't guess) college point of view...

A couple of semesters ago, there was a DJ here known as "Swervyn Mervyn" who rose to college radio fame (at our college, anyway) with his show entitled, "The Reagan Years." This show, as you might guess, consisted of middle-to-late 80's top 40 trash, known better as 'roller skating music' to our . generation. Mervyn began the show because of his extensive collection of such music in combination with some old stacks of 45 rpm wax he found around the station. Right in the middle of predominantly alternative (80%) and slightly Urban (15%) formatted WXJM, popped up a show fitting neither genre yet earning hands-down #1 status. In addition to music, Mervyn would throw in occasional movie clips (such as "Breakfast Club" or "Pretty In Pink") from "The Reagan Years" as catchy segues.

I guess the most interesting thing about this show was that it, at first, went sharply against the grain of the grunge-loving "alternative" ideas of the station's management. (At times it seems to me like college radio is AFRAID of a popular format that has any chance AT ALL of getting mainstream attention.) After a short while, however, even they couldn't resist a weekly show of the music babyboomers (whoever the hell they are) grew up with. Mervyn's not hosting the show any more, but it's always among the first time slots to be snatched up by an eager deejay looking to recapture their youth

and that of their audience.

Moral of my ramblings? None in particular. I just like how variety can spice up a market, and sometimes catch on to be major trends. I'm not saying it started here (in market #250), but it's alive and well and I'm anxious to see if this new trend is going to stay or is just passing through.

toodles,
scott gilbert

>They seem to concentrate more on songs that were popular and don't play
>alot of strange music. Yes, they play off beat stuff, but I seem to
>recognize more of the music that is played on Arrow as opposed to WCXR. This
>is all just my opinion.
>[...]
```

Concentrating on songs that are/were popular is okay, but I'd rather hear a station branch off occasionally than hear it play the same 25 songs over and over again. On too many stations in the Baltimore and Washington area, you can listen for three hours and pretty much list off their heavy rotation.

As for hype, some of it is excessive, yes. But some of it makes radio more fun, in my opinion. Lets me "participate". And if I win I won't be complaining about all the required hype to get the front row seats I just picked up. ::smile::

(For the record I am employed by DC-101, WWDC-FM Washington. My views reflect my attitude as a listener rather than an employee, and probably don't reflect the views of DC-101 either, as they can get pretty darn repetitive themselves. ::grin::)

WNDE is still around, but it has changed formats. It is now a TALK station, featuring such national programs as G. Gorden Liddy. It is owned by the same company as WFBQ, Q-95, an adult album oriented station, and WRZX, X-103, an alternative rock station.

WIFE has changed callsigns and formats so many times, I can't remember the current call, but the frequency now runs syndicated country music via satellite 24 hours a day. It is also owned by the above three stations. As you are probably well aware of, recent changes in the FCC rules allow for one owner to have 2 am and 2 fm stations in a market, and here they are!

As for the "talents" you mentioned, I have no idea where they are now. One DJ on WNDE was Jim Davis in real life (not the same one as Garfield). He was my neighbor, and was a DJ there in the mid 70's. I don't know where he is anymore.

Any other questions, let me know...

Paul

Kansas City's last AM/FM/TV combination will soon break up.

Great American Radio and Television Company, owner of WDAF-AM/TV and KYYS(FM), has announced plans to sell WDAF-TV and three other TV stations to New World Communications Group, based in Marietta, Georgia.

Great American, based in Cincinnati, will retain ownership of legacy full-service country WDAF(AM) and album-rocker KYYS(FM).

Great American's parent firm, Great American Communications, filed for bankruptcy protection in November, according to an article about the sale in the Kansas City Star. Great American chief financial officer Gregory Thomas is quoted as saying the deal should be closed this fall.

The price for WDAF-TV (Channel 4) plus stations in Phoenix, Arizona, Birmingham, Alabama and High Point, North Carolina is approximately $360 million.

In a news release, Great American chief executive officer John Zanotti said the sale would improve the company's financial position and enable it to take advantage of the relaxation of FCC restrictions on radio duopolies by acquiring more radio stations.

Other Kansas City radio-TV combos were KCMO (radio stations sold in 1983 with TV call letters changing to KCTV), KMBC (radio stations sold and changed call letters in 1967), and WHB (whose TV operations merged with KMBC-TV in 1954).

'Tis the season for sporadic-E. This morning on my way to work I hit the
2m repeater in Dripping Springs, TX from my truck using an HT at two
watts. This is ~300 miles. To check for sporadic-E scan the 10m and 6m
ham bands for beacons 300-2000 miles away. The beacons are all listed in
the ARRL repeater directory. If you hear one then you can check (my
favorite) lo-band VHF (30-50 MHz) for military comms from all over the
world.

Message-ID: <2qcg82$m34@vixen.cso.uiuc.edu>
Source record: 40051

WIFE was on 1310, and is now adult urban WTLC-AM (Golden Heart 1310). The station referred to in a recent posting was WIRE. WIRE was 1430 and Indy's country msic station for years. About 6 or 7 years ago, the 1430 frequency became WXTZ easy listening after the FM dropped the format and went to AC. A few years later, 1430 switch to the WFXF calls and simulcasted the FM which was classic rock, then. Since 103.3 went to hard rock, 1430 switched to classic country (SMN Real Country).

By the time 1430 went back to country, the WIRE calls had been used in Bloomington, IL and then ended up on a Lebanon, IN station, not far from in Indy. Hence the WCKN calls.

WIFE 1310, I believe, got into hot water with the FCC for rigging a contest. Someone told me they lost their license over this and other things, but I don't know for sure. Somehow the AM and FM (107.9 WIFE-FM) got separated and the AM became WTUX with adult standards and the FM became AC WTPI (The ToP of Indianapolis).

Also, the WXTZ calls are back in Indy. They are being used on a class A from Noblesville (93.9) that is carrying easy listening.

Bud Kress (KSAC - Sacramento) writes:

>Also this last weekend I had the PLEASURE to hear the new 1370 "Magic" KKSJ
>in San Jose. What a nice station. Fantastic signal, AM stereo with
>presence, and a enjoyable format.

And it will be an even better signal when we go from our current 1 kw to our licensed 5 kw. This may take some time. The problem is not with the brand-spiffy-new KKSJ facility, but rather with our host station, KSJX. KSJX's engineer inherited and has been literally propping up the worst house of cards to have been perpetuated from the forties. He has relished the opportunity to flush over forty years of neglect and just plain bad engineering out the door once and for all. But the task has proven more formidible than any of us had imagined. Yet before us is the rebuilding of the KSJX phasor--almost from scratch. In the mean time, KKSJ may have to operate with some screwy parameters.

The programming is the result of the considerable talents of the general manager. He has been literally selecting the music and PERSONALLY dubbing the material to the digital storage system. I have worked with this man for over twenty years and I must admit to being somewhat amazed at his newly demonatrated showmanship talents. BTW, his father founded KEEN, the original station on 1370 in San Jose.

It is too bad that AM radio is on its way out the door. Most savvy people in the industry give the band no more than ten years before its complete demise. But considering the cost, effort, and engineering require to put a signal that is medium-fi at best, AM cannot survive in the marketplace. Some time back in this very forum I predicted the demise of AM to jeers and catcalls of many. I am unmoved in my position. It is still dying.

As the keeper of the only stereo AM signal in San Jose back in the KEEN days, I lobbied long and hard for management to forget stereo. AM stereo is like putting lipstick on a pig. I not only failed to convince them, but as you can see, I lost the battle on KKSJ as well. Fortunately, it is easier to do now with more modern equipment--but it is still no walk in the park to do it right.

>A job well done ! Good Luck

You know, this is one of the few radio projects that I have been proud to be associated with--and wouldn't you know it, it is AM. It is gratifying to see so many positive comments. But as we all know, the success will be measured on the bottom line. Even though it is AM, deep down I want it to succeed as well.

RE: Screening

I am very disappointed with Dooley's screening of the show. It was embarassing that we only got old callers and that Mike spent so much time dumping the pro-KFI faction. We will not attract any new stations if this continues. Hamilton at KSFO told me himself that he was having second thoughts based on what he heard today on the listen line.

Tomorrow begins the full assault on KFI. Be prepared to help Mike screen out anyone with anything good to say about them. It won't help our cause if the audience appears divided on the issue.

1548. San Diego County Report

Newsgroup: rec.radio.broadcasting
Date: 1994-05-06 04:15:07 UTC
From: Chris.Carmichael@artecon.com
Message-ID: <2qcg8b$m49@vixen.cso.uiuc.edu>
Source record: 40041

>From the "Norte" San Diego County:

>>>Great to have the AirWaves Journal back!!

KMPC-AM (710 50kw-d 10kw-n) is running promos for it's new lineup, slated to start May 9. It seems to be on a continious loop. What is missing from the promo is UCLA basketball and football. The college has been talking to, and rumors abound, that XETRA-AM (Tijuana, Baja California, Mexico) will snag the broadcast rights.

Former radio host at KFMB-AM (760, 50kw) Mark Larson has turned up as the general manager of KPRZ-AM (1210, 25kw-d) of San Marcos. The north San Diego county radio station is an all-Christain outlet. Larson was let go during a re-organization of KFMB.

XETRA-AM has added "Let's Talk Fishing" to its Saturday morning lineup. That will complement the "Let's Talk Hook-up." The show airs from 6 a.m. to 7 a.m., followed by "hook-up." Of course, that's not early for fishermen, and fisherladies . . . .

KOGO-AM (600, 5kw) afternoon shows have listners calling in from the LA basin area. The toll free line, 1.800.600.KOGO, appears to be good from Los Angeles, to Yuma, Arizona. The Peter Weissbach gig, from 3 p.m. to 6 p.m., is full of humor (chucklehead of the day, the watermellon report, etc.,). I was told in several seperate postings that he brings in a high-tempo, polished show. They were right. KOGO's growing pains include a phone system that is out of sync, and a the board ops getting used to their new equipment. Once that is polished, they (the local talent) will, in my humble estimate, put in a good run on KSDO-AM 1130. But they will never be in the same league as KFI or KABC.
The weirdest show I've heard on a national scale is Art Bell. Last weekend, the show delt with UFOs, Ouiji (sp?) boards, and toad-sucking. He's based in Las Vegas, and is on overnight on KOGO from 11 p.m. to 5 a.m.

Quote of the week: as seen in the Escondido Times-Advocate: Now, southern California can get cold-cocked with Hot Talk at KMPC and KOGO. (both stations advertise a hot talk format)

>like putting lipstick on a pig.

Well, if the equipment manufacturers would treat AM as something more than a
telephony grade channel, something may happen. There *ARE* some good
AM receivers out there -- Denon makes one (which the NAB sells), and
Motorola makes chips for their AMAX receivers which really sound quite
good. I believe that GM/Delco is putting a good AM front end in their
radios (at least for the $$ cars). Most of the AM sections of aftermarket
car radios are atrocious -- need to ban those Toko or Murata cermaic
filters. Sony markets radios with synchronous AM detection (Costas
loop I figure) which works wonders for SW -- probably would help in
AM DXing too. I personally am thinking of ripping the IF section of
my car stereo out and putting in a real IF filter -- maybe even a stereo
decoder if I can fit it in there -- just to listen to KKSJ :-)

Anyone out there in the SJ area with a good AM car stereo? Whaddya
think about the viability of music on AM?

I sometimes listen to classical music on AM because the multipath on FM
is more annoying than the poor audio. Now to get Caltrans to stop putting
steel bars in the overpasses :-)

I really think that the viability of AM depends on whether enough good
receivers make it out there. Consumers have to vote with their pocketbook.
Incidentally, I have YET to see the Sony SRF-42 AM Stereo Walkman at
the stores around here.... Guess it isn't selling too well.... Oh well.

1553. Differences between Oldies and Classics

Newsgroup: rec.radio.broadcasting
Date: 1994-05-07 02:48:12 UTC
From: CRZ001@email.mot.com
Message-ID: <2qevhc$7eh@vixen.cso.uiuc.edu>
Source record: 40142

What is the difference between a "classic" and an "oldie?"

I listen to various Chicago radio stations (107.9, 105.9, 104.3, and 95.9) and
cannot figure it out. To me, Motown and the Monkees are just as "classic"
as the Doors and The Who are "oldies." 105.9 (classic station) would never
play Motown or the Monkees and 104.3 (oldies station) would never play
"Helter Skelter." Maybe the bottom line here is there really isn't a
difference between "classics" and "oldies" except in the marketing strategy
of the different radio stations.

>From time to time, this newsgroup, as well as those on Fido, and other places, sees a discussion on some subject, with all sorts of passionate feelings about some matter.

Sometimes it is the crudeness being broadcast by someone. Other times it is something like the proposed sale WOWO or other 'clear channel' stations to cripple them in favor of another station.

Scott Fybush wrote about the WOWO sale.

Scott Fybush also put his letterhead where his mouth was, unlike others....

This is from the Fido BROADCAST echo....

Regarding your post of several weeks ago, which requested letters be sent to the FCC concerning the probable change in WOWO's broadcast pattern following the station's pending sale, the following was photocopied and posted at our station here in Fort Wayne, IN (WBYR-FM). I can't ID the source, but it likely came from one of the two daily newspapers.

1 Letter Filed Against Sale

WOWO radio listener Scott
Fybush's letter is the only
one the FCC has acknowledged
so far as meeting its comments
deadline on WOWO's proposed
sale to a New York firm.

That's all ... just one.

Jon.

I don't know the deadline ... it may have passed. But, the next time you are inclined to comment here about some aspect of regulation, why not send it to the one place where your comments might mean something?

From: Daniel Gulino Dept: Chemical Engineering
GULINO Tel No: (614) 593-1495

Subject: FM since 1945

To Jurgen Batels in Germany,

FM frequencies were switched from the 47-50 to 88-108 MHz range for purely political reasons. In the 40s, AM was dominant and FM was just starting. The "vested interests" recognized the technological superiority of FM over AM, and, to protect their huge investment in AM, wanted to do anything possible to put FM out of business. In essence, RCA and other companies with a large stake in AM lobbied the Federal Radio Commission (predecessor of the FCC) to change the frequencies for FM. This would immediately make useless all of the FM receivers that had been sold up until that time and (it was hoped) force FM broadcasters out of business because all of a sudden no one could receive their broadcasts. It is a testament to the perseverance of the early FM broadcasters and superiority of the technology in terms of sound fidelity that FM survived this.

The reasons given by RCA for changing the FM frequencies were highly dubious, and it was amazing and disappointing that the FRC would fall for them. RCA used reasons like "needing the 47-50 MHz range for civil defense purposes" and "FM would suffer less interference at the higher frequecy range." All of this was nonsense of course.

An excellent book on this subject, mentioned in this digest earlier, is "Empire of the Air" by Tom Lewis.

Juergen Bartels (juergenb@ecs.comm.mot.com) wrote:

: I'm wondering what was the reason to switch from 40 MHz
: to the 87-108 Mhz range.

RCA's spiteful attempt to drive Edwin Armstrong (inventor of FM) out of business. David Sarnoff, founding president of RCA had a falling out with Major Armstrong, and when Armstrong went off on his own to develop FM, RCA managed to get the FCC to allocate a different band so that the transmitters and tuners would be obsolete. It's actually worked out better since high-power FM on the 40 MHz band would have caused skip problems all over the world. When FM was moved to the higher band many stations used frequency doublers and retuned as high as they could go to try to make use of the equipment they had. In the end, though, they had to buy new equipment...and RCA was the major manufacturer.

A big problem with 40MHz would be the fact that long distance skip would occur fairly frequently (see the articles about the 100MHz FM skip in this group). The FCC wanted a *local* broadcast service, so they could assign all the frequencies without having to worry about long range interference (wouldn't be as bad as AM, because of the "capture" effect of FM recievers (a signal only about 2 or 3 or so dB stronger will completely take over the reciever, and you won't even know that a weaker station is even there.)).

Is KJAZ no longer commercially viable or is current management the
problem? KJAZ is owned by Ron Cowan. When you look at the mess he
has made of office development at Harbor Bay, you have to conclude
he is the problem. A sale to the right buyer could be the best
thing for KJAZ.

I would certainly want to feel certain that the station managmement
was sound before I contributed anything.

Matthew Bye (matt@wni.com) wrote:

: My question is, what happens next time around when the bills pile
: up and the advertising dollars aren't sufficient to keep things going ?

They go broke. I think it's bad practice to ask for money when the ship is sinking when they should either be patching the holes or jumping out. KJAZ always was a marginal commercial success. There were times when Pat Henry, the former owner, would shut it off at night because it wasn't economical to pay a DJ after midnight. And this was when KJAZ lived in a smelly old Victorian house and people DJ'd there not for the love of money, but for the love of jazz. So, Ron Cowan takes it over, moves it to spiffier quarters and takes on a debt load (the purchase price), gets in over his head and has to sell.

: Jazz is an important element in the San Francisco radio scene....

If it is then why can't anybody make money at it? Why are jazz clubs closing all over? I like the genre myself, but man, jazz is simply not popular in the Bay Area. No more Keystone, no Kimball's, Yoshi's may be out of business soon...

What puzzles me is that the word "jazz" seems to be the kiss of death. Why then, has KKSF, a very successful station, been sneaking the word "jazz" into their position liners?

What format name?

And BTW, Tom Leykis isn't a "left-wing Rush [Limbaugh]." He's
actually a small-l libertarian who takes equal glee in blasting
both conservatives and liberals. He is, however, a strong defender
of personal liberty.

> a couple-hosted "relationship-oriented"
>show...who is the actual target for this programming? Men and Women 18-34?
>"Yuppies?" I'm curious simply because it seems like it could be a nice break
>in the local action (where I'm from) of largely conservative-oriented talk
>and it seems as though it would be more competitive with "younger" formats,
>such as the slew of music stations (AC, CHR, AOR, etc.) that want that
>demographic. Is this format starting to spread?

I'm not in radio (but I'd like to be :-) but here's the deal: talkradio
was the hottest radio format in Los Angeles after Leykis hit town.
He took a dumpy, frumpy, big-watted wasteland called KFI-AM 640
Los Angeles and, with the help of his producer and a smart Program
Director, turned it into number 3 with a bullet, Arbs-wise. Competing
head-to-head with 9000 watt semi-conservative KABC, the originator
of "TalkRadio" in L.A., Tom made it a race - especially when KFI carried
Rush in the morning and Tom in the evening.

Talk radio appeals especially to drive time - especially, IMHO, evening
drive time when you're PISSED OFF at the day's events but you're
still stuck in traffic. As drive time has increased (op. cit. L.A.
freeway traffic times are often well over an hour and closing in on
two hours each way on average) and as the Evening Newspaper has vanished,
talk radio is filling this niche. Demographics are 18-49, with slightly
more males. Incomes are disproportinately skewed towards the upper
end, as it takes intelligence to listen for more than 5 minutes to
"talking heads" (but we all KNOW radio is a VISUAL medium, right gang? :-)

>scott gilbert
>james madison university
>wxjm-fm 88.7

Hope this helps. All of this is IMHO (in my humble opinion).
YMMV (your mileage may vary).

1562. minority preference strikes again

Newsgroup: rec.radio.broadcasting
Date: 1994-05-07 02:48:29 UTC
From: barry@coyote.datalog.com
Message-ID: <2qevht$7fa@vixen.cso.uiuc.edu>
Source record: 40153

Minority preference, the FCCspeak for affirmative action and reverse discrimination, has awarded the listening community with yet another example of how well it works.

Among a field of nearly a dozen and a half applicants for an 80-90 breakdown in Tucson, a "feminist" group received the preference, in part, due to the women who were to be in charge, programming aimed at women, etc.

Last night, the first of the local TV ads for the new station was seen. It depicts a pig on a motorcycle, and announced the "new" KKHG, or K-HOG. The station, which has been LMA's to another local company, apparently feels its strongest attraction is the morning show of Mark & Brian.

The sad thing here ... as with most of these (we had a 50 kW station awarded to a black man, who had a sales agreement for $1 million even before the station was built .... or a Class C FM up the road, given to a sight-impaired Mexican, only to be sold for $4.25M a few months later), is that the number of stations actually built and operated according to the promises of the applicant appears to be minimal...if not non-existant.

Since the grants are made, there is no suitable way to complain to the FCC other than at the next license renewal. However, does anyone know of any reason for us to expect the FCC to actually condition renewals on living up to any part of the promises in the minority preference weighted application?

Short of talking to your local congressmen, there appears to be nothing that will have any effect ... and it just seems (from recent conversations) that it isn't PC to question these grants.

comments anyone??

Sorry.

WDCB was shortspaced to begin with in the 70's. The majority of our funding comes from Illinois Community College District 502- which is DuPage County, a small portion of Northwestern and Western Cook and an equally small portion of northern Will Counties.

The fact is...5Kw is perfectly fine to handle this area...our primary service area. 'Tis a shame, I know, expecially considering WBEZ' abandonment of accoustic music---and I do a folk show.

But then, the station is owned and operated by College of DuPage...

Scott D Fybush (fybush@world.std.com) wrote:

: The subject line pretty much says it all. My E-skip catch of the
: day came in my car, as I was driving around looking at the
: broadcast towers of Springfield, Mass.

For me, the opening happened while I was in my car plowing through a driving rainstorm on Interstate 70 near Boonville MO. I tuned to 94.1, and, instead of KFKF, there was...easy listening! It's not a common format in this trailer-trash-tuneage-infested part of the world, so I kept it on to find out it was WXEZ from somewhere in Virginia. Also heard a modern rocker at 96.1 that I think was in the Richmond market and WRVQ at 94.5, overriding the signal of KRXL (Kirksville MO). The opening held all the way into Columbia (about a 35 mile trip), and seemed to stay mostly on the stations just mentioned.

Picking up WXEZ reminded me of how common the "EZ" format used to be in the early and mid-80s and how it has all but died out in most markets.

Kansas City had KMBR ("Keep Making Bad Radio"), now KLTH, representing the Bonneville form of the genre. St. Louis had KEZK, built on the ashes of the old open-access station KDNA, representing the Schulke form of the genre. In Kansas City, KCEZ (now KCMO-FM) was the station playing the Schulke tapes. For the first four years of its life, 1982-86, KARO in Columbia ran the Bonneville format with CBS news at the top of the hour. KARO dropped the format for AC in 1986 the same week that KLEF in Houston dropped classical for oldies. (I was living in Houston at the time, and it was as though the newspapers and TV stations just discovered that radio stations do change formats. Oh, the River Oaks crowd was livid!)

When KARO switched formats, Columbia's GTE telephone exchange overloaded and in the process managed to render the local 911 service useless for about a day.

KCEZ subsequently became a CHR and then oldies KCMO-FM. KLTH and KEZK both transitioned to a "lite AC" format during 1990-1991.

Enough bloviation on my part!

Normally driving Interstate 70 through west-central Missouri is among the most dismal of listening experiences (although the recent advent of KBXR in the Columbia market now helps on the east side of the trip) but it wasn't that Saturday!

> Carle "are we on air?" Amyotte

Yeah, got one. Dale Dudley and Bob Fonseca are two of the best
morning drive time guys in Austin, Texas (KLBJ-FM, classic rock
format, bigtime Arbs - you listening yet, Dale? :-)

They do "Lesbian/Bisexual Dial-A-Date", which has been THE
most controversial stunt (I think) in the past few years.
Typically interesting women call up and want to get together
with other women - we get to play voyeurs while trying to not
go into a ditch on the highway. Dale handles it very well,
with a lot of taste, but invariably the station gets LOTS
of calls. You have the conflict of liberal Austin vs. the
buckle-of-the-Bible-belters going after each other -- with
the (classic) rockers getting kinda turned on, too. Good schtick,
good radio. It might work in up-tight Ontario, too.
Have your bail money ready <grin>.

You should probably give Dale, Bob, and their station a call
first before using the bit and to get some pointers on how to
handle the deal -- its the ethical thing to do, right? A little $$$,
maybe?

Dale needs money to support a re-try at dating Christine
Kahanek, a local TV weatherperson of dazzling beauty ...

Of course, you could always subscribe to one of the masters
of bits, Frazier Smith - he has a service, last I heard.
The Fraz. was great on KROQ-FM and KLOS-FM in L.A. back in
the '70's and '80's.

From: dsrekrb@prism.gatech.edu
Message-ID: <2qevib$7fk@vixen.cso.uiuc.edu>
Source record: 40158

I've been doing a talk show for a noncommercial station for a year and a half, and now I have a chance to take it to a commercial AM station. I would buy the airtime myself and then sell spots within my block of time.

Has anyone else here done something similar? I need some advice on how to pursue this. It seems like there are a lot of Catch-22 situations involved with beginning. I can't really commit to buying the airtime unless I have some reasonable assurance of landing sponsors, but then I can't commit to the advertisers until I have a show.

On my show, I interview writers of genre fiction (SF, horror, mystery, fantasy) which is a slant that I've not heard of in commercial radio. I have a list of publishers and bookstores in this area and businesses that I think might be interested.

Any advice through e-mail or elsewhere would be greatly appreciated. Thanks,

Dave

1568. Cincinnati Radio Update

Newsgroup: rec.radio.broadcasting
Date: 1994-05-07 03:09:32 UTC
From: john.simpson@sdrc.com
Message-ID: <2qf0pc$9nu@vixen.cso.uiuc.edu>
Source record: 40159

Here is an update of the radio situation in Cincinnati:

WIMJ-FM 92.5: Jacor now controls programming and advertising, and the sale to Jacor is pending FCC approval. The station is now called "The Point" and has an "all rock 'n' roll oldies" (ARRO) format. Call letters will change to WPPT-FM pending FCC approval.

WLWA-AM 550: Programming from the old "550 WLWA" and "1530 WCKY" were merged to create "Talk Radio 550 WCKY". The official call letters will change to WCKY pending FCC approval. This station is owned outright by Jacor.

WCKY-AM 1530: Plays "nostalgic" music (popular music from the '40s and early '50s plus "adult standards" from more contemporary artists). They now call themselves "1530 WSAI", and will be WSAI officially pending FCC approval. This station is owned and programmed by local attorney Chuck Reynolds. A "joint sales agreement" exists with Jacor.

WSAI-AM 1360: Airs the "Radio AAHS" children's network. Call letter change pending. Owned and programmed by Reynolds with joint sales agreement with Jacor.

1569. New York Radio Ratings

Newsgroup: rec.radio.broadcasting
Date: 1994-05-07 03:09:33 UTC
From: bruces8852@aol.com
Message-ID: <2qf0pd$9o0@vixen.cso.uiuc.edu>
Source record: 40160

The Winter New York Arbitrons are out. The following results(not complete)
were published in New York Newsday:

Total:

WLTW (Soft AC) 4.7
WCBS-FM (oldies) 4.6
WINS (news) 4.3
WRKS (urban) 4.3
WABC (talk) 4.2
WBLS (urban) 4.2
WQHT (dance) 4.1
WHTZ (CHR- Modern Rock) 4.0
WCBS-AM (news) 3.6
WMXV (AC) 3.6
WQCD (Jazz) 3.6

Percentage of Listeners 25-34

WCBS-FM 6.4
WLTW 5.8
WXRK 5.5
WQCD 5.1
WBLS 5.0
WMXV 4.5
WPLJ (AC) 4.4
WSKQ (Spanish) 4.1
WRKS 3.7
WINS 3.4

Morning Drive
WXRK (Stern) 8.3
WINS 8.0
WCBS-AM 5.6
WOR (John Gambling) 4.7
WFAN (Imus) 4.3

WAXQ the new hard rock station hit 1.6 total in its first quarter. WAXQ
topped men WNEW-FM among men 18 to 34 years old 6.6 to 4.3. WNEW-FM sagged
to 2.2 % of the total audience compared to 3.5 % a year ago.

WBBR now over a year old can still only pull 0.3. How much longer can they
last.

Greetings from Carlsbad, California

[in a previous post I wrote that Bill Gates appeared on Tom Leykes show. I have received several internet cannings; knowing it was actually Daryl Gates. Thanks to all who told me! Ouch, does that hurt!?!]

UCLA football and basketball broadcasts are moving from (now) 710Talk, KMPC Los Angeles to XETRA-AM (690, Tiajuna, B.C. Mexico). The long-awaited announcement on the three-year deal was Thursday. With the Bruins, San Diego State, Kings and Chargers in the play-by-play fold, XETRA is looking to buy a second station in the San Diego market. (But would it be a duoply with the station officially in Mexico??)

XETRA-AM broke the story on SDSU basketball coach Tony Fuller leaving for Pepperdine. According to the Oceanside Blade Citizen, the reporters told the school!

Jim Rome, of Smack-TV fame (with his on-air tuff with Jim Everett) was ripped in the latest edition of the weekly TV Guide. The ESPN2, and XETRA-AM Los Angeles based talk show host was grilled by the weekly pub. "It's name calling you'd expect to hear around a kindergaren sandbox." Rome "was cruising for a bruising." Apparently not, his latest books are up.

omm'A Givens, the 6'11" prep All American basketball sensation from Washington, will be a guest on the John Kentera prep show tonight. Givens has signed with UCLA. Yes, that's how he spells his name: omm'A.

San Diego Padres GM Randy Smith will be a regular guest on KFMB (AM 760 50kw,U) on Sports Sunday. The show, recently re-vamped by KFMB is using six anchors. {I'm confused, and so are the listeners, when they all fight for the mike.}

Pat Haden, of CBS Sports fame, has decided not to jump ship to the new Fox football telecast, and will stay with CBS radio as a play-by-play announcer. (I can hear it now: view the pictures on TV, listen to the game on radio.)

KMPC (AM 710, 50kw-d, 10kw-n) final jump into talk radio occures on Monday, May 9. Former KFI weekend radio host, Joe Crummey is the lead in to Tom Leykes' show. Crummey is still pedling his brain operation video to help pay for the medical bills.

Hello Radio,

KDBK "Star FM" has made a switch. In a recent post it was reported that Crescent Communications, owners of KSOL "Wild 107.7", had purchased KSRY/KSRI on 98.9/99.1FM. Since then, KSRY had been airing the liner "Star FM, hits of the 70s, 80s, and 90s...but not for long". Now what used to be KSRY is now id'ing as KSOL. I can't confirm that the KSOL program is also being aired over the 99.1 transmitter.

KGO 810AM, San Francisco's talk powerhouse went dark! KGO was off the air for approximately 90 minutes. I'm guessing that the outage began around 0200GMT and lasted until approximately 0330GMT. When the station returned to the air, the evening personality mentioned engineering difficulties and people running around like crazy, but no
specifics were forthcoming(no surprise). To my dismay, local noise prevented me from getting solid copy of any other station on 810 kc :(did anybody else out here catch some DX in the absence of KGO ?

Comments, clarifications, and further info is welcome.

Group-W has begun construction on radio studios at 855 Battery St, the home of KPIX-TV channel 5. Group-W has purchased KKHI AM/FM. The word is that Group-W is going to try an FM news operation and is committed to making it a successful FM news outlet. Also rumored, is that talent from KPIX-TV will also appear on radio on a regular basis. The idea is to have consistent and familiar talent on TV and radio. I'll follow up with
more news as it comes down the pike.

I am in a quandry and thought I would appeal to those experts out there. My
office has recently relocated to a new building. Although I am physically
less than one mile from the studios of WTEM (DC; actually Rockville MD), since
I am inside a relatively large office building (not near a window; flourescent lights,
computers, etc), I am unable to receive the signal at all. As a
long-time Imus listener, this has presented a major problem. Although I can
tape-record the program and re-play it the next day at work, much of the news
on the program loses its timeliness. Does anyone have any suggestions for me
(not to include giving up listening to Imus!) that will allow me to receive
the program?

PLEASE SEND YOUR REPLIES TO MY PRODIGY ACCOUNT UASR74A@PRODIGY.COM

Thanks,

Jack Schnapper

KSOL is now KYLD, still using "Wild 107", however, the other half of the
old KSRI/KSRY team is calling itself "98.9 KSOL" but still ID's at the
usual times as KSRY, San Francisco. For those of us who have been around
SF for a bit, it sounds like the KSOL we knew, with your new and old R&B
mixed together. As it was pointed out to me, KDIA in Oakland does this
quite nicely, but on AM. Should be interesting to see what becomes of
this regularly changing 98.9 frequency. I've stopped counting how many
different formats have been tried on this spot on the dial.

Since March 14, 1994, a Digital Radio transmitter has been in operating in Toronto. Mounted permanently on the CN Tower, the Toronto transmitter is similar to one launched in Montreal on March 11. The world's first permanent Digital Radio transmitters are being used for research and development, including permitting radio programmers to gain experience in broadcasting digitally.

The transmitters are owned and operated by Digital Radio Research Inc., a company with a budget of over $2 million supported by a number of private Canadian broadcasters (including CHUM), the Canadian Broadcasting Corporation, and the Canadian government.

While the material being broadcast may change at any given time, depending on the research underway, the programming is usually a simulcast with existing AM and FM stations. Since the transmitter carries up to six programming services simultaneously, there are usually a number of different radio digital broadcasts available at any given time. In Toronto, both CHUM-AM and CHUM-FM are active participants, usually simulcasting with their AM and FM transmitters.

There are four mini-vans equipped with digital radios which are available to CHUM and other broadcasters on a regular basis. I understand that CHUM

and other broadcasters will use them in promotional activities, and the public will be able to "hear" Digital Radio in action. (The mini-vans are also equipped with AM and FM radios, so that a real-time comparison between analog and digital can be made of the identical programming.)

>
>WIFE 1310, I believe, got into hot water with the FCC for rigging a
>contest. Someone told me they lost their license over this and other
>things, but I don't know for sure.

WIFE was started in about 1963 by Don Burden (or Burdon?), who was owner of Star Stations which had several other midwest affiliates (KOIL in Omaha, for one; also a Seattle station). They all sounded the same and traded DJ's back and forth. Burden got in hot water with the FCC and lost all his licenses. I've heard two versions--that the stations ran rigged contests, and that they double-billed clients.

Having grown up with WIFE (they always wrote it as Wife), I can state with the smug assurance of a brash teenager that Wife was a better station than WLS, with funnier jocks, a better playlist, and more exciting contests. I listened to both and much preferred Wife (I am speaking only of 1963-1965 here). Wife went downhill fast after I left for college in 1965. When Joe Light left the night show (to go to Seattle I believe?) he was replaced by an ex-country jock who used the name Robin Walker and who was lame compared to Light. He only lasted a few months, but Wife was never the same after that.

Over the years they had two morning men who used the air name Roger W. Morgan (no apologies to Robert W. Morgan--the west coast was too far away for Indpls teens to realize the near-plagiarism). The first was fabulous; the second not. And during the height of the British invasion they hired a Brit with a terribly exciting accent to do mornings, and they had the gall to name him James Bond! What a crazy, wonderful radio station. It was directly responsible for me making radio a career.

Hi, Matthew: The problem here lies not with the station, which was more
or less in the black, but with the owner, Ron Cowan, local real estate
tycoon, who borrowed FOUR MILLION dollars against the station, reportedly
to finance improvements to his 12 million$ house in Marin. This after
spending decades telling folks how much he loved and supported jazz.
After all, what kind of 1750 watt station can run up a 4 million dollar
debt? Some of us are urging contributors to ask for answers before
pledging...There is no question that the station could be run profitably,
even given existing staff, if the interference of the owner were
eliminated. Any periods of severe red ink correspond with his choices in
management personnel running up the bills and then being fired, and the

shortfalls for the most part made up in normal operation. It's very hard to believe that a guy with his name on so many deeds around here would sacrifice the station rather than come up with another way to juggle his assets, and here he's asking folks like me for our grocery money...

I read in the LA Times that KMPC is running 10 minute samples of their up-
coming programming for 1 to 2 weeks before starting the actual broadcasts.
This started on May 1 so Tom should be on in a couple of weeks.

BTW Larry King is still not in the LA market I wonder if KMPC will pick him
up?

If anyone out there can fill me in on the status of any radio stations in Northern Maine, I'd love to hear from you. I'm particularly interested in hearing about WCXU/WCXX (Caribou); WTMS (Presque Isle), and WBPW Power 96 (Presque Isle). I'd like to know how these stations are doing, what format they are playing now, etc.

In article N.Michigan Silmulcasting, From: Christopher J. Bessert <343GRPW@CMUVM.CSV.CMICH.EDU> reference is made to several Northern Michigan small market FM's simulcasting signals from larger markets (sometimes only slightly so...)

I used to own a radio station (WDBI-FM, 107.3mHz in Tawas City, MI), now being used as one of these cheesy repeaters for a station in Alpena. I can't speak for every small market or every station in these markets, but much of this is the fallout of Docket 80-90 allowing anyone with access to a database and a couple of grand to wedge in a new FM station.

In our case, things were aggravated by the closing of Wurtsmith Air Force Base, enormous debt service and some guy in Alpena willing to buy us out. We had 8 great years of LIVE, LOCAL programming, both music and news, winning an award of excellence from the AP in 1992 (along with WWJ, Detroit and WOOD-AM, Grand Rapids...good company!).

Most of the broadcasters in Northern Michigan these days are less interested in radio than they are in advertising sales. By that I mean that they really don't care about serving the communities they cover or are licensed to...they care about covering the geographic areas in order to deliver an audience to their advertisers.

Personally, I find most of this kind of stuff to be not in the public interest at all, and a kind of payback for letting the 'marketplace' run things...a la Reagan, Docket 80-90, AM Stereo, etc. kind of a governmentally assisted industry suicide.

On the other hand, this is still the most fun you can have with your clothes on!!! (I think this is Imus's line...but it's true!)

1585. Old FM Allocations

Newsgroup: rec.radio.broadcasting
Date: 1994-05-07 03:10:10 UTC
From: mh5260@ARK.SHIP.EDU
Message-ID: <2qf0qi$9q3@vixen.cso.uiuc.edu>
Source record: 40176

I have a question about how the FCC gave out FM licenses to broadcasters:

Did the FCC cut alot of slack to people who wanted to get into FM early in terms of power? For instance, a station near me, WINC-FM Winchester, VA, came on the air in the late 50's to early 60's. Their authorized power (if I remember correctly) is 22.5 KW with the tower at 1,400 ft. That equals alot of ERP!!! This station is receiveable clearly (without any interference from stations on neighboring frequencies) thgroughout the Washington/ Baltimore areas and into South Central PA. I have always been wondering how they can be so powerful? Did the FCC let them do this since they got into FM early or they some sort of special station that can have this incredible coverage? Any ideas would be apreciated.

Thanks,
Mike H.

In issue #610 Loren Omoto is quoted as saying,

: There also exists in the dark recesses of my long-term memory
: recollection of 94.5 simulcasting an Easy Listening format with its AM (at
: Mexican clear channel 730 kHz).

Actually, WVIC-FM, 94.9FM did do an easy listening format way way back...when calls were WGBS (I think...). Also during mid/late 70's VIC was playing tons of disco during the day and rather progressive stuff at night...(Bram Tchikovsky, and a lot of other bands that didn't last too long...). I was on-air there then, and it was kinda like you flipped a switch at about 8pm. Then, in July 1981, the station was sold to Goodrich Broadcasting who promptly changed the format to a very soft soft-rock where it stayed for a year until the station pretty much hit rock bottom both in ratings and revenue. In August of 1982, 'the new 95 FM' was reborn as a pretty much straight ahead CHR station. They hired some new people, kept one from the soft-rock (who actually was a hold over from the old days, Bob Berry) and rehired one who left in '81 (me).

Since then, the station has pretty much been the basic CHR station it is today. Retro is happening all over at CHR and 'Mix' stations though. I've heard it in most decent sized markets from Lansing to Dallas (during a trip in March of this year.) It's lost on me though...I played enough Bee Gee's and Village People to last a lifetime while I was there...

When I left my home of sixteen years, Burlington, Vermont last
December, the local ``EZ'' station, 92.9-WEZF, was still going strong,
and I suspect they'll still be around for quite a while. ID is ``E-Z
93, WEZF, Burlington, Plattsburgh, Montreal''. From their transmitter
on Mt. Mansfield, they have a similar coverage pattern to co-located
WCAX-TV (ch. 3), also licensed to Burlington; both stations cover all
of northern and central Vermont, northeastern New York, and
southwestern Quebec. Principal competition in the
Burlington-Plattsburgh market is ``Warm 92.5'' WMNM, and in Montreal
(English) ``Lite 92.1'' (CFQR, if I remember correctly).

WEZF has not done all that well in the ratings in recent years, but
their combination of format and coverage area makes it possible for
them to sell quite effectively to the doctors'-office crowd. The
actual number-one slot in the market rotates among (Hot Country)
98.9-WOKO Burlington, (T40) 95.3-WXXX South Burlington, and (AOR)
106.7-WIZN Vergennes. Before WQCR turned into WOKO, it was the latter
two almost since WXXX went on the air. (The story of the demise of
WQCR is an interesting one, which I should probably relate to this
group sometime later.)

In addition to these three stations, which are all locally-originated
and live, there is also all-satellite 99.9-WGFB Plattsburgh
(``B-100''). This station used to have a significant presence in the
Burlington market, but the advent 100-kW WOKO and cheap consumer
radios without switchable AFC has taken much of the west coast of New
England away from them. Before WXXX came on the air, Montreal rocker
CHOM and T40 CJFM also had significant Vermont audiences.

All three Montreal stations advertise on US stations, particularly
3-WCAX and 5-WPTZ during the late-night hours; WPTZ for one claims a
Montreal audience of one million, which is ten times what they can
pull on this side of the border.

1593. 100 MHz vs 45 MHz for FM

Newsgroup: rec.radio.broadcasting
Date: 1994-05-07 23:46:52 UTC
From: Robert Carpenter <rc@itchy.ncsl.nist.gov>
Message-ID: <2qh99c$oss@vixen.cso.uiuc.edu>
Source record: 40184

Why the move from 45 to 100 MHz for FM? The short answer is that the higher frequency is a better choice.

The paranoid view of The World Against Armstrong expressed in "Empire of the Air", isn't quite right about this one. Sure, Armstrong was in favor of the lower frequency band, but time has shown him to have been technically wrong. Even in 1945-1947, when the allocations were made, it was clear that long distance ionospheric propagation would make a mess of the 45 MHz FM band too much of the time. A wider band was needed than the 8 MHz prewar band at 42-50. The proposals in 1945 ranged from 50-68 MHz up to essentially today's band; 20 MHz wide. Armstrong was backward-looking, thought the higher frequency wouldn't cover as well, thought receivers wouldn't work well, and didn't want the expense of converting his own station. It DID take a number of years before really good 100 MHz FM receivers appeared, but the 45 MHz receivers were pretty awful as well.

The decision in favor of local service vs higher-power wide-coverage FM stations was not really part of the frequency band chosen. The "CBS Single-Market Plan" won, promoted by holders of 50-kW clear-channel AM stations. Actually it only won for the most-populated parts of the country, Region II. This stretched from Washington, DC through Boston, where coverage was limited by a 20 kW ERP, 500 feet above average terrain limit for "high-power" stations. Thus...in answer to another recent question... WINC in Winchester, VA, 60 miles W of Washington, could get nearly any power they wanted. Eventually power limits were applied throughout the US, but old stations like WINC and Hagerstown/Frederick MD were grandfathed. This explains the 200-300 kW ERP you'll see on some Michigan stations. Some pre-WWII stations ran similar powers on the old band.

The class-B and class-C coverage caps (500' and 50kW in the East and Calif., 2000' and 100kW in most of the rest of the US) were not imposed n until 1962. Stations on the air with greater coverage at that time have been "grandfathered" into the present table of allocations.

There were coverage limits in the latter days of the 41-50 mHz FM band, which were imposed largely for political reasons. They were removed from the 88-108 mHz FM band sometime in the late 40s or early 50s, once it became clear that FM had been deeply damaged by the move to a different band (again, entirely for political reasons -- Sarnoff wanted to protect medium-wave AM).

I am not sure why the FCC imposed the limits in 1962. FM was beginning to improve in the northeast and in California; here in the hinterlands, FM stations were few and far between. Activity did not pick up in Missouri until the years 1966-1968 in the rural areas. Several present Kansas City FMs went on the air in 1962-63, after the limits were imposed.

I was wondering what others consider as the best Jazz stations in their market?
In Dallas I listen to the more Traditional Jazz on KNTU 88.1, Denton; however; KOAI 107.5 plays what they call "Smooth Jazz" and they seem to be gaining popularity.
On Sundays, KKDA 730, Grand Prairie has a show form 3-6pm JUST JAZZ hosted by Roger Boynton(sp) though his show has a lot of Funk and Bop Jazz, I have also heard some modern performers.

Several correspondents wrote [many snips made...]:
: >The folks at KJAZ 92.7Mhz in San Francisco are appealing the
: >listeners for financial support to fend off a forced sale to satisfy
: >creditors....
: >
: >My question is, what happens next time around when the bills pile
: >up and the advertising dollars aren't sufficient to keep things going ?
: >
: The problem here lies not with the station, which was more
: or less in the black....
: ...There is no question that the station could be run profitably,
: even given existing staff, if the interference of the owner were
: eliminated.

Sorry to disagree, but the problems with KJAZ-FM are fundamental and not related to Ron Cowan's ownership. As even the long-time KJAZ-FM on-air staff have admitted publicly, the audience for jazz radio in the Bay Area is too small to attract many national advertisers. They have tried to pitch quality rather than quantity (fewer raw numbers, but higher socio-economic status), but it hasn't convinced many advertisers. The station WAS NOT 'more or less in the black'. Ron Cowan's debt service isn't the issue. The cost of capital is part of any station's operating costs, unless the owner is treating his or her station as a charity.

As I noted at the beginning of our thread about the economics of radio, the Bay Area (or any geographic region) has a limited number of broadcast channels, so the programming on those channels will inevitably drift toward formats that attract the largest possible audience segments.

I started my radio career as a jazz DJ and jazz remains my deepest musical love, so it depresses me as much as anyone else that relatively few share that love. But I can't change the facts. Whatever you think of KJAZ-FM's programming and overall quality, it isn't attracting enough listeners on its Bay Area broadcast frequency to be profitable. Sure KKSF is calling its programming 'jazz'. But the growing listenership for KKSF rather than KJAZ means that more people like to hear smooth, gentle instrumental pop, NOT that people care about the word 'jazz'.

The important distinction between broadcast radio and other communications media shows in the fact that KJAZ's programming will continue to be broadcast over satellite. Satellite channels are cheap compared to broadcast licenses, and the potential audience is in the tens of millions nationwide (and growing) rather than 6 million in the Bay Area alone. That means that KJAZ-[NOT]-FM can now stand a chance of finding an audience big enough to attract enough advertisers at a high enough price to turn a

profit.

Subject: KMPC - Leykis
From: Radio DXer, America On-Line

It's interesting to see what other people have to say about the new Tom Leykis show and the "new" KMPC. A lot of Leykis bashers who are really having a hard time with the fact that KFI "might" have some competition, are making a lot of noise and resorting to the same tactics here on AIRWAVES, that Tom is using to get back at KFI. Don't throw stones in glass houses folks!

John and Ken have made NO friends in the station. Ever since John announced shortly after arriving at KFI that he shouldn't have to pay union dues....on air, (They are an AFTRA station.) and getting into a shouting match with the Union rep in the lobby of the station. At that point, John basically blacklisted himself amongst all AFTRA talent in the station. In addition to the fact that they really are no talent to speak of, this was very disturbing. Newcomers just blowing in and making all kinds of statements about the union of their new employer? Do they have a good union back in Jersey, John? Sounds like they didn't have to give up anything to make anything. KFI hiring John and Ken was the biggest break in their careers, and they didn't have any gratitude......Jerks!

From what I hear, Tom was a breeze to work with compared to those two losers. And by the way, How would anyone know what Tom had to say if you weren't LISTENING! Gee, isn't that what Tom is there to do? Get Listeners? Case Closed.

1601. Columbus OH radio

Newsgroup: rec.radio.broadcasting
Date: 1994-05-07 23:47:11 UTC
From: detboy@aol.com
Message-ID: <2qh99v$otf@vixen.cso.uiuc.edu>
Source record: 40192

WRZR (103.1 FM), a Z-Rock affiliate licensed to Johnstown/Columbus, has just disappeared into thin air. They always had reception difficulties, anyway, since they were frequently overpowered in their own market by WAZU-FM (102.9 FM), a classic rocker out of Dayton.

This is really too bad. They were, in their own limited way, what I consider a vital part of the Columbus radio market.

For a #32 market, Columbus had what I would consider pretty active rock radio here: A standard AOR (WLVQ, 96.3, "QFM") which doubles as a classic rocker on the weekend; another chainsaw rocker (WBZX, 99.7, "The Blitz") which also plays quite a bit of what could be considered male-oriented modern rock; and an adult alternative (WWCD, 101.1, "CD101") which, unfortunately for me, overconcentrates somewhat on gay- and female-oriented modern, such as k.d. lang/Melissa Etheridge/Morrissey/ Smiths, while making strange nods to old Beatles and Stones. There is no standard full-time classic rock in the market, although The Arrow (105.7), the lame-o '70s soft-to-medium rock format, made its debut within the past month.

When we lost Z-Rock here, we lost a little bit of the variety which I think makes Columbus fairly unique among markets of this size. Go to similarly-sized markets like Milwaukee, Nashville, Raleigh, Charlotte; and even larger markets like Chicago, and you won't see the variety of rock radio you see here.

My strongest rock and roll hope for the market: CD101 concentrates strictly on modern rock with an occasional foray into punk classics (e.g., Sex Pistols, Stooges, early early Alice Cooper, NY Dolls, etc.,) which would make it resemble San Diego's 91X or Detroit/Windsor's 89X; QFM drops the classic rock shit on the weekend; Z-Rock reappears on 105.7 in place of The Arrow; and The Blitz goes on doing what it's doing now.

I can only dream.

: : > Just watch..."retro" will be the next big format in 12-18 months.

A Top 40 FM here in Atlanta (WSTR) has been doing a Sat. evening disco
show for a couple of years. It is very popular.

: : I know what you mean. A station here in mid-Michigan (WVIC-FM
: : 94.5, East Lansing) which has been mainstream CHR since it went on
: : the air in '63 has begin airing a "Retro Saturday Night" program.

: <...etc.>
: I did get to hear some of KRJY St. Louis in the car this weekend. This is
: the station Heritage (WRTH/WIL) just bought to create a "duopoly" and
: flipped to "K-Hits."

: It is now an all-70s station. There is one curious omission.

: Disco!

One month ago WSB-FM started doing an all-70's format on the weekends.
This station has a "Lite Rock" format during the week, but the 70's weekend
format *definitely* has a healthy helping of disco.

I'm betting by the next Arbitron Atlanta will have one full-time 70's
station.

I think it's a self-fulfilling prophecy. How can the SRF-42 ever get the chance to "sell well" or not if it is not advertised or promoted, and never gets to store shelves? The SRF-39 is at every audio discounter, department store, drug store, and mass merchandiser in the country. The SRF-42? Well, I've been watching its visibility since last year, and so far have actually seen it at two different stores since Day 1. Who is to blame for it not selling well then?

"Lesbian Dial A DATE" is OLD! MOLDY! THis has been done by many, including Howard Stern. By the way, speaking of Stern, his ratings in Rochester took a plunge between the Fall and Winter books. Brother Wease still owns the mornings and never was under any threat from this out of area shocker. While I don't like Wease much either, he is at least local.

I'm curious as to what some of those "pointers" are (e.g., how to get by the
7-second delay, etc.), and whether or not anyone pulls it off. Please let us
know!

Generally you cut your driven element as a half wave dipole (467 divided by
your desired frequency in Mhz plus or minus around 2%). You cut your reflector
to around 5% MORE than the driver element and your directors 2-5% SMALLER in
drecreasing units.

1609. Kansas City Arbitrons -- Winter 1994

Newsgroup: rec.radio.broadcasting
Date: 1994-05-08 00:16:45 UTC
From: Mark Roberts <transvox@tyrell.net>
Message-ID: <2qhb1d$rh3@vixen.cso.uiuc.edu>
Source record: 40000

This is the first of two articles about the winter book. The last time
I posted the Arbs, the article was very long and somebody complained.
So this time I will try splitting the information into two chunks.
The other article will be more analytical in nature. This just has
the 12+ numbers. Wish I had 18-34 and 25-49 (or 25-54), too, but
this is what we get in our local media.

It's also a bit hard to read. I'm trying to jam numbers from nine books
in here to give readers an idea of the two-year trends in this market.

Talk T 9.8 10.4 9.3 7.9 10.0 11.2 9.0 10.9 10.8 9.9 1.1

Category numbers reflect the following format changes:

Winter 1994: No changes for the book, though some after.

Fall 1993: WHB(AM) bought by KMZU(FM) Carrollton, MO, leaves O
for K. Otherwise, no changes.

Winter 1993: On 2/19/93, two-thirds through the ratings
period, KBEQ(FM) changed from H to K. KBZR(AM) now simulcasts KBEQ(FM).
2/3 of KBEQ shares are allocated to H, 1/3 to K. That's the best I can
do! KXXR(FM) changed call letters to KISF(FM) on 2/5/93, but format
remains H.

Winter 1992:
(1) In a complicated set of LMAs,
KXXR(FM) moved to 107.3 (the former KCFM(FM)) and KFKF(FM) began programming
the station at 106.5, using the call letters KKCJ(FM). KFKF is still
broadcasting at 94.1. To reflect the changes, KCFM is treated as being
off the air. KXXR is treated as H. (The call letters KXXR were not
transferred to 107.3 until March 1992; however, all other elements of
the station remained the same.)
KKCJ is in category K. It is being entered as a new station.
This arrangement began 2/15/92. It was too late in the period
to affect Winter 1992 numbers.

(2) Shares for categories S and R reflect change of KRVK(FM) on 4/3/92.

Also note:
KBEQ(FM) was modern rock from 8 pm - 1 am (beginning 10/24/91) but
I am counting as H. Modern rock segment reduced to
10 pm - 1 am on 6/29/92. Discontinued 8/30/92.

==========
Shares by Duopoly, Winter 1994:

Apollo 8.1 (KMXV, KUDL)
Bonneville 19.7 (KMBZ, KLTH, KCMO-AM/FM)

1610. Kansas City Arbitrons Analysis -- Winter 1994

Newsgroup: rec.radio.broadcasting
Date: 1994-05-08 00:16:46 UTC
From: Mark Roberts <transvox@tyrell.net>
Message-ID: <2qhb1e$rh4@vixen.cso.uiuc.edu>
Source record: 40001

This article accompanies the raw numbers derived directly from the spreadsheet of the 12+ numbers I've been keeping for five years. With the advent of format changes and duopolies, only two-year trends are now meaningful.

Also keep in mind that these are 12+ numbers only. I would love to get my hands on 18-34 and 25-49 or 25-54 numbers and crunch THOSE, but I am totally disconnected from the business other than as a sarcastic listener, so that's unlikely to happen.

OK, here's what I see from looking at the numbers from the past nine surveys:

WINNERS:

* The "Flatlands Godzilla" (WDAF, 610) is number one again. KFKF (94.1) is having to fight off inroads from KBEQ (104.3), stopping what was its steady upward march to overtake WDAF. WDAF also shored up its already-solid full-service image with exceptional coverage of last winter's nasty weather. If more AM stations were like this, AM wouldn't be in trouble. I say that even though I despise the music. That's how good it has been.

* Without "gangsta rap," which it has now banned from its playlist, KPRS (103.3) continues its steady growth. The station also reaped much favorable publicity from its ban on gangsta rap, including front page articles in the Kansas City Star and the Kansas City Business Journal. The station is also heavily involved in serving the needs of Kansas City's African-American community. Local ownership does make a difference!

* "The Fox" (KCFX, 101.1) continues its wily ways. Sure the numbers are down from the Chiefs-inflated fall figures, but they are up considerably compared to a year ago, and up nicely compared to the winter of '92. Too bad that much of this growth was achieved because of--or maybe despite?--an increasingly narrow playlist and a revolving-door policy regarding air talent. Or, as local comedian and former KCFX morning DJ David Naster said last month in a local tabloid (NiteLite), "it could be that playing the same 22 songs all day, every day, works."

* "Oldies 95" (KCMO-FM) never makes a spectacular showing, but its audience shares are rock-steady. I use a measurement that I call "velocity," for lack of a better term, which I derive by taking the standard deviation as a percentage of the average shares over the past nine books. KCMO-FM has an amazingly low velocity of 9.8% (KPRS is next with 9.9%).

* KXTR (96.5) is down a bit from the 1.2-point growth spurt in the last book, but it is still showing surprising strength for a classical station at 3.2. Still, classical fans better be sure that owner Robert Ingram takes his vitamins and stays in good health despite his advanced

age. Once he's gone, it's likely the format will be, too.
* Bonneville Broadcasting, owner of KMBZ and KLTH for 26 years, seems to come out a winner even though indications are out there that the company overpaid Gannett to pick up KCMO AM and FM. The only lousy performer in the new four-station "duopoly" is KCMO(AM), which may reflect some bad programming decisions on the part of Bonneville. It's too soon to tell from this book.
LOSERS:
* Sconnix Broadcasting (KFKF, 94.1 and KKCJ, 106.5). KFKF has been hurt by the advent of KBEQ, no doubt about it. In the previous two winter surveys, it topped an 11 share. Now it's below 8-1/2. Industry sources say KFKF spent between $300,000 and $500,000 on its winter promotions to try to fight off KBEQ. General manager Dan Wastler told the Kansas City Star that those numbers were inflated. What ISN'T inflated is the audience share of KKCJ. This station has clearly failed in its mission to serve as a spoiler against KBEQ. As I have said before, it is a waste of bandwidth that is doing a disservice to the Kansas City audience by occupying a channel that could be used for a format presently not represented in the market (70s oldies, modern rock, adult alternative, just to name three).
Sconnix executives should be given the Singapore treatment for what they have done to the listening choices available in Kansas City. It should be noted that the combined 12+ share of the Sconnix stations still is less than the audience share of WDAF alone. The Kansas City Star also reported that KFKF showed only "slight improvement" in its 25-54 numbers. No details were given.
* The Rock (98.9, KQRC) is clearly sinking. This is the second time this has happened to the Milwaukee Journal-owned station. A new format makes a big splash in its first book, and quickly becomes an underperformer. It's not quite as low as "The River," KQRC's previous incarnation, but give it time.
* KFEZ (1190). It's hard to tell exactly how this station is doing, given its relatively low audience shares. I get a velocity figure of 33.3%, second-worst in the market (KISF, 107.3, is the worst at 39.9%, but that station went through a bizarre LMA, as described in the spreadsheet article). It's down sharply from the surprisingly high 3.4 share in winter 1993. This may have been a statistical fluke. Still, the station clearly is not doing as well as it did during 1992.
* KNHN (1340). How does this station stay on the air? It never seems to break the 2.0 barrier, and yet it's running an expensive format AND satellite synchronous rebroadcasters to try to improve its signal. Again to quote David Naster, "If you haven't heard KNHN ... it's probably because you don't drive by the building they broadcast from using three Mister Microphones and six D-cell Eveready batteries."
SINCE THE WINTER BOOK:
There have been three changes in the market. KMXV(FM), 93.3, has transitioned to a conservative CHR format with some 80s oldies and even a few modern-rock crossovers. KBEQ(AM), 1030, became the market's first fully satellite-fed talk station when it picked up the People's Radio Network. KJLA(AM), 1510, just became the market's second such

station, when it changed calls to KCTE(AM) and picked up "The Team," a sports talk network based in Washington, D.C.
KBEQ might hurt KNHN and KCMO but, without any kind of local image, I don't expect much of an impact. KCTE might do better, because sports fans tend to be immersed in this sort of thing; however, the station's impact is limited because of its daytime-only status and crummy dial position.
KMXV is a big question mark. Clearly it will hurt the 1100+-foot KISF rimshot, which has some signal problems in metro Kansas City. I often joke that "Kiss 107.3" has a great signal everywhere except its intended market. KISF has shifted its CHR format a bit and now airs some crossover gangsta rap and plays more urban-based artists than before. But going after KPRS rarely succeeds; KPRS listeners are uncommonly loyal to the station. On the other hand, KMXV still may not have shed its AC image (the slogan is STILL "Mix 93.3," for instance).
The local alternative press gives a lot of ink to KLZR (105.9) in Lawrence, KS, the nearest available modern-rock station, but it has made no discernible impact in this market, no doubt in large measure because of significant signal problems.

Source record: 40003

BBC Radio in the UK
****

There has been a number of questions about the BBC in this journal, many want to know what is happening with the "beeb". I cannot speak for the BBC in the US or for that matter outside Europe but over here the breakdown is like this;

Radio 1 FM - this is a pop music station, (some would say THE pop music station in the UK) which has the largest audience of any station in the UK. Only in London does any station get a greater audience share than 1FM. It has recently undergone a rethink, with a complete change of format and the loss of most of the presenters. Although this has caused a great number of listeners to go to other stations the debate as to whether the new look Radio 1 is better than the "Radio 1 classic" rages on. For my money the new Radio 1 is far better and is different to other youth stations.
1FM broadcasts on FM, AM and across Europe on satalite.

BBC Radio 2 - This is also an FM station broadcasting mostly a gold format although this is a little unfair. Radio 2 covers many musical forms and these may range from the Beatles to Edith Piaf. They feature a number of talk shows which include comedy and current affairs.

BBC Radio 3 - A classical station, until recently the only classical station but now with the start up of Classic FM (an independent national station) they have competition. In an effort to compete Radio 3 have started to play more popular classics although personally I think they should have gone the other way and been as different as possible.

Radio 4 - This was the Home Service of the BBC. The news and current affairs coverage is superb, the satire is cutting and the theatre is excellent. It is a speech based FM station which produces similar programmes to the world service but with a UK bias. Radio 4 broadcasts on both FM and Longwave although there has been some talk of cutting the longwave signals. This has caused uproar as the FM coverage is poor in certain areas so now the signal is broadcast on both unless there is cricket coverage which takes over the LW frequency.

Radio 5 (live) - is the new station in the BBC fleet. Radio 5 was a sport and childrens channel but has recently changed to become Radio 5 Live a rolling news and sport station. Having the backup of the BBC news team there coverage also extends to current affairs discussion programmes I believe. Radio 5 is only broadcast on MW.

BBC World Service - Respected around the world as the voice of truth and honesty the BBC tell us, the world service has coverage in most languages and broadcasts news and special interest programmes around the globe.

BBC Local Radio - The country is covered with BBC local stations. Mostly they are broadcasting to housewives and tend to have a recent gold format. There all about competitions and local news. That is a gross generalisation I know as some are far better than others. Overnight many stations now join up in there region to give a regional service.

BBC Regional Radio. - These stations (BBC Scotland and BBC Wales / BBC Cymru) broadcast to there regions and I know little more than that. The last time I listened to BBC Wales it was quite good but for half an hour anything new seems good.

Well there you are, some of what's happening with the BBC radio at the moment.

: They do "Lesbian/Bisexual Dial-A-Date", which has been THE
: most controversial stunt (I think) in the past few years.

For some of us this is not a "controversial stunt" at all. Maybe they should take up "Straight Male Losers Dial-A-Date" instead. Heck, even the idea of a gay dial-a-date is old hat. Russ Syracuse was doing this on KSFO (a very conservative SF station) back in the mid 1970s. He didn't bill it as such, but lined up dates with whomever people were looking for. And gay men and lesbians were part of the mix. Maybe it's time to stop looking at "stunts" and try doing some REAL radio, radio which MEANS something to its listeners, instead of serving as fodder for hormone-charged male voyeurs for live for lesbian fantasies. I note that in SF both morning and afternoon drive, by far the largest audience is KCBS, the all-news station, not KGO's happy talk. I'm sure many other communities have similar station ratings. People want a station which speaks to their community, not something which panders to its baser members.

: that we only got old callers and that Mike spent so much time dumping the
: pro-KFI faction. We will not attract any new stations if this continues.

Poor Tom Leykis. If this is a for-real memo from him, his pedestal is tottering and is about to fall. That he should base a show around being anti-KFI is just plain stupid.

If he's learned anything in this business it should be that listeners do NOT like to hear a talkshow host trashing the competition. They want to feel that a talk host is "above" that kind of thing. Beyond that, the days of the radio monolith are gone -- people dial around and listen to a little here and a little there...and Leykis has now (in effect) told his audience that they're stupid because they may choose to listen to KFI. And even beyond that, it's Sin #1: it's not good radio.

I was so hopeful that Tom Leykis would eventually be carried on KSFO, but this time around I'd have to say I agree with Bob Hamilton. Besides, I happen to like listening to Peter B. Collins.

For those who want to order old radio shows, here are the sources I use:

North American Radio Archives
C/O Janis DeMoss
134 Vincewood Drive
Nicholasville, KY 40356

(This is a club which operated an unbelievable library. You join,
then borrow tapes. They do not sell tapes)

Robert Dalton
C/O Learning Media Center
Memphis State University
Memphis, TN 38152

(Memphis State University has an extensive collection of some
unusual material. Prices are inexpensive, quality sometimes marginal)

Carl Froelich, Jr.
2 Heritage Farm Drive
New Freedom, PA 17349

(Nice catalog, good quality tapes, limited selection)

Adventures In Cassettes (Metacom)
5353 Nathan Lane North
Plymouth, MN 55442-1978

(Good quality, often has clearance sales)

Radio Yesteryear
Box C
Sandy Hook, CT 06482

(Nice selection, good quality)

Radio Spirits, Inc.
Box 2141
Schiller Park, IL 60176

(New group to me, nice catalog--They are the ones who produce "When
Radio Was" with host Art Fleming)

Erstwhile Radio
Box 2284
Peabody, MA 01960

(Extensive catalog, you can pick which individual programs you want,
good prices)

Satellite Broadcasting Inc.
4580 E Mack Avenue
Frederick, MD 21701

(New group to me, strange mix of programs on tapes, but some unusual programs available)

The Hall Closet
Metro Golden Memories
Box 421
Morton Grove, IL 60053-0421

(Nice catalog. This is the outlet for Chuck Schaden of WBBM)

In addition, some of us collectors will trade tapes. I would be glad to hear from others with an interest in radio drama, old programs, etc.

To All-

The book by Andrew Yoder is called "Pirate Radio Stations: Tuning in to Underground Broadcasts." It is published by TAB Books and is copyright 1990. It is a very good book and very interesting too. I got it several years back at Border's Books in Washington, DC. It was the only one they had at the time. Unless TAB discontinued it, it should still be avaliable in book stores or by special order. Oh and also, the ISBn ISBN number for the book is 0-8306-3268-9. Hope this information helps out.

Sincerely,
Mike H.

Reported in the local print media today -

KSTE-AM 650 (TalkRadio/KST) sacked morning (9-noon) host Chris Collins and afternoon-drive host Ron Dobson. They'll be filling the afternoon drive slot with Tom Leykis' syndicated Westwood One show (3-7 PM PST) and moving afternoon host Geoff Metcalf into the morning slot. Enid Goldstein (ex-KGO/San Francisco) locally heads up a new 12-3 PM slot. Metcalf formerly had the 1-3 slot and I'd assume that this means the end of syndicated host Dr. John McDougall, at least in the noon to 1 weekday slot. Leykis' show is set to launch Monday, and the other changes will take effect Thursday.

An article in today's Sacramento Bee quotes Collins as saying it just wasn't working out in the 9-noon slot, up against syndicated giant Rush Limbaugh on KFBK-AM 1530, the station Rush worked at until going national.

Speaking of KFBK, they won the award for Best Radio Enterprise Story in the 1993 Society of Professional Broadcast Journalists, Northern California chapter awards. The story on local activist B.T. Collins was reported by Beth Duncan (now with Metro Traffic) and produced by Alex Dittmar. KFBK's sister station Y-92 has the usually outside-active morning team of Paul Robins and Phil Cowan in the news, also... they're up for a San Francisco/Northern California Emmy award for their "The Next Step: Answer Guys" program on KRON-TV/San Francisco (and cable TV's The Discovery Channel). Paul and Phil also nabbed $10,000 this past week from ABC-TV's "America's Funniest People", for a comedy segment taped at a local mall.

Incidentally, folks reading this newsgroup may remember Paul and Phil as the hosts of Fox TV's ill-fated "Wilton North Report", a program that they'd probably like to forget themselves. ;)

Yep disco is staging a come back. Two stations, KPWR (Urban) and KBIG (80's & 90's hits), in LA are doing Disco. KPWR started first about 6 months ago with a 3 hour show on Sunday "The Retro Show" with disco and a little rap. About a month ago KBIG started "Disco Saturday Night" with four hours of classic disco hits.

It will be interesting to see how this developes in other markets.

It hardly seems worth it to even get an AM stereo walkman, since there are so few AM stereo music stations in the first place. I have AM stereo in my car, and while it's interesting and even sounds good when a decent song comes on AM, that happens so few and far between that it hardly seems worth it at all. And on a walkman, where reception is severely compromised by movement anyway, it seems that the advantage of having an AM stereo walkman would be overridden by the cost of such an item.

I've had a Sony AM stereo reciever (the one with two speakers, 'A100)
for several years, but didnt use it much until lately. Moved to Portland
OR just recently, and the only station playing modern rock is on AM,
KBBT Portland 970KHz. They haven't mentioned anything about being in
stereo, but found that they are broadcasting stereo when I tried my
Sony AM stereo to recieve them. I have since hooked up the Sony AM
stereo to my stereo system, thru a graphic equalizer to try to boost
around 3KHz and reduce 10KHz hetrodynes. Wonder if I'm their only
AM stereo listener :-)

Anyone know how well KBBT is doing in the ratings in this market?

>I think it's a self-fulfilling prophecy. How can the SRF-42 ever get the
>chance to "sell well" or not if it is not advertised or promoted, and
>never gets to store shelves?

This is a major cause of the failure of AM stereo. Since the technical quality is nothing to write home about (compared to stereo FM), it must be pushed. I have yet to see anywhere, in any store, a display or even a sign promoting AM stereo. Of course, during the 16 months that 1370 was dark there were no really local AM stereo signals to use for a demo in the south Bay Area, but even when the signal has been available no receivers have been on display.

If broadcasters could see just the slightest evidence that anyone (like manufacturers of consumer equipment, for instance) cared, there might just be the slightest incentive to spend the considerable amount of money to stereo-ize their signal. As it is there are so few set out there that it scarecly impacts the attraction of the station and hence the revenue. Only the owners of 1370 have seen fit to expend the funds to keep a stereo signal on the air in San Jose--or even put one there in the first place.

And somehow I wonder if it had been any other system than Motorola that became the standard, things might be different. I cannot see Leonard Kahn sitting back and watching it all die if his system were on the line.

For whatever reason, AM is in trouble however.

Regarding the requests often seen for Arbitrons for particular markets,
this suggestion may help:

BILLBOARD carries the 12+ numbers for the top 100 or so markets, with
figures from the previous four surveys included. They are usually toward
the back of the book, just ahead of the section with radio station and
"personality" news. The May 7 issue has a ton of them.

1631. Nevada City, CA community station returns to Sacto

Newsgroup: rec.radio.broadcasting
Date: 1994-05-08 19:09:12 UTC
From: parth2@aol.com
Message-ID: <2qjdco$tt@vixen.cso.uiuc.edu>
Source record: 40022

Variety/non-commercial KVMR-FM 89.5/Nevada City, CA has returned to the Sacramento airwaves, with a little help from a commercial broadcaster in the market. The station had been heard clearly throughout the Sacramento market until a couple of years ago, when religious broadcaster KEBR-FM 89.3 signed on. This effectively wiped KVMR off the air in this market, but an admitted long-time listener helped them return this month... the general manager of KSFM-FM 102.5/KSMJ-AM 1380.

With KSFM/KSMJ's help, KVMR installed a translator at the Howe/Arden Professional Building, the Howe Ave. location near Arden Fair Mall that also houses KSFM/KSMJ. The community broadcaster is now heard in Sacramento at 99.3 FM. I don't imagine the signal is all that strong, as it was kind of flaky in the car just as I was pulling up to my home in the Rancho Cordova area...but I am picking it up clearly right now in this 2nd floor room.

his own pocket

His suggestions included trying on weekends when the "$5 an hour hosts" are on the air. They are "much less experienced" and will be more likely to "screwup". He also suggested "going along with the topic" for the screener and springing it on the air in the middle of a thought.
> > if you can get the phrase "Tom Leykis on 710 Talk" on KFI. Double

Charles George (charles6407@delphi.com) wrote:

: I was wondering what others consider as the best Jazz stations in their
: market?

In Kansas City:

The only choice most days is KCUR (89.3, University of Missouri-Kansas City), which programs jazz after the end of its CBC "As It Happens" feed, which is usually around 8.30 pm. It is very well done, with knowledgeable announcers and a good selection of artists.

There is some jazz programming from KANU (91.5, University of Kansas in Lawrence) but it is not as extensive and the signal has problems in metro Kansas City.

KPRS (103.3) has a "Sunday morning jazz brunch" from 8 am to 1 pm. KFEZ (1190, stereo) has a Sunday night jazz show beginning at 9 pm.

In mid-Missouri:

KBIA (91.3, University of Missouri-Columbia), programs jazz after its nightly classical block. The nightly jazz block usually starts at 10 pm.

Elsewhere:

In St. Louis, the Alton (Ill.) rimshot at 100.3 has just moved to a jazz format under the call letters KNJZ.

In the north and western parts of the state, KCNW (90.9, Warrensburg) and KXCV (90.5, Maryville, with Chillicothe repeater at 88.9) also have some evening and weekend jazz programming.

I am neglecting our community-access stations (KKFI, KDHX, KOPN), but their programming changes frequently and I just can't keep up with them (plus, much of the time, I can't hear KDHX in Columbia because of co-channel KEJJ). I just can't listen to KKFI in Kansas City any more, because I never know what it will be broadcasting and when and by whom. (The Transvoxian ideal is *controlled* unpredictability, not utter chaos.)

I read with interest the comments about the status of WCEN (AM). I am a '76 CMU grad, and was station mgr of carrier current WCHP (650). The GM of WCEN at the time, Chuck (somebody or other) was instrumental in keeping WCHP off the city's cable system while I was there. I note that the same "fate" befell WHGR 1290 in Houghton Lake, MI, up the road about 60 miles. They had a 5kw 3 stick arrangement for many years, then sold the land to a shopping center. It is now a omni directional station with reduced power.

At 10 AM on May 8, WNHI (I-93.3) Belmont/Laconia/Concord, N.H. signed on. Format is classis rock (sort of)...intended to be, in the words of pd Harry Kozlowski "very familiar classic rock..no deep cut material". In perusing a couple of days playlists (I work p/t at co-owned WJYY/WRCI EzRock 105.5) I found this to be mostly true, even for someone like myself who has very little use for AOR/CR.
With the exception of Imus-In-The-Morning, all programming is voicetracked on an all-digital workstation. Mid-days will be handled by Dorian Jaye from WLNH/Laconia, Harry Kozlowski (as Bob Payne) will do PM drive, Jeremy Dale--EzRock 105.5 PM driver is nites, and overnites go to new EzRock nite guy Mike Lorin. In addition EzRock weekenders Brenda Sommers, Mike Bradley & Steve Ouellette (yours truly) will pull shifts on I-93.3 as well...all time shifted from their regular live shifts.

Coverage is pretty good for a Class A, serving the Lakes Region to south of Manchester, basically along Interstate 93 (hence the I-93.3 handle).

> } >into FM early...

WINC-FM signed on in 1941 with messages spoken by one of the Lewis family (owners), simply asking for correspondence from anyone who received the signals. (I actually have tape of a bit of it.)

The station has an ERP of 219 kw, and was indeed grandfathered in when the FCC set limitations on such things. Unfortunately, there is sigificant interference in Baltimore and environs from 92.3 ("92 Star," I forget the calls). WINC can be heard EAST of town, although you might need a boat to take advantage of that fact.

When I was working there the longest distance call I got for the FM was from Erie, PA. For the AM (1 kw and simulcast except of Orioles and UVA games) I actually got several calls early on (doing my time on overnights) from Canada.

Best,
Alan

1640. radioprep list

Newsgroup: rec.radio.broadcasting
Date: 1994-05-08 19:09:30 UTC
From: Norm Gregory <normg@halcyon.com>
Message-ID: <2qjdda$us@vixen.cso.uiuc.edu>
Source record: 40031

I am managing an exciting Internet show prep service. The radioprep mailing list. This is a forum for those who daily toil preparing for their air shift. To be frank, it's not a list for those "kind of interested in radio" or for those who are fans/listeners of radio. it's aimed at working air personalities and radio show producers whose target audience is 25+. We are inviting on board radio professionals who do daily show prep and can contribute as well as take from the list.

It's simple to join and it's potiential is great.

And how much does it cost you to add this feature to your current online status? NOTHING! Of course . . . it really depends on where you receive your email . .. some systems, I'm not mentioning any names, charge to receive 'net mail. So beware you will be getting lotsa mail!

To subscribe to Norm Gregory's radioprep mailing list sent a message to our listserver:

majordomo@halcyon.com

(what ever you put in the "Subject:" line is ignored.)

In the message text put this single line:

subscribe radioprep

That's it!

You then will be notified, via return email, of being added to the radioprep list.

When you want to POST a message on the list, and you DON'T have be a list subscriber to post, send mail to:

radioprep@halcyon.com

And everyone on the list will get your message.

Norm Gregory, Seattle.

:if you have satellite Single Channel Per Carrier reception, KMPC is
:right there 24 hours a day.

A couple questions about this: First, don't you mean Westwood One is there 24 hours? KMPC is just the local affiliate, no?
Second, and more to the point, how exactly does that work via satellite? I figured that, if someone wanted to listen to a nationwide broadcast like Limbaugh, Stern, etc., but didn't have a local station carrying it, they could just use equipment similar to that in the affiliates around the country to pick up the feed themselves. However, I also assumed that this kind of professional-type equipment would probably be very expensive. So just what equipment is needed, anyway?

So far this is the most idiotic post I've read on this newsgroup. Seeing how I am the said morning show which does the bit I think I can speak well of this.

People want a station that ENTERTAINS And STIMULATES them. My audience is on of the largest in the city. So are you saying the majority of men and a large amount of the women in the city of Austin are its "Baser Members" ? Granted the bit is not original, however not many stations have the guts to do it. My listenership is made up of people from all walks of life and education. Demographics show that my listeners are also the highest educated. Thank you for enlightening us all on what you think a community wants. Your comments contradict themselves.

We also balance our show with fund raising for Aids services of Austin and we have the occasional discussion of political issues. By the way my Sister lives in the bay area and with the exception of a couple of personalities on my visits I've found it extremely boring for a market of it's size.

If we weren't doing something right, I would not have had the job for seven years. Unless you've heard the show why not save your judgment for SF.

>Thanks-jr

>

>From 1989 to 1991 I was Traffic Manager of a radio station on which we ran CBSI's traffic and billing software on a Wang system. (Kinda ass-backwards, but we got the hardware rather cheap from a drugstore that went out of business. So what if we ruined the hard disk drive? ;)
I felt that on the Wang platform, the software was slow and poky.
But their training and customer support was quite good. Basically, they lock you in an office and teach you□ the software, component by component. They do a rather comprehensive pre-load as well, which saves lots of headaches.
Things I didn't like: you couldn't assign the same random acct. numbers to clients on the AM and FM side. And combo billing was rather cumbersome; it required separate order entry for each station.
Maybe the software has progressed in the last three years; and maybe it's a charming program on a proper platform (i.e. for Windows). But it's been a while since I set foot in a radio station. I hope you can use my information, however outdated it may be.

1648. Andrew Yoder responds to FCC charges

Newsgroup: rec.radio.broadcasting
Date: 1994-05-08 19:33:45 UTC
From: anitam1061@aol.com
Message-ID: <2qjeqp$3a1@vixen.cso.uiuc.edu>
Source record: 40039

ANDREW YODER RESPONDS

PO Box 109, Blue Ridge Summit, PA 17214

Howdy!

Have you ever been harassed by the government? I have been accused
by our Federal Communications Commission (FCC) of operating an unlicensed
(pirate) radio station. I am contesting their fine. I believe that I
might have been singled out as a result of my notoriety in the pirate
listening scene. In fact, the FCC agent who came to my parents' house
told me he read my column every month in one of the newsletters!

I have been fined $17,500-- nearly half of which was for not
letting an agent in my parents' house at 3:00 AM who didn;t have a
search warrant! More troubling aspects of the fine are that (1) they
have no evidence, (2) the fine is 175 times greater than when the pirate
WKND was caught in 1990 (WKND was caught a second time and had
approximately $100 in equipment confiscated), (3) pirate radio is nonprofit
and public service oriented. This fine is on par with being fined $17,500
for being within two blocks of a jaywalking incident.

To start my case, the FCC sent press releases to all of the media
outlets in this area and to all of the radio-hobby publications. These
press releases announced that I DID (without question) operate a pirate
radio station and that these broadcasts could interfere with emergency
communications (again, not true). Without a court case, these press
releases were slanderous and they also damaged my right to a fair trial
(an perhaps even prove myself to be not guilty) because I had already been
pronounced guilty by the FCC and by the mass media.

In addition to being fined $7,500 for not letting someone who didn't
have a search warrent into a house that wasn't mine, I was fined $10,000
for unlicensed operation. The trouble is that this fine is based on
commercial rado stations who make thousands of dollars per day. Also, this
new fin structure was instituted in April 1992--thus, I was fined under a
structure that didn;t exist when my incident occurred! When my incident
occurred, the minimum enforcement was a warning or loss of license, the
maximum was a $2,500 fine (for a commercial station).

Although the FCC has allowed me to question the legalities of their
actions in my case, they have not answerd any of my questions or lowered
the fine (in spite of the obvious conflicts with our legal system).
Yesterday, I received a bill from the FCC stating that I had 30 days to pay

them $17,500 or it would be taken up by a debt collection agency. They did not even notify me of my right to a trial or court case! This is not lawful because they have not notified me of my right to due process (and attempted to mislead me) and because they do not have the power to collect fines.

At this point I'm getting desperate. The ACLU won't represent me because there is a disccepancy as to whether I am guilty or not. After months of playing telephone tag with the National Lawyer's Guild, I haven't come up with any assistance. In the meantime, the FCC is behaving much like an agency from some little totalitarian government. They only need to drag me ff to a jail and beat me for a few days to complete the process. At the pace with whitch they are breaking laws, that might just be next.

This case does have an affect on other aspects of radio operations. Of course beating the FCC in this case will cause more pirate radio stations to go on the air (both on FM and shortwave) because the FCC will no longer appear invincible. This could improve the quality of radio programming in communities across the United States. If I lose, on the other hand, it will be a strong case for the FCC to continue to destroy any sort of alternative broadcasting. The FCC's policy over the past 10 years has been to allow 1 corporation to own more stations than ever (making the mainstream bigger and driving small stations out of buisness) and to raise the minimum power levels of stations (to keep small organizations out of broadcasting). The next step for the FCC might be a major assault on college radio, which has already been damaged. The FCC will only stop when someone else stops them.

What can you do to stop the FCC? Please publicize this case in zines or wherever you can, support radio stations that air programming that you like, and support pirate radio stations. So, if you would like to contact pirate stations for interviews or if you have further questions for me, do not hesitate to write!

73's

1649. Boston station changing formats?

Newsgroup: rec.radio.broadcasting
Date: 1994-05-12 01:40:21 UTC
From: nhmas@gauss.med.harvard.edu
Message-ID: <2qs1e5$8ai@vixen.cso.uiuc.edu>
Source record: 40054

Apparently(if they're not making this up...again :-).a tabloid gossip column in one of the Boston papers got their hands on a copy of a generic fax release from a sales dept. of CHurban WJMN 94.5FM to local ad agencies. It appears 'JMN is pitching a new format which will debut in the next couple of weeks - Top 40 Alternative Progressive geared at mostly Generation X audience(me included, I guess).

Pyramid is expected to take over 94.5 sometime at the end of May. A change of formats has been strongly rumored for the past 5 months, ever since the sale was first announced in the last week of December. This will become 4th FM duopoly in the #9 market...

There is only one AP commercial station in the area -- WFNX-101.7FM. 'FNX's problem is low power - 3,000 watts. It has problems reaching many suburbs south of Boston proper. A powerful, well-programmed AP outlet at 94.5 will reach many more listeners. Many core 'FNX listeners will probably sample it. But, will they stay around at the new frequency?

Nobody in the #9 market ever tried to go head-to-head with WFNX before. Infinity's AOR WBCN flirted with the idea in late '80s but wound up losing many of its 'classic rock' listeners when it began to play AP acts in heavy rotation. It went back to its more-or-less balanced modern/classic rock formula and regained its numbers.

A couple of months ago, Pyramid brought in a new GM with rock radio backround, Matt Mills, to run WJMN 94.5(as well as the older sister station WXKS 107.9FM).

Stay tuned for details,

-Mark

1652. HELP--Antenna design challenge

Newsgroup: rec.radio.broadcasting
Date: 1994-05-12 01:40:25 UTC
From: mjs@hubcap.clemson.edu
Message-ID: <2qs1e9$8as@vixen.cso.uiuc.edu>
Source record: 40057
Cross-posted to: rec.audio,rec.radio.broadcasting,sci.electronics

I don't know if it's possible to solve this problem, but I'd welcome any help. This is my sad story:

There's a very fine radio station that broadcasts from a moutaintop about 80 or 90 miles away, with a few thousand watts of power, at 88.7 MHz. A brand new "Christian" station just fired up from about 25 miles away, putting out about 50,000 watts, at 88.5 MHz! Of course the big, bad, new station's signal bleeds all over the good, little station's signal, rendering it totally unlistenable. (The really maddening thing is, the new station's signal duplicates a perfectly clear signal at 90.9 MHz, owned by the same organization.)

Anyway, if it's at all possible, I'd like to rig an antenna to pull in the station at 88.7 (originating approximately northeast from my location) and reject the signal at 88.5 (originating east-southeast from me). Antenna experts: how would you proceed? Is there some combination of directionality and frequency-specificity that will do the job? Would a Yaggi help, or are the frequencies too close? (I wouldn't mind getting the stations at higher frequencies, although if necessary I could switch antennas to do this.) One more complication: I live in the shadow of a 3000-watt college station's antenna. They are located to the northwest about 1/2-mile away, and they broadcast at 88.1 MHz. (Fortunately, my tuner, an Adcom GTP-400, was able to pull my station in even so. My clock radio never could.)

Is this project completely hopeless? Thanks in advance for any assistance. This place is a radio wasteland without my 88.7!

(E-mail or post. I'll be happy to summarize if anyone else really wants to know.)

> ID's. Same thing a while back when 550 was IDing as "This WAS WKRC
> Cincinnati...550 WLW". Can someone straighten me out on just what the legal
> call letters are on these stations which changed owners?

Sure.

Since I was a boy (I'm 32 now), Cincinnati radio had been like this up
until
last year:

550 was WKRC.
1360 was WSAI.
1530 was WCKY.

After Jacor acquired 550 last year (or was it '92?), and clear through
until today:

550 is WLWA.
1360 is WSAI.
1530 is WCKY.

Sooner or later, all the paperwork will go through and result in this:

550 will be WCKY.
1360 will be ????.
1530 will be WSAI.

Personally, I think 1360 should get the WKRC call, just to confuse us more.

The stations are using the calls to get us used to it, but they have to
give
a legal ID once an hour, so the use the old "was" trick. It's legal, but
certainly confusing.

Hello...

I just finished listening to the Dennis Praeger Show on KABC and today he told a listener that he is doing a 1-hour show on WABC also. I was curious when the show airs in New York and how he's doing.

Dennis makes about the most sense of anyone I've heard on the radio. He describes himself as a "passionate moderate". He has a fantastic ability to cut to the logic of an argument and define the opposing viewpoints.

His commentary on Capital Punishment (which I support, BTW) is that if you choose to support it, you should then have no problems with pushing the button yourself. It definitely made me think, although I cannot say that I have changed my overall viewpoint.

He gets quite a few calls from LA listeners calling themselves "90 Per-Centers". In other words, they agree with 90% of what he says - not a bad average.

Thanks for your input, especially from the New York side.

Take care...
Mark West
Glendale, CA

I took a long lunch today (May 10), drove home, and listened to the solar eclipse.

Observations of the eclipse's effect on the radio dial in south-central Kansas City:

* KFRM (550, Salina, Kansas) could be received in the car without any interference from KSD St. Louis at 11.30 am. The signal was not terribly strong, but the lack of interference was unusual.
* KFDI (1070, Wichita, Kansas) registered a two (on a scale of five) on my home tuner's signal strength indicator at 11.45 am (the peak of the eclipse). Half an hour later, it was back at zero though still barely audible.
* KFSB (1310, Joplin, Missouri) registered a three at about 11.55 am. Normally, I do not receive this station. It appeared to be simulcasting its FM station, which is a real comedown for one of southwest Missouri's high-coverage signals.
* KKLL (1100, Webb City, Missouri) registered a two on the tuner at about the same time. I didn't listen for long; I can normally get it only in the car; normally, it runs a format (Christian easy-listening) that is quite avoidable.
* Traces of KGBX (1260, Springfield, Missouri) were heard at around 12 noon. Normally, it doesn't make it up here at all. I didn't try KWTO at 560; it usually comes in up here OK.
* While on the way home in the car, I listened to the station at 1530 in Butler, Missouri (KMAM). This small-town station had enough creativity to drag a microphone or two out to its parking lot and have its DJs describe what they were seeing and talk to people driving up, asking what they thought of the eclipse and what they were seeing. Little KMAM was doing a better job of being an on-the-spot radio station than the big-city (and not-so-big-city) talk stations relaying the bloated blathering of Rush Limbaugh, whose career ought to go into eclipse.

Conclusion: The eclipse seemed to give a bit of a boost on signals that normally come in very weakly at midday.

I couldn't do a comprehensive scan because of my center-city location (quite a bit of interference from WDAF and KMBZ where I live -- and KMBZ interference will be worse at my new location, where I think I'll be able to SEE the strange tower-and-a-half DA that KMBZ uses) and because I did have to get back to work!

Also wild was to see the Kansas City skyline from the roof of Hallmark at about 11.30 am -- we had a crystal clear day, yet the light was as dim as it normally is at about 8 o'clock at night.

Did anyone else try radio listening during the eclipse?

Just in to the Springfield Radio desk: KWTO AM (560 5kw-U) and FM (98.7 100 KW) have been sold. The new owner is Meyer Communications, owner of KTXR (FM) (101.3 100 KW). According to the News-Leader, Meyer plans no changes in KWTO's format, (Their AM is talk which has Rush Limbaugh, Paul Harvey, and the Kansas City Royals, and the FM is a rock station), and he would not elaborate on simulcasting possibilities. (He already has the Cardinals and SMS Bears on KTXR, so it is likely when they conflict that KWTO will get them, but that is only speculation at this point. KTXR is an easy listening/AC station).

>wondering if it was worth the price. I like to DX AM and I am looking for a
>good antenna to improve reception.

I purchased the Select-A-Tenna from C. Crane Company about 5 years ago and it has improve AM reception some. It reduces overall static which brings in the station clearer. I heard about it from a early morning talk show from Las Vegas hosted by Art Bell. This station (KDWN 72 AM) comes in at night and fades during the day. With the Select-A-Tenna I am able to pick it up longer till it fades out around 7:00 AM. I paid $30 for it but I understand the price has gone up.

1664. When WOWO and WWVA Shared Frequency

Newsgroup: rec.radio.broadcasting
Date: 1994-05-12 01:40:52 UTC
From: "George F. Davison Jr" <gfdjr@delphi.com>
Message-ID: <2qs1f4$8cr@vixen.cso.uiuc.edu>
Source record: 40069

WOWO share-time arrangement with WWVA

In light of the discussion regarding WOWO, I thought the following report of the Federal Communications Commission, Main Auto Supply Co., et al., 1 F.C.C. 251 (1935) would be of interest. Here is the text of the report regarding the license renewal applications of WOWO and WWVA and their night time-sharing agreement:

This proceeding arose upon the applications of Main Auto Supply Company, operating Station WOWO at Fort Wayne, Indiana, for renewal of license, and West Virginia Broadcasting Corporation, operating Station WWVA at Wheeling, West Virginia, for renewal of license.

These stations are authorized to operate simultaneously during daytime hours and to share time at night. Their licenses do not specify the exact hours of operation at night during which each station is to operate, but under the provisions of Paragraph 155 of the Commission's Rules and Regulations these licensees are authorized to agree upon their respective operation time, and this Rule requires them to file their agreement in writing with each application for renewal of license.

The licensees herein were unable to agree upon a division of night hours and so notified the Commission, whereupon the Commission designated these applications for a public hearing, pursuant to Paragraph 157 of the Rules, for the purpose of determining upon the night hours to be used by each.

Thereafter, the licensees entered into a time-sharing agreement and when the hearing on their respective applications was called before the examiner on March 6, 1935, they filed the same. The hours set forth in the agreement for each station are the same as those assigned under the last time-sharing agreement entered into between these licensees, and under which they have been and now are operating. The examiner recommended, therefore, that the applications be granted in accordance with the time-sharing agreement so filed.

No exceptions were filed to this report, and there were no respondents or interveners.

It appearing that these licensees have been and now are operating their respective stations in the public interest, convenience, and necessity under their existing time-sharing agreement, and that they have complied with the requirements of Paragraph 155 of its Rules, the Commission, on April 16, 1935, entered its final order effective 3 A.M., E.S.T., April 30, 1935, authorizing the issuance of renewal licenses to each.

Adopted April 30, 1935.

I do wish that this historic record had more information, especially about the hours of night-time operation that WOWO and WWVA agreed upon, the frequency that the two stations were assigned, and the power authorized each.

Message-ID: <2qs31e$bqp@vixen.cso.uiuc.edu>
Source record: 40070

* According to last Sunday's Boston Herald, Westinghouse's WBZ-AM 1030 is talking to the NHL's Bruins about having them land on their station starting next season(1994/95). The Bruins have an option of staying with their current flagship, WEEI AM 590(SportsRadio 590) for one more season or finding a new home somewhere else on the dial. They're opting for the latter.

Originally, it was almost definite that the Bruins would follow the Celtics to the American Radio Systems AM combo WRKO-WHDH.(The Celts start their 5-year deal on WHDH in the fall). However, the potential Bruins move to WRKO would almost certainly create conflicts with Red Sox in the March,April, May, and October. That would mean the Bruins would be shifted to WHDH or WEEI(if 'HDH was carrying the Celts). The Bruins have been shifted from WEEI to WMEX 1150 AM for the last three seasons whenever there was same-night game conflict with the Men in Green. They were not too thrilled with that set-up.

The Bruins could choose to stay at 'EEI for 1 more year(highly unlikely) but 'BZ offers much stronger signal and bigger audience reach.

* Ardman's CHUrban WJMN-94.5FM, which is to be officially transferred to Pyramid Broadcasting at the end of May , will celebrate its 1-year anniversary on May 17th with a station-sponsored party at a local nightclub. I wonder if that night will be station's final hip-hop swan song as it prepares for new ownership to take over. Pyramid is reportedly ready to dump Churban/Dance format for something more profitable when it assumes control of 94.5... WJMN's current GM Alan Chartrand will become a general sales manager at the station when Pyramid takes over...

* Another 1-year anniversary mention : Greater Media's WBCS-96.9FM became a Country Western outlet around this time a year ago. Its main competitor, Fairbanks' WCLB-105.7FM, has solidly won every ratings period so far in this radio battle...Hey, maybe there's space for 2 country stations in this market? Doubt it...:-)

* Score one for A.R.S. : One major radio battle that's definitely beginning to develop locally is American Radio Systems vs. Pyramid Broadcasting.

On Friday(5/5/95), ARS announced that John Gehron,47, will become the second in command at the Boston-based company. Gehron spent the past 5 years as GM of Chicago's Pyramid outlet WNUA-GM. He's no newcomer to Boston radio. He spent a few years as a GM of Boston's CBS oldies outlet WODS-103.3FM before leaving for Chicagoland in 1989.

As you recall, the monster merger of Pyramid and A.R.S.(then much smaller company known as Atlantic Radio Ventures) fell apart in early March of 1993.

The bad feelings between flamboyant Pyramid CEO Rich Balsbaugh and conservative minded ARS CEO Steve Dodge haven't disappeared. There were rumors that Dodge and Balsbaugh couldn't stand each other from the start. Their personality clash was going to kill the deal regardless of Pyramid's inability to sell light-jazz WUNA-FM which was supposed to pump $30 to $40 million to make the merger work since Pyramid had way too much debt at that point.

Then in December 1993. Pyramid not wanting to be left out of the duopoly game, which has swept the chaotic Boston radio market, decided to aggressively bid for its main pain in the butt, Ardman's WJMN-94.5FM. At that point, ARS(which is by now a much bigger company) decides to enter the bidding war to piss off Pyramid. Keep in mind that ARS was never seriously interested in 94.5. This was a corporate game played out on a personal level. The result : Pyramid seriously overpays for WJMN-94.5 by putting down $22 million.

Now, ARS raids Pyramid for management talent and scoops well-respected Gehron from the Chicago station.

I don't think this will be the end of it.

Gehron becomes # 2 guy in the ARS. He'll oversee ARS's troyka in Boston - WRKO-AM/WHDH-AM/WBMX-FM, as well as Red Sox and Celtics radio networks, and addition of the second FM signal to the mix.

* A couple weeks ago, a poster asked a question asked about the status of an all-talk WRKO-AM 680. Well, the Talk Station was a victim of bad management decisions and bad luck to a certain degree. Bad management decisions involved hirings of such air-talents as Mike 'Clueless' Cuthbert, Marjorie Clapprod, and Victoria Jones(alert to DC radio junkies : she starts on WWRC-AM in D.C. on May 16th; she replaces Larry King who is being dumped all over the country as exits his radio career....finally). Pairing of Jones with Herald's Howie Carr(now on a sister station 'HDH) was a disaster. Loss of Gene Burns didn't help. Jerry Williams(2-6pm) has practically nothing left except for a fat contract. Tom Leykis was ran out of town after the 'incident'. Popular morning co-host Janet Jaghelian left the station to run for Ted Kennedy's senate seat as a Republican canditate...The station has been sliding for a couple of years. With big changes in ARS corporate structure(addition of John Gehron) look for some BIG changes sooner than later...

* WBZ was the winner :

I take the blame for misinterpreting the night-time numbers for the Winter '94. My sincere apologies to the mighty Lords of Boston radio...

[I actually asked the Moderator to pull that post after I realized my inexcusable error but he didn't for some unknown reason].

Yes. Howard on WBCN was # 2 behind WBZ. I just hope WBZ crowd prays for some snow this spring and maybe some major tabloid-like story with a local angle(ala Nancy-Tonya stuff :-) because this book was an exception to the

rule as far as their over-inflated ratings go....

-Mark

Source record: 40072

I disagree with an earlier statement saying that AM radio is on its way out. In terms of station ratings, Several AM radio stations continue to make the top 5 in the Chicago radio market. High sound quality and popularity do not always correlate.

The success of AM stereo depends on three critical factors. Government regulation, technology, and marketing which heightens consumer awareness. The adoption of an AM stereo standard in the US has been dragging on for over 10 years and manufacturers are rightfully reluctant to produce receivers capable of AM stereo detection fearing that an FCC ruling will make their product obsolete. Fortunately the vast major of AM stereo radio stations today are using the same C-QUAM standard and a few radio manufacturers are designing some high quality receivers capable of C-QUAM stereo detection. The technology is definitely here to produce some very impressive sound on AM relative to what we have been accustomed to. Now the marketing of AM stereo is another story.

Mike Schuster illustrated well the marketing disaster of the SRF-42 AM stereo walkman. Compared to its AM mono walkman counterpart, SRF-39, you still can not find the SRF-42 in chain stores like Circuit City, Silo etc. If AM stereo doesn't fit the marketing strategy of these stores then maybe the hope for AM stereo's viability in the marketplace is to have manufacturers such as Sony incorporate AM stereo into ALL of their portable stereo product. I am sure the AMAX logo on these products might stir up some curiosity among some customers that would have never seen the SRF-42.

The marketing responsibility of AM stereo doesn't stop with the retail stores. I am surprised that many of the AM stereo stations do not have an occasional radio promotion that would give away AM stereo receivers so that the listening audience can appreciate the enhancement the radio station made to their signal quality. I am not a radio station engineer, but I am sure that the enhancement was an added cost to the radio station.

AM sound quality is not always as poor as people tend to think. A lot of factors enter into the picture. Terrain and receiver designs are the biggest factors. Many FM receivers have sharp high frequency and stereo separation roll off when the signal starts to degrade slightly. When that happens, a high quality AM stereo receiver can rival the high frequency response of the blended FM stereo signal while blowing it away as far as stereo separation goes. Like everything else in life, both AM and FM stereo have their sound quality limitations. IMHO, Good receiver design attempts to mask these limitations when they appear the most. If you want to get extreme about sound quality then I'll take my CD player at baseband over AM or FM any day:-))

>owned by NBC), this CNN/NBC News affiliate is also the flagship
>of the Chicago Bulls and Chicago White Sox.
>

I listen (or at least try) to WMAQ for White Soxs games, as that is the only station I can pick up in western Illinois that carries the Sox. My bias is going to show, as I can care less about the Bulls (everyone around here carries them), and I would rather not have WMAQ always preempt the Sox games for the Bulls. Similarly a ton of stations in my area (Quad Cities=Davenport IA/Rock Island IL) carry Cards and Cubs baseball; more stations than I could find radios in the house to tune them all in. But Soxs? No, can't find a local for them, nor get Kansas City, Mpls Twins (my hometown station) or the Brewers unless propogation is good, the game is later in the evening and the clear channels come in.

What does it cost to get a local/regional station to carry a major sports team's broadcasts? Is it that crucial what teams you carry as an affiliate? Now I'm a geographer, so I understand regional alliances. I just don't understand radio marketing I guess.

Cheers. Kevin

As long as Michael Bloomberg stays in business. The station is there for
"public image", as he owns one of the largest financial/business news
services. If you have anything to do with banking or brokerage you
probably have a Bloomberg news retrieval terminal next to your Reuters or
TV tuned to CNBC financial news, or both. Unfortunately John Q. Public had
never heard of him, until he bought WBBR.

AMARC's Board to meet May 30 to June 3

-------------------------------------

The International Board of Directors of the World Association of
Community Radio Broadcasters (AMARC) will be holding its annual
meeting in Montreal, Canada from May 30 to June 3, 1995. This
will likely be the last meeting of the full board before 1995.

The detailed agenda of the twelve member board is available to
interested AMARC members. It includes discussions on finances and
plannig process.

The AMARC Board of Directors invites any and all interested
parties to send comments and suggestions for consideration by the
meeting. Please address them to AMARC's International Secretariat
in Montreal.

The members of AMARC's board are:
Eugenie Aw (Senegal) - President
Tiga Bayles (Australia) - Oceania
Steve Buckley (United Kingdom) - Western Europe
Luis Davila (Ecuador) - Latin America
Barbara Losier (Canada) - North America
Francisco Lucas (Philippines) - Asia
Cancio Mamani Lopez (Bolivia) - Special Representative for
Indigenous Peoples
Guntai Mboroki (Kenya) - Africa
Tatiana Pelipeiko (Russia) - Eastern Europe
Maria Victoria Polanco (Colombia) - Representative for Women
Michel Delorme (Canada) - ex-officio member
Evelyne Foy (Canada) - Secretary General

/* ---------- "Cuban radio conference results" ---------- */
Latin American Community Radio Conference
COMMUNITY RADIOS: DEVELOPING THE PRACTICE OF DEMOCRACY

"On the basis of the community's tastes and interests, community radio extends the use of democracy in society. Community radio is defined by its own objectives of service to the community and active community participation in the endeavors of the radio. Community radios contribute to free expression on the part of social, political and cultural movements, as well as to the promotion of all initiatives aimed at peace, democracy, development and friendship among the peoples of the world."

The above is a brief summary of the conclusions reached by 120 community radio broadcasters from Latin America, the US, Canada and Germany who gathered in Havana, Cuba, from November 23 to 26, for the Latin American Community Radio Conference.

The statement issued following the conference also indicates that: "Community radio stations may be large or small, low- or high-powered, private or collective, church- or state-run, licensed or in the process of obtaining legal status. Community radio stations may operate with unsophisticated equipment or have achieved a higher technological level." In addition, the participants agreed that their community-based nature should not prevent their radios from producing competitive-quality programs nor from becoming financially viable ventures, though their objectives are not profit oriented.

The participants pointed out many new challenges facing community radios, including: reaching a broader audience so as to avoid remaining on the fringe; creating opportunities for real debate in a democratic and pluralistic atmosphere; recovering the magic of radio language by using all available resources and formats; ensuring continuing training for broadcasters to as to professionalize the quality of programs; pressuring for national legislation that will legalize community radio stations.

It was concluded that community radio should be dynamic, refreshing, colorful and deeply rooted in the real-life experiences of our people and of all those who defend their cultural values and national identity. In this way they will be better able to stand up to the plans of neoliberalism and thereby offer our peoples some hope for the future.

N> Poor Tom Leykis. If this is a for-real memo from him, his pedestal
N> is tottering and is about to fall. That he should base a show around
N> being anti-KFI is just plain stupid.

I listen to both Leykis and John and Ken (his competition on KFI-640),
usually bouncing back and forth, or listening for an hour if the topic
really interests me.

But they're starting to sound the same. Today (5/11), here's the topics
they talked about:

3:00 p.m
Leykis, KMPC: "Advancing yourself through sex"
John and Ken, KFI: "Stopping kids from having sex"

4:00 p.m.
Leykis: an interview with someone in favor of killing abortionists
J & K: "First Time You Had Sex"

It gets a little cloying after awhile, no?

[Article crossposted from ba.broadcast]
[Author was David A. Kaye]
[Posted on 9 May 1994 18:32:13 -0700]

I'm listening to Tom Leykis' new network talk show on KSTE in Sacramento (650). The signal makes it fine into the Bay Area. The show airs nationally 3-7pm Pacific. Unfortunately, I wish the show were a little better.

In the first hour I'm hearing (6-7pm) the hour consists mainly of two guys phoning in and <yawn> debating smokers' rights. When he finally did start talking again, he criticized one caller for not being an expert in cigarette smoking because he was not a smoker, the caller shot back, "How then can you talk about addiction? What authority do you have? You're not a doctor!" Tom stammered and dropped the ball.

I'm sorry. I think Tom Leykis was great on KFI, but unless this happened to be an off-day, I must say that I'm disappointed. I hope it gets better.

Well, I was happy as anyone to find out he was coming back. I had vaguely fond memories of his old show and him giving out copies of "Cop Killer", so I thought it would be nice to have him back, though John & Ken have been actually better than I expected.

All I can say is, Tom really REALLY has got to get over this bitterness towards KFI. I tried listening at various times throughout last week. Aside from the fact that I had no interest in listening to Daryl Gates when he had his own show and the guy who teamed up with Damien Williams is a total nutcase, Tom's own portions of the show were just juvinile rantings about KFI. He's alienated this potential listener. I think many of us like having a choice, and that's what I was looking forward to: a choice from 3-7. If I think one topic is too dry and boring, just switch over. Geez, it seems like I might be listening to a lot of Dodger games this summer if this keeps up.

The one good thing is Joe Crummey did not stoop to Tom's level at the end of his first show today. He wasn't about to go badmouth KFI. What's the point? Tom needs to gain an audience on his merits, not by bagging on the competition. I'm not sure what the hoopla about having this guy here is all about, but I'm already an ex-listener after one week & one half day. (today's show is the worst yet. who is this stupid comedian guy & why is Tom doing gushy pseudo-celebrity interviews?)

Longing for the old Sports Format...

Terra

1678. FCC agents to get new equipment to find problem radio signals

Newsgroup: rec.radio.broadcasting
Date: 1994-05-12 02:08:11 UTC
From: wa2ise@netcom.com
Message-ID: <2qs32b$bsf@vixen.cso.uiuc.edu>
Source record: 40083

copied from amateur radio packet:

From: W7LD@VE7DIE
To: FCC@USA
Subject: NEW ELECTRONICS FOR FCC AGENTS

Here is an interesting Bulletin from the AP NEWS SERVICE:

The Federal Communications Commission on Friday, May 6th, 1994
showed off a car equipped with two computers, a color printer, complete
with a satellite receiver in the trunk. This car when driven through
cities and neighborhoods can detect unlicensd radiosignls and signals
that cause malicious interference.

By June, the FCC will have ten such cars, each installed with
$75,000.00 worth of electronic equipment. The Commission would not say
which field offices will get the first cars. The goal is to provide each
Field Office with at least two of these cars.

The FCC finds about two or three unauthorized radio signals a
month, with the worst offenders being "Low power FM radio stations, Taxi
cab dispatchers, Businesses, and especially Boat operators," said
Commission spokesman Steve Svab.

Inside each car is a Control Station between the driver and the
rear seats. It features a Mobile Phone, a Computer Keyboard, and Two
Small Screens: one for computer commands and one for the display of maps
and other information.

With this equipment, a FCC agent can pick up a radio signal and
use a Data Base to find out if it is authorized and pinpoint the location
of the transmitter. Furthermore, data can be trnsmitt from the car to
a central location and from one car to another. "Big Brother is listening
to us using new sofisticated toys! Be careful.

Retransmitted by:
Jack West W7LD
---
end copied file.

Looks like those micropower FMer's should think twice now. They'd probably
be better off leasing some time on a licensed station to get their agenda
out.

1679. Snotty Comments About DALLAS/FORT WORTH ARBITRONS

Newsgroup: rec.radio.broadcasting
Date: 1994-05-12 02:08:11 UTC
From: Chris Stamper <clstampe@mailbox.syr.edu>
Message-ID: <2qs32b$bsg@vixen.cso.uiuc.edu>
Source record: 40084

> Arbitron released the Winter ratings Monday. Here they are as printed
> in today's DALLAS MORNING NEWS. The DMN only lists the top 20. Winter
> rating for KVIL is probably .1-.3 higher; the DMN always forgets to
> include simulcasting KVIL with KVIL-FM's ratings (I've corrected the
> Summer and Fall listings to include KVIL with KVIL-FM).

Summer Fall Winter
1 KSCS country 5.4 6.9 6.4

What's so great about this station? Did you ever think that country would
ever be "hip?"

2 KVIL-FM/AM AC 4.5 5.4 5.8

K-EVIL will live forever!

3 WBAP news/talk 5.9 5.5 5.1

Most of WBAP's audience is Ft. Worth and rural Texas.

4 KOAI jazz "Oasis, Smooth Jazz" 3.7 3.5 4.9

The Oasis #4? There must be a whole heck of a lot of waiting rooms in
the Metroplex.

5 KYNG hit country "Young Country" 5.3 5.1 4.8
6 KPLX hit country "K-Plex" 4.6 4.6 4.7
KHKS CHR "106.1 Kiss FM" 4.4 5.9 4.7

Top-40 country beats Top-40 teeny-bopper music. I don't think KISS-FM
plays more than five different songs in a two hour period.

8 KJMZ urban "100.3 Jamz" 4.8 3.3 4.4

This seems low. JAMZ and K104 must split the same audience.

9 KRLD news/talk "News Radio 1080" 3.4 3.0 4.0

Glenn Mitchell's talk show must have helped.

10 KLUV oldies "K-Love" 4.0 3.3 3.8

Considering their lousy signal, this is V-good.

11 KKDA-FM urban "K104" 4.5 3.4 3.5
KEGL AOR, Stern "Eagle" 2.7 3.3 3.5

Kidd Kraddick over at KISS-FM is kicking his former employer's tail.

13 KDMX hot AC "Mix 102.9" 3.2 3.4 3.2

Do canned formats work? Mix, Edge, Z-Rock and Arrow are all below #12.

KTXQ AOR "Q102" 4.5 2.9 3.2

A CBS owned station should be doing better than this; expect either a sale
or format change within 18 months. AOR is apparently becoming a dinosaur.

15 KDGE modern rock "Edge" 2.8 2.9 3.1
16 KZPS classic rock 3.8 3.3 2.9

KZPS and Q102 are probably splitting the same audience. One will die.
Considering the overall drop of 8.3 - 6.1 = 2.2 points, it seems the
bottom is falling out of Klassic Rock. KZPS still advertises heavily but
they have the same three commercials over and over again. BTW, Check out
the Mormon services on Sunday mornings.

KLTY contemporary christian 2.1 2.4 2.9

Here's why I got out of Christian radio. KLTY is the #1 religious station on
the planet. Look at the ratings. Where's KKPBC (770) and K??? (1360)?

18 KLIF talk "Talk Radio 570" 2.7 3.0 2.5

These guys DROPPED Limbaugh. I bet they're sorry.

19 KHVN black gospel "Heaven 97" 1.9 1.5 2.4
20 KSNN clx country "Sunny 95" 2.8 2.3 2.1

These guys now trashing KPLX for playing "teeny-bopper country" - as if
they were the only ones - and calling itself "country music for grownups".

KESS Spanish "La Fabulosa" 1.5 2.6

Considering the Hispanic TV audience, where's radio?

WRR classical "Classical 101" 2.2 2.5

Allegedly these guys are making money.

KKDA urban AC "Soul 73" 2.2 2.4
KTCK sports "Ticket" 2.4* 2.3*
*--as adult standards KAAM "K-Double A-M"

Considering all the hubub over the format change, was this worth it?
It needs time. Maybe lots.

KRVA Spanish "Radio Variedades" .7 1.5
KRRW clx rock-oldies "Arrow 97.9" 3.1* 1.4
*--as soft AC KLRX "Lite 97.9"

How can they drop a Barry Manilow/Anne Murray format and do WORSE?
I think most of the waiting rooms jumped over to the Oasis, explaining
their ratings jump.

KDZR SMN Z-Rock "99-1 Z-Rock" 1.6 1.3

1980s Dinosaur. Time to bring back the jazz music.

KMRT Spanish "La Super 1480" .8 1.2

How does the Hispanic audience stand all that reverberation?

>Format is classis rock (sort of)...intended to be, in the words of pd
>Harry Kozlowski "very familiar classic rock..no deep cut material".

wow. it's really great to see a new *classic rock* station. it always
frightens me to think that someday there may be less than 20 classic
rock stations in any given market. thank god that day won't be coming too soon!

=bobw

1681. NYC FM XMTR sites (Was NYC FM calls 70s-today (was: Re...))

Newsgroup: rec.radio.broadcasting
Date: 1994-05-12 02:08:18 UTC
From: JOHN SCHMIDT <schmidt@auvax1.adelphi.edu>
Message-ID: <2qs32i$bsp@vixen.cso.uiuc.edu>
Source record: 40086

With the help of Bill Wells, Chief Engineer of WBAI, I have taken the liberty of adding transmitter location and backup site info to Paul's list for all the stations which we are familiar with.

Disclaimers:This is for 70s to today only 92-108 only not necessarily Empire State / WTC sites

(also it includes several stations licensed to NJ, but not Long Island or Westchester)

89.9 always WKCR
WTC Master Antenna, No B/U (I added this one as it is the only NCE band station on one of the master antennas.)

92.3 WHOM-fm....WKTU.....WXRK
Empire Master Antenna, No B/U

93.1 always WPAT-fm(Paterson, one t)
WTC Master Antenna, B/U in N.J.

93.9 always WNYC-fm
WTC Master Antenna, No B/U

94.7 alwys WFME
(Transmitter in NJ)

95.5 WABC-FM...WPLJ...WWPR (to emphasize "Power" 95)...WPLJ
Empire "Network" Master antenna, B/U???

96.3 always WQXR (-fm not needed when the AM became WQEW)
Empire Master Antenna, No B/U

97.1 WNBC-fm...WNWS...WYNY...WQHT (moved here from 103.5 9/22/88)
Empire "Network" Master Antenna, B/U???

97.9 WEVD-fm...WSKQ-fm
Empire Master Antenna, No B/U

98.7 WOR-fm...WXLO...WRKS
Empire Master Antenna, seperate B/U antenna on Empire

99.5 always WBAI
Empire Master Antenna, No B/U

100.3 WVNJ-fm...WHTZ
Empire Master Antenna, B/U, in NJ?

101.1 WCBS-fm always
Empire "Network" Master Antenna, B/U, site??

101.9 WPIX...WQCD
Empire Master Antenna, B/U on WTC Master Antenna

102.7 always WNEW (-fm not needed when AM became WBBR)
Empire Master Antenna, B/U offsite, location??

103.5 WTFM...WAPP...WQHT...WYNY (moved here from 97.1 9/22/88 WTC Master Antenna, used to have B/U in Fresh Meadows, Queens at studio site, current backup site??

104.3 WNCN...WQIV...WNCN...WAXQ
Empire, still on "old" master antenna (only user), will move to "new" one sometime this year, no B/U

105.1 WRFM...WNSR...WMXV (to better emphasize MixVariety)
Empire Master Antenna, B/U??

105.9 WHBI...WNWK
Transmitter still at 515 Madison Avenue??

106.7 WRVR...WKHK...WLTW
Empire Master Antenna, B/U at Viacom Building (Times Square)

107.5 WLIB-fm...WBLS
Empire Master Antenna, B/U at WLIB Xmtr in NJ.

There is one master antenna on WTC, with five users. There are no backup antennas installed at WTC. There is emergency power at WTC for all users (but it failed during the bombing, as the cooling water line was cut).

There are three master antennas at Empire. The "New" master antenna has 11 current customers. The "old" master antenna has one customer who will soon move to the new antenna. The old antenna will then remain as a backup to the new antenna (but the old diplexers will be removed, which to me seems a little backwards, as there have been several diplexer failures over the years, but never, as far as I know, an antenna failure.

The "Network" master antenna was installed by the three network o-and-o stations (WPLJ, WNBC-FM, WCBS-FM), and is, to the best of my knowledge, still used by their decendants.

There are several individually owned backup antennas on Empire. I know WRKS has one, but am not sure who else currently does.

There is no central emergency power at Empire, several stations have their own generators. I know WRKS does, and am almost positive WCBS does. Others ??

A number of stations have off-site backups. I suspect often at co-owned or formerly co-owned AM sites.

Paul Mount
Monmouth NJ

Hi,
I am a 19 yr-old student studying Russian and French at Leeds University
in England and I am looking for a summer job in radio in the UK, France or an
English- and/or French-speaking country.
I have huge amounts of
experience (but I won't bore everyone with my full CV) and I speak fluent
french. I have worked at the World Service, Capital Radio in London and Radio
France Cherbourg where I made a few programmes which were broadcast. Mostly I
have worked as a technical assistant which is the area I most interested in.

If anyone has any suggestions, helpful advice, job offers or wishes to receive
a copy of my CV to look over please do not hesitate to contact me.

yours hopefully,
Emma Freeman <fll3ej2f@arts-01.novell.leeds.ac.uk>

Hi rrb'ers

Sorry for the sporatic postings, but as most of you know, I have moved
from Chicago to the Branson Mo area. I bought some acrage and a house
and am in tranist now.

I now log in Long distance from a friends house and I put as much out
as I can every other day. I am soon to have a local net-connection
and things will resume as normal.

During this transition period, I am giving priority to posts in this order...

1) Time sensitive material (If your post is time sensitive, say so in
the subject line, such as "TIMELY: Article subject". This will help.)

2) Broadcast professional matters.

3) RadioWatcher reports

4) Informational postings

5) Other articles.

Also...

Please try to keep articles as short as possible, and if you are
reading via AIRWAVES, you will see larger issues. This is to
accomodate the largest number of posts.

Please trim quoted text to a minimum. I am going to start rejecting
posts that have miles of quoted text and a line or two of original
text. Sorry, but I just cannot keep editing these posts and to pass
them on like that is to abrogate my job.

Also, consider emailing "personal" replies rather than posting them.

If you have tried to sub/unsub to AIRWAVES, be patient. I am doing it
all by hand <feeble grin>.

Things should be getting back to normal shortly.

Happy trails

Bill

1686. RadioWatch-Buffalo/Toronto(5/13)

Newsgroup: rec.radio.broadcasting
Date: 1994-05-14 00:18:49 UTC
From: ag365@freenet.buffalo.edu
Message-ID: <2r15d9$kk9@vixen.cso.uiuc.edu>
Source record: 40091

Here's what's happening in the 45th market(hoping I don't run into a black cat):

*Pat O'Brien(7pm-mid.)is the new music dir. at WYRK. Ken Johnson, the program dir.(and 12n-3pm)had been handling those duties.

*Danny Wright,ex-WKSE midday jock,joins WITI-FM in Milwaukee as its midday DJ and prod.director. Sue O'Neil(Kiss' MD)is now doing 9am-2pm,while Jammin' Donny Walker handles 6-10pm(BTW,I interned at Kiss and WWKB in 1990,and he's the only jock left on the FM side that I know of).

*WGR sports reporter/anchor Barry Buetel and ex-WBEN sports reporter Rick Maloney(now writing for Business First)have auditioned to fill the vacancy left by former WIVB-TV sports anchor/reporter Brian Blessing.

*Rich(the Bitch)Michaels stikes again! Recently,I reported that Jewish groups had drafted a letter regarding Michaels' actions on a recent show. Alan Pergament's column on May 3 revealed some of the details:on his April 1 show,after talking on-air with a Jewish caller, he said,"He's lucky I didn't ask why he and his buddies killed our Savior." GM Jim Meltzer met with Michaels and had a long talk regarding the incident,adding that Rich now "absolutely" realizes his error.
Prediction:Rich will be gone before mid-1995(I'm being very generous);if not for his mouth or actions,then because he found another job.

*Anthony Violanti repiled to a comment made by WGRF midday jock Anita West thusly(first the comment,then the reply):"Instead of shooting himself in the head,Kurt Cobain should have shot Anthony Violanti." "Pretty funny,Anita. Almost as funny as the time Larry Norton joked about the death of Eric Clapton's infant son,or the time 97 Rock gave away a breast implant operation for a contest,despite protests from local breast cancer groups. Does anyone at Rich Communications listen to what is said at 97 Rock? Does anyone at Rich Communications care about what 97 Rock is doing to Rich Communications' image in this community? Does Rich Communications know that 97 Rock's ratings plunged by nearly 20% in the winter book? By the way,Anita,now that Kurt Cobain is dead,will 97 Rock play his music?" Shouldn't Kurt have just shot the 97 Rock staff? :>

*The former WPHD-FM(now WUFX)morning team of Robert W.Taylor and Harv Moore are looking into starting up a triple A station in the area(adult album alternative,BTW).

*The ratings-at least to 1.0-are here(according to the 5/7
Billboard;12+ only):

Stn./freq. Format/positioner(fall rank) F93 W94 +/-

: maddening thing is, the new station's signal duplicates a perfectly
: clear signal at 90.9 MHz, owned by the same organization.)

This appears to be the state of Christian broadcasting -- they don't care about anybody but themselves. Along the West Coast there must be hundreds of them duplicating signals and cutting into the grade B coverage of other stations. You might want to contact the station you like, ask them where their primary coverage area is, and visit a friend in that area. Then, tune in the signal of the station you want, note the interference problem, and file a complaint with the FCC, and get others of your friends in that area to do the same. It may work (it may not). But the important thing is that you do it in your favorite station's prime coverage area, since the station is grandfathered in and must have its signal protected by any new stations coming on. Hell, fight fire with fire. It's time to teach these arrogant broadcasters a lesson.

}
}I don't know if it's possible to solve this problem, but I'd welcome
}any help. This is my sad story:
}

.....

}Anyway, if it's at all possible, I'd like to rig an antenna to pull in
}the station at 88.7 (originating approximately northeast from my
}location) and reject the signal at 88.5 (originating east-southeast
}from me). Antenna experts: how would you proceed? Is there some
}combination of directionality and frequency-specificity that will do
}the job? Would a Yaggi help, or are the frequencies too close? (I
}wouldn't mind getting the stations at higher frequencies, although if
}necessary I could switch antennas to do this.) One more complication:
}I live in the shadow of a 3000-watt college station's antenna. They
}are located to the northwest about 1/2-mile away, and they broadcast
}at 88.1 MHz. (Fortunately, my tuner, an Adcom GTP-400, was able to
}pull my station in even so. My clock radio never could.)
}
}Is this project completely hopeless? Thanks in advance for any
}assistance. This place is a radio wasteland without my 88.7!
}
}(E-mail or post. I'll be happy to summarize if anyone else really
}wants to know.)
}
}--
} Matthew Saltzman
} Clemson University Math Sciences
} mjs@clemson.edu

You can make a fairly simple directional antenna by putting a corner reflector
behind your antenna. Here's an end view where the + is end of the antenna:

```
-------------------->
|
|
| +
|
|
|
|
|
|
```

```
|
\/
```

This works well if the angle in the corner is 90 or 60 degrees. The reflector extends to infinity in the ideal case, so make it as long as feasible. tweak the antenna length and distance to corner for optimal reception.

I hope this works for you.

I want to caution you about the need for a receiver/tuner that has the selectivity to handle the situation you are describing. Before you spend too much time and money with a directional antenna, see if your tuner can separate STRONG and weak adjancent channels. Is the new, higher powered station you are talking about in the line of fire between your location and the 88.5 station? That is, will your antenna have to 'look through' the higher power station's location as it points to the 88.5 location? If so, then for sure, your tuner must have good co-channel performance. Best of luck.

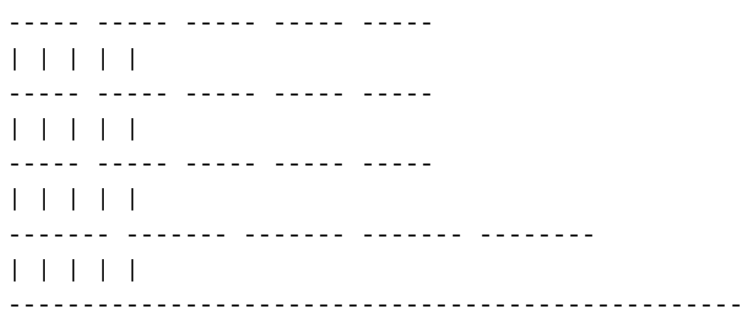
There is something called superdirectional antenna. This antenna is highly directional and highly frequency tuned. You can built this several ways. My suggestion would be to put 5 Yaggi antenna in a broad-side array. This should do it. Here is the idea:



Big plane of reflector.

with highest regards,
Babak Sehari.

How about buying one of those powered antenas which give something like 15dB boost in all frequencies. Your receiver may then be able to diferentiate between the two stations but if not you could put a sheild around it and just aim it toward the good station. The shield shoud be easy to build. Just make a wooden frame and wrap it with aluminum foil and then ground it.

I know this sounds like a stupid idea but I live in an all cement building and b/c of the iron shit they use to strenghten the concrete I can't get any stations at all unless I have my antenna hanging out the window.

Hope this helps, With a little bit of experimenting I'm sure you could get this to work.

milt.

I believe Jack Armstrong is a staff announcer for WUAB-TV 43/Cleveland, or at least he was. You might call 43 up and ask them. :D

From: mstrand@delphi.com
Message-ID: <2r15dj$kkj@vixen.cso.uiuc.edu>
Source record: 40098

Scot Witt <scotwitt@interaccess.com> writes:

>>Could anyone please give me design specs for a Yagi antenna. The signal
>>frequency I require is 600MHz.

Since this frequency is in the UHF-TV band (about ch. 40 or so) you can buy
a Yagi antenna that is cut to a specific channel or goup of channels (ie. 40-
50). These are available with 75 or 300 ohm feeds.

>Generally you cut your driven element as a half wave dipole (467 divided by
>your desired frequency in Mhz plus or minus around 2%). You cut your reflector
>to around 5% MORE than the driver element and your directors 2-5% SMALLER in
>drecreasing units.

If you want to "roll your own" antenna these instructions ar right on. A good
source for antenna rods (elements) is 1/8" brass welding rod.

Good luck,
Mike

I remember him from WKYC in the mid- to late-60s; he was the prime-time evening guy on that Top-40 rocke. As a kid in high school in suburban St. Louis, I used to flip back and forth between Jack Armstrong on WKYC and Ron Riley on WLS/Chicago. Armstrong's signature was his shouted proclamation that he was "Your LEEEEEADER!"

In article <2qs1eq$8c0@vixen.cso.uiuc.edu>, slutsky@tesla.njit.edu writes:

(about Jack Armstrong)

Jack is a semi-legend to Buffalo and Rochester radio listeners from
his years as night jock at WKBW/1520 (a station where I later worked and
heard vintage Armstrong stories years later)...he later was PD at 13Q in
Pittsburgh and did their morning show for a while. He has also, I'm told,
worked under the name of Chuck Knapp (which is reportedly his real
name) and may be around in the business under that name today...there
IS a Chuck Knapp who is now a major market CHR program director, but
I don't know if it's the same guy (long gone from CHR and into talk radio
myself). As an ex-KB guy myself I'd love to know what happened to him...
and to other well-known night guys at KB like Jim Quinn (who also ended
up in Pittsburgh some time in the early 80s and may still be there)...KB
was an interesting place that gave rise to radio legends like Joey Reynolds,
and later to people like TV weatherman/standup comic/occasional TV
actor Fritz Coleman and Bob Barker's Price Is Right announcer Rod Roddy.

Bob Smith, middays WXXI/1370 Rochester NY

In article <2qs31g$bqu@vixen.cso.uiuc.edu>, C12019@email.mot.com (Rob Schaller) writes:

(about the problems of AM radio and AM stereo, especially marketing)

Time to share with you an interesting series of surveys done by Capital Cities/ABC over the last 20 years...and what they found out about the importance of AM Stereo and AM sound quality. In a nut-shell, those two factors are NOT all that important in determining what stations people choose to listen to. They're both very secondary to the one main factor that determines listening patterns; PROGRAM CONTENT. If people hear a format and personalities they like, and that serves their interests and needs, they could care less if it's AM or FM, mono or stereo, as long as they're not confronted with absolute-ly objectionable noise and interference. In the highest-tech region of the country, San Francisco/San Jose, the top two stations in the latest Arbitrons were AM news-talkers, and AMers topped the market in Boston, New York and Detroit as well, just to mention a few. The one common factor among all these stations is strong locally originated programming. They'd be #1 whether they were on AM or FM. (Con-versely the second place station in Philadelphia, where all news KYW is #1, happens to be FM talker WWDB...which shows that a talker doesn't have to be on AM to find an audience.)
We know, of course, that AM transmitters put out a signal with almost the same fidelity and dynamic range as FM, and can even do it in stereo; we also know that AM is perceived to be lo-fi because the typical RECEIVER is lo-fi. But even that doesn't seem to move people to or away from AM,as much as the simple matter of what we put on the air.

1704. WBZ acquires Bruins rights

Newsgroup: rec.radio.broadcasting
Date: 1994-05-14 00:37:00 UTC
From: fybush@world.std.com
Message-ID: <2r16fc$ltb@vixen.cso.uiuc.edu>
Source record: 39909

Before it makes the papers...

Starting with the 1995-1996 season, the Bruins hockey games will move
from 5,000 watt highly directional WEEI-590 to 50kw clear WBZ-1030.

WBZ outbid American Radio Systems' WRKO-680/WHDH-850 for the rights. Nobody
inside the building is saying anything about terms just yet.

So, this is the long-term outlook for Boston's major sports rights:

AL Red Sox - WRKO-680. This is the last year of the deal; it's expected
to be renewed.

NFL Patriots - WBZ-1030. We just inked a new long-term deal that also
includes pre-season TV rights for WBZ-TV 4.

NBA Celtics - WHDH-850 beginning this fall. Celts rights went to WHDH
when "Back Bay Broadcasting" bought WEEI from the Celtics organization.

NHL Bruins - WBZ-1030 beginning in 1995, when we take over from WEEI.

The Bruins acquisition will make BZ more of a player in the sports
field in town. It also means no problems with Bruins/Celtics
conflicts (the Bruins went to WMEX-1150 when the Celts were on WEEI
the same night).

You'll see it in the papers tomorrow...you read it here first...

1706. COLLECTORS RADIO NETWORK

Newsgroup: rec.radio.broadcasting
Date: 1994-05-14 00:37:06 UTC
From: platecap@gatecom.com
Message-ID: <2r16fi$lth@vixen.cso.uiuc.edu>
Source record: 39911

The Collector's Radio Network is in the process of launching to serve collectors of almost everything, everywhere.

A decade of research has gone into the project.
Programming will consist of interviews and discussion of everything from baseball cards to license plates, antique radios & TVs, radio PROGRAMS, stamps, sheet music, sports, telephones, toy cars, etc. etc. One of the goals of the Collector's Network is to provide a central clearinghouse for information for collectors looking to invest wisely, or seeking that one last item they may need. Education and information are two key elements along with the goal to make it all entertaining.

In addition to the collectables ingredient, family-oriented public domain vintage radio comedies, mysteries and dramas will be presented, along with interviews, and links to the largest old radio program conventions in the country: THE FRIENDS OF OLD TIME RADIO held annually in Newark, and on the West Coast, SPERDVAC; both being attended by hundreds of both professionals from the "old" days of radio, as well as a mecca for collectors of every type of program imaginable.

The Collector's Radio Network will cover it all.

The concept was created by Tom Eurich, Jr., who is known as the Voice of Collectables & Antiques in the Detroit area and on satellite-delivered YESTERDAY USA SUPERSTATION. The Collector's Radio Network will also be delivered via satellite, and also available via pre-recorded programming.

Another key member of the the Collector's Network is Bob Burnham. Burnham holds an archive of 15,000 old radio shows which he has marketed to a mailing list of nearly 7,000 for the past 20 years. Burnham has been employed in almost all facets of broadcasting during that time from programming, production & on-air to engineering. He is currently Chief Engineer at a Detroit-area station.

Additional information on THE COLLECTOR'S RADIO NETWORK is available by sending a request to platecap@gatecom.com (via internet)
Or writing: BRC Productions; P.O. Box 2645; Livonia, MI 48151-0645
fax/voicemail (313) 277-3095.

A demo tape is currently in production & available at no charge.
The Network is looking for affiliates to carry the programming which will initially be 1 hour per week, then gradually expanded. The goal is to make it a 24-hour service.

Gateway Online ... 38 Line Multi-user Interactive Information System
Taylor, Michigan - (313)291-5571 2400 baud (313)291-5571 9600 baud

1707. Seattle's fifth duopoly

Newsgroup: rec.radio.broadcasting
Date: 1994-05-14 00:37:07 UTC
From: Brian Gregory <briang@halcyon.com>
Message-ID: <2r16fj$lti@vixen.cso.uiuc.edu>
Source record: 39912

Interesting to note that five companies are (or will be) controlling 16 of the broadcast properties here now.

The latest....

SEATTLE (AP) _ Officials of KIRO and KING radio stations announced Thursday KIRO Inc. has purchased KING-AM and will handle advertising sales for KING-FM, the city's classical music station given to the local arts community a few weeks ago.

Joe Abel, executive vice president and general manager of KIRO AM-FM, will manage the combined properties and the advertising sales agreement with KING-FM.

The deal has been in the works for about two months, Abel said. Approval by federal regulators is expected in about four months. He would not disclose the purchase price.

Abel said the talk radio format of KING-AM will be re-evalauted, although no immediate changes are planned.

``I do think there's a lot of potential for talk in this market,'' Abel said.

The fate of the 37 or so people who work at KING-AM is uncertain.

``We know those people and that's a good staff. We're going to sit down with every one of them to see what their decision is and what our decision is, how they fit in with our organization,'' Abel said.

KING-AM will be moved into the nearby KIRO building.

The AM and FM operations of KING have been owned by Priscilla Bullitt Collins and her sister, Harriet Bullitt. A few weeks ago the Bullitt family announced that KING-FM was being given to a non-profit company managed by the Seattle Opera, Seattle Symphony and Corporate Council for the Arts, which will share the profits.

The sisters sold the bulk of King Broadcasting Co. in 1990 to a joint venture of The Providence Journal Co. and a New York investment firm, Kelso and Co. Inc. The agreement covered six television stations and 13 cable operations.

King Broadcasting was founded by Dorothy Stimson Bullitt, mother of the two women. Mrs. Bullitt died in 1989 at 97. She was the daughter of Seattle lumberman and developer Charles Douglas Stimson. She founded King in 1946 when she bought a struggling Seattle radio station. She bought KRSC-TV in 1948, the first television station in the region, and renamed

it KING-TV.

In article <2qh99c$oss@vixen.cso.uiuc.edu>, Robert Carpenter
<rc@itchy.ncsl.nist.gov> writes:

(why FM was moved to 3-meter wavelength)

Another technical consideration was an impending change in the
design of TV sets. It was determined, especially as upper-band
VHF channels (7-13) began coming into use after 1946, that TV
set IF amplifiers should be set at frequencies in the 41-46 mHz
range rather than down in the 20 mHz area, like pre-war and very
early postwar sets (which were subject to interference of their
own from FM subharmonics and shortwave and emergency service
broadcasts). Keep FM down there as well and you play hell
with everyone's TV picture and sound. Putting FM on 3 meter
wavelength was really the best long-term solution for everyone.
It carries adequately with decent ERP and antenna height (even
our plain-vanilla Class B sister station gets out 60 miles on its
46 kW ERP at just over 500 feet). It's also unlikely to be broken
up by sporadic E-skip...and has room for more stations to be ac-
comodated.

Juergen Bartels <juergenb@ecs.comm.mot.com> writes:

>Was the 87-108 MHz range available imediately after the move,
>or was there only the 87-100 MHz open as in Europe. Only
>in the 80's the 100-108 range became available here.

It was all open; there wasn't any real non-military use of those frequencies before the war, so it was no problem to put broadcasting there. (Incidentally it's 88-108 MHz here -- our TV channel 6 is from 82-88 MHz.)

I don't think there was that much interest in FM broadcasting in Europe until the early to mid 1950s, and by that time several countries did have land mobile services between 100-108 MHz. (The BBC started real FM service in 1955; some areas in Germany had it around 1953, from what I'
ve gathered.)

Scott D Fybush <fybush@world.std.com> writes:

>WFMN 98.9 Alpine NJ (also known as KE2XCC on 92.1) died in 1954,
>after its owner, FM pioneer Edwin Armstrong, committed suicide.

That may have been only a CP -- I'm not aware that this ever went commercial.
It was, of course, W2XMN on the old band; KE2XCC was apparently a separate
license issued to allow Armstrong to conduct comparison tests between the two
bands.

>WBBM-FM 99.3 Chicago still on as 96.5.

I tend to have my doubts about such a continuation. A lot of AMs started FMs
in the late 40s, dropped them a few years later and ended up building new ones
(or buying out undercapitalized FM-only stations) in the 60s.

>WGNB "98.0" (really 98.7?) Chicago was WGN's FM, sold off a year or
>two later to become classical WFMT, still on the air.

Hmmm...Tribune ended up buying BACK WFMT at one point, then selling it off
again.

>WWZR 98.5 Chicago was Zenith's station, later WEFM on 99.5,
>now WUSN.

Next time you see an old Zenith FM radio, look for an umparked dot on the FM
dial at 99.5.

From: ginnyw@netcom.com
Message-ID: <2r16fs$ltr@vixen.cso.uiuc.edu>
Source record: 39916

The San Francisco area 24 hour jazz station KJAZ is struggling to collect funds from its audience at the same time its owner has his hand in the till once again. Looks like he's convinced the station will die, since he's spending next month's operating capital and then some...The irony is this: the new owners have concluded a contract, pending the probably unsuccessful attempt to forestall the creditors, which gives them the right to "park" the call letters "kjaz" at a central California valley station playing Latino music, in addition to their using KJAZ's present frequency to broadcast the same in the bay area. A current transit poster ad campaign refers to KJAZ as "Que Jazz!", a irony-laden coincidence given the future of the call letters...

[Article crossposted from ba.broadcast]
[Author was David A. Kaye]
[Posted on 12 May 1994 18:59:57 -0700]

Todd Hawley (thawley@netcom.com) wrote:
: question is this..didn't KMPX go "off the air" in the late 60s to be
: "replaced" by KSAN? Seems to me I read somewhere the DJs left KMPX to go over
: to KSAN. Any Bay Area radio historians here, help me out. :)

Note: Obviously, this is not gospel, but it's pretty close.

KMPX was a brokered station (selling time in block to whoever wanted it) owned by a guy named Leon Crosby, a local techie who liked to run radio and TV stations, but didn't quite know how to do it from the business end. So, he ended up selling airtime or occasionally giving it away when he thought he had something hot.

In the mid 1960s he owned KMPX, over at 50 Green Street (across from where KSOL is now). It was a tiny little place, pretty much away from all the hippie happening. But it had airtime available.

One guy who decided to play with the airtime was Tom Donahue, who had been a DJ at KYA, a big time rocker in SF. He really didn't like the time/temperature kind of radio at all, nor the playlists developed at the Drake/Chenault cross-town rival KFRC, and being implemented at KYA.

So, in Donahue's inimitable words, "I don't do time and temperature. If you want to know what time it is, look at your watch. If you want to know the weather, stick your head out the window." Donahue's freeform music and talk format on KMPX meshed very well with the developing hippie movement and went on to become quite successful.

Among the innovations were a street drug report, wherein some expert would talk about what drugs to avoid due to impurities, etc. Another was the "listeners' personals" where people would call/send in anything. Another was the ride line, which existed for nearly 15 years. People who had rides or needed rides left their info and they'd air it and put it on an answering machine, too. The music was a hodge-podge of the some of the stuff the people had done when they were buying block time (bluegrass and folk music mostly), mixed in with the latest rock. In an hour you'd hear everything from acid rock to chicken rock to bluegrass, even to country singers like Ian and Sylvia Tyson. It was unique.

Metromedia was getting very excited about the SF Bay Area, and had bought 2 radio (KEWB and KSFR) and 1 TV (KSAN-TV) stations, but were failing with classical music on their FM, KSFR, as was nearly everyone who programmed classical. (Within 3 to 6 months KBRG [now KITS] also dropped classical,

going to Spanish contemporary.)

So, Metromedia and Tom Donahue came to an agreement to bring his people over from KMPX, where they still weren't making much money, to the newly christened KSAN(FM). They basically up and moved to KSAN. Metromedia was very successful with the "progressive" or "underground" format that they soon duplicated it at KMET in Los Angeles and at a couple other of their station.

Then about a year later, George Yahraes, an ABC executive, cloned it into an automated format called "Love" which ran on the ABC-owned stations for a couple years. "Love" was probably the first program/format to bring columnists from the "hippie press" (Rolling Stone, Village Voice, etc) to the airwaves on a national basis. When this failed due to technical problems, ABC then renamed all their FMs and tried to duplicate the Tom Donahue format on their stations. Some of their stations such as WPLJ in New York (White Port and Lemon Juice), KLOS in Los Angeles, and KSFX in San Francisco became legendary in their own rights.

As to KSAN, Tom Donahue died, and his vision pretty much died with it. Some Metromedia corporate types came in and tried to steer it, and began to lose the edge. KMPX eventually went to big bands, KSAN to country, KSFX to disco, then talk, and the other stations changed to whatever would work. The problem with Donahue's format is that it relied on the creativity and musical knowledge of the DJs and their community involvement. That's something which can't be cloned very well or for very long.

Hithere:

Sorry for the sporatic postings, but as most of you know, I have moved
from Chicago to the Branson Mo area. I bought some acrage and a house
and am in tranist now.

I now log in Long distance from a friends house and I put as much out
as I can every other day. I am soon to have a local net-connection
and things will resume as normal.

During this transition period, I am giving priority to posts in this order...

1) Time sensitive material (If your post is time sensitive, say so in
the subject line, such as "TIMELY: Article subject". This will help.)

2) Broadcast professional matters.

3) RadioWatcher reports

4) Informational postings

5) Other articles.

Also...

Please try to keep articles as short as possible, and if you are
reading via AIRWAVES, you will see larger issues. This is to
accomodate the largest number of posts.

Please trim quoted text to a minimum. I am going to start rejecting
posts that have miles of quoted text and a line or two of original
text. Sorry, but I just cannot keep editing these posts and to pass
them on like that is to abrogate my job.

Also, consider emailing "personal" replies rather than posting them.

If you have tried to sub/unsub to AIRWAVES, be patient. I am doing it
all by hand <feeble grin>.

Things should be getting back to normal shortly.

Happy trails

Bill

Radio news week of 5/8/94

Infinity Broadcasting has jumped a big hurdle in its bid to buy WPGC AM & FM. The broadcasting giant ran in to opposition from the African American Business Association when it announced last Fall that it planned to buy the top rated station in the market for $60 million. The group's biggest problem with Infinity is its most popular radio host, Howard Stern. The Stern show, which is already on in D.C. on Infinity's WJFK FM 106.7, will not be broadcast on either WPGC AM or FM if and when the sale is finalized. The AABA has dropped its petition opposing Infinity's purchase of WPGC AM & FM and will get money and special programs in return. Infinity will spend $2.7 million on programs aiding minority businesses in the Metro Washington area. This means Infinity will fund a program that will train local business people in planning and producing radio advertising. Infinity will also provide up to $2 million in discounted air time on WPGC over a period of 4 years to AABA members. And Infinity's chief executive Mel Karmazin will attend a seminar on racial sensitivity and will make a $25,000 contribution to a program that trains African Americans to be radio talk show hosts.

The FCC has other complaints against Infinity before it can allow the sale of WPGC to be finalized. The FCC has two anonymous complaints alleging that the Howard Stern show violated the FCC rule against indecent programming. These two complaints may continue to delay Infinity's purchase of WPGC. However, Infinity is putting pressure on Congress in an attempt to get the FCC to approve the purchase.

WASH FM 97.1 (Soft Rock format) and sister station WTOP AM 1500 (All News format) won't be going on strike for now. The stations and AFTRA agreed to extend the deadline of their current contract to Tuesday, May 17. Both are in the process of finalizing a new three year contract. The stations and the union apparently will modify how it deals with severance pay for the newer hires. The old agreement called for Evergreen Broadcasting to pay up to 5 weeks severance pay should a union member be fired.

WWRC AM 980 (Talk format) is in the process of putting together a new morning show. Carol Preston of NBC Radio News and Jim Bohannon's fill-in announcer, will join Mike Cuthbert on the morning show. Victoria Jones joins WWRC on Monday and will be working afternoons on the talk station replacing the Larry King show.

You're in luck. You say that one station is northeast of you and the other is southeast. That means they're 90 degrees apart, about the best possible situation as far as directional antennas are concerned.

You want your antenna to be:
- highly directional;
- high enough above the ground to get a good signal from the weaker station;
- correctly polarized.

With an 0.2-MHz difference at 89 MHz, you won't be able to put frequency-selectivity to good use. Directionality is what you'll have to count on.

I'd suggest looking in any ham radio book for a cubical quad antenna design; it's the simplest highly directional antenna. Take a design for the 2-meter (140-MHz) ham band and simply make it 1.6 times the specified size.

Aim it at the desired station, and see what you get. Try rotating it about its axis (i.e., rotating it about the line from antenna to desired station) to change polarization and get the best match (or at least, to get the worst match to the undesired station).

OK. I will answer your challenge. In short you may be SOL.
But, let's analyze the situation. FM has capture -- that
is, the stronger signal wins, so you need to make sure that
at the detector in your receiver, you have a stronger signal
from your desired station than the undesired station. Simple
enough concept.

Yes, you want a Yagi. BUT, not all Yagi's are created equal.
You want one that has a deep and well defined null in the pattern.
You can create Yagis or buy them, but find one that has a null
in the right direction for your situation. Separating
the stations frequency wise won't work with an antenna --
way too close. This may bet you 15 to 20 dB if you choose
your antenna wisely.

Next step. Filter. The FM signal technically has a bandwidth
of 250 KHz, but most receivers (including the so called highly
rated Adcom) use cheapo ceramic filters that are wide enough
to drive a bus through. Most have poor rejection 200 KHz
away from center. This is good in terms of distortion of the
recovered audio, but very bad for your situation. You could
replace the ceramic filter with a narrower one -- Toko and
Murata both make "narrow" FM filters. You would trade audio
distortion for selectivity.

If you don't want to take your radio apart..... You could put
a RF filter on your antenna terminals. You want a notch
filter at 88.7 (or whatever) that is very narrow. This can
be done with a few inductors and capacitors, provided you can
tune them with a network analyzer. You will need a pair
of buffers to control the termination impedance of the filter,
but it can be done. This will buy you much more isolation
than an antenna. Perhaps 40 dB or more.

The combination should definitely help you get the station of your choice. The design of the filter is too complicated over the net. See if you have a EE dept. at your institution to design this puppy -- doubt you can buy one, as these are one of a kind things.

Good luck.

-Ken

==========
The purpose of this note is to introduce you to Cassette Culture,
an independent radio production group producing radio programs and
audio documentation of vital themes in the areas of environment,
development and social justice.

CASSETTE CULTURE is an offshoot of CFRU-FM, the not-for-profit
campus and community radio station at the University of Guelph. Established
as an independent working group in 1990, CASSETTE CULTURE has produced and
distributed more than 50 radio programs for broadcast across North America
and around the world. Topics have included indigenous land rights,
ecological restoration, biotechnology and intellectual property rights,
alternative agriculture, gender and development, and the impact of
structural adjustment programs in West Africa.

More than 20 campus, community and First Nations radio stations
in Canada have aired our programs. CASSETTE CULTURE tapes
have also been broadcast on stations in the United States,
Ireland, France, Italy, as well as on the Radio for Peace
International short-wave service broadcasting from Costa Rica.

CASSETTE CULTURE programs have also proven valuable to a wide
range of community groups and organizations. We are particularly proud of
the fact that one of our programs, a profile of Blackfoot leader Milton
Born-with-a-Tooth has been translated into Cree for broadcast in Northern
Ontario and Quebec. Parts of this same interview have also been excerpted
for inclusion in a new documentary by the International Rivers Network.

The CASSETTE CULTURE catalogue is updated as new programs are produced.
To receive future editions of this catalogue, please contact CASSETTE CULTURE
c/o CFRU-FM, Level 2, University Centre, University of Guelph, Guelph,
Ontario, N1G 2W1, (519) 824-4120, ext. 8341, EMAIL: cfru@web.apc.org

Two excerpts from our catalogue follow below:

THE SEED SATYAGRAHA 9/21/93
Since October 1992, hundreds of thousands of Indian farmers have
taken part in mass demonstrations against the General Agreement on
Trade and Tariffs (GATT) and against the transnational
taken part in mass demonstrations against the General Agreement on
Trade and Tariffs (GATT) and against the transnational

agri-business corporations that stand to profit from the new provisions for intellectual property rights. To defend their right to grow, breed and exchange crops outside the control of the transnationals, Indian farmers are reviving forms of struggle and protest dating back to the anti-colonial movement. The world's largest grain trader, Cargill, has been a particular target. Cindy Duffy speaks with activist and scientist Vandana Shiva about the significance of the "seed satyagraha" and the potential for asserting community control over seed stocks. Runs 29:55 with intro and extro.

HEALING THE FOREST, HEALING ITS PEOPLE 8/13/92
Dennis Rogers-Martinez has worked for more than 20 years in range and forest restoration. Since 1988 he has worked with the Intertribal Sinkyone Wilderness Council in northern Californian on a project to restore and reclaim a watershed devastated by logging. In this interview, he talks about the traditional systems of indigenous land stewardship and the restoration model being developed at Sinkyone. Runs 29:45 with intro and extro.

For the guy with the problem of a co-channel religious station. I can sympathize with you there. Something worth looking into would be narrower filters in the IF. Greg Coniglio might know a bit more about that than me. I think it's just a matter of taking the old ones out and replacing them with new ones, giving the radio a narrower bandwidth.

Cincy 1360... the idea of switching the calls to WKRC wouldn't be too bad. Besides the fun of call letter shuffling, I've got a slogan for the Radio AAHS affiliate... We're Kid's Radio for Cincinnatti. Somebody should pass that on to them.

The San Francisco area 24 hour jazz station KJAZ is struggling to collect funds from its audience at the same time its owner has his hand in the till once again. Looks like he's convinced the station will die, since he's spending next month's operating capital and then some...The irony is this: the new owners have concluded a contract, pending the probably unsuccessful attempt to forestall the creditors, which gives them the right to "park" the call letters "kjaz" at a central California valley station playing Latino music, in addition to their using KJAZ's present frequency to broadcast the same in the bay area. A current transit poster ad campaign refers to KJAZ as "Que Jazz!", a irony-laden coincidence given the future of the call letters...

>> knowledge no one has succeeded yet. (Saturday 5/7/94 at 8:30 PM)
>
> Mark, what exactly does that mean? Are you listening to something which is
not affected by the delay, like the studio lines or something?

Mike:
KFI's news facility (after business hours) and traffic reporter are not on the premises and they provide a non-delayed feed so that the talk show hosts can communicate with the news people. It can be found at 450.737 Mhz on most scanners (I live below Mt. Wilson, where the xmitter is). Some hosts turn it off and on as needed, but most let the show air. You can also hear the board engineer communicating with the remote news people sometimes.

IFB=Interuptable Fold Back - meaning the program feed can be interupted by the engineer to give important information.

Take care...
Mark West

(very) low power B/U in NJ at WZRC site. If purchase option is taken by
LMA of AM station this may change.

> 93.9 always WNYC-fm
> WTC Master Antenna, No B/U
B/U was once on Municipal Building, but was removed during restoration of
the landmark building.

> 100.3 WVNJ-fm...WHTZ
> Empire Master Antenna, B/U, in NJ?
Nope, WHTZ is no longer associated with an AM station.

> 101.1 WCBS-fm always
> Empire "Network" Master Antenna, B/U, site??
Seperate B/U antenna on Empire, also full UPS system and WCBS-TV B/U, (main
TV on WTC). Only TV and FM stations to remain on the air during blackout
and TV was the only VHF to stay on during the WTC bombing.

> 103.5 WTFM...WAPP...WQHT...WYNY (moved here from 97.1 9/22/88 WTC Master
> Antenna, used to have B/U in Fresh Meadows, Queens at studio site, current
> backup site??
Fresh Meadows torn down years ago, WQHT studios moved to Astoria, Queens
long before that.

> 105.9 WHBI...WNWK
> Transmitter still at 515 Madison Avenue??
Good question, new studio is downtown and since frequency is assigned to
Newark, NJ, it may be moving to WTC. BTW, 515 Madison tower was originally
built by Dumont TV network for Channel 5, (WABD) and WABF (FM). Although
WABF went off the air in 1954, it's direct decendent is WNEW-FM since
WNEW's owner, (Metropolitan Broadcasting), was the senior partner in the TV
and FM station, (Metropolitan Television). After move of WABD to Empire
and later demise of WABF, tower was used by WKCR.

1733. WANTED: RADIO SALES MANAGER

Newsgroup: rec.radio.broadcasting
Date: 1994-05-18 02:13:26 UTC
From: cameron@netcom.com
Message-ID: <2rbtk6$nn2@vixen.cso.uiuc.edu>
Source record: 39938

WANTED: SUCCESSFUL/INNOVATIVE RADIO SALES MANAGER

We are looking for an energetic, creative, and aggressive
radio ad sales manager. We will use interactive digital audio
programming services to create Radio...The Next Generation. A
wide range of audio programming will be packaged to meet the
specific tastes of a variety of market segments and distributed
to digital distribution channels.

My background is in promotions and data services.The past
two years have been spent performing research and organizing the
development team. The technical, legal, radio frequency, and
telecommunications expertise is in place. The main resource we
lack is an individual with radio ad sales experience. The ideal
candidate has a track record of innovation and success in
developing radio promotional programs. He/she enjoys the
challenge of starting something from scratch.

You will receive equity based on the achievement of
milestones, just like the rest of the development team. The team
has a youthful spirit and the energy and talent needed to build a
programming service of tremendous value.

If you, or someone you know, fits the above criteria please
contact me or forward their name.

Best regards, Chris Jaeb

Source record: 39940

Rob Schaller (C12019@email.mot.com) wrote:

: The success of AM stereo depends on three critical factors. Government
: regulation, technology, and marketing which heightens consumer awareness.

KNX in Los Angeles is doing stereo. It's an all news station. They have
stereo news sounders. So much for AM stereo. Stereo is supposed to
enhance a high fidelity signal. AM reception is not high fidelity.
Having mediocre sound in stereo is not going to win it any fans. I don't
think AM radio is dead (yet), and certainly the top 3 stations in SF are
all AMs, but most listeners listen to music -- and the music stations are
all FM.

: impressive sound on AM relative to what we have been accustomed to. Now
: the marketing of AM stereo is another story.

No, that's not the point. It's not better AM compared to previous AM.
It must be AM that's as good or better than FM. AM is competing against
FM, not against itself.

Anybody remember the AMAX equalization promos the stations were doing a
few years ago? Another washout.

: AM sound quality is not always as poor as people tend to think. A lot of
: factors enter into the picture. Terrain and receiver designs are the
: biggest factors.

No question, AM transmitters are putting out high fidelity signals. Just
build a crystal set and use one of those cheap little crystal earpieces
and you'll hear the frequency range. But there is no practical way to
have selectivity AND fidelity.

1735. XETRA-AM

Newsgroup: rec.radio.broadcasting
Date: 1994-05-18 02:13:28 UTC
From: Chris.Carmichael@artecon.com
Message-ID: <2rbtk8$nn7@vixen.cso.uiuc.edu>
Source record: 39939

Good Day from north San Diego County:

As reported last week, XETRA-AM (690, 50kw, Tijuna, Baja California) picked up UCLA sports from the former all-sports KMPC Los Angeles. XETRA holds the rights to San Diego State football and basketball, the SD Chargers, NHL Kings, and Stanford football. Plus, the station is vying for the SD AA Padres for next season; and reportedly would like the California A's baseball. Problem is that there is only 24-hours in one day; and one signal (or combined signal for LA) of XETRA. (KWNK, 670 5kw -D carries the all sports station and broadcasts from San Fernando valley.)

The Escondido Times-Advocate and Oceanside Blade-Citizen have printed that the Noble broadcasting group is looking for another outlet in SD county. But the choices of a good signal is far and few. The best bet would have been what is now KOGO, a 5kw U station at 600. But, as previously reported, the hot-talk format and SD Gulls hockey are now on that station. Sports pages and radio columns claim that certain stations may be for sale, but the one mentioned are directional and/or reduce the power after sunset.

One report claims that if the Cal A's are on XETRA, XETRA will still bid for the AA Padres, and then buy time on cross-town (and country) KFMB to -- broadcast the Padres. KFMB currently broadcasts the Padres, and the $1 million a year contract is up after October.

In the fall fling of football, there will be up to four conflicts with game times between the SD State Azetecs, and the UCLA Bruins. SD State is upset that the Aztec games were farmed out to 2.5kW KCEO AM 1,000, Carlsbad. The games at night can be barely heard at the stadium.

[I have a solution: stereo AM. "Tonight on Football Feast, the right channel will have the SD Aztecs vs. Hawaii, and the left channel, UCLA takes on cross-town rival USC. Can your radio-station do this??]

As if they don't have enough: XETRA-AM has added the highly rated ESPN radio feed to it's weekend lineup.

Jerry Gross, former sports director at KFMB radio and radio-with-pictures is moving to Atlanta, Ga. He has signed a deal with the Southern Sports Network, and will host a show, "the Jerry Gross Hotline" weeknights with ex-Falcon's running back, Gerald Riggs. Gross' production company will also move to Atlanta.

XHRM-FM (92.5, 50kw) has opened a nightclub near Jack Murphy Stadium. The first "big" venue is the group NRBQ, sponsored by KKOS, Carlsbad. 92.5, the "Flash's" entry in north of the border entertainment has caught the eye of grunge bands.

XETRA-FM (91.1 100kw) second in a series of local (San Diego) bands compact disc arrived at area record shops. It's at a special price of $5.91 until next week. (E-mail me if you would like to purchase a copy.)

Thanks!

/* Written 11:01 am May 17, 1994 by resystom in web:amarc.radio */
/* ---------- "AMARC 6 Information" ---------- */
WAVES FOR FREEDOM

"Waves for Freedom" is the general theme of AMARC's Sixth World Conference, which will take place in Dakar, Senegal, from January 23 to 29, 1995.

The event, to be held in a continent racked by unprecedented levels of economic, social and political crisis, will undoubtedly provide an excellent opportunity to consider the problematics of radio at the service of development. AMARC 6 will offer a special focus on the different methodological facets of community-based participation in development, radio technologies and the establishment of networks for exchange and for South-South and North-South solidarity.

Since January of this year, a local organizing committee (LOC) has been at work preparing for AMARC 6, where more than 400 participants from all continents are expected. This committee comprises a pan-African NGO network (FAVDO), a collective of Senegalese NGOs interested in setting up community radios (CORACOM), the Panos Institute, Senegal's Radio-Television nationale (RTS) and representatives from the local press, including Sud Quotidien, as well as various networks and resource persons with experience in radio communication.

The LOC is working with the close cooperation and support of AMARC's Secretariat in Montreal, Canada. Priorities for the coming weeks will be to subdivide and link thematic guidelines in order to develop precise subjects for the conference's workshop discussions as well as to prepare documents to stimulate thinking regarding all issues linked to the AMARC 6 main and underlying themes.

We are inviting all people and institutions interested in greater access to the airwaves and the development of community radio throughout the world -- and especially in Africa -- to attend our upcoming event in Dakar, Senegal. It will be a novel opportunity to make a significant contribution to the emergence of free and community radios in a continent still haunted by dictators and where young democracies remain fragile and even feverish.

The AMARC 6 Local Organizing Committee
P.O. Box 7369
Dakar-Medina, Senegal,
Tel.: (221) 24-49-01

Fax: (221) 24-49-02

For more information about AMARC 6, contact the local organising committee at the address above or AMARC's international secretariat at the address below.

The cost of the conference has not yet been determined but we plan to offer a package including registration, hotel and two meals a day for the week. The package will likely cost between US$500 and US$850, depending on the standard of accommodation you choose.

I have found it strange some on the comments that have been offered to help cut out the 88.5MHz. Directional ant will help but how about cutting the signal strength of the unwanted signal? Microwave filter company makes a model 5KFM-88.5 filter which will lower the 88.5MHz signal by 50 dB, this should let you pick up 88.7MHz. If you use a booster amplifier be sure the use the filter in front of the booster amp.

/* Written 10:59 am May 16, 1994 by resystom in web:amarc.radio */
/* ---------- "Politics of DAB" ---------- */
Digital Audio Broadcasting: The politics of a new technology
==========

The introduction of transistors and integrated circuits made FM broadcasting one of the cheapest and most effective means of local communication available today, putting radio at the disposition of community and participatory broadcasters.

Digital audio broadcasting (DAB), the next generation of radio broadcast technology, is almost with us. Depending on the technical choices that are made, DAB could bring about greater changes to radio broadcasting than the introduction of FM did.

This article looks at the issues at each of the three levels of policy making in the DAB debate: technical systems, frequency allocation and regulation. It attempts to determine whether DAB's introduction poses an opportunity or a threat to community radio and to identify the strategies that can be used by AMARC and the community radio movement at each policy level.

A system stacked against us

Two different DAB technologies are currently under development. The United States is proposing an "in-band" technology which will simply enhance the signal quality of existing FM services without altering the economic and regulatory structures of the radio industry. However, while the technology poses few problems for community broadcasters, it has not yet been shown to work effectively and no countries outside the US have committed themselves to adopting it.

The European model for DAB, known as Eureka 147, is roughly five years more advanced in research and development than the US model and has the support of governments across Europe together with Canada, Mexico and Australia. In February this year, Eureka 147 was submitted to the European Telecommunications Standards Institue for approval and it could be available to some listeners as early as 1995.

The Eureka 147 DSB system differs fundamentally from FM in using a single common transmission signal to be shared by six or more different programme services. It has the advantage of allowing a network of transmitters to re-use the same frequency without

interference, provided each transmitter carries the same six services.

This is very good news if you are a national or international broadcaster running five or six radio services. If you are a local broadcaster running a single stand alone service Eureka 147 is extremely inefficient since you will have five or more unused channels on your transmitter. Eureka 147 DAB, for many local broadcasters, could simply prove to be uneconomic becuase only by grouping six services together artound an identical coverage area can local broadcasters make Eureka 147 as efficient as FM.

If the Eureka 147 system is adopted as proposed, space on DAB could still be secured at the frequency planning and regulatory levels, but we will be starting with a technical system clearly weighted in favour of national and wide area broadcasters.

How local is local?

The first question in frequency planning is "how local is local?" If the frequency plan for DAB uses small independant cells, each with their own transimtter and frequency then any coverage area is possible downn to the size of the smallest cell. In this model each local radio service can use one or more cells to achieve the coverage are it requires. Thus ther size of each transmission cell is a policy decision of considerable importance. If the frequency plan uses a network of high power transmitters, some community radio stations may be left out simply because they are too small.

A second possibility for frequency allocation involves single frequency networks using more than one transmitter to cover a wide area. In this model each transmitter carries the same set of programmes on the same frequency and is encoded at a single central point. This approach is favoured by many wide area broadcasters as being more efficient and less expensive. Howver, under such circumstances, the opportunities for smaller commnity radio stations on DAB will be severely limited and theses local services will have to incrase their coverage area or forego DAB altogether.

Regulation - who is in control?

The regulation of Eureka 147 DSB introduces a new political dimension to the question of who is in control of the means of distribution. AM and FM radio stations typically own or contract their own transmission system although in some countries there remains a government monopoly over the transmission infrastructure. Under Eureka 147, control could be in the hands of the broadcasters, the regulator or the transmission provider. Cable and satellite systems already provide some experience of the latter option where programming space is simply bought and sold by the

transmission provider, but it is largely new territory for radio broadcasting.

The prospect of a new level of control is complicated by the fact that DAB transmissions could carry data services as well as sound programme services. We could very soon see the convergence of telecommunications with broadcasting. In this case, should DAB be regulated as a broadcasting activity or a telecommunications activity? The historical separation of these two means of communication have led to very different regulatory models.

If there is one thing community radio broadcasters should demand it is the provision of "must carry" rules on DSB to ensure that, in the new age of digital sound broadcasting, access is reserved for communities to communicate at a price which is affordable. The fact that Eureka 147 DSB requires new spectrum allocation for sound broadcasting means there will be opportunities for new radio services. Faced with a system which favours national and wide area broadcasters, it will be all the more important to ensure that community radio is recognized by the regulatory system as an essential part of the new media landscape and thus able to take advantage of these new opportunities.

> ve gathered.)

FM started to catch up quite quickly when it was introduced here.
A week ago I went to an exhibition of the Hessischer Rundfunk in Frankfurt
(70th anniversary) and read that they started with FM in 1951, it was
and still is a simulcast of their AM service (1. program). Short after that
they started their 2. program (FM-only)

The reason why FM became so popular is the fact that Germany (as a looser of
the war) was allocated non-clear MW frequencies. Hence the radio stations
started on FM. I remember as a child my parents only tuned to FM (that was in
the early 60's). Nowadays noone really listens to AM anymore. Holland a few
years ago started new services on their MW. After a while they found out
that people didn't like to listen to AM and set up an FM network for it.
Why Germany still simulcast on AM, I don't know?

In Britain MW and in France LW (4 stations with more than 1000 KW power)
is much more important than here.

: wow. it's really great to see a new *classic rock* station. it always
: frightens me to think that someday there may be less than 20 classic
: rock stations in any given market. thank god that day won't be coming too soon!

And to think ten years ago, the format didn't even exist.

When I moved to Houston in 1985, I was blown away by this AM station that I described as "sounding like KSHE in 1975." It was KRBE at 1070, running in stereo, with one of the first classic-rock formats anywhere. Unlike present day examples of the format, KRBE had a pretty diverse playlist. The Thirteenth Floor Elevators (a Houston band!) were a particular favorite.

When was the last time you heard "Monster" by Steppenwolf on a classic rock station? Moreover, when was the last time you heard *anything* by Steppenwolf other than "Born to Be Wild" on a classic rock station? The same tale can be told for a thousand other classic rock artists. The classic rock format is but a pale reflection of the musical corpus that made it possible.

I had my SRF-A100 by 1985. KRBE sounded awful in stereo, but I put up with it because the music was good and the playlist varied.

The station later ran Z-rock then simulcasted the FM (itself a pretty good CHR station) and now, I understand, has picked up its old call letters of KENR for some reason.

Probably the most interesting (from a curiosity standpoint) transmitter
in NYC is my alma mater, WNYU-FM (89.1). The frequency was origanlly
assigned by treaty to the United Nations, which theoretically can demand
it back anytime. Currently it is shared by WNYU (4p-1a local time,
Mon-Fri) and WRSU (all other times) (some shit-ass college in Jersey).
The transmitter is located at the old NYU campus in University Heights,
the Bronx and the antenna is aimed generally to the NE (Manhattan below
about the 50s, including the NYU campus, can't usually receive WNYU well).

I'm not aware of any other such time sharing arrangement in the US.

Someday if I get rich or elected to Congress I will find a way to make
WNYU 24 hrs and omnidirectional.....

1754. AM-band radio interference problem

Newsgroup: rec.radio.broadcasting
Date: 1994-05-18 02:53:13 UTC
From: gjanee@coyote.rain.org
Message-ID: <2rbvup$r47@vixen.cso.uiuc.edu>
Source record: 39959

I enjoy listening to old radio shows on an AM radio station (KNX 1070).
My problem is that there is sporadic static that completely
obliterates the station.

The static seems to occur only at night, and at random times. However,
the static has a characteristic quality: it is intense for
approximately 20 seconds, then sputters out in a particular fashion.
My guess is that a neighbor has a motion detector that controls a light
via radio. I used to have one of these setups, and it generated
AM-band static. Perhaps the neighbor's light is triggered by
the dog, and the light is set to turn off almost immediately.
But I really don't know.

But whatever the cause of the static, what can I do about it?

I'm using a clock/radio that has for an antenna one of those
cheesy 2-foot wires hanging out the back. I've tried using a better
radio, but the static is still there (though to a lesser extent).

Right now I'm in the process of determining if the static is present on the
other side of the house. If it is not, would it be possible to hook
the clock/radio to a remotely-placed antenna? How would I go
about doing this---with shielded cable? Could I achieve the same
effect by hooking the clock/radio's antenna to my TV cable?

Obviously clueless (I'm a software weenie, not an EE),

Greg Janee

From: Robert Carpenter <rc@cmr.ncsl.nist.gov>
Message-ID: <2rbvuq$r4i@vixen.cso.uiuc.edu>
Source record: 39962

For some months I have noticed an obvious TIS installation at my interchange off Interstate 270 at Rockville, MD. I've tried tuning to 540 kHz, the state-wide TIS frequency, but never heard a loud signal. This past Saturday I happened to tune to 590 kHz at that interchange and discovered a county-operated TIS ... loud. They have good audio quality (unlike the state system) and announce their 590 kHz frequency. I suppose they couldn't use 530 because of the state system and the 540 AM station moving to the county from the Eastern Shore (100 mile move). However, 590 seems odd considering that Rockville is the city-of-license for WTEM on 570 kHz. I suppose that there was no better frequency since 1610 has been eaten by band expansion and few radios tune above 1610 anyway.

Any comments?

Bob Carpenter w3otc@amsat.org

I don't know what hours WOWO and WWVA operated respectively, but the common frequency was 1160 kHz and the common power was 10 kw.

WWVA of course went to 1170, WOWO to 1190, and both to 50kw after NARBA (WOWO made the 50kw move in 1954, I'm not so sure about WWVA).

WOWO-FM broadcasts on 103.1 FM and is licensed to the suburban city of Huntington IN (about 20 miles southwest of Ft. Wayne.) Until "Docket 80-90," any FM station in this part of the country on that frequency had a max. Class A power of 3K. WOWO bought the frequency in the early 80's when it was struggling as an underpowered and undersignaled CHR in competition with 50K Class B WMEE-FM at 97.3Mhz. The reason that WOWO picked up the Class A frequency was simple. WMEE was hard on WOWO's "tail" and very likely going to overtake WOWO as the number 1 station in Ft. Wayne. WOWO continued the CHR format on 103.1 as automated WIOE-FM, and operated 103.1 commercial free in the hope that it would skim off enough audience from WMEE to keep WMEE from overtaking WOWO's Number 1 rating. The WIOE gimmick didn't work. WMEE edged ahead to number 1, but was later overtaken by adult contemporary WAJI-FM 95.1 Mhz. WOWO lost its long time morning man and fell into a downward ratings spiral that has only recently seemed to level off. WOWO-FM has simulcast the AM for at least 5 years now. Why is there still a WOWO-FM? My only guess is that they have not been able to find a suitable buyer...(well at least until Inner City came along.) The 103.1 signal has really never been able to do anything in the Ft. Wayne market. It was just another of the many problems that has plagued WOWO during the late 80's and early 90's. It is a real shame!

Hello Radio,`

Former AOR KOME 98.5 is now positioning themselves as "The new
98.5 KOME". They have adopted a modern format similar to that
of KITS San Francisco. However, from my brief 1 hour
listening period, I noticed no hint of any techno sounds
or anything like Depeche Mode or the Cure. It seems there
sticking to Gin Blossoms and Crash Test Dummies etc.
Also no hint of a DJ in the building. I'll
pass along more news after a more thourough evaluation.

From: john@bovine.ati.com
Message-ID: <2rc13b$slb@vixen.cso.uiuc.edu>
Source record: 39964

C12019@email.mot.com (Rob Schaller) writes:

>Fortunately the vast major of AM stereo radio
>stations today are using the same C-QUAM standard and a few radio
>manufacturers are designing some high quality receivers capable of C-QUAM
>stereo detection.

While C-QUAM has indeed become the standard, I don't know that I would use the term "fortunately". It is generally acknowledged that the superior AM stereo system was developmed long before the other competing systems by Leonard Kahn. His system had the distinct advantage of surviving skywave propagation and interference. While I hear of frequent complaints of platform shifting with C-QUAM, the Kahn system never exhibited this in all of my listening to such stations over a great distance. Unfortunately, in addition to his abrasive personally, Mr. Kahn was not endowed with the brute force corportate clout of the Mighty Motorola and could not cut the deals to get Delco, the standard setter in auto radios, to even consider his system.

>AM sound quality is not always as poor as people tend to think.

Yes it is. It is a simple matter of physics. NRSC calls for a steep pre-emphasis and then a sharp cut off at 10 KHz. This helps give all AM reception that ringy, "over a telephone" sound. The edge of percussion instruments is completely stripped away, and what does make it through that audio torture chamber has phase shifts and other artifacts aplenty. Those elements of processing are present in every AM transmission system--by FCC rules. Add to that the necessity to highly compress and limit the audio to keep the sideband energy high (for coverage), bandwidth limitations of directional antennae, and the number of older, terrible-sounding AM transmitters out there and it gets most unimpressive. Of course, the coup de grace is the propondrance of narrow-band, mono radios out there for sale.

>Many FM receivers have sharp high frequency and stereo
>separation roll off when the signal starts to degrade slightly.

Delco radios have a very annoying "hi-blend" that kicks in at the slightest provocation. Its purpose is to intentionally reduce separation at the higher frequencies to attack some of the baseband noice that can result. Further reduction in the signal causes an actual attenuation of the high frequencies. Mind you this all happens in those crappy Delco radios and is not an inherent quality of FM transmission at all. The effect dreadful--much like listening to a damaged cassette. This is also why I will never own a Delco radio.

>When that
>happens, a high quality AM stereo receiver can rival the high frequency
>response of the blended FM stereo signal while blowing it away as far as
>stereo separation goes.

And comparing AM stereo to the world's worst-sounding FM receiver is not exactly fair to FM. No matter how many times you say it, no matter how much you try tying one arm behind FM's back, AM does not sound as good as FM in the covered market. AM has some interesting propagation characteristics, but that is a different story.

Why is the talent on WIOD in Miami allowed to use the words "a__hole" and "godd__n" (how moderated IS this group? :)), while these very same words are disallowed on all other stations in that market (that I'm aware) or anywhere else, for that matter?

Or am I wrong about it not being allowed, or is it up to the station managers, or what? Help?

[Moderator's Note: Unlike the FCC, you may use whatever language you like, if it is in the vien of making your point. No need to edit letters from words. However please refrain from using profanity for profanity's own sake. Use your brains <grin>. Bill]

>with everyone's TV picture and sound. Putting FM on 3 meter

Actually, the pre-war TV sets were running IFs around 8 MHz (!). The industry went to 20 MHz when the first postwar designs came out in 1946, but 40 MHz IFs didn't even start until around 1950. The real reason for the switch to 40 MHz IF was that early UHF TV tuners had incredibly high local oscillator leakage and terrible image responses; the FCC concluded that they'd have to space UHF stations based partly on the IF being used, so they asked set makers to choose a new standard IF for all UHF-equipped sets so that they'd be able to use that figure in allocation planning. (Oddly enough the earliest Japanese transistor TVs, starting in 1960, had 21 MHz IFs.)

>from me). Antenna experts: how would you proceed? Is there some
>combination of directionality and frequency-specificity that will do
>the job? Would a Yaggi help, or are the frequencies too close? (I

For receive purposes, antenna frequency response isn't going to be "peaky"
enough to attenuate something 200 khz away. There are a few things you
can try:

- Get the best possible signal from the desired station. This means
a directional antenna. You could buy a log-periodic-V from Radio
Shack, or roll your own quad/quagi/yagi. How much time do you want
to spend on this? I'd go for a quad/quagi. Check the ARRL Handbook
or Antenna Book.

- Knock down the interfering signal with a sharp tuned circuit. A
L-C filter isn't going to cut it, so check the "repeater" section of
the ARRL Handbook. Transmit and recieve frequencies of 2-meter (146
mhz) repeaters are only 600 khz apart, so it's a start.

- Find a receiver/tuner with better adjacent channel rejection.

Good luck,
Jim N2VNO

Source record: 39982
Cross-posted to: rec.radio.amateur.antenna,rec.radio.broadcasting,rec.audio,sci.electronics

Thanks to everyone who was responded to my desperate plea for help with pulling in a weak signal in the shadow of a strong one. Below is a brief summary of points that folks made, followed by acknowledgements.

The big bad station has completed their test run, and are off the air for a little while. When they come back on, I'll be trying out your suggestions and hoping for success. (I guess I'll never solve the problem with reception in my car, though...) I will let you know the outcome.

(1) Yes, I plan to write to the FCC, but my area is outside the good guys' protected contour, so I don't hold out too much hope.

(2) Yes, the stations are at an angle (but not exactly 90 degrees) to each other with respect to my location. Most people suggested a directional antenna like a Yagi or log-periodic, or a pair of Yagis stacked vertically or horizontally. (Did "horizontally" mean side by side, or front to back?) Some suggested adding metal screening to help block the strong station. A couple of people worried about multipath signals from the undesired station. I don't think that will be a major problem, as the terrain around me is mostly rolling hills and few tall structures. (I hope I'm right about that...)

It seems to be a consensus that any reasonable antenna solution will emphasize directionality over selectivity.

(3) A couple of people suggested an amplified antenna. I know (and others told me) that that won't help. I had been using one before (bought long ago for another situation) and when the gain is up it pulls in the other nearby college station loud enough to overload the tuner, so I'm sure it won't help here in this case.

(4) If the directional antenna doesn't solve the problem, the next possibility is to construct a "notch filter". I'll need to do some research on the design of such a circuit.

(5) Some folks suggested upgrading the filters in my tuner to improve selectivity, but warned that signal quality would suffer. There are also tuners available that would do this job better than my Adcom.

(6) For sources, there's the ARRL Antenna Handbook and an article in an issue of Audio from some time back describing the stacked-Yagi configuration, and an issue of QST (3/88) describing a filter.

(7) To the "If you can't beat 'em, join 'em" crowd: Thanks, but no
thanks. Nothing personal, you understand...

Thanks to whoever posted my request to Airwaves, and to the following
respondents by post or e-mail. Anyone else who has anything to add,
please feel free.

>have selectivity AND fidelity.

I agree with that assesment, but perhaps the solution is to equip the
radio with more than one IF filter, e.g. one each of bandwidth 5, 10 &
15KHz, so you can use whichever is most appropriate--5 for weak
signals, 10 for moderate, 15 for really strong ones. It shouldn't add
much to the cost of the receiver. Also useful would be to put an
audio notch filter like the ones used by hams and serious DXers, in
order to cut out the heterodyne whistle from adjacent-channel
carriers.

Of course, even though this would be relatively cheap to do, it seems to
me that the radio manufacturers would charge an arm and two legs for it....

Thanks for the actual date. Federal Germany used to have the world's biggest percentage of FM listeners; I do know that the Blaupunkt and Becker AM/FM car radios had a small but loyal following in the States in the late fifties (long before Motorola or anyone else could be bothered with FM auto radios here), much like the clique that has formed around the Philips DC 777 SW car radio in recent years.

Hi folks,
It must be nearly 9 months since I posted to this newsgroup - good to see
its still going strong!
I'm currently searching for a jingle package to revamp the station, and
the best ones I've come across so far have been the new JAM cuts, with
custom sings... and I'm now looking for other stations who've bought packages
in the past year or so, and what its done to their image: has anyone any
proir experiance... I know their cuts are used on BRMB & Viking; do they
really flow? (I've never heard them!)
Alternately, are there any other hot rocking jingle companies I've missed?

1784. More about KTTN, Trenton, MO

Newsgroup: rec.radio.broadcasting
Date: 1994-05-19 18:57:25 UTC
From: "George F. Davison Jr" <gfdjr@delphi.com>
Message-ID: <2rgcql$51f@vixen.cso.uiuc.edu>
Source record: 39989

KTTN REVISITED

Earlier this year Mark Roberts reported on his journey to Trenton, Missouri, and his observations regarding KTTN AM-FM. His posting struck a responsive chord with a number of readers. Here is an update regarding KTTN and its efforts to improve service to its listeners, as well as some observations from a former employee.

KTTN was sold about one year ago to a group of employees by Marvin Luehrs. He continues to live in Trenton, and he takes an active interest in the station. Marv is no longer involved in the management of KTTN.

KTTN-FM is changing frequency from 92.1 to 92.3 and increasing its power from 3 kW to 6 kW. It is hoped that the power increase will improve the coverage of the FM in its primary service area of Grundy, Mercer, Sullivan and Putnum counties in north Missouri. Best information is that the frequency change and power increase will occur by the end of the month. With the change in power and frequency, KTTN-FM will increase its broadcast hours from 5:30 a.m. until midnight and will change its music to all country.

There are no plans at present to change the power or frequency of KTTN-AM. It is at 1600 with 500 watts, daytime. KTTN-AM continues to suffer from a lack of power and a poor dial position. The signal deteriorates badly about ten miles out of town.

The owners of KTTN have a construction permit for a new FM station which is licensed to Gallatin, MO. Gallatin is a small, county seat town, immediately west of Trenton. Gallatin is famous as one of several towns where a financial institution was held up by the James brothers (Frank and Jesse). Frank was tried in the Daviess County Courthouse in Gallatin and acquitted. The courtroom where the trial was held continues in use to this day. The new FM will be assigned to 101.7 with 25 kW. The tower will be located in Livingston County northwest of Chillicothe. Call letters are to be KGOZ. It will broadcast 24 hours a day with a hot country format. The station is supposed to be on the air by the end of May. Present plans are for it to be a regional service, aimed at Daviess, Livingston, Caldwell, Linn and Carroll Counties. All station operations will be controlled from the KTTN studios in Trenton.

As Mark indicated in his reports, one of the key's to the success of KTTN (or any small market station) is service to the community. KTTN continues to broadcast hospital reports (admissions and dismissals), local high school sports, and lots of information about local government.

KTTN's news director, Tom Mock, has been at the station since 1966. His voice is as familiar to residents of North Central Missouri as Walter Cronkite's was to decades of national radio and television listeners and viewers, and his news reports are as credible. The news reports are solid and factual. After listening to a local newscast on KTTN, you know that you have been advised about what is happening in north central Missouri.

I had the pleasure of visiting the station last month during a business trip to North Missouri and spending time with Tom Mock. The station and its facilities have grown and significantly from when I was a part-time announcer, news reporter, and play-by-play announcer in 1969. Shortly before I joined KTTN, its studios had moved from quarters above the fire department and police station. The new quarters were a significant improvement because the roof did not leak and rain no longer shorted out the control board (There was a trick to make the control board operate correctly which involved hitting it two or three times when it acted up.) Today, the equipment is more state of the art; the space in the building allocated to the station has grown at least twice; the newsroom has an electric typewriter; the old AP wire service machine is gone; wire and weather reports come in by satellite. National, state and farm news comes from various networks, which are all received by satellite. No more dealing with the telephone company and lines.

There continues to be a commitment to service and to being a local station. Nothing at KTTN is flashy, and there are times when you wonder what is going to happen next. That is small market, local radio, and that is what makes it interesting. The on-the-air personnel have their roots at KTTN and in the community. Several of the programs that are broadcast today were staples in 1969 and when the station signed on in 1955.

KTTN proves that local broadcasting still is viable, despite all of the commentary to the contrary. KTTN, and its fellow local broadcasters, continue to serve in the public interest, necessity and convenience. They prove that service can be profitable, entertaining and informative.

By the way, Trenton is getting a McDonald's. In the late 60s, fast food was limited to the Lil' Duffer chain and a Dairy Queen.

Agenda? Simple: ratings. He's been quite good at it, too.
Secondarily, good radio (although his slams of KFI, according to
net.friends, have been a bummer and bad radio).
Thirdly, screw the power brokers and poseurs and hypocrates.

Still haven't found out his station line-up ... anyone got it
yet?

> Probably the most interesting (from a curiosity standpoint) transmitter
> in NYC is my alma mater, WNYU-FM (89.1). The frequency was origanlly
> assigned by treaty to the United Nations, which theoretically can demand
> it back anytime.

The UN gave up the frequency FOR GOOD about 10 years ago.

Currently it is shared by WNYU (4p-1a local time,
> Mon-Fri) and WRSU (all other times) (some shit-ass college in Jersey).

It shares with WFDU from Faerleigh Dickenson(SP?), who was the first to
submit a chalenge to the UN's reservation of the channel. They get the
lion share of the time not only because of that, but that they went on
about a year or more before WNYU and Ryder College in Trenton, (WWWR ?),
that was the number 2 chalenger for the frequency.

> The transmitter is located at the old NYU campus in University Heights,
> the Bronx and the antenna is aimed generally to the NE (Manhattan below
> about the 50s, including the NYU campus, can't usually receive WNYU well).

You can thank WFUV's CE for that, he built the WNYU transmitter plant,
cloning the WFUV plant and northern pattern rather than beaming it east.
>
> I'm not aware of any other such time sharing arrangement in the US.

There's one in Long Island. Like the WFDU, WWWR, WNYU battle for the UN
cleared channel, there was one for 90.3 in Nassau county when WSHS in
Floral Park burnt down. Both Adelphi U., (WBAU), and Nassau Co. Teachers
Coll., (WHPC), who are both in Garden City, share the frequency. Except
WHPC has the Mon-Fri until 4PM, and WBAU has all the other times.

At one time they shared the same transmitter until WHPC knocked WBAU off.
Now WBAU has the better signal from it's own plant. But you have to watch
out. Between the time they got bounced and got their existing tower up WBAU
was miniscule in power. A 10 watter from Harlem got squeezed into a hole
just before the FCC stopped issuing the license class. That station is
still there causing all sort of problems for WBAU in upper Manhattan and
Western Queens, and probably parts of the Bronx.

> Someday if I get rich or elected to Congress I will find a way to make
> WNYU 24 hrs and omnidirectional.....

Yeah, buy up WFMU, move WNYU to 91.1 and both WFUV and WNYU can go omni.

> Leonard Kahn.

Can you cite references to show that it is generally acknowledged that Leonard
Kahn's system is the superior AM stereo system? Also while C-QUAM may be a
Johnny come lately, I think the Magnavox and related systems date back to the
same period as Kahn's, I will check the references. One advantage that C-QUAM
has over Kahn's system is that it can be decoded to yield L & R signals at the
receiver that are identical with those that were used to modulate the
transmitter. This is not true with Kahn's system, where it is not
mathematically possible to recover the original L & R modulating signals at

the receiver.

> His system had the distinct advantage of surviving skywave
> propagation and interference. While I hear of frequent complaints of
> platform shifting with C-QUAM, the Kahn system never exhibited this in all
> of my listening to such stations over a great distance.

Can you provide any references, other than your own listening, that indicates
Kahn's system does not suffer from platform shifting and other artifacts under
adverse reception conditions? Since the Kahn system has pretty well
disappeared from the scene, it is difficult to try this for ones self. In any
case how much AM listening is done via skywave by the general public today? I
would guess that only a few DX fans are into skywave listening today.

> Mr. Kahn was not endowed with the
> brute force corportate clout of the Mighty Motorola and could not cut the
> deals to get Delco, the standard setter in auto radios, to even consider

> his system.

I believe C-QUAM has been selected as a standard or is widely used in
countries such as Canada, Japan, Australia, China, and others. Does Delco
set
the standards in all these places? Has the Kahn system been selected for
use
anywhere? If it is as good as you say, it must have been selected for the
standard somewhere.

> >AM sound quality is not always as poor as people tend to think.

> rules.

Could you cite the FCC rules that require the use of the "NRSC calls for a
steep pre-emphasis and then a sharp cut off at 10 KHz."? My reading of the
CFR
part 73 only shows that an emission mask must be meet. It does not say that

you must use the type of filter you claim. I am sure a clever design
engineer
could design a good sounding filter that meet the FCC requirements. Does
this
filter really sound as bad as you say or is the problem elsewhere? Don't
forget FM uses the same type of filter, although it does have the advantage

that it is at 15kHz instead of 10kHz.

> Add to that the necessity to highly compress and limit the audio to

> directional antennae, and the number of older, terrible-sounding AM
> transmitters out there and it gets most unimpressive. Of course, the coup
> de grace is the propondrance of narrow-band, mono radios out there for
> sale.

Now we are getting down to the real problems, excessive multiband
compression
and limiting, directional antennae, and poor receivers. AM is not alone in
suffering from compression and limiting, FM also does this and suffers the
same evil from it. FM does not have the directional antennae problem, but
is
not without receiver problems in the real world, although limited audio
frequency response is not the problem it is with most AM receivers.

Regards,

John Byrns

That was someone else's message that I replied to. You might want to ask the AOL folks to check their newsreader's quoting code.

I do listen to WOWO-FM when I visit my relatives in Columbia City (20 mi. west of Fort Wayne. Seems to come in fine on Delco car radios, but I haven't done any detailed checks on their signal.

1789. economics -- how much to start barebones station?

Newsgroup: rec.radio.broadcasting
Date: 1994-05-19 20:40:06 UTC
From: gganderson@augustana.edu
Message-ID: <2rgir6$hdg@vixen.cso.uiuc.edu>
Source record: 39855

I am curious what the operating costs of a basic, barebones medium wave (AM) or FM radio station.

Assuming one had an open frequency, how much to put up an AM antenna, purchase a transmitter, operate the transmitter monthly, etc. I'm thinking of just a low-power (250 to 1,000 watt) local or small regional station.

If one wanted to operate say a public station (PBS-type) and just provide say a rebroadcast of BBC WS or some satellite or tape-based feed, how much does that add to operating cost?

How do these expenses change with a low-power FM station assuming an open space on an existing tower?

How much does it cost to operate a translator service? (One of favorite stations is in fact a 10-watt translator of a PBS FM station in eastern Iowa.)

No, I'm not interesting pirating or anything like that. I'm just trying to understand today's economics in the industry.

Thank you. Cheers. Kevin

Are you telling me that FM stations *don't* "highly compress and limit" their audio?? The only ones around here that don't are classical music stations and some college stations, and these stations aren't exactly beating the pants of their AM competitors. Some of them would probably double their ratings if they set up a Radio Shack stereo system on a street corner. And the FM's I am talking about are not class D's either.

On the other hand, for those FM's that *are* doing well, success seems to be directly proportional to the amount of compression and limiting they use in their audio chain, although some of the people running these stations may also tell you they do it for coverage, just like on AM, but for a different reason -- FM multipath causes highly objectionable "clicks" and "picket fencing" in moving automobiles that is masked by loud program material. (AM does not suffer from this problem in moving cars.)

So why *shouldn't* AM stations compress and limit? It seems to be what the public wants, as evidenced by the FM stations that are successful doing it!!

1791. What happened to Art Bell?

Cross-posted to: rec.audio.pro,misc.forsale,rec.radio.broadcasting

I have some broadcast audio gear that I would like to horse-trade out of my storage closet for additions to my collection of microphones, particularly in search of ribbon mics and an EV RE-27.

I have: 1- Ampex ATR-700 R/R deck, fully pro, 1/2 trk stereo, heads in excellent condition.

1- Ampex 351 R/R deck with tube electronics, full-track mono heads fair, electronics fair, deck built like a tank.

I'll make trades favorable to you ... I'm moving before long, and don't want to move these. Both units have been in _clean_ storage and may require routine maintenance (oiling, belt and drive rejuvination, switch cleaning). You pay packing and shipping.

Email me at this address, or at aj@aj.com --- let's deal!

1793. Upgrading G.722 Codecs

Newsgroup: rec.radio.broadcasting
Date: 1994-05-19 20:40:20 UTC
From: "Al Rieland Rm: 7142 3-5544" <RIELAND@vilas.uwex.edu>
Message-ID: <2rgirk$hea@vixen.cso.uiuc.edu>
Source record: 39859

ref the Stephen Baum question on codecs...

Although we've made the decision to purchase the Telso Zephyr systems for all our news bureaus (6), we wouldn't have done so without the G.722 compatability. The Zephyr will allow two separate G.722 sessions simultaneously when using Basic Rate ISDN. On the other hand, if we want 20KHz mono or stereo between our bureaus, the Telos box should theoretically be better than anything available - this is also the downside. Telos uses ISO MPEG Layer III while CCS, Comrex and others are using the less complex, and nearly as good ISO MPEG Layer II standard. There are a lot more of the layer II boxes out there already than the Layer III and they are NOT compatible. (Telos could make there box downward compatible with Layer II, but they couldn't justify the cost at present.) So...

Since there are hundreds of G.722 users out there, whatever you buy, ask if it's also G.722 compatible - some are. When you get your system up and running give me at call and we'll test it and include your name & number on the latest Digital Audio Terminal Directory for North America.

Date: 16 May 1994

CONGO: Journalist Yves-Roger Yebeka arbitrarily detained,
released; journalist Marcel Mallet Ombamba interrogated

Originator: Reporters sans frontieres (RSF, Montpellier)

Journalists Yves-Roger Yebeka and Marcel Mallet Ombamba were
stopped by the police on 10 May 1994 about 20 kilometres outside
of Brazzaville on the road to Oyo. Yves-Roger Yebeka, journalist
with "radio Congo" and correspondent for the continental radio
station "Africa No. 1", and Marcel Mallet Ombamba, journalist
with "radio Congo", had gone to Oyo, 400 km. north of
Brazzaville, to interview former president Denis Sassou-Nguesso
on the outcome of the South African election.

Yves-Roger Yebeka was then detained at the central police station
in Brazzaville until 14 May. Reports indicate that he was held
for having state property in his possession and for having left
on assignment without permission, accusations that he
categorically denies. The recordings made on the trip were
confiscated.

Marcel Mallet Ombamba was holding a authorisation to leave on
assignment, signed by the director of "Radio Congo", Lucile Oba.
This authorisation however did not include an interview with
former president Sassou-Nguesso. Marcel Mallet Ombamba is also
```

accused of leaving town on assignment without permission.

Another "Radio Congo" journalist, Therese Mickountima, was recently reprimanded for having referred to the former president's relationship with South Africa. In July 1993 Therese Mickountima had been detained for 72 hours after being seen leaving the former president's residence in Brazzaville.

RECOMMENDED ACTION:
Please write Congolese authorities protesting the interrogation of journalists Yves-Roger Yebeka and Marcel Mallet Ombamba and the arbitrary detention of the former for four days; pointing out that the justification given for the interrogation and detention is inadequate; and asking for assurances that Congolese journalists will be able to practice their profession unrestrained.

Source record: 39994

Hi BIll!!!! Have you moved yet? How did it go??? I am moving to Ann
Arbor for a new job. I will have this account for a while yet, I will give you
the new account when the time comes...
Concerning the antenna design challenge, I have seen all manner of suggestions
and they all seem like they might work, but I would suggest an adcock array.
Adcock arrays are normally used for rdf work, they have a cardiod pattern
with a very sharp null in one direction, since both signal are sufficiently
strong, point the adcock array at the interfering signal and voila, it and
only it disappears!!!

```
i i
i i ------> direction of null
i i _
\_______/^\_______[_] radio
```

the adcock array consists of two 1/4 wave verticals seperated by 1/4 wave
of coax and then fed into the radio. the 1/4 wave seperation + 1/4 wave
of coax produces a 1/2 wave of seperation only in the direction toward
the inside antenna. remember we are talking electrical, not physical
quarter wave, the antenna length will be affected by the diameter of the
wire (not much affect) and the coax will be affected by the propagation
velocity (a lot, .66 for 75 ohm foam dielectric I think)
physical length = 1/4 wavelength * propagation velocity.
eg
300/freq in MHZ = length of fullwave in meters
39.2 * length in meters = length in inches
if this gives you, say for instance, a 100" quarter wave, and if the
propagation velocity is .66 then a 66" phycical length of coax
will electrically be 100" to a radio wave, since the radio wave will
slow down while travelling through it. remember light speed is constant
in a vacuum, everything else slows it down,
subject to approval of management (tm).

All of this is from memory, I would get a copy of the ARRL antenna
handbook before I spent any money, also if I were doing this, I would
look at a ready made 90 degree bend and a 'T' to make the wiring easier,
you can play with the physical spacing to adjust the null, if you have
the wrong spacing you will get two nulls, in RDF that is catastrophic,
but in your case I don't think it matters. If this works, post your
results and the part numbers you bought in case others want to try it.
this can also be used to DF your favorite station.

1799. Re: FCC UNDERWRITING GUIDELINES- help please!

Newsgroup: rec.radio.broadcasting
Date: 1994-05-19 20:40:32 UTC
From: Bob Keller <rjk@telcomlaw.com>
Message-ID: <2rgis0$hia@vixen.cso.uiuc.edu>
Source record: 39995

The basis legal provisions are set forth in Sections 399a and 399b of the Communications Act (47 U.S.C. secs. 399a-399b) and Section 73.503(d) of the FCC Rules (47 C.F.R. sec. 503(d)). To answer any specific question, however, it would probably be necessary to research FCC decisions under these provisions (e.g., in what circumstances has the FCC blessed underwriting practices versus in what circumstances it has imposed monetary forfeitures or taken other enforcement action due to a violation of these policies?).

I believe the original post asked about whether a tobacco company could be named as an underwriter. I have not had the occasion to research this question and therefore don't _know_ the answer, but my gut feeling is that this would probably be legal provided the underwriting practice otherwise met the requirements of Sections 399a-b of the Act and Section 73.503(d) of the Rules. Even on commercial stations not _all_ tobacco products are within the scope of the advertising ban (e.g., pipe tobacco) and the mere mention of a tobacco company in a sponsorship role (e.g., a tobacco company-sponsored auto racing or athletic event) is prohibited.

: before the war, so it was no problem to put broadcasting there. (Incidentally
: it's 88-108 MHz here -- our TV channel 6 is from 82-88 MHz.)

Actually, the upper few megs of the FM band were originally reserved for
facsimile transmissions. I think they figured that services such as AP
Wirephoto would take off as a public service of some sort. This was
assigned with the proviso that it would be made available to broadcasting
if fax didn't take off. I think it was 106-108.

I don't like MD much, but it's an order of magnitude better than carts.

>I have heard that some unwanted de-compression products from the
>minidisc process can affect the transmitter compressor and create
>harmonic distortion in the transmitted output.
>
>Does anyone have any knowledge of this and can confirm of deny?

This is in part true. Audio processing after the de-compression algorithm they use can make the compression artifacts even more obvious than they already are. Whether this is significant or not depends on what sort of sound quality you really want; if you're overprocessing that badly anyway, sound quality is probably not a primary concern.

The worst possible configuration here is if you are using a MUSICAM-encoded digital link on your STL. I've done this and have heard the signal fall apart pretty badly while going through the two lossy compression systems in turn. With conventional analogue processing, though, it's not anywhere near as bad.

Overall, the MD isn't an acceptable quality format for music, but if you want a quick and dirty spot format that cues up easily, and you don't have to deal with additional digital compression or radical processing afterward, it's not bad at all. I recommend it.

Yes!

We have some major freeway rebuilding going on in Walnut Creek, CA
and the TIS system there is running on 1030, right in the middle of
the AM band (and a clear channel frequency to boot!). The signal isn't
that great (especially when the audio is overmodulated) but I was
very surprised to see (or rather, hear) this transmission.

1809. Jazz format dropped

Newsgroup: rec.radio.broadcasting
Date: 1994-05-19 21:07:46 UTC
From: STEVE BAUER <fnbw1100@ink.org>
Message-ID: <2rgkf2$l19@vixen.cso.uiuc.edu>
Source record: 39864

While on hold one day last year for technical support, I was
introduced to KOA (107.5) in Dallas. It was a real nice
modern jazz format. I had hoped that someone inthe Wichita,
Kansas would decide to move to that style of music.

Well, in November last yeaar, KDLE 93.9 signed on the air with a light
rock format.

After a couple of weeks, they started playing modern jazz and a little
New Age music from 8:00 p.m. until midnight seven days a week.

Response was so good they added Sunday mornings from
8:00 a.m. until 2:00 p.m.

This was nice radio. During the day, it was great
at the office. Very little talk and lots of nice soft music.

Then, suddenly last week, everything changed.

The light rock/jazz format was dropped and the station
has gone Urban Contemporary.

Station spokes persons said the Urban format was not
represented in the market. They felt it should be.

Well, light jazz was not represented either!

Well, the nice format is gone and *POWER 93.9* is here.

Just glad I had made some tapes to take to the office of the jazz.
That will be my pleasant memory of a good station tossed in the trash.

Steve

>NFL Patriots - WBZ-1030. We just inked a new long-term deal that also
> includes pre-season TV rights for WBZ-TV 4.

Better check with your station boss on this one. Officially, it's only
a 1-year contract with a possibility for a longer term deal. Patriots'
new owner Bob Kraft is thinking about taking the radio rights 'in-house'
(the team buys/leases radio time from the station at a fixed rate and
does its own production; sells its own ads) in the non-too-distant
future. 'In-house' could be very profitable when you have a good product
on the field. It's a risky set-up, if the team isn't competitive. From
it seems righ now, the Patriots will be an entertaining team for the next
few years...:-) The Patriots fever is already sweeping New England...

>NBA Celtics - WHDH-850 beginning this fall. Celts rights went to WHDH
> when "Back Bay Broadcasting" bought WEEI from the Celtics organization.
Just want to add : it's a comfortable 5-year deal for the C's at
$1.7million a year.

Apparently, 'EEI's new owners, Am..er..'Back Bay Broadcasting'(still
without a telephone listing in a greater Boston area :-)
want 'EEI to become a truly 'all-TALK-sports' outlet with very minimal
play-by-play action. It also makes it a lot cheaper to run the station
without costly pro-team contracts. 'EEI has been in the red ever since
the Celtics Broadcasting went with the sports talk format in September,
1991. Of course, the people who own the Celtics and ran 'EEI were never
known for their deep knowledge in radio broadcasting.

Also, it was utterly disgraceful how WEEI(under Celtics ownership) handled
the late great Celtics radio voice Johny Most at the end of his
career/life with the team. It was indeed a very dark and unpleasant
chapter in the Boston sports radio history.

Based on the latest audience shares, WEEI 590 AM (SportsRadio 590)
is now the second largest all-talk sports station in
the country. 'FAN in NYC is an undisputed #1. WIP in Philly is #3.

On the Bruins : Hopefully, WBZ AM 1030 will retain Bruins' legendary
play-by-play radio voice Bob Wilson when the B's land on that station
in 1995.

Message-ID: <2rgkf5$l1f@vixen.cso.uiuc.edu>
Source record: 39867

I know that 87.9 was allocated as Channel 200 after the eliminatioj of Class D FM's in the late 70's. No stations have ever been assigned to the frequency. Anyone know why? Was it opposition from Channel 6 stations or the Assn. of Maximum Service Telecasters (AMST)?

A friend of mine claims that WMUC at the U. of Maryland, tried to move from 88.1 to 87.9. Apparently they weren't successful since they are still listed in the FM Atlas as 10 watts at 1 meter HAAT.

dk@crl.com (David A. Kaye) writes:

>I wasn't even
>aware that Crummey was on the network as well. Hey! More things to hear.

I don't think Crummey's on the _network_, just on 710 Talk. I happened to be in Los Angeles the first full broadcast day of 710 Talk (KMPC), and Joe was all local. At the end of Joe's show (about 2:55 PM) Tom came on and did a pre-show for his show (this was the first day Tom was national), but I clearly remembering hearing them mention that Tom was at "The Westwood One Studios" (the ones syndicating Leykis - 710 Talk just happens to be their local LA affiliate).

I'm kind of disappointed that Joe moved - I used to be able to hear him at night when he was on KFI weekend evenings. Ah, I guess he deserves to move up - he's great.

1814. HELP finding Demento/Seuss recording...

Newsgroup: rec.radio.broadcasting
Date: 1994-05-19 21:07:58 UTC
From: ziggy@iastate.edu
Message-ID: <2rgkfe$l22@vixen.cso.uiuc.edu>
Source record: 39868

I'm not really sure if this is the proper group to post this, but I'm gonna give it a try. If you know of a better place, pleas cross-post...

A while back I heard on Dr. Demento's show a recording of the Dr. Seuss book FOX IN SOCKS, read in time to a really "hip" background track. Can anyone help me out with the source of that recording??

Please reply by e-mail, I don't get to the newsgroups too often. Thanks in advance!

Marty Ellenberger

Couple of great FM and TV DX loggings from the last hour or two:

- WTAE-TV 4 Pittsburgh
- Can someone confirm the calls of channel 5 in St Louis? I have KSDK... I never saw them but are sure of the location.
- Channel 3 in Louisville? Calls and would they be running spots for a hospital in Paducah?

- 92.7 WQLZ Taylorville, IL
- 92.7 "Country 92.7" or "Q-country 92.7"
- WBWI West Bend, WI - they were ID'ing as Wisconsin Country 92.5 F-M but I was hearing them on 92.7. Can someone double-check this? I have a local on 92.3 so 92.5 is useless to me.
- 95.7 WLHT Grand Rapids
- 96.1 WKEZ Holland, MI
- 96.9 WLAV Grand Rapids
- 98.5 WNWN Coldwater, MI
- 93.5 WOZZ New London, WI

Couple I need help with - maybe new calls or something (they're not in M-Street or I wasn't able to hear enough info to ID)
- Magic 95.1 WHAI
- 94.9 "Z95 WAIZ West Michigan's Country Lifestyle"
- 93.3 possible country station, references to "north of I-69"
- 94.9 jingle "WBRC" - ?

Thanks!

Andy in Orlando

1816. An FM Listener in 1953

Newsgroup: rec.radio.broadcasting
Date: 1994-05-19 21:08:00 UTC
From: transvox@tyrell.net
Message-ID: <2rgkfg$l2e@vixen.cso.uiuc.edu>
Source record: 39871

Apropos of recent topics on FM history, here is an excerpt from
a letter written to HIGH FIDELITY magazine during the depths of FM's
dark ages. The letter, written by Robert Grubbs of Kearney, Missouri,
was published in the January 1953 issue.

> FM has been one of my favorite subjects for over seven years.
> Let me admit, here, that I do not have a high-fidelity system to
> work with. I have a small, cheap tuner which is used with a cheap
> amplifier. While I do not get the fidelity possible (for financial
> reasons), I do enjoy the absence of noise and interference. At
> present, the FM situation in the midwest is not good. Kansas City
> now has only one FM station, KCMO-FM, which is a Transit Radio
> outlet, broadcasting continually music that all sounds alike.
> At night they carry either baseball or the ABC network. This is
> the only local FM station. The only other stations are distant
> ones that can be received from time to time, but not regularly,
> WHO-FM, KSO-FM, Des Moines, Iowa, and KDRO-FM, Sedalia, Mo.,
> giving fair results. I go to school at Columbia, Mo., and the
> situation is no better there. KWOS-FM, Jefferson City, Mo.,
> is the only station and it duplicates the FM schedule.

The only station listed that made it past the 50s was KCMO-FM.
There were several other letters in HIGH FIDELITY regarding the problems
of FM, especially about complaints that FM stations were duplicating
AM programming or network programming instead of providing separate
programming.
If you think there has been progress over the intervening 41 years
reflect on the statement that KCMO-FM was "broadcasting continually
music that all sounds alike" and think about how many stations
(regardless of format) to which that statement applies in 1994.

1817. Re: Old FM Allocations

Newsgroup: rec.radio.broadcasting
Date: 1994-05-19 21:08:05 UTC
From: talk1370@aol.com
Message-ID: <2rgkfl$l2l@vixen.cso.uiuc.edu>
Source record: 39872

In article <2qh99i$osu@vixen.cso.uiuc.edu>, transvox@tyrell.net (Mark Roberts) writes:

(wonders why old FM stations operate with higher power than rules allow)

Some of it may, indeed, have been to encourage early FM broadcasters either to get on the band, or to enhance whatever service they provided on AM. I worked for one such station (one of several in the Buffalo, NY area) which in 1951 was allowed to operate with 110,000 watts ERP with a 1400 foot antenna on 102.5, and still does to this day. (There are several such

virtual Class C stations operating in Buffalo even now.) Later on, they were simply grandfathered as the FCC has always done (the sister TV station was also given authorization for an antenna height above normal limits, and is able to use full 100 kW erp on Channel 4 at 1300 foot HAAT, 300 more than the normal Zone I maximum).
They clamped down later on, after 1961, I suspect because more broadcasters started getting interested in FM once it became the only convenient way to broadcast in stereo and demand for licenses increased fivefold between 1961 and 1968...had C-Quam been around in 1961, we might never have seen the FM band develop as it did.

1818. HAITI: Clandestine Radios

Newsgroup: rec.radio.broadcasting
Date: 1994-05-19 21:08:06 UTC
From: resystom@web.apc.org
Message-ID: <2rgkfm$l2n@vixen.cso.uiuc.edu>
Source record: 39873

/* Written 10:56 pm May 18, 1994 by resystom in web:amarc.radio */
/* ---------- "HAITI: Clandestine Radios" ---------- */
Clandestine Radios in Haiti: A LITTLE VOICE THAT SAYS NO

The lambi (a gathering call usually made with the aid of a sea shall) rings out. "Asosye li jou!" (Friend, the day has begun!) "Leve kanpe!" (Time to rise!) "Soley la leve!" (The sun's up!) It is 6 a.m., and the clandestine radio "Soley Leve" has started its broadcast on 94.9 MHz FM. It will continue until 8 a.m. and come back on the air at 8 p.m.

Created in 1993, this station has made a name for itself in Port-au-Prince. The residents of the shanty towns surrounding the capital enthusiastically welcomed the renewal of its programming at the end of 1993, following an interruption for unspecified reasons in October of the same year.

The low-power station is a daily headache for the military. According to a reliable source, the men under Michel Francois (the current police chief) are actively searching for its broadcasting headquarters. Serge Beaulieu, a fervent supporter of the military and the owner of Radio Liberte, which is just next to Soley Leve on the dial, complains of problems that the "pirate station" causes for his own programs. At the time of the signing of the Governors Island Agreement and the New York Pact,ppealed to grass-roots sectors to continue their resistance, even now, 29 months after the coup.

"Komite rezistans pou jodi" (resistance committee today) and "komite rezistans pou demem" (resistance committee tomorrow) are continual announcements on Radio Pep Ayisyen (People of Haiti), Soley Leve's sister station, which broadcast its first program in April 1992. After silencing its transmitters for more than six months, Radio Pep Ayisyen renewed its regular programming in February 1994.

A drumbeat announces that this station, usually called "Radio pep la," (radio of the people) is about to come on the air. In Port-au-Prince, the country's capital, people tune in at 1600 kHz AM. Its antennas are turned on about six times each day, with different schedules for each region of the country. This seems to be intended to overcome the problem of low transmission power.

Radio Pep Asyen provides time for international news, in addition to its editorials and national news bulletins. "The suffering, struggles and victories of one people are the business of all

peoples," the radio explains in an ad. In the time slot entitled "kozman pep la" (chatting with the people) the residents of poor neighborhoods and rural areas voice their demands and speak their minds regarding the country's problems.

The same formula was used by Radio Lave Je (literally: washing living under cover in Port-au-Prince. However, they are determined to resume Radio Lave Je's programming.

Since President Jean-Bertrand Aristide was overthrown on September 30, 1991, several clandestine radios have come into being in Haiti. Radio Resistance Lavalas made its first broadcast immediately after the coup. It represented a breath of fresh air for the people of Port-au-Prince throughout the dark days of late 1991. During that same period Radio 29 Novembre became well known. These initiatives did not last very long, but they did make it possible to speak out despite a prohibition enforced at gunpoint. They represented a turning point that will leave a permanent mark on the evolution of radio in Haiti.

>A couple questions about this: First, don't you mean Westwood One is there 24
>hours? KMPC is just the local affiliate, no?

no. Westwood One is digitally delivered as far as I've been able to tell.
KMPC is on there 24 hours a day -- the primary reason they are on SCPC
is for California Angels baseball, but beyond the games they keep KMPC
up so I can hear the new talk radio! It sure is going to beat that stupid
sports talk they used to have there before this great change!

>up the feed themselves. However, I also assumed that this kind of
>professional-type equipment would probably be very expensive. So just what
>equipment is needed, anyway?

well, I don't use professional equipment since that is out my my ballpark
price-wise. I do use a cheap hobbyist trick with my home dish to get
analog SCPC. I use a scanner -- there are some bandwidth mismatch "hiss"
problems on some channels, but the great majority of what I receive are
hiss-free and enjoyable (companded a bit, but I can live with
hiss-free,companded signals) and I'll put up with some hiss if there is a
radio station I want to hear bad enough.

1820. Goodbye, KMPC

Newsgroup: rec.radio.broadcasting
Date: 1994-05-19 21:08:08 UTC
From: Spencerob@aol.com
Message-ID: <2rgkfo$l2t@vixen.cso.uiuc.edu>
Source record: 39875

With all the talk about KMPC's new format lately, I am moved to write a few words about the station.

I grew up listening to KMPC, steadily from about 1964 (when my family moved to LA) to 1974 (when the music started to skew older), and intermittently since then. I woke up to Dick Whittinghill, came home from school and listened to Gary Owens, and went to sleep listening to Johnny Magnus. Owens defined my sense of humor in those formative years, and I learned much about the people behind the records from listening to Magnus ("the host that loves you the most"), who played album cuts at a time when 3 minutes max was still the rule on AM. I am an Angel fan today because of KMPC. The station invented the SigAlert, and as far as I know also pioneered the use of helicopters to report on traffic (I'm sure the others on this list will correct me if I'm wrong on this).

KMPC was Top-40 personality radio back then, and even though they went through several mutations starting in the late '70s, including a short, disastrous foray into talk, in the early '90s there was still a sense of continuity in KMPC's general identity stretching back to at least the mid-'50s. Sure, the canned format was a bit heavy on the worst of the pre-rock '50s and the news division had been gutted, but they had a strong morning show with Robert W. Morgan (with hilarious commentary by Pat Buttram) and an even stronger afternoon drive-time sports-talk show with Scott St. James, featuring a half-hour of Jim Healy at 5:30. Their ratings, while not stellar, were respectable, and they had a devoted long-term audience. They had their niche in the market, and with a little fine tuning, they could have improved their ratings while retaining their core audience. Their owner, Golden West Broadcasting (Gene Autry), decided nonetheless that since the sports programming they already had was doing well for them, a conversion to a sports-talk format would improve their ratings considerably. When I heard this I predicted it would last a year, like their earlier all-talk experiment, before they would return to their traditional format.

Well, it was not much longer than a year before it was obvious that the experiment was a failure, but they stuck with it nonetheless, until the ratings went so low that Golden West finally bailed out entirely, selling the station to Cap Cities and ending LA's oldest radio tradition once and for all. Now we have yet another talk radio station, and the blanding of AM proceeds apace.

It is sad when you think of all the people in LA for whom KMPC _was_ radio. When the format change to sports-talk was announced, an older lady I know said, "My radio has been tuned to KMPC for 40 years. I don't remember ever changing the station, or ever having to. Now, I'll have nothing to listen to." She was representative of many people in LA, people whom Golden West Broadcasting abandoned in the quest for a few tenths of a ratings point.

Of course, times change. Radio changes with the times. I understand that. If KMPC had been receiving dismal ratings before the change, then no

one could fault GWB for changing the format. But their ratings _weren't_ bad, all things considered. They did have a loyal audience, and certainly a larger one before the change than after.

The truly sad thing is that they didn't even do a good job with the sports-talk format. They destroyed the one good sports show they had before the change by relegating Scott St. James to the twice-hourly scores updates, and they never successfully integrated Morgan into the new format. There were some bright spots--Jim Lampley's short-lived show, Joe McDonnell's emergence as a vitriolic personality, certain nationwide sports-news scoops--but for the most part, the ratings went steadily downward. The one thing they did that I loved was their replaying, commercials included, entire Angels games from their archives, some of which I undoubtedly had listened to live. But that merely illustrates the vast legacy that they flushed entirely, and which is now probably lost forever.

I apologize for the length of this posting, but I felt the old KMPC deserved a decent eulogy before we discussed the new one at length. The last connection to my childhood is broken.

Rob Spencer

1821. San Diego Country Report

Newsgroup: rec.radio.broadcasting
Date: 1994-05-19 21:08:14 UTC
From: Chris.Carmichael@artecon.com
Message-ID: <2rgkfu$l3e@vixen.cso.uiuc.edu>
Source record: 39876

Here's what's happening in north San Diego County:

XETRA-AM (690-AM, Baja California) dominence of sports radio continues to grow in southern California. The latest Arbitron books are out, and in the 25-54 men's group, the target audience of XETRA sports 690, the 6 a.m. to 12 midnight numbers went from 3.4 to 5.4.

The morning show, despite a change to Berger, Prescott and Schwartz, went from 3.1 to 4.7. The 10 a.m. - 3 p.m. slot which includes Steve Hartman, Chet Forte, and Smack-TV's Jim Rome, jumped from 3.6 to 6.2.

This on top of falling numbers for LA-based KMPC, (710, 50kw-d, 10kw-n). The ratings in SD county dropped off after 10 a.m. -- which is when the morning show of Charlie Tuna, Marv Howard, Scott St. James and Nancy Plum, leave the air.

XETRA-AM and UCLA are close to signing a deal that would move the Bruins football and basketball to the Mexico-based station from KMPC. (KMPC is being sold to Cap Cities/ABC, and is reported to be moving to Hot-talk [Great, now southern California can get cold-cocked with hot-talk on KOGO, (AM 600) and KMPC]) XETRA-AM carries the SD Chargers, Kings, San Diego State football and basketball. Plus, they are making a run on the professional baseball team, the AA Padres (opps, sorry to insert editorial comment, but baseballs been a running joke in the papers, radio, and radio-with-pictures).

Mike Trussel, let go by floundering KFMB-AM/FM and TV, has talked to XETRA-AM.

[I'm not a big listener to XETRA-AM, but the station's signal is a killer in the daytime to Barstow, California, a distance of almost 250 miles; that and coupled with the translator/re-broadcast in San Fernando Valley, it'll be a station that should show in the LA books, especially when KMPC changes format. Plus, Mighty 690's format is tight, very professional and informative. I compare it to the very-listenable ESPN sports radio.]

On the FM side at XETRA, 91X (91.1 FM 100kw) has slid in the books from 4.4 to a 3.5 standing. This is on the heels of KKOS (95.9 Carlsbad 3.3kw) and Mexico-based XEHRM (92.5, 50kw) entry into the re-vamped AAOR. (which, according to the Escondido Times Advocate is alternative album orientated radio)

Here's the top ten stations in San Diego.

1. KSON country 7.4
2. KKLQ AC 6.8

3. XHTZ urban 5.8
4. KJQY AC 5.4
5. KSDO n/talk 5.2<<<only AM station in top ten!
6. KYXY sft-hts 5.0
7. KGB AOR 4.3
8. KBZS AC 4.0
9. KFSD classical 3.5
10. XETRA-FM mod rock 3.5

Showing up in the San Diego books from Los Angeles include:
KABC-AM, (790), KMPC-AM (710), KFI-AM (640), KNX-AM (1070), and KLSX-FM
for the morning show of Howard Stern.

The Orange County Register had the books for LA:

1. KLAX-FM Spanish
2. KPWR urban dance
3. KOST-FM soft hits
4. KFI-AM talk news
5. KABC-AM news-talk

KOGO (AM 600, 5kw, U) entry into the world of hot-talk is slated for
April 25. The first show to air will be WFAN's Don Imus at 5 a.m.
This will be Imus' second entry into California (other being Sacremento).

Thanks!

1822. Select-A-Tenna

Newsgroup: rec.radio.broadcasting
Date: 1994-05-19 21:08:15 UTC
From: gdallal@world.std.com
Message-ID: <2rgkfv$l3i@vixen.cso.uiuc.edu>
Source record: 39877

What does the Select-A-Tenna do? Someone described the Select-A-Tenna as a "well of radio energy" for your receiver to tap. It's hard to improve on that description. A Select-A-Tenna affects the sound of an AM receiver much like increasing the RF gain or switching from local to DX mode on a shortwave receiver. If a signal is strong to begin with, the Select-A-Tenna isn't needed. If there's lots of static, the Select-A-Tenna won't be of much help, either. But if the signal is marginal or weak, the Select-A-Tenna can raise it and clean it up to the point where it becomes one that can be enjoyed for extended listening.

This is my second try with a Select-A-Tenna. The first time, I just had moved from NYC to Boston and was eager to continue receiving WCBS which was getting lost in RFI. But even though the Select-A-Tenna increased the signal, the RFI was increased too and I still couldn't get a signal worth listening to and the Select-A-Tenna was returned. This time my goal was to get a clean signal from WQEW (New York City) on Sunday evenings. Sometimes the signal was strong enough by itself, but often it would fade and no longer be worth listening to. This time, the Select-A-Tenna did the trick--I get a much more consistent signal without the frequent fades and drops.

Why do prices vary? The Select-A-Tenna comes in many models. According to the C. Crane Co. (800/522-8863), there is

Regular ($52.95)
Model M ($69.95) is the same as the regular model with the addition of an external antenna and ground wire which plugs into the front of the unit. For all metal buildings, campers, or trailers. No more powerful than the basic unit.
Hardwire ($69.95) Our exclusive. For use with stereo receivers. Same as regular model except it has a special output jack for connection to the AM terminals of a stereo receiver. Can be used without the wire as a regular Select-A-Tenna. It is no more powerful than a regular model and in some cases may be less powerful.
Ferrite ($83.95) Our exclusive. The Hardwire plus a ($19.95 separately) patch cord. The patch cord has a ferrite stick that gets attached to a receiver's loop antenna. Supposedly quieter performance than the Hardwire.

Crane prices include shipping by UPS ground. There is a 30 day money-back satisfaction guarantee.

The Select-A-Tenna in the Grove catalog (800/438-8155) (If your receiver requires an external antenna, a convenient jack and plug are provided) *seems* to be what Crane calls the model M. Grove's price is ($65.95 + $6 shipping). Grove, too, has a 30 day money-back guarantee.

1823. Re: NEEDED RADIO STUNTS FOR MORNING SHOW

>And gay men and lesbians were part of the mix.

Interesting radio history. It may not have been very modern in
San Francisco - to be sure, it was probably just servicing the
target audience - but this particularly stunt wasn't part of the
L.A. scene in the 70's and 80's.

I appreciate your sense of normalcy here -- but remember: the original
poster asked for a stunt. I gave him one. I also gave him pointers
to go get more stunts (i.e. Frazier Smith and his service).
That's what he WANTED, David.

> Maybe it's time to stop
>looking at "stunts" and try doing some REAL radio, radio which MEANS
>something to its listeners,

Judging by KLBJ's ratings, it meant something to them. Don't be such
an elitist, David. I share your conviction about what good radio is --
radio that can change people's lives, radio that deals with issues,
radio that broadens people's perspectives. But there is ALSO a place
for fun in radio, too.

Lest you think that this stunt MERELY titillated the fantasies of
male listeners (which it did, of course) -- it ALSO tended to normalize
the entire concept of lesbians and bisexuals finding dates in this
day and age. After an hour or so of this, the listener tended to
identify with the callers a little more -- NONE of the participants was
profane, nasty, slutty, lascivious, man-hating, women-hating, or anything
other than, well, NORMAL. Since you haven't heard Dale and Bob do it,
do you feel qualified to comment on this particular stunt?

And yes, after awhile stunts don't work. Mark and Brian, KLOS-FM 95.5
Los Angeles found that out. Stunts tend to be very polarizing -- people
who "get" the stunt stay with it, people who don't tune out.

> instead of serving as fodder for
>hormone-charged male voyeurs for live for lesbian fantasies. I note that
>in SF both morning and afternoon drive, by far the largest audience is
>KCBS, the all-news station, not KGO's happy talk. I'm sure many other
>communities have similar station ratings. People want a station which
>speaks to their community, not something which panders to its baser
>members.

Not necessarily. Most of all, people don't want to be BORED. If you
are going to do SERIOUS RADIO, you better have some hooks that keep
them locked on to your frequency, David. I too like talking head
radio - I love NPR and APR, I loved Michael Jackson on KABC-AM L.A.,
etc. But truth is, every once in awhile, I love to kick back with a
virtual cold-one and have some fun. And so do lots of people.
That's why there's more than one or two radio stations!

And BTW, what's wrong with hormone-charged male voyeurs living for
lesbian/bisexual fantasies? Think about it for awhile ....

Cross-posted to: rec.radio.broadcasting,rec.radio.info

A poster has sent in three 900 line files consisting of media fax numbers. They are too big to realistically post to the entire world, so they are being added directly to the FTP and GOPHER archives for AIRWAVES RADIO JOURNAL, which as most of you know is the email digest reflector for rec.radio.broadcasting.

To access the archives via FTP...

ftp radio.aiss.uiuc.edu /misc/rec.radio.b-cast/FAX

They, like the rest of the archive, are in compressed form and must be transfered using FTP's binary mode. (Type binary at the ftp prompt).

To use gopher, ...

gopher radio.aiss.uiuc.edu 7070

Then follow the prompts. Use ? for help in gopher.

To get them via email, send mail to rrb@radio.aiss.uiuc.edu with ...

Subject: FAXDIR-1 -- -- (for letters A-H)
Subject: FAXDIR-2 -- -- (for letters I-M)
Subject: FAXDIR-3 -- -- (for letters N-Y) <No 'Z' lists>

NOTE: ONE FILE REQUEST PER LETTER PLEASE. If you want them all you must send three letters. YOU MUST PLACE THE ABOVE IN THE SUBJECT OF YOUR EMAIL.

You should get them back in return mail.

Also note that I make no claims as to the accuracy of these lists.

William Pfeiffer

Source record: 39882

50,000 WATT WHO
LEADS DES MOINES ARBITRON RATINGS

The latest Arbitron ratings show that WHO is the number one station in Des Moines. WHO is a 50,000 watt, clear channel AM, broadcasting at 1040 kHz. The Des Moines Register on Thursday, May 19, 1994, reported that in the overall listener category WHO nosed out KJJY (92.5 mHz) by less than one point of audience share in the overall category. WHO features news and information while KJJY bills itself as the ten in a row country station. Third place is held by KGGO (94.9 mHz) which features album-oriented rock.

The Register article quoted WHO program director Van Harden as saying, "We've got strong personalities, and we just keep enhancing what we're doing." Harden is also the morning drive personality on WHO. Harden indicated to the Register that he was pleased with the station's evening ratings, which features old radio serials on week nights.

Here are the average quarter hour shares as reported by the Register:

Monday - Friday 6 a.m. - 10 a.m.
People 12+ Spr 93 Sum 93 Fall 93 Win 94
WHO-AM (1040) 17.0 20.1 19.0 20.5

KDLS * 1.2 0.4 1.0
KWKY-AM (1150) 1.4 1.2 1.3 0.8

WHO-AM and KLYF-FM are sister stations; KLYF-FM features hits of the 80s and 90s.

KJJY-FM, KRUU-FM and KKSO-AM are sister stations; KKSO-AM simulcasts KJJY. KRUU characterizes itself as the Rooster, and plays hot country.

KGGO-FM and KHKI-FM are sister stations. KHKI-FM was KDMI-FM, which programmed religion and was independently owned. It recently switched to a country format -- Hawkeye Country. The group also owns KDMI-AM (was KSO)(1460 kHz, 5 kW, DA-N) which now has the religious format.

KRNT-AM, KSTZ-FM, KIOA-AM/FM are all sister stations. KRNT features big band from a satellite service, some talk, and some sports, plus two local personalities (Steve Gibbons Monday through Friday) and Ford Roberts (Saturday mornings). KSTZ bills itself as Star 102, featuring more contemporary music and live personalities. KIOA AM-FM simulcast 50s, 60s and 70s top 40; however KIOA-AM has an increasing sports lineup of baseball, football and basketball.

KMXD-FM (licensed to Ankeny, suburb just north of Des Moines) and KEZT-FM (licensed to Ames, home of Iowa State University, about 30 miles north of Des Moines) both feature easy listening formats.

KFMG-FM is a rim shot, licensed to Pella (transmitter is southeast of Des Moines). It has an eclectic mix. KWKY-AM features religious programming and sports play-by-play.

KDLS is an AM-FM combination, licensed to Perry, which is about 30 miles northwest of Des Moines.

Missing from the Arbitron reports are WOI-AM (Ames, licensed to Iowa State University)(Public station); WOI-FM (Ames, licensed to Iowa State University)(classical music); KUNI-FM

(repeater of public relation from the University of Northern Iowa in Cedar Falls); KDFR-FM (a religious station); and KZZQ-FM (another religious station)(was KBBM-FM, CNN news)(licensed to Winterset, which is southwest of Des Moines).

Hello!

It is my "duty" to bring this sad speculation to all of you in Airwave land. Yesterday's (5/18/94) Fort Wayne News-Sentinal has an article in it sayting that a consultant for Inner City Broadcasting Corp. has said that Inner City wants to move the signal of WOWO so that NYC station WLIB can broadcast 24 hours. The article continues by saying that Inner City would like to accomplish this by moving WOWO's signal out of the NYC area and cutting it back at night. However, they do not want to change the programming. All of these changes are, of course, subject to FCC approval.

Some stuff heard(as I type this is a quiet library;quiet beacuse there's almost no one here,due to my alma mater-Buffalo State-having its commencment ceremonies today):

*Bob Smith(aka Talk 1370 on America Online)had asked if WGR's inability to find a new PD was due to instability at the stations. They have found one. According to Billboard's Vox Jox column,Darryl Parks is the new PD-joining from KTDY-AM/KPEL-FM in Lafayette,La.(If anyone in the Lafayette area's reading this,I'd like to know what's in store for us-i.e.his style,etc.)

*Speaking of WGR,Rich Deitsch of Metro Weekend had some things to say about weekend sports talker Rocco Pendola in his May 19 column: "With apologies to his level-headed partner Bob Gaughan and any decent sports journalist in the world,last Sunday evening at WGR..(where else), teenage sports hoser Rocco Pendola,an Art Wander-disciple and Chris "Mad Dog" Russo(WFAN-NYC)wannabe,used the word 'ass' seven times(as in 'Dougie Gilmour and the Maple Leafs knock people on their ass')in the midst of a made-for-Fox-TV argument regarding the importance of heart versus talent in sport. Curse me once,shame on me. Curse me seven times,shame on the FCC for allowing this testosterone-laden sewage. His asinine soliloquy prompted me to do a little research the following day:And,yes,Edward R.Murrow actually did roll over in his grave."

*Business First(a paper that I have a good deal of respect for,in regard to its reports on radio)did a number on Buffalo News music critic/reporter Anthony Violanti in its Fifth Coast column last week, snidely asking if he was so concerned about improving access for local artists on area radio stations,why didn't he ask the paper's owner, Warren Buffett,for money to start a station of his own. First,Buffett doesn't give a rat's tail about this city;the News,as my paper pointed out in its March edition,takes about $40 million every year out of the city which could be invested in it. Second,let me ask Business First a question:If you want a business radio station,why don't we ask *YOUR* owners,American City Business Journals of Charlotte,N.C.,to put up the cash to start *YOUR* station? Didn't think so.

* A series of new radio ads have popped up.
-WUFX's shows a big guy dancing to music(I could swear that this agency did ads for WCMF in Rochester,same guy-except morning man Brother Wease joined him)in promoting themselves as Real Rock and its new contest-hear 3 songs in order and win $1,000. Verdict:OK.
-WHTT's shows Danny Neaverth and his crew in one of the station's studios,partying-while saying that it's a classy show. Most of the crew(Steve Boyd of ch.7,Dan Jr.,and Darren(aka the Deadhead))pop up here

as well. It has him peeking out through a hole in the record(paraphrasing one of his pet sayings). Verdict:I likes!
-WGRF shows a variety of rocks,trying to say that there's only one station for classic rock(i.e.Scotch on the rocks,moon walk-yes,it drops its pants). Verdict:To quote Beavis & Butt-head,"It sucks!" They should have added one more-rocks in our heads. :)

*John Wright is the new VP/GM at CHUM-AM/FM in Toronto(AM:50kW,DA-2, oldies;FM:40kW,adult rock-I think). He previously was VP/GM of St.Lawrence Broadcasting(what stations they own,I don't know).

1830. San Diego Report

Newsgroup: rec.radio.broadcasting
Date: 1994-05-21 05:23:05 UTC
From: Chris.Carmichael@artecon.com
Message-ID: <2rk5rp$mhl@vixen.cso.uiuc.edu>
Source record: 39885

Here's what's happening in San Diego County:

The downhill spiral of the AA Padres has KFMB wondering: "Is it worth $1 million per year to broadcast the games?" The 50kw outlet at 760 AM contract for the baseball team is up after this season. XETRA-AM 690 (50kw, U, Tijuna Baja California, Mexico) will make a big push to broadcast the games.

KFMB-FM is making a swith to "non-urban top 40." The station, once known as B-100, continues its "great radio experiment" by trying a different format each day. Anna Chan from KIIS-FM, 102.7 Los Angeles, has been hired.

KLOS-FM Los Angeles broadcasting duo of Mark and Brian will be back in the SD area doing a live remote from Sea World on May 27.

Radio talk-show host with an attitude, Tom Leykis (I spelled it right!) starts in the SD market on a tape-delay basis on KSDO-AM (1130 10kw D), Monday, May 23. Leykis' show, which originates from 710Talk, KMPC Los Angeles, is heard around the country from 3 p.m. to 7 p.m. Pacific.

Mutual Broadcasting announced that Larry King's last radio show will be May 27. I have listen to Larry from the beginning in 1978, when working for 1370 KGNO in Dodge City, Kansas. While the station didn't carry the show, I listened to him from the network feed. Larry started the whole trend for talk radio, and helped keep Mutual and AM radio alive.
Press reports indicated that David Brenner will replace the King of Talk after a "few weeks of re-runs." CNN, the national cable radio-with pictures, will make the audio feed available for syndication. It's hard to imagine radio without Larry. I am fortunate to have two signed pictures from Larry. One, taken in the early 80s with a cigarette in hand, and one from the early 90s, with the now legendary suspenders. Good Luck Larry. Another one for the Hall of Fame!

Thanks!

chris.carmichael

> equipment is needed, anyway?

I know for sure that Rush Limbaugh/EFM Media uses SEDAT, a proprietary digital audio compression system used by all of the major radio networks. To pick up his signal (on Satcom C-5/Transponder 23, btw), you have to have a unit capable of decoding SEDAT. This is definitely professional-type costly equipment. I dunno where the average Joe could pick up a SEDAT decoder, or if. ;)

However, several radio stations are available for those with SCPC equipment, which is much easier to obtain. What usually happens is that actual stations are up there, not networks (though some of the offbeat low-rent networks also use SCPC)...so it is likely that it is actually KMPC on the bird. Thus, you'd be picking up Leykis as he's heard on KMPC...or whatever station you can find that runs Rush Limbaugh, as they are on the satellite.

I'm by no means an expert on this, but if you nose around rec.video.satellite, you can find out a lot more about this. Gary Bourgeois, who hosts the Birdwatcher segment for the shortwave radio show Spectrum, is a regular and compiles the FAQ for that group.

As posted in Airwaves Journal:
Re: Tom Leykis' show on KMPC Los Angeles

>Tom's pissed at KFI for dumping him when he wanted some
>perks. He helped put those clowns on the map again, brought them
>back from the frigging dead, and they can him. If he keeps it to
>one show needling his old friends, where's the harm?

I burnt me to belittle the cross-town competition. A quality show
would do more in -- as in the words of Mr. KFI, "Pummel them into submission"
on a 50,000 watt microphone.

>Chris: its "Leykis", not "Lyekes." Its "Handel", not "Handle."
>And yes, Bill is in fact a part-time lawyer, part time radio guy.

In this super-dooper pot-filled info-highway, any correction to my
spellings of last names is appreciated. I took my best-guess at both hosts.

>Actually, KMPC is 10k... I wish it were 50, cuz then it might over blast
>710 from Sacramento here in the Bay Area... =)

KMPC is a 50kw directional station with lobes to east and west (great,
ships at sea can hear them great, I have static at 710 in north county SD.
(If I go to Temecula, about 20-miles north, she booms.)

>Two shows does not a career make, gents.

That's true, (Larry King would probably agree also). What professional
experience I have had (and it's nearly 20-years worth) is that slamming
the cross-town rival usually backfires. I have, however, continued to listen to him
(especially after writing his name 500 times on the electronic
billboard) and he will put KMPC on the map, and into the books.
As reported in my SD county report, Mexico-based XETRA-AM as picked up
UCLA sports, and is looking for more. KMPC seems to be interested in
dropping all sports programming and focusing on what they can do best:
talk radio.

As experienced here in San Diego with KOGO, AM 600, growing pains lead
to great gains.

Thanks gentlemen for the round-table discussion. We may not agree on the
way radio is run, but we can agree that it's only getting better. I
encourage this; and it does open my eyes to new and better ideas. (and better
spelling)

Now, if I can live-down the post of Bill Gates instead of Daryl Gates on
Leykes first show. I have been caned. Asbestos suits and flame-retardent
workstations cannot stop the wrath of the internet.

Thanks!

Source record: 39892

===== FCC NEWS RELEASE =====

Report No. DC-2599 ACTION IN DOCKET CASE May 19, 1994

COMMISSION AMENDS RULES AND POLICIES GOVERNING THE
LOW POWER TELEVISION (LPTV) SERVICE
(MM DOCKET NO. 93-114)

The FCC today amended its rules and policies governing the low power television (LPTV) service.

The Commission modified its rules to permit LPTV operators to request four-letter call signs with the suffix "LP" (for example, "WXYZ-LP"), rather than the current five-character call signs consisting of letters and numbers. In addition, the Commission modified its current standard for acceptance of LPTV applications and expanded its waiver policy regarding terrain shielding.

The Commission established the LPTV service as a means of increasing diversity in television programming and station ownership. LPTV station licensees include schools, colleges, churches, community groups, newspaper publications, and radio and TV broadcasters. The Commission noted that the service has provided substantial first-time ownership for small businesses and members of minority groups. Small businesses have also benefitted because of the more affordable advertising rates, and the ability to target advertising to specialized audiences.

The Commission will allow LPTV operators to request four- letter call signs. These call signs will include the suffix "LP" to distinguish LPTV stations from full-power television stations. The Commission will establish, by a later Public Notice, a schedule by which licensees and permittees will be able to apply for four- letter call signs. Those stations in operation for the longest period of time will have the opportunity to apply first. Requests from permittees must include a certification that a firm equipment order has been placed or that physical construction is underway at the transmitter site.

The Commission said that LPTV operators may not request a call sign used by another broadcast station unless the stations are commonly owned, or unless the LPTV operator has the other station's written consent.

In the case of identical requests filed on the same day, the call letters will be assigned to the station with the longest continuous record of broadcasting operation under substantially unchanged ownership and control. The Commission stated also that a full-power television station will prevail in the situation where a full-power station and an LPTV station apply for the same call sign on the same day. AM or FM radio

stations applying for the same call sign on the same day also will prevail over an LPTV station.

Previously, the Commission required LPTV applications to be complete and sufficient (i.e., "letter perfect") in order for them to be processed. The Commission will now accept for processing applications judged to be "substantially complete." Applicants will be given an opportunity to cure defects or omissions. If the defect prevents FCC staff from further processing the application, a deficiency letter will be issued and the applicant will have 30 days from the date of that letter to correct the defect. If the defect does not prevent processing, a deficiency letter will not be sent until completion of pre-acceptance studies on the application or until a subsequent defect prevents further processing, at which time the applicant has 30 days to amend.

Applications revised to correct all defects identified will then be listed as "Accepted for Filing" in a Public Notice, either in the form of a lottery announcement notice for mutually-exclusive applications, or a proposed grant list for nonmutually- exclusive applications. The Commission said that in order to prevent undue processing delays, it will strictly enforce the 30-day period.

With respect to terrain shielding, the Commission has removed administrative barriers that were necessary when the LPTV Terrain Shielding Policy Statement was first established. Applicants' terrain shielding showings of noninterference to protected broadcast facilities will now be considered for all LPTV and TV translator applications. Previously, such showings were considered only for nonmutually-exclusive applications, i.e., those not involved in LPTV lottery proceedings. LPTV applicants seeking terrain shielding waivers should continue to follow the existing criteria for demonstrating noninterference based on terrain considerations. That constitutes submitting either detailed profiles of the terrain in pertinent directions toward the protected signal contours of potentially affected stations or letters of assent from the licensees of such stations, agreeing that terrain shielding would prevent interference but without surrendering the right to be protected against any actual interference.

Also, mutually-exclusive applicants may now use either of these methods to demonstrate that their respective station proposals could co-exist without an interference conflict. Further, while the Commission strongly urged applicants to fully address applicable terrain shielding conditions at the initial application stage, it will accept a satisfactory terrain shielding showing for the first time in response to a deficiency letter.

The Commission declined to adopt a proposal to narrow the definition of what constitutes a major LPTV station modification stating that this issue requires further consideration and will be resolved at a later date.

Action by the Commission May 19, 1994, by First Report and Order (FCC 94-120). Chairman Hundt, Commissioners Quello and Barrett.

|>
|>You can thank WFUV's CE for that, he built the WNYU transmitter plant,
|>cloning the WFUV plant and northern pattern rather than beaming it east.

Actually you can thank Vir James for the pattern and the need to protect some rinkydink station down in jersey. (I used to fill in for Bob on call for the WNYU xmtr when he went on vacation...last time I checked, I think I still had a posting statement up there...Don't blame the FUV CE, the site was there long before he took it over...

|>Yeah, buy up WFMU, move WNYU to 91.1 and both WFUV and WNYU can go omni.

FUV is hemmed in by some 10-watter down in Brooklyn and I forget who over here in NJ. It was a pain to do the pattern right when we replaced the Jampro back in '76 with the RCA stack. It would have been nice, however, to have worked on an NCFM that was 50K omni...oh well...

Archive-name: greaseman-faq

The Greaseman is a radio personality on the Infinity Broadcasting network. He broadcasts from Los Angeles to New York City, Washington, Atlanta, Philadelphia, and San Jose. He is known for his bits and song parodies. He also has his own vocabulary which he uses to avoid trouble with the FCC. Before, he broadcast out of DC on DC/101 where he competed and beat Howard Stern on a consistant basis. The Greaseman is on by himself most of the time, though sometimes you hear his producer, Bill Scanlan cackling in the background.

Q: What is the Greaseman's real name?

A: Doug Tracht. He prefers to keep his radio life and his personal life separate. His radio name is Nino Greasemaneli.

Q: Why does Howard Stern hate the Greaseman so much?

A: Howard worked for DC/101 until he got fired. When the Greaseman was hired to take Howie's place he not only held on to Howie's audience but increased it. Then when Howard syndicated in DC he competed with the Grease until the Grease moved to Infinity where they now are co-workers for the Broadcasting Giant. Now, mentions of the Greaseman on the Howard Stern show appears to be just an act in part of Stern.

Q: Which one was the Grease in the Village People?

A: He was not really in the Village People. But in the bit, he was the construction worker.

Q: What is this Bingo that the Grease dislikes so much?

A: The Greaseman's college nick name... Ask him about it.

Q: How can I get in touch with him?

A: Call him between 1730 and 2200 EST at 1-800-544-9294 and 1-213-850-0986 (FAX) and BTW do not address him as "dude".

Q: What bits does the Greaseman do?

A: Fudgeman- Fudgeman and his chicken assistant throbin
save the world from deviant behavior

Methods to which recieve ingus.
Damien- The Grease has occasion to run into the "dark master"
while he is trying to perform his duties.

Q: What is the alarm that is sometimes heard in the background when the
Greaseman talks?

A: The Geeze alarm. This goes off when the greaseman starts geezing.

Q: What other gigs did Grease do on the radio?

A: Like any other up-and-coming DJ, Grease worked at other stations in
other markets to develop his unique style. They include:

Washington DC (WRC-AM 980) 1974 - 1976
Jacksonville, Florida (WAPE) 1976 - 1981
Washington DC (WWDC-FM 101.1) 1981-1993

Q: Did he always leave on good terms?

In almost all cases, yes. The one notable exception was WRC, when
management decided his morning personality wasn't quite right, and gave
him a choice between dropping the "Greaseman" character and leaving.
Grease chose the latter. If you ask about it today, he will joke about
the time he was collecting unemployment insurance in DC and would "stay
up to watch the moon rise and CURSE THE NIGHT!" although I'm sure at the
time it was somewhat unsettling.

Although he left Florida voluntarily to take the better offer at DC-101,
he did offend some bible-belt types during his stay. The Florida gig
was important to developing the Grease as a "god-fearing, truck-driving
redneck," though. The Florida station has since gone to religious music
("From Grease to Grace" was their motto for a while). Their loss.

Q: Are there any good biographies or other comprehensive stories about
the Greaseman?

A: Grease is a very private person, and spent a number of years in DC
before finally consenting to an in-depth story about him in the
Washington Post Magazine Fall 1987. It's a good resource to summarize
his past gigs and overall life story. Also the Washingtonian Magazine
did an article on him in the January of 1993 in commemeration of his
departure from DC.

Grease also appeared on the Larry King Show (early to mid-80's) to talk
about morning radio in general. The only down side was that he was
teamed with a "Morning Zoo" DJ as a co-interviewee, a format that has
become annoyingly ubiquitous on the radio landscape. Transcripts may be
available (don't know how to get them, sorry). This is the old
Mutual show that ran all night (Grease probably got up early to do it :-),
and not the current CNN TV talk show.

Q: Are there any albums or compilations of Grease bits?

A: There was a 4-part "Best of Grease" compilation, available on cassettes. These became unavailable shortly before he left DC-101. They are now prized collectors items and can only be obtained from private owners. Part of Grease's popularity on a national basis before he went into syndication (and hence part of the motivation for this newsgroup) was the creation and exchange of bootleg tapes among an extended network of fans. Some of his best work has never been republished (although you can occasionally talk him into doing them again on his current show).

Q: Did Grease ever serve in the military?

A: Like John Wayne, Grease has a deep and abiding respect for everyone who serves in uniform, but never served himself. During the Vietnam war, he was attending Ithaca College in New York, and his draft number never came up.

Q: But Grease did serve as a policeman?

A: Yes, he did. While working at his gig in Florida, he worked as a reserve police officer on the night shift. Morning staffers would be jolted out of their bleary-eyed state by the sight of Grease doing his show in full uniform with a 44 Magnum strapped to his belt.

Q: Is Greaseman a bigot/homophobe?

A: Certainly not. Like the program "In Living Color" or even rec.humor.funny, Grease parodies what's funny in everyone, and winds up defusing hatred as a result. Grease respects all of his fans, and wishes well even those who don't like him.

Q: But there was that "Martin Luther King, Jr." incident in DC?

A: Yes, sometimes there's a fine line between parody and cruelty, and Grease crossed the line only once during his otherwise unmarred broadcasting career spanning over 2 decades.

Sometime in the late 80's, he was noting the passing of Martin Luther King Jr.'s birthday (which had then only recently become a national holiday). Grease said something about "killing 4 more and getting rest of the week off." Grease was suspended, and apologized for the incident on an "Editorial Rebuttal" on WRC-TV in DC.

Haven't the rest of you made mistakes or are you all perfect?

Q: What does AMF mean?

A: Adios my friend.

Q: What is the "Bit without an Ending?"

A: When Grease was working in Florida, he would be prevented from getting a good day's sleep after his morning gig by thoughtless model-airplane enthusiasts who would buzz their models outside his window.

Grease came up with a revenge skit with a model plane of his own that would shoot the others out of the sky. The plane became posessed by Damien and started chasing after him. Grease then got too deep into this bit without a way out (and tried to incorporate this into the bit). After fumbling with the sound-effects, and trying a foray South of the Border, and then calling in Big-Dick Brannigan, he finally gave up groping for a punch line. Grease can usually be counted on to do some of the most impressive ad-libbing and improvisation on the radio today, but at that time his talents failed him. The bit originally aired in the Fall of 1982 from WWDC FM Washington, DC/101.

It's considered a classic, and is on Vol. 1 of the "Best of Grease" tapes. He owns the rights to all his bits, and may rerun it on his current show from time to time.

Q: What stations carry the Greaseman?

A: City Station Time

The C-Quam system, as practically built, uses the same quadrature techniques designed for the old SQ Quadrasonic sound system that Motorola designed for CBS Records. The same patents that are the basis for Dolby Surround Sound. Another earlier phase matrixing system, that was the basis for another Quad system, (RM), was simultaniously used in the rudementary design of Stereo AM systems in the mid 60's. However, ISB, the basis for the Kahn-Hazeltine system was developed much earlier and the method was proposed as AM stereo a good year or two before any matrix system was off the drawing boards.

> One advantage that C-QUAM

> any
> case how much AM listening is done via skywave by the general public today?

WQEW/1560 in New York will be using the Kahn system until the last day they can legally use it. I happen to be in a null of their night pattern and so the least little thing effects my reception. The anomalys are caused by anything from local conductive weather conditions, like fog and TI's, to the height of a construction crane near the transmitter site causing minor variations to the pattern.

It has only been due to the recent intence solar distrubances that I have had any problem with platform motion. And this only when the phasing of the ionosperic backscatter caused the minimum signal I normally get to be alternately nulled and renforced.

Ten years ago, when working the ovenight shift, I would use my SRF-A1 to do some DXing during my 4AM lunch break. There were still some powerhouse stations doing music at that hour and the platform motion on the C-Quam stations made me nauseous. It was only the Kahn stations I could listen too and my favorite was listeing to oldies on WBT in Charlotte. As the signal would fade, there would be no noticeable change to the debt or image of the stereo until it got to a treshold point and then drop to mono, usually just before the station faded completely out. I could not say the same thing about C-Quam.

Although you may find C-Quam to be a better system for a local station to use as far as simplicity and fidelity are concerned, it is a system that requires phase modulation of a pilot signal to the carrier. A pilot that is monitored for phase differences that are applied as corrections in the decoding process to maintain the accuracy of the 1kHz subcarrier. Even if a co-channel is not strong enough to be noticed, presence of the carrier will beat out a subsonic phase with the local station. That is your primary cause of platform distortion with C-Quam. The Kahn system uses a phase modulated pilot only to switch the decoder in or out, it does not use the pilot to adjust the output of the unit.

The problem with the transmitted end of AM radio is that all that compression is needed to get over inherent noise with any AM modulation system, especially at those frequencies. The problem with FM is that there are just too many uneducated Program Directors with tin ears that want their stations to be the loudest on the dial. It's too late now, but we could have once regulated or even legislated those MUDulation boosters out of FM radio. Of course power increases, and new local stations popping on the FM band, are causing desentization of the receivers. Computers and other CPU driven devices that cause RFI at FM broadcast frequencies are also growing. So maybe the solution has preceeded the problem. It's too bad the cure helps kill the patient.

>signals, 10 for moderate, 15 for really strong ones.

What is the point of a receiver with 15 KHz response? There is not a station in the country that has audible material above 10 KHz (actually 11 KHz, but who is counting?). If they do, they are in non-compliance with NRSC and they are going to have to seriously fake their NRSC II measurements due later this year.

>Also useful would be to put an
>audio notch filter like the ones used by hams and serious DXers, in
>order to cut out the heterodyne whistle from adjacent-channel
>carriers.

10 KHz whistle filters used to be common in radios when they had enough bandwidth to justify them. However, these filters exact quite an audible price when heard by any decent-hearing ear. These days, a notch is unnecessary: there is nothing above 10 KHz to hear. It might as well be a brick wall lowpass filter--and is in most modern radios.

The basic myth is that there is this glorious high fidelity coming from AM stations and the only reason you cannot hear it is because of crummy radios. That used to have a glimmer of truth to it; now it is pure bunk.

Back in earlier times, I used to glory at the audio that I could get out of an RCA Ampliphase transmitter. 50 KW of glorious high fidelity that sounded marvellous on a crystal set was most impressive. Of course, it interfered with everything within tens of kilohertz on either side of it, and I used to get complaints from the local classical station 50 KHz away.

But now, with NRSC standard, that is all gone. I have the latest and greatest AM transmitting equipment money can buy. If you compare the output of the Delta stereo AM monitor (plugged directly into the transmission line) with the audio coming over the STL, it is pathetic. It is not "high fidelity" by any standard I am aware of.

>Of course, even though this would be relatively cheap to do, it seems to
>me that the radio manufacturers would charge an arm and two legs for it....

I think you would be most disappointed by the results.

alcassel@netcom.com (Alan Cassel) writes:

>Are you telling me that FM stations *don't* "highly compress and limit"
>their audio??

I never said that. What they do NOT do is have a brick wall filter at 10 KHz. Yes, they have a filter that operates above 15 KHz, but that extra half-octave makes quite a difference.

>On the other hand, for those FM's that *are* doing well, success seems to
>be directly proportional to the amount of compression and limiting they
>use in their audio chain,

In this market the number one FM station has the least amount of compression and limiting in addition to having two SCA subcarriers. As a result, it is probably one of the quietest stations on the dial. The number two FM also is quite conservative in its processing. In twenty-five years of radio experience, I have found little actual correlation between processing and ratings. The greatest influence on ratings seems to be program content.

>FM multipath causes highly objectionable
>"clicks" and "picket fencing" in moving automobiles that is masked by
>loud program material. (AM does not suffer from this problem in moving
>cars.)

No, AM is great! It just suffers from bad high frequency response, total fading on bridges and underpasses, buzzes and hums from unknown myriad causes, lightning crackles and pops, and with C-QUAM, stereo platform drift.

>So why *shouldn't* AM stations compress and limit? It seems to be what
>the public wants, as evidenced by the FM stations that are successful
>doing it!!

I could probably give you more examples to disprove that generalization than you could in the reverse, but it begs the question. AM station are required by regulation to chop everything above 10 KHz out of the signal. Later this year, station operators will be required to make a spectrum analysis of their channels to make sure this material is not present. You can dance around the issue all you want, but that missing half octave combined with the miserable medium-wave AM noise environment make AM inferior to FM--even with one of FM's hands tied behind its back!

dx@netcom.com (dx) writes:

>Did KDWN drop Art Bell? The last few times I've tuned in, they've been
>airing Rush Limbo reruns. Has Bell moved on to some other station to
>originate his syndicated program?

Yeah, they did... all at the same time as Art started broadcasting from his home & when they moved the live show back from 1 am - 6 am to 11 pm - 4 am (all times pacific). I guess when Chancellor Broadcasting Network (who has been syndicating the show for some time now) took over all aspects of the show, KDWN didn't want to be a part of it anymore... I can't understand why, I'm sure Art was doing quite well in the LV overnight ratings - he's been doing it for years!

Anyway, in Las Vegas area, try picking him up on these stations:

600 KOGO San Diego 11 pm - 5 or 6 am
780 KKOH Reno Midnight - 5 am
1120 KPNW Eugene, OR 11 pm - 2 am
1190 KEX Portland, OR 11 pm - 5 am

All these stations are quite powerful at night, and depending on local conditions, you should be able to pick up at least one of them.

>afternoon rantings of Rush Limbaugh and ESPECIALLY Bob Grant. He

He was one of a series of hosts tried in the timeslot by the programming director after Curtis and Lisa Sliwa were cancelled.

The WABC lineup, which is very successful, is:

6:00 - 10:00 AM/Lionel
10:00 - 11:00 AM/Dennis Prager
12:00 PM - 3:00/Rush Limbaugh
3:00 - 7:00/Bob Grant
7:00 - 10:00/Lynn Samuels
10:00 - 2:00 AM/Jay Diamond

>might fit better on WOR...(much of this is second hand, on the basis
>of airchecks sent my way, since he's on in NYC while I'm on the air up-
>state, so those who hear him live on a daily basis are welcome to take
>issue...)

I have heard WOR is on the selling block, and I tend to wonder what the future of that station will hold, and what will happen to Barry Gray, the dean of late night talk radio.

Dennis Prager is a perfect addition to the WABC family, and brings a lot of middle ground politics and ideology which is sometimes not found on the shows. I like Rush and Bob very much, and find Dennis to be a host which can stand up with them and make his points clearly and with depth and detail.

He is also getting a talk show this fall in syndication, and from what I remember he also does a program out in California, where he broadcasts from each day.

There is a lot to be said for the programming and the personalities on WABC, and the same for WOR. Radio is a fragile industry in this NY/NJ area, so it is anyones guess what the future will show us for these two stations.

>Bob Smith, middays WXXI/1370 Rochester NY

What does your show/format deal with?

Juergen Bartels writes:

>Nowadays noone [in Germany] really listens to AM anymore. Holland a few
>years ago started new services on their MW. After a while they found out
>that people didn't like to listen to AM and set up an FM network for it.

That's not entirely true. A year or 10 ago, the Dutch Radio 5 started on MW with talk, education and minority programming. Though previously Hilversum 1 (which is now Radio 2) was on this frequency, many people didn't know how to find it, probably because they only knew how to tune around the FM band. It is still so that, when other networks announce programs on Radio 5, the frequency is explicitly announced, something which isn't done for other networks.

However, the new FM network that has been set up in the last two or three years is for Radio 1 (news and sport). This has indeed increased its audience. But when the government wanted to take away Radio 1's MW frequencies, because of European regulations which forbid simulcasting on two bands, there was a large amount of complaints from, mainly, international truck drivers, who wanted to listen to Radio 1 when abroad.

Apparently, when you cross the border, you suddenly turn into target material for Radio Netherlands, our world service. Which is now looking into cooperating more with the domestic broadcasters and using a MW frequency for part of their European transmissions, by the way.

There are also two new Dutch stations on the medium wave now, Radio 10 Gold on 675 kHz and Holland FM (!) on 1224 kHz. 675 kHz became free because Radio 3 went to FM only, and 1224 kHz is a spare frequency (has been used in the past for Radio Bloemendaal and regional stations), which, alas, is a bit too close to the British station Virgin 1215 (though they have reduced their bandwidth usage a little now).
We'll have to see what comes of that.

>Why Germany still simulcast on AM, I don't know?

In principle, they should stop doing that because of aforementioned regulations. I would regret that, though. I like to listen to them once in a while from Holland.

Also, when driving though Germany when going on holiday, my father always tuned to Deutschlandfunk's LW frequency for its traffic spots. Now, with RDS, this shouldn't be necessary anymore, at least when DLF (soon to be DLR) covers the whole country.

>In Britain MW and in France LW (4 stations with more than 1000 KW power)
>is much more important than here.

That is true. Maybe you'll find it interesting to know that, in the
recent bid for ether frequencies for commercial stations here, there were
actually two applicants for the Dutch spare LW frequency, 171 kHz.
It seems that these plans have been dropped now, however. Almost no-one
here still knows that that broadcast band exists.

: very surprised to see (or rather, hear) this transmission.

That's because a 1030 was authorized for Sacramento several years ago (I think it's the "town" of Riverbank, which I can't seem to find on a map), but 1030 went bankrupt and it's unlikely anyone is going to put it on the air any time soon. Thus, a proven Class II (if they still have that sort of thing) channel is available within earshot of Sacto. That's my take on it anyhow. Well, *something*'s got to be done with AM -- make it all TIS all the time!

: The downhill spiral of the AA Padres has KFMB wondering: "Is it worth $1
: million per year to broadcast the games?" The 50kw outlet at 760 AM contract
: for the baseball team is up after this season. XETRA-AM 690 (50kw, U, Tijuna
: Baja California, Mexico) will make a big push to broadcast the games.

When did KFMB-AM increase its power to 50 KW? It was only a class III station for most of its life on 760 KHz. It was moved off 540 KHz, I believe, because of a treaty with Mexico, and moved to 760 KHz as a class III station under a special exception to the FCC rules allowing a class III station to be assigned to San Diego on a frequency on which otherwise only class I and II stations could be assigned.

Has it become a 50 KW station because of the new rules that permit regional stations to increase their power up to that level? Certainly, they wouldn't have many nearby stations competing to increase their power on 760 KHz.

Wrapping a lot of #22 wire around a broomstick and plugging it into your antenna jack, or sometimes just laying it in parallel with your radio's loopstick can help a lot, and it's frequency-sensitive, making it less prone to noise. I found that about 2 feet worth around an old garden rake handle improved my shortwave 31 and 49 meter band reception better than a 1/4 wave I'd been using, with a lot less static. For the AM band it'll be a lot longer, but what the heck.

>From the Orange County Register, Saturday May 21:

Radio personality Howard Stern's on-air musings have his employer, Infinity Broadcasting Corp., facing an additional $200,000 in fines from federal regulators.

The FCC proposed Friday fining four Infinity-owned stations $50,000 each. Those stations include WJFK-FM, Baltimore, WXRK-FM, New York, WRSP-FM, Philadelphia, and WJFK-FM Manassas, Va., said FCC spokeswoman, Maureen Peratino.

Stern's show is carried on each of the stations. Materail from Stern's show appears to be in violation of the FCC's indecency standards, Peratino said.

In separate action, the FCC on Friday cleared the way for Infinaty to acquire WPGC AM and FM, which serve the Washington, D.C., metro area.

[Should be able to view the FCC actions on Monday, May 23 from the following sites using WWW: gopher//liberty.uc.wlu.edu:3002/7?FCC

anything
>other than, well, NORMAL. Since you haven't heard Dale and Bob do
it,
>do you feel qualified to comment on this particular stunt?

Alan,

I couldn't have responded better myself. I tried however and I guess it got lost in the moderators move. There aren't many original ideas on radio, but if I think something will entertain my listeners or at least stimulate them (ocassionally in the negative) I'm not going to hold back.

I get a thrill from tweaking the politically correct NPR crowd and could only smile at the previous post. If public radio is so stimulating, I invite them to do away with public funding and get into the Arbitron battle we fight every single day of the year.

And as for you Mr. Kaye, I find it insulting that you would make a blanket statement that my listeners are nothing but vouyers. Our demographics make up the most educated and the highest income people in the market. If you know anything about morning radio you know that "Stunts" are not market exclusive. As a matter of fact I share my bits with other jocks throughout the country.

I've been in the top three of the morning ratings battle in Austin for seven years. Any radio person will tell you thats a lifetime in mornings. Your post not only lacked knowlege of the business but had no basis, as I take it you have never heard my show.

Well...Cleveland now has TWO sports stations...

WKNR-AM/1220 "Sportsradio 1220" has been doing the format for
a couple of years now since Cablevision bought the station.

Now, former bad WHK-AM/1420 "Talk 1420" has tried to start the
second sports format as of this Monday... The results are
pathetic... Announcers that know VERY little about sports and
stumble all over themselves.

We were bored the other day, so tried calling...got through
and was put on the air immediately - no screening...And we
mentioned WKNR's call letters during our question, and they
let it call. No callers, beside us!

What does Carl Hirsch hope to accomplish? Good luck! WKNR is
right on the money.

Should be interesting!

BTW, Carl's duopoly FM- WMMS-FM/100.7 is now "Buzzard Radio -
the Next Generation" - Think they're Star Trek fans?

Apparently-To: rec-radio-broadcasting@cis.ohio-state.edu
Status: RO

While tapping into the FCC Gopher,I ran into a message from their
Mass Media Bureau in regards to license renewals. A number were
renewed conditionally. They are:

*WOR-N.Y.C.(Buckley Broadcasting)
*WQXR-AM/FM,N.Y.C.(New York Times Co.)
*WINS-AM,N.Y.C.(Group W)
*WSEN-AM/FM,Baldwinsville(near Syracuse,Buckley)
*WBNR/WSPK,Poughkeepsie(Beacon Broadcasting)
*WLVL,Lockport(Culver Broadcasting)
*WZSH,S.Bristol(near Roch.& now WRQI,Gr.Lakes Wireless Talk.Mach.Co.)
*WHCU/WYXL,Ithaca(Eagle Bdcstg.)
*WGHQ/WBPM,Kingston(Historic Hudson Valley Radio,Inc.)

The bottom 5 had theirs challenged by the NAACP-and,since only
2 touch into my area,these are the only ones I'll discuss;look at the
Gopher if you want info on any others.

-WLVL:The license was renewed subject to reorting conditions and a
$12,000 notice of apparent liability,with the sanctions based on a
failure to engage in recruiting efforts in attempting to attract an
adequate pool of minority recruits for a substantial number of its
full time jobs(it has 7). Specifically,Culver didn't recruit for at
least 1/3 of its positions. However,it also took into account the
relative size of the minority labor force.
-WZSH(now WRQI):Based on its review of the record,they found that
renewal would be in the public interest-noting that Great Lakes had
made efforts to hire minorities,and-in fact-had done so. However,
reporting conditions were warranted to improve Rock It 95's self-
assessment and record keeping. This has nothing to do with its
transmitter tower problems-Bob Smith of WXXI could tell you more about
that than I can.

*On to other things:Bob pops up here again. While scanning
Prodigy's board,I noticed that Buffalo may not have Rush Limbaugh to
kick around much longer. WBEN,which holds the rights(and one of the first
nationwide to pick him up,I believe),is considering whether to drop the
show when its deal runs out later this year. Opinion:'BEN did well with
Rush,they can do well without him.(Also of note:his TV show didn't do
well in Canada;when he first appeared on Toronto's CFMT-TV(ch.47,ind.),it
only lasted 6 weeks before it was pulled due to a number of complaints.
Then,he returned on CFTO-TV(ch.9,CTV)-only to be yanked a few weeks ago.)
Also:are Don & Mike,whose show runs on WWKB from 4-7pm,leaving? GM
Terry Rodda says their contract is with Unistar(D & M's syndicator),but
hinted that he has other programming in mind in case they leave. After
the winter book came out,they were none too happy about the ratings.
Some advice:STFU and take it like a man,not a wuss! As far as I'm
concerned,take your sorry excuse for a show as far away from here as
you can.

1858. Letter from AMARC 6

Newsgroup: rec.radio.broadcasting
Date: 1994-05-24 00:12:00 UTC
From: Bruce Girard <resystom@web.apc.org>
Message-ID: <2rrgog$3l9@vixen.cso.uiuc.edu>
Source record: 39896

A LETTER FROM AFRICA

When AMARC 6 is inaugurated in Senegal on January 23, 1995 it will be the first time AMARC's world conference takes place in Africa. In addition to a new location, the conference will bring new themes to AMARC. For several years Africa has been buzzing with free-radio programs. With a state monopoly here and a legal void there, pirate stations, community radios in Mali, commercial radios in Gambia, local radios in Burkina Faso, denominational radios, etc., radio adventurers have opened the airwaves to Africans who, though silent for generations, are rich in differences and anxious to participate in public discussions and make their opinions known. Others are longing for the same opportunity.

Africa has moved straight into the radio-wave forum. The opportunity to hold the Sixth World Conference of Community Radio Broadcasters on our own soil has come at just the right time. It will boost enthusiasm and help to build a framework for harmonious development of radio broadcasting on many levels: legality, programming, technical development and even on the level of ideals because it will contribute to renewing dialogue between people who have broken off all communication and see violence as their only alternative.

Radio broadcasting is already regarded as a form of freedom -- freedom to communicate from one continent to another or just from one part of Africa to another or from one point of view to another. It means freedom of expression for Africans on global matters in which the stakes are high. The central theme of AMARC 6 has already been chosen: Waves for Freedom.

The local AMARC 6 Organizing Committee is currently working with this dream -- well on its way to becoming reality -- to shape the upcoming event and raise awareness of the scope and demands of these new tools. The challenge will be to encourage the participation of Africans from all over the continent, with their specific differences and needs, as well as radio broadcasters from other parts of the world: people who are more experienced and still eager to exchange and help to build.

More than ever before, this AMARC conference should be designed to bring together the largest possible number of participants, from many different backgrounds, around themes common to all community radio broadcasters. At the same time, it should bear the mark of Africa. Dakar has been known throughout the centuries as a crossroads for every sort of exchanges and a meeting ground for

discussion amongst different peoples. The choice of this city as the host of AMARC 6 will undoubtedly be a significant asset in carrying out the important task that lies ahead.

1865. Mr. Leonard Sighting

Newsgroup: rec.radio.broadcasting
Date: 1994-05-24 00:12:18 UTC
From: schuster@panix.com
Message-ID: <2rrgp2$3lu@vixen.cso.uiuc.edu>
Source record: 39803

Ross Brittain and Mr. Leonard mysteriously vanished after John Lander took over the morning show at New york's WHTZ (Z-100). Other posters here have hinted at what happened to Ross.

But as of last week, Z-100 was still running "missing child" spots on the afternoon show for Mr. Leonard.

Well, at 7:15 this morning, Mr. Leonard wandered on-air into the morning show, and the ensuing discussion seemed to indicate that he was involved in contract re-negotiations - and he is now back.

The recent listings of ratings for various cities have been
interesting and illuminating. Does anybody have the most recent list for
Louisville? It would be appreciated.

He also spent a year stint at KVEN in Ventura, Ca. I heard he was on a L.A. station but I didn't realize it was the same station that Howard Sterns is now on, what a letdown that must of been for him!! Phil was not very well received here (in Ventura). It must have been quit a blow to the ego, and then to get fired from LITTLE KVEN!! Anyways, even though I personally didn't find him very entertaining (although for Ventura, he was pretty good), it's good to hear about him.

Brian in Ventura, Ca

1868. Proposed Urd European Charter

Newsgroup: rec.radio.broadcasting
Date: 1994-05-24 00:12:20 UTC
From: resystom@web.apc.org
Message-ID: <2rrgp4$3m4@vixen.cso.uiuc.edu>
Source record: 39806

At the meeting held in Sheffield on October 22-25, 1993, representatives of European community radios discussed the first draft of the European charter confirming the principles which join European broadcasters together. This text is not yet definitive but indicates discussions within the AMARC-Europe Working Group to date.

Introduction

Recognizing the diversity of community radio in Europe, whith different cultures and traditions which lead to a variety of models, this Charter is meant to identify common goals which community radio stations should strive to achieve:

Community radios:

1) are established as non-profit-maximizing, independent media services which contribute to the democratic process and a pluralistic society;

2) must remain independent of local or national political or commercial power;

3) are constituted as non-profit-distributing trusts, co-operatives or other non-profit-maximizing limited companies;

4) ensure that internal management is open and accountable to supporters and all working personnel;

5) are entitled to be financed from a variey of sources, e.g. public grants, shares, advertising, listener subscriptions and other sources to which it has a right;

6) are committed to, and will provide, access rights to minority and cultural and linguistic diversity in areas where there are no such marginalised groups, and will use its services to promote and protect adequate services dedicated to minorities;

7) will encourage local creative talent and foster local contribution;

8) ensure that management, programming and employment policies are opposed to discriminatory attitudes and practices;

9) recognize the right of paid workers to unionize, and will provide satisfactory working conditions for both paid and voluntary personnel;

10) will serve geographically recognizable communities or communities of innteres, and have ownership representative of their local community or community of interest;

11) will have a strong commitment to providing access to training, production and broadcasting facilities;

12) will stimulate innovation in programming and appropriate technology;

13) will enable and enhance the development and enjoyment of their listeners, and facilitate a variety of opinions by enriching the flow of information;

14) news programmes will seek to honestly inform and assist the plurality of sources;

15) will provide "right of reply" to any person or organization subject to serious misrepresentation;

16) will seek to draw their programming mainly from local sources, while also ensuring that local listeners have an understanding of wider issues;

17) will seek to create awareness of environmental and human rights issues;

18) will seek to foster programme and personnel exchange between stations;

19) will strive to use communications to develop greater understanding annd unity between all the peoples of Europe.

1869. Re: NEEDED RADIO STUNTS FOR MORNING SHOW

Newsgroup: rec.radio.broadcasting
Date: 1994-05-24 00:12:26 UTC
From: dk@crl.com
Message-ID: <2rrgpa$3m7@vixen.cso.uiuc.edu>
Source record: 39807

Alan R. Weiss (alanw@farpoint.sps.mot.com) wrote:

: Interesting radio history. It may not have been very modern in
: San Francisco - to be sure, it was probably just servicing the
: target audience - but this particularly stunt wasn't part of the
: L.A. scene in the 70's and 80's.

LA is every bit as hip as SF, but the media people simply don't want to think of it that way. They're still stuck on the belief that LA is hick because it was settled mainly be hick dustbowl refugees in the 1930s. While that it their past, LA is sophisticated enough to have a lesbian dial-a-date as a regular feature, not as a stunt. As a stunt it only bolsters the hick image. Do it for real or don't do it at all.

: After an hour or so of this, the listener tended to
: identify with the callers a little more -- NONE of the participants was
: profane, nasty, slutty, lascivious, man-hating, women-hating, or anything
: other than, well, NORMAL.

Uh, why should the be anything else? Haven't hung much with lesbians, eh? I still think a "clueless het-boy dial-a-date" would be a scream. Give away 6-packs of Budweiser as doorprizes.

: And yes, after awhile stunts don't work. Mark and Brian, KLOS-FM 95.5
: Los Angeles found that out. Stunts tend to be very polarizing -- people
: who "get" the stunt stay with it, people who don't tune out.

Don't forget that stunts creat a we/they dichotomy -- "we are hip" and "they are clueless". This does not exactly endear a station to potential listeners. Try a "clueless het-boy dial-a-date" and see what I mean.

: Not necessarily. Most of all, people don't want to be BORED. If you
: are going to do SERIOUS RADIO, you better have some hooks that keep
: them locked on to your frequency, David.

Funny, the #3 station in the SF Bay Area during morning drive is KQED-FM, an NPR station, playing "Morning Edition" during that period. I'm sure in LA KCRW probably has similar ratings. So much for needing hooks. But what about in other communities? In Oregon, OPB (5 full service FM and hundreds of translators) pepper the state with "Morning Edition", "All Things Considered", etc., and yet they do remarkably well in listenership througout their service area. No hooks.

: I too like talking head
: radio - I love NPR and APR, I loved Michael Jackson on KABC-AM L.A.,

Well, wait a minute. We do have standards here. :>

: And BTW, what's wrong with hormone-charged male voyeurs living for
: lesbian/bisexual fantasies? Think about it for awhile ....

Nothing wrong with it at all, IF it is a 2-way street. I, personally
have sexual fantasies of straight guys. Hey, give us some fun, too.
Let's hear them clown around and ineptly try to get dates on the air.

Overview: **********

This is the weekly schedule for West Coast Live, San Francisco's Live Radio Show to the World (actually just public radio).

The upcoming schedule: **********

Our producers work overtime booking talent onto the show. Sometimes they're so busy on the phone, they don't have time to keep the rest of us up to date. So join our audience at a live show. You too may be pleasantly surprised.

Every week we'll be calling our Fort Mason neighbor, the World War II liberty ship, the Jeremiah O'Brien on it's trip back to Normandy. If we're lucky, we'll even be able to talk with them.

May 21st: **********

Rosie Flores, singer/songwriter.

Gerald Haslam, author "Condor Dreams and Other Fictions".

Rand and Robyn Miller, designers and programmers of the MYST CD-ROM.

Meredith Tromble, view from the artist's studio.

"Baseball Jake", the 3 year old baseball expert.

May 28th: **********

Merl Saunders, Bay Area keyboard legend.

Michael Doucet & Beausoleil, fantastic cajun-zydeco.

Winnie Smith, author "American Daughter Goes to War".

Yellow Wood Junction, original acoustic music.

Anne Lamott, Sam's mom and author of "Operating Instructions".

June 4th: **********

Susan James, singer/songwriter.

Sara Paretsky, author of V.I. Warshawski Murder.

June 11th: ***Re-run**********

Our first re-run!

June 18th: ***Re-run**********

A fabulous re-run.

June 25th: **********

Live show, guests to be announced.

July 2nd: **********

The Declaration of Independence.

Special Offers: **********

Drawing for Free Tickets!: *****

This week marks our 20th West Coast Live show. Be the 20th person to email (see rules, below) the moderator at;

Owner-West_Coast_Live@netcom.com

and you will win two (2) free tickets to this week's live show. Runner-ups are allowed to buy tickets at list price.

Rules: **********

The contest begins each week as soon as the moderator sends this notice to the West Coast Live email subscription list,

so code up those PROCMAIL Auto-Reply recipes.

The winner will be selected based on the time the entry was sent (as opposed to the time the entry was received), no sooner than 1 hour after the moderator receives the minimum number of entries, and no later than 48 hours prior to the live show.

The email must be addressed to;

Owner-West_Coast_Live@netcom.com

The email's header subject must contain the phrase; "Win Ticket Drawing".

One entry per person.

The winner will be notified by email.

If the winner can't attend this week's show, the winner must assign the tickets to a couple of friends.

The moderator's (PROCMAIL's) selection is final.

Free Coffee: **********

Wear an official West Coast Live shirt at the show, and you are entitled to free coffee.

Rules: **********

Official West Coast Live T-shirts or sweat shirts only.

For a limited time, this offer is extended to shirts from that old radio show, that are upgraded with an official West Coast Live Shirt Upgrade Kit.

This offer is good for free coffee only from the West Coast Live java bar. If anyone else offers you free coffee for wearing a West Coast Live shirt, let us know.

T-shirt Drawing: **********

On the last live show of each month, we give away an official West Coast Live T-shirt.

Rules: **********

To enter this drawing, you must drop a business card into our fish bowl. Any scrap of paper with your name, address, and phone number may be substituted for a business card.

One entry per person. You must be present to enter.

The drawing is held following the last live show of each month. You need not be present to win.

Tip of the Week: **********

Cowell seating chart: **********

If you're intimidated by the Internet, don't bother with
this week's tip.

Send an email message as follows;

To: Owner-West_Coast_Live@netcom.com
Subject: Please Send WCL seating.gif

and we will auto-reply with a seating chart for the Cowell
Theater. Actually, you'll get a multi-part response of an
UUENCODEed file, which must be reassembled. You'll get some
assemble instructions, but if you don't know how to
UUDECODE, don't bother with it. We're happy to help you
find your seat at the live show.

Downloading Additional Information: ******

You may download an information document giving background
information on the show and the show's Internet service, by
sending the following email message to;

LISTSERV@netcom.com

Message Contents:

Source record: 39809

```
**************************************************************************
* Broadcasting Resources on the Internet *
**************************************************************************

This file started because several colleagues of mine were looking for
broadcasting related resources on Internet. I decided to polish the
list up and post it for the good of humanity. Please mail additions
and corrections to ngriffin@nyx.cs.du.edu.

These are divided into digests, lists, newsgroups, and remote systems.
Not all systems are capable of all of these, so be forewarned. All
addresses are Internet addresses. Some lists have Bitnet addresses as
well.

I have tried to verify all of the addresses, but don't have time to
read all of these lists, so I have relied on some second-hand
information. Accuracy is not guaranteed, but what do you expect for
free! Enjoy and send those corrections and additions.

Digests and Lists_____________________________________________________

Airwaves -- This is a digest of the rec.radio.broadcasting newsgroup
listed below. It is moderated, and is aimed at professionals in the
field. There are "Radio Watchers" who send in regular contributions
from their regions. It's a great place to keep up with distant markets
and to talk about about issues in the industry. Digests are sent out
once or twice a day typically. NOTE (5/18/94): For the next week or
so, the publisher is in the process of moving. Digests and mail
responses will be sporadic.
Subscribe: subscribe@airwaves.chi.il.us.

AM/FM -- Keep up with events in the British broadcasting industry.
Lots of news about new private broadcasters. This one sticks to radio
as well. Issued monthly.
Subscribe: listserv@tqcomms.co.uk. Include "SUBSCRIBE AM/FM your
name"

DJ-L -- An unmoderated list about college radio. Most postings relate
to programming and management.
Subscribe: listserv@vm1.nodak.edu Include "SUBSCRIBE DJ-L your name"

KidMedia -- This unmoderated list is devoted to children's media,
including radio, television, software, music, and videotapes. A
digested version of the list is also available.
Subscribe: kidmedia-request@airwaves.chi.il.us (reflected)
kidmedia-d-request@airwaves.chi.il.us (digest) For either
address include "REQUEST in the subject line.
```

NACB-L -- A list targeted at stations and members of the National Association of College Broadcasters. Discussion centers around station management and NACB events. This is an open list.
Subscribe: listserv@gwuvm Include "SUBSCRIBE NACB your name"

NBS-AEP -- A list targeted at members of the National Broadcasting Society, a student and professional association. Postings include NBS events and job openings.
Subscribe: listserv@cunyvm1.gc.edu Include "SUBSCRIBE NBS-AEP your name"

PBP-L -- This list is devoted to play-by-play sports broadcasting.
Subscribe: listserv@etsuadmin.etsu.edu Include "SUBSCRIBE PBP-L your name"

Prog-Pubs -- A list that deals with progressive publications, including radio.
Subscribe: prog-pubs-request@fuggles.acc.virginia.edu

Radio Resistor's Bulletin -- Community and cooperative radio is the dealt with by this digest.
Subscribe: haulgreen@well.com

RFERL-L -- Discussion on this list centers around Radio Free Europe and Radio Liberty. With the end of the Cold War these stations have a changing mission.
Subscribe: listserv@ubvm.cc.buffalo.edu Include "SUBSCRIBE REFRL-L your name"

SatNews -- A newsletter about satellite television broadcasting worldwide. This is also posted on rec.video.satellite.
Subscribe: listserv@orbital.demon.co.uk

Talkin' Tech -- Technical isssues are the focus of this list. It is moderated by the publisher of Airwaves. It's a new digest, so traffic is still light. The primary focus is broadcast equipment and engineering.
Subscribe: tech-request@airwaves.chi.il.us

Telecomreg -- This list is devoted to discussion of telecommunication regulations. Much of it is non-broadcast (Data networks, Telco regs, etc.), but there is some good information on cable and multichannel television. It also carries short articles from Multichannel News.
Subscribe: listserver@relay.adp.wisc.edu Include "SUBSCRIBE TELECOMREG your name"

Toaster-list -- This list is for NewTek Video Toaster users.
Subscribe: listserv@karazm.math.uh.edu Include "SUBSCRIBE TOASTER LIST your name"

Videotech -- This is the list version of rec.video. Discussion includes broadcast, cable, videotapes/discs, and teletext.
Subscribe: videotech-request@wsmr-simtel20.army.mil

Vidnet-L -- University video networks are discussed on this list.
Subscribe: listserv@uga.cc.uga.edu Include "SUBSCRIBE VIDNET-L your name"

Vidpro-L -- Professional video production discussed here. There are also job openings posted on here ocassionally.
Subscribe: listserv@uxa.ecn.bgu.edu Include "SUBSCRIBE VIDPRO-L your name"

Usenet Newsgroups_____

alt.radio.pirate -- This newsgroup is devoted to pirate broadcasting. Frequent issues are the "microbradcasting" movement, Part 15 rules and regulations, and the construction of low power transmitters such as the Ramsey FM-10.

alt.satellite.tv.europe -- European satellite and DBS services are the topic of dicussion here.

rec.radio.broadcasting -- This is the Usenet version of Airwaves (listed above).

rec.radio.noncomm -- Noncommercial and public radio are the focus of this newsgroup.

rec.video.cable -- Cable television and technology are discussed on this newsgroup. Topics include cable regulation, scrambling methods, and programming.

rec.video.production -- It's a newsgroup focused on, you guessed it, video production. There's a good deal of traffic about the Video Toaster.

rec.video.satellite -- Satellite broadcasting is the focus of this newsgroup. Frequent issues are programming, scrambling, wild feeds, and equipment.

Other (BBS systems, gophers, etc.)_____

FM10 -- Information about the Ramsey FM10 kit is available here. Other pirate radio stuff here, too. It's in the fm10 directory.
FTP: ftp.dg.com Login: anonymous Password: your address

Federal Communications Commission -- The FCC has recently established a gopher and an FTP site. Available information is limited, but includes Notices of Proposed Rulemakings and the Daily Digest.
Gopher: gopher.fcc.gov
FTP: ftp.fcc.gov

ISCA BBS -- ISCA has a forum called Media Issues. It includes discussion of both print and broadcast media.
Telnet: bbs.isca.uiowa.edu

KKSF/KDFC Gopher -- This gopher is operated by a contemporary jazz station and a classical station in San Francisco. Information includes program schedules, playlists, and engineering information.

Gopher: kksf.tbo.com

KPFA/Pacifica Gopher -- Programming and playlists are cerried on this gopher, operated by the Pacifiaca station in Berkeley. In addition, they have playlists and station lists for public radio's "Music From the Hearts of Space." At the top menu for the Well Gopher choose Communication and Media, then KPFA.
Gopher: gopher.well.sf.ca.us

KUOI -- The University of Idaho gopher includes KUOI program listings. The real nugget of gold here is the Other Stations selection that has connections to gophers of over 30 stations. Choose the UI Gopher Services option and then KUOI.
Gopher: gopher.uidaho.edu

Quartz BBS -- Quartz has a forum called Tech Toys that includes discussion of radio along with electronics and other "tech toys."
Telnet: quartz.rutgers.edu Login: bbs

Skynet BBS -- This BBS recently added a room called Radio Stations. Discussion is primarily college radio.
Telnet: hpx6.aid.no Login: skynet

WFIU/WTIU -- The Inidana University gopher has program schedules for public radio station WFIU and public television station WTIU. Also, listed is a schedule for SCOLA, a satellite television service. Choose the News, Weather, Addressbooks, and Other Information selection.
Gopher: gopher.indiana.edu

WKAR -- Here's a nice example of what a gopher can do for a radio station. WKAR-FM (E. Lansing, MI) program listings are included at the Michigan State University gopher. Choose Computing and Technology followed by Broadcasting Services.
Gopher: gopher.msu.edu

1872. Boston Radio Watch 5-23-94

Newsgroup: rec.radio.broadcasting
Date: 1994-05-26 00:02:38 UTC
From: nhmas@gauss.med.harvard.edu
Message-ID: <2s0ouu$g2b@vixen.cso.uiuc.edu>
Source record: 39827

* On Thursday(5-19), American Radio Systems reached an agreement with Gowdy Communications to acquire AOR WCGY-93.7FM("Pure Rock 93.7") in Lawrence,Mass(north of Boston) for around $12.5 million. 'CGY will join the other 3 ARS properties(WHDH-AM,WRKO-AM, and WBMX-FM) in the Boston to form the record 5th FM duopoly and the first local quadropoly. ARS to upgrade 'CGY's signal in the future and look for a the transmitter site. No immediate format or on-air staff changes are planned. 'CGY's AM sister station(WCCM) was also included in a deal but will have to be sold off by ARS since it already owns 2 other AMs in the same market.

* Imus will be broadcasting from Boston's WEEI 590AM studios in Charlestown,MA on the 22nd and 23rd of June to celebrate his 1-year on a Boston's all-talk sports station. 'EEI has been Imus' strongest station in his growing network.

* Speaking of WEEI, they fired their only local morning newsperson, Bob Ames. Ames was at 'EEI since its all-news days. For the past year, he was doing local newsupdates during syndicated "Imus in the Morning" show.

In September 1991,the Celtics dumped all-news format in favor of all sports. They fired 'EEI first-rate newsstaff,which later was hired by WBZ-AM 1030 as it was making a strong move to become a news and info leader in the Boston market.

* Now that WEEI has been sold by the Celtics to 'Back Bay Broadcasters', daily Celtics bashing is underway by both, the talkshow hosts and the callers/listeners. I'm not sure about the backround(ie questionable broadcast connections) of 'EEI's new owners, but at least a troubled Celtics organization can now be a fair game on the airwaves...

* Boston's longtime talk radio voice Jerry Williams could be at the end of his career. Reportedly, 71-year old Williams(2-6pm on WRKO-AM680) hasn't been offered a contract by his bosses, American Radio Systems. Since ARS owns both local talk stations in the market(WRKO and WHDH) Williams might have to take his schtick out of the #9 market.

* WBCN-104.1FM(Infinity Broadcasting) has not made any attempts to extend the contract of its longtime morning jock, Charles Lacquidara. Lacquidara's current contract expires at the end of September. I wonder if Infinity's mounting FCC fines and growing expenses in acquiring radio properties around the country, could squeeze out a high-paid Lacquidara in favor of syndicated Infinity-talk or a new cheaper morning voice...

* Pyramid's(WXKS-107.9FM) official takeover of a rival WJMN-94.5FM is expected sometime early next week(5/31 or 6/1). It'll be Boston's fourth FM duopoly and counting...

-Mark
Peace : Live in It or Rest in It.

1873. Observastions of NYC radio scene(short)

Newsgroup: rec.radio.broadcasting
Date: 1994-05-26 00:02:39 UTC
From: nhmas@gauss.med.harvard.edu
Message-ID: <2s0ouv$g2e@vixen.cso.uiuc.edu>
Source record: 39828

These are my very short observations of NYC/CT/NJ radio scene on my 4-day trip to the City last week :

Overall, most of NY/NJ/So.CT FM stations are in poor shape as far as programming and air-talent go. Such rock FM powerhouses as 'NEW, 'XRK, 'CBS are just a memory. The only bright light is AP 'DRE.

CHR hybrids are absolutely tasteless. 'PLJ and Z-100 are truly pathetic.
AC WMXV(Mix) is generic.

If you like rap and Churban, #1 market is good at that to excess.

AM side is much better,IMHO. At least, WINS and WCBS still do a great job covering news/info/traffic. It seemed like WINS gave traffic reports every 5 minutes(no kidding)).

WFAN is a great sports stations. The callers make 'FAN work very well.
Unlike in Boston, where callers to WEEI are humorless and mostly one-dimensional.

I liked the quality of talk show hosts on both, WABC and WOR.

That's it for now...

-Mark

Down to business:

*First,to update an item that ran in ARJ630:Don & Mike are no longer on WWKB. A liner ran yesterday during what would have been their time slot stating they were gone,and that those who had any questions could call their syndicator-Unistar. No offense to Tom Lacko or any D & M buffs out there,but IMHO I'm glad they're gone-they sucked. Currently,the One-on-One Sports Entertainment Network (based in Las Vegas)runs in the 4-7 slot. When D & M came on last June(replacing Alan Colmes),I thought,"They replaced Alan for THIS?" Well,at least A.C.has his revenge.

*WBEN(NewsTalk 930)has debuted some new IDs-seem to be out of town produced and can't ID the voice. Also,the top-of-hour newscasts have their start reworded a bit.

*Some articles of radio personalities seen:
-The Buffalo News ran an article on Jenny Bagen,a RN and head of the AIDS Designated Center at the Erie County Medical Center-who also hosts WUFX's Sunday night sexual info show,Infomania(10pm-mid.) It happens to be the Fox's most popular show since debuting on June 6 last year,drawing a 33.9 share of the 18-34 group. Bagen,who describes herself as shy,has to put it aside so she can deal with topics such as (for women):pregnancy,orgasms and sexual orientation,while male callers talk about sexual dysfunction,STD's(if you don't know what they are,RTFM) and sexual orientation-adding up to 40 calls a show.
Her funniest call came from a 55-year old woman who complained that her husband(who's 63)was waking her up in the middle of the night to have sex. When asked how often it happened,she answered about every 3 months,prompting ex-cohost Bob Richards to ask,"So what's the problem?"(You can now laugh your gonads off.)

-The May 20 Rochester Democrat & Chronicle ran a story on a young couple who couldn't attend their prom at Naples High School due to one having bad grades. Enter WCMF-FM. They set up the duo with tickets to the REO Speedwagon concert at the Festival Tent downtown,along with backstage passes to meet the band;the latter was given during Brother Wease's Morning Circus show.(Even though-as Mike Black has noted-Wease is crude,at least he has a heart;whereas I've yet to find Howard Stern's. Did he leave it on the campaign trail? :>)
The tale of Ben Stopka filled the air on Thurs.with interviews given on WVOR(Variety 100.5)and WHAM(News Radio 1180),as well as WCMF. Calls were received from 3 other stations,2 newspapers and a TV station. Naturally,the case was the talk of Jack Kinnicutt's WHAM

show,with the majority of callers against the Stopka's view that the crime(bad grades)didn't fit the punishment(not going to the prom). Kinnicutt said,"I think people are frustrated over what they see in our society as a failure to take responsibility for one's own actions."(Well,Mr.Kinnicutt,let me ask you this(to paraphrase the new movie "Speed"):If what you say,directly or not,leads to someone's suffering,what do you do? What do you do?)

*Sunday's D&C had an article on G.Gordon Liddy(aired on WWKB locally and on WHTK in Rochester).

*There's also an article by Donn Esmonde in the News about Triple A and if it'll appear in Buffalo. I'll post it up soon.

Isn't this backwards? Looking in the 1985 TAB book on AM Stereo, I see "SQ"

techniques in the Kahn Transmitter diagrams, in the form of audio phase
shift
networks. The diagrams of the C-QUAM system include none of these "SQ"
audio
phase shift networks. I believe there were what you call "phase matrixing
systems" proposed in the 50's.

> >

I was not referring to adverse receiving conditions, but rather to
irreversible distortion added at the transmitter of the Kahn system. Due to

the FCC rule requiring the AM envelope to be modulated with L+R for
compatibility with older receivers, both the pure QUAM and pure ISB systems

must be modified. Both Kahn and C-QUAM encode the L-R difference signal as
phase modulation, the only difference between the two, is the mathematical
function of L & R used to generate the phase modulation. C-QUAM uses a
modulating function that can be completely reversed in the receiver,
assuming

wide enough bandwidth. As of the printing of the 1985 TAB book, Kahn was using
a second harmonic distortion generator to suppress the second sideband
resulting from the phase modulation. I am not aware of any way to undue the

effects of the transmitter second harmonic generator, in the receiver. The
higher order sidebands resulting from the phase modulation process remain with
"ISB". I am not aware of anything published more recently on the Kahn system.
I have heard that there have been changes made in the operation of the Kahn

system, to improve performance, but nothing has been disclosed. If you have

any information on this, that changes my conclusions, I would be glad to hear
about it.

> the pilot to adjust the output of the unit.
>

My understanding of the C-QUAM system is that the 25 Hz "pilot signal" is only
used to indicate the presence of a C-QUAM signal, and to activate the decoder.
It is not used to demodulate the signal. However a synchronous detector is
used demodulate the main carrier, I believe Kahn receivers also use a
synchronous detector. What is the "1kHz subcarrier" you refer to? The block

diagram for a C-QUAM demodulator can be found in the Motorola Semiconductor

Databooks.

It would be interesting to have one of the Kahn experts on the net discuss how
a practical receiver for the Kahn system operates. Unlike the other AM Stereo
systems, Kahn seems not to have released much information on how his system

actually operates.

Well, it's not as bad as the public thinks, but the problem is that
the public thinks it's as bad as the public thinks. Perceptions can get
you hung by short rope from a tall tree.

Maybe digital will change all that. Maybe when digital comes, it
won't matter anymore. Bandwidth will just affect how many channels a
given station will have.

The programming on WMBR (88.1) is pretty varied, with an emphasis on all kinds of "rock" music: independent pop and rock weekday mornings, non-moldy oldies from noon to two. My station, WHRB in Cambridge (95.3, Harvard radio) offers jazz, classical, and independent rock and pop, mostly. Weekday schedule: jazz from 5am to 1pm, classical from 1pm to 9pm, "rock" from 9pm to 5am. The schedule is somewhat topsy-turvy this month, though, due to a series of "music orgies" currently running through the month of May...

We have been featured in Broadcasting and Cable Magazine and in Radio Business Reports. Its a free service - check us out! FCC WORLD can be reached at 202-887-5718 - (14.4 baud) 24 hours a day.

1879. Estimating "health" of a station from the commercials it airs?

Newsgroup: rec.radio.broadcasting
Date: 1994-05-26 00:02:49 UTC
From: wa2ise@netcom.com
Message-ID: <2s0ov9$g2n@vixen.cso.uiuc.edu>
Source record: 39834

Was wondering if it's possible and sensable to get a "feel" for the health of a station from the commercials it airs. If you hear a lot of national based products (Coke and/or Pepsi), this might indicate ratings good enough for the station to keep its format. Next would be local but good stuff like new car dealers. But I wonder when I hear ads for the local tattoo parlor late at night. "there's a pool table while you wait".

Or is late night considered an "overflow" time, with cheap time slots that, if sold, are just a little extra "gravy"?

Years ago, a small AM in Syracuse NY had played commercials for the local porno theater days and evenings. Heard that the station folded a year later. Just heard that WOLF is back on the air now, though, with a different format.

1880. Louisville Radio

Source record: 39835

Last Saturday, I reported that WHKW changed frequencies from 103.9 to 107.7. The two frequencies were simulcasting until tonight. 103.9 is now calling itself "Cool 103.9." It broadcasts "the greatest hits of all times". It is next to another Oldies station, Oldies 103 WRKA at 103.1. The cool 103.9 format seems to be more laid-back, a bit more progressive in sound, and has few hits from earlier than 1970.

1881. Project: radio news service

Newsgroup: rec.radio.broadcasting
Date: 1994-05-26 00:02:56 UTC
From: Bruce Girard <resystom@web.apc.org>
Message-ID: <2s0ovg$g2t@vixen.cso.uiuc.edu>
Source record: 39836

A RADIO NEWS SERVICE

Inter Press Service (IPS) and AMARC have proposed a joint project to develop a news service specially suited to the needs of radio broadcasters.

The IPS Third World News Agency is the 6th largest news agency in the world. It produces an independent daily news and feature service that is distributed in 11 languages to 97 countries. With a focus on news by about and for the people of the South and with a special interest in issues concerning women and the environment, the IPS service is a progressive alternative to that offered by other major news agencies. However, the service is designed to suit the needs of the print media and has to be completely rewritten in a broadcast style for use in radio newscasts.

The AMARC/IPS project seeks to provide radio stations with a daily 4,000 word service with regional and international news delivered in text form via computers and modems. The news will be specially edited for inclusion in radio newscasts.

In addition while the print media are generally concentrated in major cities, radio is present in smaller towns. Thus, the project also foresees extending IPS's current distribution system to smaller towns using computers and modems. This distribution system will also be available to other specialised news services and organisations wishing to reach radio stations.

AMARC and IPS hope to launch the Spanish-language version of the new service before the end of 1994. English and French versions will follow.

From: thompson@csulb.edu
Message-ID: <2s0ovh$g2u@vixen.cso.uiuc.edu>
Source record: 39837

To any other broadcaster's: To what extremes do you feel a station should go to clear up interference with someone's cordless phone? Here's the situation. Someone called me to complain that they hear our station in their brand new cordless phone. They live less than a quarter mile from our transmitter. The person is very upset with us and expects us to rectify the problem. I already tried suggesting that a better phone be purchased, or one that uses a different frequency. The guy just exchanged his phone for one of the same exact brand and model. He called me back and is demanding a filter to fix the problem. I'm not sure that will work, and I'm not sure that anything exists for cordless phones. He or the manufacturer can't tell me the exact frequency the thing operates on. He wants us to pick up the phone and have it repaired. How do other stations handle this type of situation. We're willing to be a good neighbor, but after a while it seems kind of ridiculous to spend money on a cheaply made consumer device. The guy's old cordless phone worked fine with no interference trouble. Thanks for any comments.

1887. WOWO update 23 May

Newsgroup: rec.radio.broadcasting
Date: 1994-05-26 00:03:06 UTC
From: fybush@world.std.com
Message-ID: <2s0ovq$g47@vixen.cso.uiuc.edu>
Source record: 39842

The latest from the Fort Wayne papers (the Journal-Gazette this time), as we await the FCC's decision:

WOWO news director Curt Miller is leaving the station June 3 for a new job heading up PR for Christian Church Disciples of Christ in Indianapolis. Miller says his departure is unrelated to the pending sale. Miller has been at WOWO since 1987; before that he spent 3 years as ND for crosstown WMEE/WQHK. No replacement has been announced.

The J-G's May 18th front page featured a map prepared by radio engineers Suffa & Cavell in Fairfax, VA, showing a way in which WOWO's pattern could be altered to keep power at 50kw while giving WLIB night power in NYC. WOWO's current pattern is a sort of formless blob whose edges run along Indiana's western edge, through Lake Michigan, across the UP and Ontario, down through Ottawa and Albany, western Long Island, into the Atlantic Ocean, across Jacksonville FL, northern Alabama, Nashville, and western Kentucky (connect the dots on a map and you'll begin to see the picture). The new pattern looks like a shoe, with the heel falling on Ohio, eastern Kentucky, and a small chunk of northeast Tennessee, and the larger part of the sole making a broad circle north of Fort Wayne, actually adding coverage in Chicago, eastern Wisconsin, Michigan's UP, northern Ontario, but then cutting back in again through Buffalo, Erie PA, and Cleveland. The new pattern would require one more tower to be added to WOWO's 3-tower array. It would still cut coverage into New England and to the snowbirds in Florida. It would also cut off Indianapolis and Bloomington, Indiana. We shall see. As always, "any plan would require FCC approval," and I _will_ file a complaint on any action Inner City tries to take should they succeed in buying WOWO.

And Fort Wayne's ABC affiliate, WPTA-21, did a three part series on the 6pm news last week on WOWO. I'm hoping to get a copy of this soon...I'll keep everyone posted.

1888. WTEM 570 Xmtr Move / Problems

Newsgroup: rec.radio.broadcasting
Date: 1994-05-26 00:03:12 UTC
From: Robert Carpenter <rc@itchy.ncsl.nist.gov>
Message-ID: <2s0p00$g4r@vixen.cso.uiuc.edu>
Source record: 39843

I'd wondered why WTEM (ex-WGMS-AM) didn't seem to have started using their new transmitter site, even though it has been complete for well over a year. Neighbors? Coverage? ....?

The answer is contained in today's Washington Post radio column. To quote:
"The folks at all-sports WTEM-AM (570) will have their fingers crossed as engineers test the station's signal from new antenna towers on 65 acres in Germantown this week. All testing will be conducted at off-drive-time hours. General Manager Bennett Zier said he hopes that by moving the signal eight miles northwest, listeners in Fairfax County and parts of Montgomery County will get a "cleaner, clearer signal." And, of course, this will make advertisers happy. Listeners in Southern Maryland, however, are apt to experience difficulty in receiving the station.
"The Germantown site was tested last year, but it reportedly failed to impress station engineers. Zier acknowledged Sunday that the site was "not ready" then. WTEM's transmitter and four antennae currently are located on a 51-acre site off Bell's Mill Road in Potomac. The partnership that owned the station in 1989 sold the prime property for about $28 million to a development company that planned to build more than 200 detached homes and town houses, but the developer later went bankrupt and the station's lease was extended."

My question:
Assuming that WTEM couldn't get city-grade coverage over city-of-license (Bethesda) at night from the new location.... Do many installation engineering jobs fail this badly?

73 from w3otc@amsat.org

1889. The latest from New England

Newsgroup: rec.radio.broadcasting
Date: 1994-05-26 00:23:34 UTC
From: fybush@world.std.com
Message-ID: <2s0q66$hlg@vixen.cso.uiuc.edu>
Source record: 39844

No big surprises here...

After an admittedly poorly-concealed courtship, American Radio Systems (WRKO-680/WHDH-850/WBMX-98.5 Boston) has agreed to buy WCGY-93.7/WCCM-800 Lawrence MA from Curt Gowdy for a reported $12+ million. WCCM will have to be spun off to meet the two-AMs to a market standard. ARS says it's looking for someone in the Lawrence community. As for album-rocker CGY, which uses 50kw from a 131 meter stick in Andover MA (20 miles N of Boston), ARS is saying there won't be much in the way of format changes... at least until they see what Pyramid (WXKS-1430/107.9) does with its now-finalized purchase of CHuRban WJMN-94.5. ARS is promising technical improvements to pump more signal into downtown Boston and the southern suburbs, where the CGY signal is shaky. This is a superb move for ARS, because they just happen to own the other high-powered 93.7 in the neighborhood, WZMX Hartford (21kw at 238 meters). Look for WZMX to issue a waiver to WCGY to cover the new interference 'CGY will cause in the sparsely populated overlap zone in southern Worcester County, Mass, northern Windham County, CT, and far northwestern RI. Right now WZMX is the dominant signal in that area. When and if WCGY can move south (with a change of city of license possible as well), the 93.7 situation will resemble 104.1, where short-spaced WBCN Boston and WYSR Waterbury-Hartford fight back and forth from hilltop to hilltop.

The other sale in the works is WMFP-TV Lawrence/Boston, the very independent Channel 62 that transmits (illegally?) from One Beacon Street in Boston, putting almost no signal over its city of license. Owner and former radio talk host Avi Nelson is selling out, in every sense of the term, to Shop at Home network. No more "interactive" video vaudeville...no more overflow for the NBC shows WBZ-TV declines to carry...no more MSTV public-domain '30s movies. I'm thinking about putting in a license challenge to this one...does Boston need two home-shopping stations? (We already have WHSH-66 Marlboro/Boston, Silver King's HSN2 station). Shop at Home has been seen in this market overnights on WMFP and on WQTV (now WABU) channel 68.

And as for traveling news...I have a bunch of new video available, including almost every NYC transmitter site (thanks Paul Richards for the guided tour of the Meadowlands!), more Southeastern Connecticut (WSUB/WQGN, WCTY, WCNI), etc. etc. The SE CT stations that had not been legal-ID'ing before have improved...I now have audiotape of legals from

WXZR East Lyme, WTYD New London, and WCTY Norwich.

: No, AM is great! It just suffers from bad high frequency response, total
: fading on bridges and underpasses, buzzes and hums from unknown myriad
: causes, lightning crackles and pops, and with C-QUAM, stereo platform
: drift.

Suggested fun activity! Try to DX while driving under a high-voltage power
line.

FM has its problems too. Number one is generation of spurious cross-mod
signals by poorly designed receivers operating in areas of blanketing.
High-power FM transmitters should NOT be placed in the middle of thickly
populated areas. But that's where they get put, often to counteract
cross-mod caused by extant close-in signals.

KC has a couple of examples of C-to-C1 downgrades solely for the purpose of
being able to move the tx within the Jackson County portion of Kansas City
(KCFX at 101.1 and the former KXXR, now waste-of-bandwidth KKCJ at 106.5).
This raises the noise floor even higher than it was before.

: >So why *shouldn't* AM stations compress and limit? It seems to be what
: >the public wants, as evidenced by the FM stations that are successful
: >doing it!!

Higdon didn't write this quote but it bears answering. My experience is
that most people out there don't give three cents about how much processing
their favorite station has. They'll get excited over some half-literate
morning show host or some damn contest or a particular tune, but how many
people really care about sound? Again, this is another example of what
happens when you turn a medium over to the witless PDs and GMs of today.

I just moved to a house and have yet to un-box my radio gear. Since
Thursday afternoon, I have been radio-free. The effect has been
surprisingly cheerful.

Never heard Mr. Muller... I'm out of earshot of the SF market up here in Sacramento. But the "keep him out of jail" comment refers to one of his most infamous stunts a year or so back... when he held up traffic on the Bay Bridge in San Francisco to get a haircut, in a parody of the famous presidential haircut-on-the-runway fiasco.

He's very popular down there, and if he does nearly as well in Chicago, I'm sure the Blaze folks will be happy.

Yes, he just left KSOL where he moved the station up in ratings very fast.
He's done things such as a remote broadcast from a crane hanging outside
the window of a competitor (KMEL). His biggest stunt was tying up the
SF/Oakland Bay Bridge to get a haircut when Bill Clinton allegedly delayed
a flight by getting a haircut. Interviews I've read about him indicate
he's a very nice guy. He left here only because his father is dying and
felt it would be very awkward to come back to SF a few months from now.
KSOL has offered him his job whenever he wants to come back.

1898. WMAX-pt.2

Newsgroup: rec.radio.broadcasting
Date: 1994-05-26 00:23:52 UTC
From: ag365@freenet.buffalo.edu
Message-ID: <2s0q6o$hnq@vixen.cso.uiuc.edu>
Source record: 39754

From Donn Esmonde's column "Adventurous sounds abound,but not soon on local airwaves" from the May 22 Buffalo News,pp.E1,8:

They didn't know what they were missing until they heard it. Unfortunately,they probably won't be hearing it in Buffalo any time soon.
"They" are a few colleagues who spent a week in Atlanta a few months ago. "It" is 99X,the adult alternative album(or Triple A,in FM format lingo)(Donn,for the last time,it's adult *ALBUM* alternative!-CKG)station they listened to while there. By week's end,the consensus of these male boomers:This is a great station,and why haven't I heard this music before?
Triple A is an oasis for the 25-to-45 crowd who are weary of the classic rock desert but can't make the leap to Garth Brooks and Wynonna Judd. It's the place where the worthy-but-largely-unheard heroes of '80s college radio(the Replacements,the Pogues,etc.)and their current artistic college offspring(Cranberries,Lemonheads, Counting Crows,Breeders)have found a commercial radio home. It's a format that-mixed with older boomer favorites-has bloomed in 25 markets nationally the past few years,Rochester among them.(Toronto's CFNY-102 FM-is the locally available equivalent.)(Not so,DE. It's a modern rocker-CKG)
Unless there's someone out there with an adventurous spirit and a spare $4 million,it's probably not coming to Buffalo soon.
The bottom line in FM radio-particularly in a recession-weary market like Buffalo-is money. Advertising dollars are scarse,and it takes time to build an audience for an unfamiliar format. Triple A's new wave simply isn't large enough yet for most station owners to hang 10 on.
As for the possibility of Triple A-minded folks buying an existing station,two words:Forget it.
The going rate for a local FM station is $4 million. Figure annual interest payments and operating costs at $1.3 million annually. Even if the station gets a optismistic 3 share of the area's $30 million radio pie,the numbers don't work.
"Any leap of faith in this day and age is suicidal",said John Casciani,owner of WNUC "New Country"(107.7 FM).
Casciani knows about leaps of faith. His late-'80s foray into New Age/light jazz with the Wave lasted 18 months.(Then came his foray into easy listening,which sank. I ought to tell you about 107.7's history someday..)His 1992 format change to cutting edge country was a safer bet. Country music's popularity is mushrooming and there was already a large audience for the music. In less than two years as country's second fiddle station in town,WNUC has a respectable 2 share(2% of all

listeners at any given time).(Actually,it's 1.7. That's why it,IMHO,
will not-for a long time-make a dent in WYRK's ratings. Also,let's
not forget it's satellite delivered.-CKG)
In large cities,a 2 share means significant advertising dollars.
Here,it means a modest profit with a lean operation.
Rochester's Triple A station(WMAX)is working because of an
unusual set of circumstances. One,the FCC opened up a new frequency,so
obtaining the stations didn't cost millions. Two,WMAX is owned by a
corporation(Cablevision of Auburn)(Try Auburn Cablevision,DE-CKG)willing
to swallow early losses and think long term.
There's no open frequency here,and no similarily inclined owner.
(Disagree on the open freq.part. In Buffalo,Depew,Niagara Falls and
Wethersfield,yes. But,any area-to the best of my knowledge-that does
not have an FM freq. can get one. And that includes most of the area.-
CKG)
After 2 years,WMAX has a 3 share of the audience(2.6-CKG)and is
rated 10th of Rochester's 14 FM stations(actually,all that got at
least 1-CKG).
WMAX GM Alan Bishop admitted,"Any(station owner)in Buffalo who
looks at our numbers,his reaction is going to be,'Nah'. For us,it's
a long term strategy of continued growth."
There is hope,however,for boomer listeners weary of "A Whiter
Shade of Pale". Triple A attracts what's called a "quality" audience-
upscale,college-educated listeners ages 25 to 45. Record companies
are pushing alternative bands like never before. A fledgling Triple A
station has an advertising base in the boutiques and restaurants that
are yuppie havens.
In Buffalo in 1994,it still doesn't add up.
"You need the bigger ad buys,the supermarket chains,the automobile
dealerships,"said Casciani."And those buys are made by people in
Chicago and New York who just look at the (ratings) numbers."(No
argument there,John!-CKG)
Which doesn't mean alternative rock will never make it to the
Niagara Frontier. The better the Triple A stations do in large cities
(N.Y.,Chicago,Boston and San Francisco all have a station),the more
attractive it becomes elsewhere.
That's what happened with the "new country" format Casicani
latched onto. It took off the past few years,with the emergence of
such boomer-attractive acts as Garth Brooks and Alan Jackson.
If alternative rock develops similar stars and gets more exposure,
it could be in the same place in a few years as "new country" is now.
Right now,it's a Catch-22:The potential 25-to-45-year-old audience
for alternative rock in smaller cities is largely unfamiliar with it,and
you can't clamor for what you haven't heard.
What's needed is a station owner with deep pockets and the smarts
to recognize the music's potential niche. Such owners,unfortunately,
aren't plentiful.
"In radio,it's usually whatever is the easiest way to the bottom
line,"said Dave Rahn,a Colorado-based programming consultant."Triple A
isn't a well-known,cookie-cutter format,so owners have to be educated

as to who it appeals to."
Alternative rock radio in Buffalo?
For now and the forseeable future,it's a matter of a car radio
with a long antenna. Long enough to pull in CFNY from Toronto.

-Comments,anyone?

I've long been a fan of RN, which is what I consider the absolute tops in hip radio broadcasting! One example was the 12-parter they did on the EU member countries. RN might well take a page from the BBC's modus operandum and distribute 24 hours by satellite to the Americas. There are lots of stations in the USA and Canada which broadcast BBC in realtime during slower hours, such as overnight. In the SF Bay Area one station does this 5 hours a day, and 6 on weekends. Unfortunately, we don't get too much but Jonathan Marks' "Media Networks" from RN (distributed I think by American Public Radio). I'd like to see a lot more programming from the Netherlands here; after all we've got a lot of your culture and even speak with your accent. :)

> think... not sure...)

Actually Garrison Keillor is distributed by APR (American Public Radio) and produced by Minnesota Public Radio.

Public radio stations may be members of National Public Radio, as well as affiliates of American Public Radio. Or they may be one and not the other, or neither.

National Public Radio is a membership organization. Its member stations pay dues, which go to support NPR programming production. NPR also sometimes distributes programming produced by independant producers. NPR is headquartered in Washington DC.

American Public Radio (which is in the process of renaming itself Public Radio International) is a program distributor. It has never produced programming, although they form partnerships with producers and fund some production. It is headquartered in Mineapolis, MN.

Actually, although I don't have the curves here to look at, I think the real reason the signal is not aimed east any more than it is, is to protect WRHU, Hofstra. They are on 88.7, second adjacent to 89.1. The NCE band in the New York area is pretty full, and the WNYU/WFDU licenses were latecomers. While the rules protected 89.1 for the UN, the allocation rules were changed in the early '60s to become more restrictive, and there were existing operations such as the WRHU license which were not compatible with the full allocated power for the UN slot. The FCC required NYU and FDU to protect the existing operations using the rules in effect at the time NYU and FDU applied, not the rules in effect when the UN allocation was made. This forced the stations to use directional antennas and less power than the UN slot was allocated for.

>> I'm not aware of any other such time sharing arrangement in the US.

>Coll., (WHPC), who are both in Garden City, share the frequency. Except
>WHPC has the Mon-Fri until 4PM, and WBAU has all the other times.

Well, to set the record straight, WSHS didn't burn down. The Sewanhaka school district, the licensee for WSHS, had their budget voted down several years in a row in the 1960's, and one of the things that state law in New York requires when that happens is that all extra-curricular activities are suspended. Also the 1947 equipment was getting a little "tired" in the mid '60 s and would have required a major capital expense to upgrade. WSHS was licensed for 350 watts, from 110 feet. I remember listening to WSHS's last broadcast, in either 1965 or early 1966. It was a basketball game. After this Sewanhaka lost interest in running the station, and it remained "dark". Meanwhile, Adelphi driven by the interest of the students at the existing carrier current station, approached

Sewanhaka about shareing the frequency, and actually reached an agreement to "rent" WSHS's facilities and share time.

This agreement was filed with the FCC in late 1966, together with an application. Shortly afterward, the involved students graduated, Adelphi's administration got wet feet, and the application was withdrawn. Interest grew again in 1968-9, and since WSHS was still dark and their renewal was up in June of 1969, a decision was made by Adelphi to challenge the renewal, which we did. Meanwhile, Nassau Community College approached Sewanhaka and agreed to buy the station for $12,500 (the presumed, and greatly inflated, value of the equipment). Sewanhaka filed the renewal application together with a transfer application from Nassau Community. (actually it was in the name of Nassau College Association, a Non- Profit association set up to run student activities and such at Nassau Community College.)

Adelphi and Nassau, not wanting to be fighting for the license for 20 years, got together and agreed to share the frequency I was at the meeting, and it took less than 20 minutes to split up the hours. Nassau, as a commuter school, was most interested in the daytime hours, and Adelphi was looking for the evening hours. We agreed to split it at 5:00 PM. After a couple of ammendments over the years, currently Adelphi has 5:00 PM until 5:00 AM, except that we have until 9:00 AM on Saturday and Sunday, and we have Saturday afternoon after 1:00 PM. Nassau has the remaining hours.

When we split the hours, we agreed to share the transmitter plant. Nassau had the better site, space on the WLIW TV (NCE TV) tower, which was owned by Nassau County, who runs the Community College. They also had written a clause into an agreement by WLIR to rent space on the WLIW TV tower that WLIR had to provide transmitter space for Nassau in WLIR's transmitter building free of charge. And being further east than Adelphi's site, we could run more power due to reduced interference to WKCR and WFUV, both second adjacent channels.

It took about 6 months to agree on the equipment arrangements, but each school bought part of the plant. Adelphi bought the transmitter, Nassau bought the antenna, transmission line and stereo generator. Nassau paid (off ;-)) Sewhanka the $12,500 (Actually it cost them far more than that, because their agreement with Sewhanakha required them to take down the WSHS tower, AND remove the footing from the ground!!) Adelphi got on the air July 31, 1972. Nassau didn't get on until November, as they had to build studios.

>At one time they shared the same transmitter until WHPC knocked WBAU off.

What happened is typical county politics. The WLIW site, and the Community College are both in Mitchel Field, a former Air Force base, mostly deactivated following the Korean War. The Federal Government gave much of the land to Nassau County, but kept some for itself. The Community College was established in old airbase buildings (WHPC is in the morgue of the old base hospital!). In the mid 1970's the County wanted to build a new campus for the Community College, and the Federal Government wanted to build a new Post Office garage and sorting station. Both owned a lot of broken up parcels on Mitchel Field. So they got together and traded land. Unfortunately for WBAU and WHPC, they gave the land where the WLIW tower was back to the Federal Government, and

that's where the Post Office is now. WLIW moved its transmitter to Plainview, but that was too far east for WBAU/WHPC to operate legally, due to interference to/from WSUB, Stoney Brook. The County kept saying "Don't worry, we'll find you a new site", but they never did. In early November, 1981, we got 2 days notice from the Post Office contractor to get out.

Nassau Community, with the County bureaucracy, was unable to do anything but remove the equipment. WLIR moved to North Shore Towers, where their successor, WDRE still is. Adelphi, not wanting to be off for an extended period, took their transmitter back to the Adelphi campus, borrowed an antenna, got an STA from the FCC, and got back on 3 days later, running 130 watts from the roof of our studio building (the old license was for 390 watts at 157 feet). We offered Nassau permission to join us, but they didn't, for political reasons.

We looked around for a new permanent site, and finally got permission to locate on the Marriott Hotel in Uniondale, where we got 1100 watts, at coincidentally 157 feet. Nassau went their own way. They were off the air completely for about two years, and finally built a new plant on the roof of their new campus administration building, broadcasting 500 watts from close to 200 feet.

Actually, WBAU has only slightly more coverage area than WHPC. Their extra height gets them better into the North Shore where it is hilly. Our coverage extends a little farther into the south shore of Suffolk County. The two coverage contours are very close though, at least on paper.

>Now WBAU has the better signal from it's own plant. But you have to watch
>out. Between the time they got bounced and got their existing tower up WBAU
>was miniscule in power. A 10 watter from Harlem got squeezed into a hole
>just before the FCC stopped issuing the license class.

Actually, the move had nothing to do with that. Neither the old or current WBAU or WHPC coverage receives interference from (on paper) WHCR (Harlem Community Radio, for those who track such things) (licensed to City College of City University of New York) which runs 7 watts erp from a tall building on their campus. Their interference problems were second adjacent, with WFUV and WKCR. WFUV fought them, unsuccesfully, in the FCC. It was hard for us to fight them for interfering with WFUV and WKCR, when, at the same time we were applying for a waiver of interference to the same two stations!

>That station is still there causing all sort of problems for WBAU in upper
>Manhattan and Western Queens, and probably parts of the Bronx.

Yes, but outside of our primary coverage area, where we are unprotected. There are times I've been mighty suspicious they have been using more than their licensed 7 watts, but its very hard to prove, at least enough to get the FCC to look. I've been tempted to attempt to get a "spy" to join their staff ;-).

(The FCC doesn't even bother to act against the Haitian pirate operating very openly on 87.9 (+/-) at about 200 % modulation. That station is even running paid commercials and call-in diccussion shows! They appear to be somewhere in Queens, and must be running 100 watts or so.)

In article <2rrfd2$1va@vixen.cso.uiuc.edu>, richdean@clark.net
(Richard Dean) writes:

I could be wrong about this, but Garrison K's new program IS NPR, not
APR.
His old show, Prarie H.C. *is* APR.

You are wrong, unless you're talking about a program so new that it
hasn't been publicly announced. Keillor is APR's strongest
program--many of their affiliates would not pay their very hefty
annual membership fee if they didn't have to in order to get
Keillor's program.

1904. Re: 1030 TIS...again.

Re: Tis on 1030....again.

David A Kaye, wrote:

"That's because a 1030 was authorized for Sacramento several years ago (I think it's the "town" of Riverbank, which I can't seem to find on a map), but 1030 went bankrupt and it's unlikely anyone is going to put it on the air any time soon. Thus, a proven Class II (if they still have that sort of thing) channel is available within earshot of Sacto. That's my take on it anyhow. Well, *something*'s got to be done with AM -- make it all TIS all the time!"

David is almost right. 1030AM is, was licensed to Folsom, CA.
For a long time they were KHWY (Your Country Hi-way 1030 Stereo) and were in C-Quam. The plug on that was pulled in 1987 and the went to this very interesting Oldies-CHR hybrid called 10Q, under the Calls, KIOQ-AM (BTW, M street lists that those same calls will be back under new owners on the same frequency) It was very wierd, but fun to listen to at times. In late '87, KIOQ announced, on the air, that they needed to do work to their antenna system and would be back on the air within a few months... they did come back about 6 months later as KKSA, Big Bands. That lasted less than a year and they were gone for good. Bud Kress, my radio partner in crime, should know a little more about what is happening right now. He posts occaisionally, and should have more info. (BTW, when 1030 was on the air, they were 50kw-D, 1kw-N, DA with a fantastic daytime signal that blanketed Sacramento, and that you could almost get to Fresno, the night signal you couldn't get in North Sac. they were SOOOOO directional.

Thanks!

: some research on the design of such a circuit.

You can use a shorted quarterwave stub. They work wonders. Get a piece
of coax (or twinlead, depending on what you're using) and cut it to a
little over a 1/4 wavelength, taking the velocity factor of the coax
into consideration. Connect it across the feedline to your antenna.
Short the free ends' conductors, and trim it until the offending station's
signal is at a minimum.

This article is from "The Beacon", the newsletter of the World Association for Christian Communication - Africa Region.

The Catholic Church in Mozambique is going ahead with a proposed community radio station, in preparation for the country's elections of October 1994. The station will be set up in the Archdiocese of Beira and will reach local communities situated within 500 km.

According to Sr. Lucy Rodrigues, coordinator of the Communication dept. of the Pretoria-based Interregional Meeting of Bishops of Southern Africa (IMBISA), people will benefit by participating in the entire process of making radio programmes. Education at all levels will be provided, but first of all political education, to enable people to understand and make their own meaning of democratisation, and encourage responsibility and participation in the running of social and political affairs.

Meanwhile, two FM radio stations have recently come on the air in the Catholic Diocese of Fada N'Gourma and the Archdiocese of Ouagadougou in Burkina faso. The latter broadcasts since October 2 1993, and can be received within a radius of 40 km.

On Monday, May 23, 1994 I was receiving various FM signals from
many parts of the Northern Tier of the US. Attached are the station frequencies
and Names or call letters that I heard. Can someone please identify where
the city of braodcast is for these stations. I was able to receive them
around 7-8 PM CDT anywhere within the North Dallas Suburbs.

Frequency Call Letters Station Name Location
==========
93.3 ?????? Z93 W. MI (Tri Cities Classic ROCK)
93.9 WTVS (TBS?) ???? North Lands ??
95.1 KSKY ???? Black Hills Best Rock
95.7 W(LITE) WLITE West Michigan
96.9 WLAV ???? ????
101.9 WDET ???? ????
102.5 KMGI MAGIC 102.5 Idaho
105.9 WHKQ ???? North Michigan
107.7 ???? Bay 108 Caller from Alpina, MI
==========

The stations at 96.9 and 101.9 were being received just one frequency below
our local stations KEGL 97.1 (100KW ??) and KTXQ 102.1 (100KW ??).
Please post any information you can about these stations.

Thanks,

Best Regards,

8. How to Reach Us: ********** 4

Overview: **********

This is the weekly schedule for West Coast Live, San Francisco's Live Radio Show to the World (actually just public radio).

Anonymous FTP now available: **********

About two hours after I got PROCMAIL able to auto-reply with BULKMAIL, I received a notice that NETCOM was making anonymous FTP available to us. Since many people are still limited to email, I'll continue to announce how to request files via email, but for those of you that are up on FTP, here's the low down;

Machine: ftp.netcom.com
User ID: anonymous
Password: your userid@machine
Directory: /pub/essmjf/wcl

The upcoming schedule: **********

Our producers work overtime booking talent onto the show. Sometimes they're so busy on the phone, they don't have time to keep the rest of us up to date. So join our audience at a live show. You too may be pleasantly surprised.

Every week we'll be calling our Fort Mason neighbor, the World War II liberty ship, the Jeremiah O'Brien on it's trip back to Normandy. If we're lucky, we'll even be able to talk with them.

May 28th: **********

Merl Saunders, Bay Area keyboard legend.

Michael Doucet & Beausoleil, fantastic cajun-zydeco.

Winnie Smith, author "American Daughter Goes to War".

Yellow Wood Junction, original acoustic music.

Anne Lamott, Sam's mom and author of "Operating Instructions".

June 4th: **********

Susan James, singer/songwriter.

Sara Paretsky, author of V.I. Warshawski Murder.

Bonnie Loyd, the Urban Geographer.

June 11th: *** Re-run **********

Our first re-run!

June 18th: *** Re-run **********

A fabulous re-run.

June 25th: **********

Naturalist, Claire Peaslee.

Zekiya Hooker and Oza.

July 2nd: **********

The Declaration of Independence.

Bill Barich, author "California".

Special Offers: **********

Drawing for Free Tickets!: *****

This week marks our 21th West Coast Live show. Be the 21th person to email (see rules, below) the moderator at;

Owner-West_Coast_Live@netcom.com

and you will win two (2) free tickets to this week's live show. Runner-ups are allowed to buy tickets at list price.

Rules: **********

The contest begins each week as soon as the moderator sends this notice to the West Coast Live email subscription list, so code up those PROCMAIL auto-reply recipes.

The winner will be selected based on the time the entry was sent (as opposed to the time the entry was received), no sooner than 1 hour after the moderator receives the minimum number of entries, and no later than 48 hours prior to the live show.

The email must be addressed to;

Owner-West_Coast_Live@netcom.com

The email's header subject must contain the phrase; "Win Ticket Drawing".

One entry per person.

The winner will be notified by email.

If the winner can't attend this week's show, the winner must assign the tickets to a couple of friends.

The moderator's (PROCMAIL's) selection is final.

Free Coffee: **********

Wear an official West Coast Live shirt at the show, and you are entitled to free coffee.

Rules: **********

Official West Coast Live T-shirts or sweat shirts only.

For a limited time, this offer is extended to shirts from that old radio show, that are upgraded with an official West Coast Live Shirt Upgrade Kit.

This offer is good for free coffee only from the West Coast Live java bar. If anyone else offers you free coffee for wearing a West Coast Live shirt, let us know.

T-shirt Drawing: **********

On the last live show of each month, we give away an official West Coast Live T-shirt.

Rules: **********

To enter this drawing, you must drop a business card into our fish bowl. Any scrap of paper with your name, address,

and phone number may be substituted for a business card.

One entry per person. You must be present to enter.

The drawing is held following the last live show of each
month. You need not be present to win.

Tip of the Week: **********

Photo of WCL shirt: **********

If you're intimidated by the Internet, don't bother with
this week's tip.

Send an email message as follows;

To: Owner-West_Coast_Live@netcom.com
Subject: Please Send WCL shirt.gif

and we will auto-reply with a photo of the official West
Coast Live shirt. Actually, you'll get a multi-part
response of an UUENCODEed file, which must be reassembled.
You'll get some assemble instructions, but if you don't know
how to UUDECODE, don't bother with it, or just use Anonymous
FTP. We're always happy to help you find your seat at the
live show.

Downloading Additional Information: ******

You may download an information document giving background
information on the show and the show's Internet service, by
sending the following email message to;

LISTSERV@netcom.com

Message Contents:

INFO West_Coast_Live
END

It may be strange to answer a question about Louisville broadcasting from Quito, but...in answer to a recent request in Airwaves # 628, the call letters for channel 3 in Louisville are WAVE. Paducah is probably outside of the WAVE-TV broadcast signal, but perhaps is carried on cable there, which is why they might carry an ad for a hospital in Paducah. Also, if I remember correctly Kentucky Baptist Hospitals has a hospital in Paducah, and so a mention of it might have been made on a general ad for Baptist Hospital of Louisville. Actually, Paducah is closer to the Evansville market. --Ken MacHarg

KLBJdudman (klbjdudman@aol.com) wrote:

: I get a thrill from tweaking the politically correct NPR crowd...

It's not enough that you have Rush Limbaugh, GGGGordon Liddy, Howard Stern, and the 4 major networks on your side? You have to trash NPR? Methinks you are not secure in your political beliefs if you feel you need to trash one of only 2 bastions of free thought in the USA.

: stimulating, I invite them to do away with public funding and get
: into the Arbitron battle we fight every single day of the year.

In the SF Bay Area, KQED (which IS measured by Arbitron, as are all non-commercial stations in all Arb markets) is #3 in morning drive. I understand KCRW in Santa Monica/LA, and WNYC in New York have similar ratings.

: And as for you Mr. Kaye, I find it insulting that you would make a
: blanket statement that my listeners are nothing but vouyers.

If this is all it takes to insult you, you've got a very thin skin. Perhaps you shouldn't be in radio. I'm told they always need shepherds.

: demographics make up the most educated and the highest income people
: in the market.

As stated in a previous post, you can't HELP but have a college educated audience because Austin is a college town! As far as high income, I would like to see some proof of that. I'd bet that there's a far wealthier audience listening to the local NPR station. What is it, KUT?

: If you know anything about morning radio you know that
: "Stunts" are not market exclusive.

Sure, and stupidity is not exclusive either. Are you proud that you do a lesbian dating game as a way to draw in voyeuristic straight male listeners? You admitted exactly that in a recent post. I should think there are more things in the world to be proud of.

: I've been in the top three of the morning ratings battle in Austin
: for seven years.

Austin is a college town. You could do the same thing with fart jokes and giving away enema bottles as doorprizes. Sorry, but I'd be embarrassed to base my career on crude stunts. I think you've been in radio too long.

: Your post not only lacked knowlege of the business but had
: no basis, as I take it you have never heard my show.

I am 40 years old. I started in the business when I was 15. I have been the #3 talk host in a market 4 times the size of Austin (Portland), and have worked in the SF market (#4) and in Sacramento, both in radio and TV. I know something about the business. And yes, you're quite correct; I have never heard your show. Care to send me a tape?

> What does Carl Hirsch hope to accomplish? Good luck! WKNR is
> right on the money.

I've heard mixed reports about the debut of WHK's sports format,
mostly not very good. However, I wonder if 'KNR is still bleeding
money like they were rumored to be doing a few months ago. The
figures I heard bandied about the market were in the double-digit
millions, and there was speculation that Cablevision et al. wouldn't
finance this forever.

Since I left NE Ohio, though, 'KNR picked up the Browns rights, which
could help them immensely (unless 'ol Belichoke drives the team fully
into the ground).

To the skies we go(celebrating that my cable company FINALLY
got me more channels to watch):

*And now,the latest in the continuing saga of "Where will Don &
Mike land next?" You'll recall that D & M are no longer running on
WWKB-AM,P.O.ed were they that KB chopped off 1 hour of their show to
carry Jay R. and Suzie Gach from New Orleans. Seems they might land
on the air again. Jim Meltzer,GM of WGR and WWWS(both AM),said that
he is discussing with Unistar over getting D & M on 3WS(as it's more
commonly known;it runs a business/talk format,as well as acting as a
dumping ground for sports that WGR can't run due to conflicts). If
D & M expect to get ratings,forget it:the station is only a 1kW'er
and doesn't do well in the ratings-never has,and probably never will.

*WYSL(1030,Avon;news/talk)has dropped its affiliation with
WOKR-TV(ch.13,ABC affil.,Rochester;NewsSource 13)and switched to
WROC-TV(ch.8,CBS affil.;NewsChannel 8)for its weather. Kevin Williams
has done weather forecasts on an irregular basis;ironic considering
he does weather for WHAM-AM/WVOR-FM(1180/100.5)and writes a daily
column for the Rochester Democrat & Chronicle/Times-Union(AM/PM).
John Kucko(sports anchor,WROC)has also joined to do sports during
the 6pm news. (Background:WROC,until 1989,was an NBC affil.,then
switched to CBS when WHEC became an NBC affiliate. Ironically,the
network switch improved WROC's newscasts. Bob Smith at WXXI could
give you more of the details. BTW,my market looks like it'll go
through the same thing:WIVB is itching to jump to NBC(it's currently
with CBS),which would leave WGRZ(the NBCer)with CBS.

*Word is that another non-comm could be in Buffalo in the
forseeable future. The University at Buffalo has made some rumblings
about coming on board at 90.5 FM.(BTW,UB's student radio history has
been erractic,at best. Could a UBer bring us up to speed?)

*WJJL-AM(1440,Niagara Falls;oldies)will start up a new show geared
to local and alternative music starting June 11 at 6pm with the debut of
"Other Side". Paris Roselli,ex-MD at Canisius' carrier current station,was
quoted in today's Gusto section of the Buffalo News as saying that"the
reasonwe're doing this is to play local music",and to that end they'll
play anything-be it rap,country,rock,even the Buffalo Philharmonic
Orchestra. Lisa Murray and Scott Hunt will also host. Tony Violanti
says that it might be a major breakthrough. I hope so,but 1 fact comes
into play:at night,WJJL drops power from 1kW to 55W. For half of the year,
no one in my area will hear it.
Also from Tony:he was very appreciative of WKSE-FM's fine-tuning to
include alternative music in its playlist. Don't get too hepped up,Tony:

it's the "safe" alternative stuff you'd hear on MTV. Do you honestly think that Nirvana's "Rape Me"(an anti-rape song,BTW,as Kurt Cobain noted before he died)and Nine Inch Nails' current song,which mentions that "God is dead and no one cares/If there is a hell,I'll see you there" would ever land on Kiss? As far as "Rape Me" goes,only 97.7 HTZ FM and WBNY have even touched it.

*Can anyone confirm the status of 97.7 HTZ FM's Kristy Knight? I haven't heard her in a month plus;I know she was sick. Could it have someting to do with what she said on the day of Kurt Cobain's death (i.e.dissing a caller who asked what type of gunshell was used)?

*Still on the lookout for bumper stickers-e me offnet.

1919. San Diego Radio

Newsgroup: rec.radio.broadcasting
Date: 1994-06-04 05:11:50 UTC
From: Chris.Carmichael@artecon.com
Message-ID: <2sp2em$aes@vixen.cso.uiuc.edu>
Source record: 39774

Good Day from San Diego:

Peter Weissbach, the program director of KOGO-AM 600, San Diego (5kw, U) has made the first change at the hot-talk outlet. Effective July 1, he is replacing the Michael Reagan show with George Weber. Also canceled is Raoul Lowery Contreras, from 9 p.m. to 11 p.m. Replacing him will be Morton Downey Jr. Overnight, it's still Art Bell, from 11 p.m. to 5 a.m. (Pacific).

Weissbach opened the phone lines on June 2, to see what listners wanted, and it seemed "either you love Michael Reagan, or you hated him." Reagan's show, which is sent from Oceanside, California, had an earlier outlet in San Diego, but cancelled after a short run.

He indicated on the air that KOGO is wanting more local-live talk shows instead of syndicated. Plus, he did not hesitate in saying there were two other stations in the SD area for talk, and three available from Los Angeles.

Weissbach is betting his job. He said that he expects to be fired if this doesn't go through, and the move proves to be a ratings diaster.
Starting at 12-noon, Dave Dawson starts the local-live shows, until 3 p.m. Then, Weissbach takes the microphone until 6, followed by (July 1) by George Weber. That gives the listeners nine hours of local, live talent in San Diego.

Syndicated talk-show host, G. Gordon Liddy, will use the studios of KOGO on July 29.

+
KPBS FM (89.5, 1.7kw) has cancelled Harry Shearer's one-hour "Le Show." North county can pick-up the better programmed KCRW 89.9 FM or KUSC at 91.5.
The Santa Monica-based KCRW airs "Le Show" live at 10 a.m. Saturday. Shearer is best known for his voice-overs on the "Simpsons."

KPBS did pick-up "Mountain Stage," and airs it Saturday from 3 p.m. to 5 p.m.
"E Town" makes its debut from 7 p.m. - 8 p.m. on Saturday.

Thanks!

1922. McKay Dymek AM tuner/antenna

Newsgroup: rec.radio.broadcasting
Date: 1994-06-04 05:12:01 UTC
From: jpatrick@char.vnet.net
Message-ID: <2sp2f1$afb@vixen.cso.uiuc.edu>
Source record: 39777

Very few people know what the McKay-Dymek AM tuner and its companion loop antenna are, and so when I decided to sell this equipment, I thought I would post a short note to this group. The AM3 tuner is solid state, high-fidelity and very sensitive. Its companion antenna, the AM5, is a rotatable ferrite bar antenna. The tuner was advertised my McKay-Dymek as an AM monitor tuner when it was in production in the late 1970s. Please EMAIL me if you are interested. I apologize if this post has gotten anyone's back up.

Thank you

Interesting concept. I think you need to evaluate the national based product.
Coke, Pepsi, GM, IBM, etc. would probably be safe bets. On the other hand, I worked for a station a long time ago that obtained new equipment by swapping commercial time for products (trade out) through a nationwide broker. One of the products was Beneficial Finance Co., which I believe is now defunct. My conclusion was that any station that ran these ads were in the same position. The station I was at was not financially 'healthy', and in fact was sold several years after I moved on to greener pastures. I sometimes wonder if the same phenomenon is happening today. After all, how can an outfit like "Hooked on Phonics" or "Gold Bond Medicated Powder" have the resources for large national buys?

I agree with the author that a "feel" for the success of a station can be judged (in part) by the quality of the spot ads run. But I have noticed that 'junk' commercials, e.g. "hooked on phonics"; "S-O-C-K-S" spots, etc., are showing up with great frequency on such top stations as WJR 760 in Detroit. This type of commercial really hurts the sound of a station.

>like new car dealers. But I wonder when I hear ads for the local tattoo
>parlor late at night. "there's a pool table while you wait".

In my experience, a failing station usually doesn't have any ads at night.
Even from the local tatoo parlor or bail bondsman. However, popular
stations have been able to attract advertisers that would not normally
buy air time by offering what seem to be cut rate deals on overnight
time. Imagine, you run a local tatoo parlor and the the number 1 station
in town tries to sell you some air time. You look at their rates and
say that you can't afford it. Then the salesman hits you with their
special overnight rates. You're sold.

Even the overnight audience of a successful station is going to deliver
more listeners than mornings on at the lowest rated station in town.

But the writer of the previous post does have a point. He asks if it is
possible to judge the health of a station by the advertising.

One might want to listen for number of breaks and how many spots (or
units) per break in the drive times. Keep in mind some formats allow
for more spots than others. And while listening to the spots, watch out
for the typical radio "trades." You know, office furniture, stationery.

Also listen for a variety of advertisers. Good stations attract clients,
both national and local.

A station in my market (Fresno, CA) just filed for bk. I worked at this station
6 years ago when they were at the top of their demos, and the leader in their
format. After leaving the station, I would check in from time to time, to
see how they were doing. Listening to the ads, and the kinds of ads they
aired was an indication of their slide into oblivion.

1929. AudioPrism HiQ 6500 Antenna Mailorder Source

Newsgroup: rec.radio.broadcasting
Date: 1994-06-04 05:12:17 UTC
From: hl1@soc4.acpub.duke.edu
Message-ID: <2sp2fh$afu@vixen.cso.uiuc.edu>
Source record: 39784

Can anyone tell me a mailorder source for the "AudioPrism" brand of FM antennas? I've seen reviews of these antennas in magazines but can not find a place to buy one.

The review in Popular Mechanics some months back said that this tunable folded quarter wave (yes quarter wave) had a very high Q and could help to separate stations in crowded urban areas.

1930. Satellite Radio

Hello from Carlsbad, California:

Searching the great vast Internet, I have found a hypertext server. It covers all aspects of radio, from shortwave, FM, and Mediumwave (AM). For those on Mosaic, it can be reached at http://itre.uncecs.edu/radio/#Radio .

At the URL type in: http://itre.uncecs.edu/misc/satchart for all the audio frequencies for reception via Satellite. It contains such diverse audio-feeds as the "Ostrich/Emu Network (on Galaxy 4, transponder 5); WWL-AM, New Orleans, La.; WFAN-AM, New York; KRLD, Dallas; KOA, Denver, and many more. `
For those without Mosaic or WWW access, I am willing to e-mail you the list, but it is *very* big, and might overwhelm your mailbox.

Thanks!

From: Mark Roberts <transvox@tyrell.net>
Message-ID: <2sp4f7$cs5@vixen.cso.uiuc.edu>
Source record: 39789

A bidding war ensued for the rights to carry Missouri Tigers sports in the Columbia market, home of the University of Missouri.
KFRU (1400) emerged the winner, at the cost of having to pay more than double what it's now paying for the rights to carry Tigers baseball and basketball. It's estimated that the new cost will be around $60,000 per year.
It was rumored that Zimmer Broadcasting, owner of KCLR(FM) and KCMQ(FM), would carry MU football and basketball on one of the country-formatted FM stations, and reactivate KTGR(AM) to carry other Tigers sports, such as baseball and women's basketball. KTGR (1580), a 250-watt daytimer (10-watt PSSA), has been dark for more than one year.
However, the other serious bidder was Brill Media, owner of Jefferson City combo KLIK(AM)-KTXY(FM). Brill also offered FM coverage of Tigers football.
KFRU has carried Tigers football since it moved to Columbia in 1925. One of its former owners, Mahlon Aldridge, was the founder of the Missouri Tigers football and basketball radio networks in the late 40s and early 50s.
Aside from KFRU's heritage as a Tigers station, another factor working in KFRU's favor were concerns expressed by stations in counties adjacent to the Columbia/Boone County market. Those stations regarded KTXY's 100,000-watt signal as competition to their own efforts to sell time for Missouri sports.
Jefferson City coverage of the Tigers will remain on KWOS (1240).
A limited sales marketing agreement with KFRU may be in the works for Tigers sports to be sold in combination on both AM stations. KWOS is owned by KJMO(FM) owner Frank Newell.
****
The owners of Columbia stations KFRU and KARO(FM) have filed an application to buy 80-90 drop-in station KBXR(FM), licensed to Ashland.
KFRU and KARO have been handling sales and marketing functions of KBXR since it went on the air last fall. KBXR's studios have also been located in the KFRU and KARO building.
The present KBXR owners, David Taylor and Patricia Watkins, were formerly managers at Columbia community-access station KOPN(FM). They will retain a small ownership interest in the station and rights to the station's SCS subcarriers.
KBXR programs an adult album alternative format at 106.1 (class C2). KARO (K-102) programs adult contemporary at 101.5 (class C2).
KFRU is a legacy news/talk station at 1400 kHz. No price for the transaction has yet been disclosed.
****
KARO is using one of its SCS subcarriers in an experiment to boost coverage of KFRU.

That's how Al Germond, one of the stations' owners, describes KARO's carriage of KFRU on the FM station's 67 kHz subcarrier. For some time, Germond has been looking for ways of improving the heritage news/talk station's 1,000-watt signal in outlying areas of Boone County. KFRU also recently installed a new transmitter.
****
The owner of Contemporary Media, Michael Rice, is scheduled to go on trial in St. Charles County (Mo.) Circuit Court July 6-8 on eleven felony counts accusing him of sexual misconduct with minors. Allegations of misconduct surfaced more than three years ago, and were extensively reported in St. Louis-area media.
Rice is the original owner of KFMZ(FM), Columbia, and KBMX(FM), Eldon, Mo., as well as the owner of three stations in Terre Haute, Indiana and a construction permit for a station at Huntsville, Mo., near Moberly. Rice's career as a radio station owner began in the late 60s with 5,000-watt rock-and-roll daytimer KIRL (1460) in St. Charles. Rice later sold the station to a group of former St. Louis Cardinals football players, who now program the station fulltime with a black gospel format oriented toward listeners in St. Louis.
****
With the purchase of a GE Superradio capable of SCS reception, I am now capable of exploring this medium in the Kansas City market. Here is what I have heard so far. Telemetry and data services are not included.

KCUR 89.3 reading service (67 kHz), relays 92 kHz SCS of KANU
KKFI 90.1 Radio Cadena Centro, Spanish (67 kHz)
KANU 91.5 reading service (67 & 92 kHz)
Note: Identical program on both; 92 kHz has compressed audio
KCMO 94.9 background music (67 kHz)
KLTH 99.7 Mormon religion (92 kHz)
KLZR 105.9 background music (67 kHz)
KMAJ 107.7 background music (67 & 92 kHz)

All but the KLTH subcarrier are listed in Bruce Elving's FM atlas. I wonder if other Bonneville Broadcasting stations (owned by the Mormon church) are carrying this service.
The KCMO, KLZR, and KMAJ 67 kHz services are identical, probably Muzak. While Elving's atlas lists ABC network programming on KYYS' 67 kHz subcarrier, that subcarrier appears to be silent.
In the Columbia-Jefferson City market, known subcarriers are on KBIA (91.3), KWWR (95.7), KARO (101.5), and (maybe) KTXY (106.9). I will check them out next time I'm over there.
****
As for Kansas City...zzzzzzz. Too many contests and not enough imagination.

WGAY FM 99.5 (Soft AC format) will have a new morning team beginning Monday, May 30. Beverly Fox and David Burd will be the new announcers. Fox resigned from WARW (ARROw 94.7, All Rock & Roll Oldies format) last week after a 13 year stint there to pursue her new position. Burd has been available for the past six months after his surprising release from WASH FM 97.1 (Soft Rock format). Management says the morning show will be music-driven, but will now be personality enhanced. Fox and Burd are replacing Steve Schy who spent the past 2 years at the station. Management is hoping to find another slot for Schy either at WGAY or with one of the other stations the company owns.

WPGC FM 95.5 (Urban format) morning man Donnie Simpson has a new sidekick. He's Chris Paul a comedian well known in the metro Washington, D.C., area. Mr. Paul replaced Michelle Wright who left WPGC to do mornings on WBLS FM in New York. And WPGC has re-hired "Dakota" to work overnights. Last summer Dakota left WPGC for a job in Milwaukee but returns to WPGC to replace Jesse Collins. Collins heads west to Los Angeles for a job at KKBT FM.

As reported on May 25 in REC.RADIO.BROADCASTING and AIRWAVES by Robert Carpenter, WTEM AM 570 (All Sports format) is testing its signal from its new towers located in Germantown, MD. The goal is to improve the stations signal in the metro area where it is a struggle to hear the station, especially at night. Rumor has it that when tests were conducted last year none of the engineers or consultants were at all impressed. Many said the station sounded worse when transmitting from the new towers.

Victoria Jones has been hired by WWRC AM 980 (Talk format) to take Larry King's afternoon slot. Victoria is a native of England and has been in the US for about 8 years. She's had talk shows in Phoenix, Nashville, Detroit and Boston.

WBIG FM 100.3 (Oldies format) has hired WUSA TV channel 9 weatherman Doug Hill to do their morning and afternoon weather.

1935. Re:AM Stereo and Viability

Newsgroup: rec.radio.broadcasting
Date: 1994-06-04 05:46:18 UTC
From: C12019@email.mot.com
Message-ID: <2sp4fa$csd@vixen.cso.uiuc.edu>
Source record: 39791

john@bovine.ati.com (John Higdon) writes:

Unfortunately, inaddition to his abrasive personally, Mr. Kahn was not endowed with the brute force corportate clout of the Mighty Motorola and could not cut the deals to get Delco, the standard setter in auto radios, to even consider his system.

Not necesarly true. The hardware realization and cost of Kahn's receivers may have been impractical at the time Delco was considering an AM stereo system in their radios.

john@bovine.ati.com (John Higdon) writes:

Delco radios have a very annoying "hi-blend" that kicks in at the slightest provocation...<Stuff Deleted>.. Mind you this all happens in those crappy Delco radios and is not an inherent quality of FM transmission at all. The effect dreadful--much like listening to a damaged cassette. This is also why I will never own a Delco radio.

Delco isn't the only FM radio manufacturer that uses the "hi-blend" technique. In fact, I have found that among different models of Chrysler radios(Acustar) they use different types of blending techniques based on listening tests. Some have the performance like you described about your Delco radio. Again the radio designer has to decide which is more dreadful-- listening to a damaged cassette or listening to a scratchy record when the signal strength degrades. It is a real balancing act. I guess the designer of your Delco radio once owned some scratchy records:-))

Comparing AM sound quality to FM sound quality is an apples to oranges comparison. The point I am trying to make is that the technology exists to improve AM/AM stereo sound quality well beyond what we've grown accustomed to hearing

1937. CASSETTE CULTURE:radio programs for social change

Newsgroup: rec.radio.broadcasting
Date: 1994-06-04 05:46:26 UTC
From: cbenjami@uoguelph.ca
Message-ID: <2sp4fi$csq@vixen.cso.uiuc.edu>
Source record: 39792

The purpose of this note is to introduce you to Cassette Culture, an independent radio production group producing radio programs and audio documentation of vital themes in the areas of environment, development and social justice.

CASSETTE CULTURE is an offshoot of CFRU-FM, the not-for-profit campus and community radio station at the University of Guelph. Established as an independent working group in 1990, CASSETTE CULTURE has produced and distributed more than 50 radio programs for broadcast across North America and around the world. Topics have included indigenous land rights, ecological restoration, biotechnology and intellectual property rights, alternative agriculture, gender and development, and the impact of structural adjustment programs in West Africa.

More than 20 campus, community and First Nations radio stations in Canada have aired our programs. CASSETTE CULTURE tapes have also been broadcast on stations in the United States, Ireland, France, Italy, as well as on the Radio for Peace International short-wave service broadcasting from Costa Rica.

CASSETTE CULTURE programs have also proven valuable to a wide range of community groups and organizations. We are particularly proud of the fact that one of our programs, a profile of Blackfoot leader Milton Born-with-a-Tooth has been translated into Cree for broadcast in Northern Ontario and Quebec. Parts of this same interview have also been excerpted for inclusion in a new documentary by the International Rivers Network.

The CASSETTE CULTURE catalogue is updated as new programs are produced. To receive future editions of this catalogue, please contact CASSETTE CULTURE c/o CFRU-FM, Level 2, University Centre, University of Guelph, Guelph, Ontario, N1G 2W1, (519) 824-4120, ext. 8341, EMAIL: cfru@web.apc.org

Two excerpts from our catalogue follow below:

THE SEED SATYAGRAHA 9/21/93
Since October 1992, hundreds of thousands of Indian farmers have taken part in mass demonstrations against the General Agreement on Trade and Tariffs (GATT) and against the transnational
taken part in mass demonstrations against the General Agreement on Trade and Tariffs (GATT) and against the transnational
agri-business corporations that stand to profit from the new provisions for intellectual property rights. To defend their right to grow, breed and exchange crops outside the control of the transnationals, Indian farmers are reviving forms of struggle and protest dating back to the anti-colonial movement. The world's largest grain trader, Cargill, has been a particular target. Cindy

Duffy speaks with activist and scientist Vandana Shiva about the significance of the "seed satyagraha" and the potential for asserting community control over seed stocks. Runs 29:55 with intro and extro.

HEALING THE FOREST, HEALING ITS PEOPLE 8/13/92
Dennis Rogers-Martinez has worked for more than 20 years in range and forest restoration. Since 1988 he has worked with the Intertribal Sinkyone Wilderness Council in northern Californian on a project to restore and reclaim a watershed devastated by logging. In this interview, he talks about the traditional systems of indigenous land stewardship and the restoration model being developed at Sinkyone. Runs 29:45 with intro and extro.

1938. wanted: computer controlled broadcast band receiver

Newsgroup: rec.radio.broadcasting
Date: 1994-06-04 05:46:27 UTC
From: hunter@work.nlm.nih.gov
Message-ID: <2sp4fj$csr@vixen.cso.uiuc.edu>
Source record: 39793
Cross-posted to: rec.radio.broadcasting,rec.radio.scanner

I have an application which requires the remote monitoring of a variety of broadcast stations. I basically need a moderately high fidelity broadcast band radio (AM/FM, US station spacing) that can be computer controlled. That is, I need to be able to turn the radio on and off, and set the reception frequency by PC. I also need a line-level audio output. I will probably be buying between 50 and 100 of these, so price is somewhat of an issue.

I have a couple of questions:

1. Are there "tuner" cards that fit into a PC chasis? What is their performance like in the rf environment inside a computer? Does anyone have any specific experience with them?

2. I am aware of the Kenwood RZ-1, which seems like overkill for this application. Does anyone know of any other radios that both tune the broadcast bands and have a serial port control?

Any other advice or input is welcome. Thanks!

Larry

From: g91l4576@warthog.ru.ac.za
Message-ID: <2sp4fr$ct2@vixen.cso.uiuc.edu>
Source record: 39796

I need help from people around the world for a mini-thesis I'm writing on the development of independent radio in South Africa using one radio station as an example.

My essay will touch on models of broadcasting around the world, particularly in the US and UK. Even more specifically I would like to know how campus/college stations around the world are licenced and how they run. I'm interested in programming considerations, how the community accesses and reacts to campus stations and so on. Any information whatsoever would be much appreciated.

Responses can either be posted to this group or e-mailed to me directly. My address is: G91L4576@warthog.ru.ac.za I'll acknowledge all contributions in my essay.

For those who are interested in the new legislation that's operating in South Africa and the model that is being formed around it I would be happy to fill you in by e-mail or posting to this group. If you are REALLY interested and would like a copy of my completed essay I could let you have that with pleasure. The situation here is very exciting as for the first time control of the airwaves has been taken away from the government and handed to the people, its all very new and I'm interested in how things are being handled around the world.

Thanks.

1942. Fax - Phone List?

Newsgroup: rec.radio.broadcasting

From: gencmm@noctrl.edu
Message-ID: <2sp4ft$ct4@vixen.cso.uiuc.edu>
Source record: 39797

Is there a phone list available similar to the fax list?

Chad Mitchell - WONC

[Moderator's Note: We have such a list, but it is several months old.
Below is the informational text on how to receive it. Bill]

**** Begin quoted textfile ****

A poster has sent in three 900 line files consisting of media fax
numbers. They are too big to realistically post to the entire world,
so they are being added directly to the FTP and GOPHER archives for
AIRWAVES RADIO JOURNAL, which as most of you know is the email digest
reflector for rec.radio.broadcasting.

To access the archives via FTP...

ftp radio.aiss.uiuc.edu /misc/rec.radio.b-cast/FAX

They, like the rest of the archive, are in compressed form and must be
transfered using FTP's binary mode. (Type binary at the ftp prompt).

To use gopher, ...

gopher radio.aiss.uiuc.edu 7070

Then follow the prompts. Use ? for help in gopher.

To get them via email, send mail to rrb@radio.aiss.uiuc.edu with ...

Subject: FAXDIR-1 -- -- (for letters A-H)
Subject: FAXDIR-2 -- -- (for letters I-M)
Subject: FAXDIR-3 -- -- (for letters N-Y) <No 'Z' lists>

NOTE: ONE FILE REQUEST PER LETTER PLEASE. If you want them all you
must send three letters. YOU MUST PLACE THE ABOVE IN THE SUBJECT OF
YOUR EMAIL.

You should get them back in return mail.

Also note that I make no claims as to the accuracy of these lists.

1943. Wireless Phones & Broadcasters

Newsgroup: rec.radio.broadcasting
Date: 1994-06-04 05:46:38 UTC
From: Robert Carpenter <rc@itchy.ncsl.nist.gov>
Message-ID: <2sp4fu$ctb@vixen.cso.uiuc.edu>
Source record: 39798

The recnt question about filters for wireless phones prompts this posting.

1) Have the complainer READ the notice on the bottom of the phone. It says that (s)he must accept any interference that occurs.

2) The FCC recently published the results of a survey they did of dozens of cases of wireless phone interference from various sources. To paraphrase, they found that available filters didn't help in the majority of cases. They also found that THEIR well-filtered/shielded phone suffered interference in only one or two situations. I think their conclusion was that the manufact-ures should do better.

3) My own guess is that you won't have much luck in filtering, etc.

4) Wireless phones - current models - operate on 46 and 49 MHz.

5) THIS POSTING DOES NOT REPRESENT ANY OFFICIAL VIEWS ON THIS SUBJECT.

Good luck, Bob w3otc@amsat.org
(pardon spelling error on 'manufacturers', above.

British, American, French and Russian forces will have left Berlin in the next month or so. Does anyone know what will happen to the Forces' Broadcasting facilities? Radio FFB (Forces Francaise de Berlin) was more or less a straight relay of RFI ParIs, but BFBS (British Forces Broadcasting Service) and AFN had local studios. I gather though, that latterly they had more listeners amongst the English-speaking expat civilian population than the military.

1950. Subcarriers -- updated and corrected

Newsgroup: rec.radio.broadcasting
Date: 1994-06-04 05:46:55 UTC
From: Mark Roberts <transvox@tyrell.net>
Message-ID: <2sp4gf$cut@vixen.cso.uiuc.edu>
Source record: 39705

In a previous post, I mentioned that KYYS (102.1) did not seem to have a 67 kHz subcarrier, contradicting information listed in Bruce Elving's FM Atlas.

It turns out we are both right, sort of. KYYS *does* turn on its subcarrier during Kansas City Royals baseball games to relay the AM signal of co-owned WDAF. It sounds like a direct feed and not IFB.

The subcarrier may, in fact, stay on during home stands of the Royals. The relay was still on at 9 o'clock Saturday morning (May 28), relaying WDAF's wonderful "Saturday Morning Memories" country oldies show.

In addition, I have gritted my teeth to listen to the religion programming on the 92 kHz subcarrier of KLTH (99.7), and have been rewarded with more information.

The service is called "The Bonneville International LDS Radio Network," and appears to originate from Salt Lake City. Aside from Mormon religious sermons and music, it relays the audio of newscasts from CBS affiliate KSL-TV. The station refers to its reporters as "news specialists!"

I would imagine the service is relayed on other FM stations owned by Bonneville Broadcasting, which is owned by the Latter-Day Saints (Mormon) Church.

One more correction: KMAJ Topeka does *not* relay the same background music service as KLZR and KCMO-FM.

Here is the updated list of subcarriers with program material in the Kansas City and Topeka markets, as available on my finger:

KCUR 89.3 reading service (67 kHz), relays 92 kHz SCS of KANU
KKFI 90.1 Radio Cadena Centro, Spanish (67 kHz)
KANU 91.5 reading service (67 & 92 kHz)
Note: Identical program on both; 92 kHz has compressed audio
KCMO 94.9 background music (67 kHz) (same service as KLZR)
KLTH 99.7 Bonneville Int'l LDS Network (Mormon gospel) (92 kHz)
KYYS 102.1 relay of WDAF(AM) (67 kHz, only during and near Royals games)
KLZR 105.9 background music (67 kHz) (same service as KCMO-FM)
KMAJ 107.7 background music (67 & 92 kHz)

1951. UK FM allocations

Newsgroup: rec.radio.broadcasting
Date: 1994-06-04 05:47:02 UTC
From: Richard Hunt <rhunt@cix.compulink.co.uk>
Message-ID: <2sp4gm$cv2@vixen.cso.uiuc.edu>
Source record: 39706

In the UK as int the US, FM radio is in Band II - that is, 87.5 - 108.0 MHz. BBC Radio has four national networks in England which are carried on FM, and these give about 98 percent coverage. In Wales there are two extra networks, Radio Wales and Radio Cymru (Welsh-language), in Ulster also Radio Ulster and in Scotland, Radio Scotland. The national networks use distinct sub-bands for their high power transmitters. 1FM uses 98-99.5 MHz, Radio 2 uses 88-91MHz, Radio 3 uses 91-93MHz and Radio 4 uses 93-94.5MHZ. BBC Local radio is clustered from 95-96MHz and 103-104.5MHz. Classic FM, national commercial classical music radio, has a network of high power transmitters between 100.5-102MHz. Commercial FM is bunched between 96-98MHz and 102-105MHz. The BBC National networks and Classic FM transmitters are co-sited and have powers up to 300kW. The spacing is worked out so that stations do not interfere with each other, with a minimum spacing of 0.3MHz where they are adjacent. The government department responsible for frequency allocation is the Department of Trade and Industry. Anyone wanting more specific information should refer to the UK radio section of the World Radio TV Handbook.

1952. San Diego County Report

Newsgroup: rec.radio.broadcasting
Date: 1994-06-04 06:14:58 UTC
From: Chris.Carmichael@artecon.com
Message-ID: <2sp652$joc@vixen.cso.uiuc.edu>
Source record: 39707

Hello from southern California:

The sprint on "who is going to carry the San Diego Padres" is starting to sizzle. KFMB-AM, 760 (50kw, U, DA2-N) has had the honor for the past 17-years. But, the seventh inning stretch is almost over, and XETRA-AM, Tijuna, B.C. Mexico (690, 50kw, U), and newly re-vamped KOGO (AM 600, 5kw, U) are coming up to bat.

XETRA has a big bat, and big bucks. John Lynch, the CEO of Noble Broadcasting, the parent company of the Mexico-based broadcaster, wants the Padres. The sports-station bid several millions more than KFMB, but the owners of the baseball club at the time, Joan Kroc and company, had strong ties to the San Diego station.

Spoiler KOGO was once the Padres' flagship station. The station is property of one of the Gang of 15. Leon Parma is a minority owner of the fledging baseball team.

KFMB AM/FM/TV is in the middle of an internal and financial struggle. I have reported in the past two months of air personalities being let go, most notable, long-time GM Paul Palmer.

One thing against Sports 690 is that the on air announcers frequently bash the Padres; and that doesn't sit well with them. This year hasn't been too kind for the Padres, just coming off a thirteen-game, record setting losing streak. And Jack Murphy stadium has a lot of seats with no fans.

What I think will happen: After 17-years as the flagship station, KFMB will lose the Padres to XETRA-AM. It'll be an un-easy marriage; but the Padres need the money, and XETRA wants a professional baseball team. (I'll reserve editorial comment on the words: SD professional baseball team) KFMB will then pick up the SD State football and basketball. KOGO will be left with the San Diego Gulls hockey, and wait until next time the baseball contract comes up. But don't count KOGO out, they have made several in roads with the hot-talk format.

In other news: XETRA has put together a 16-station network for UCLA football and basketball. 690 will be the flagship station, and KRLA, 1110 AM will be the LA affiliate.

The L.A. Kings will sign a three-year extension with XETRA for broadcast rights.

Wasted Air Space. KGMG-AM 1320, Oceanside (9.5kw D) will start to broadcast KKLQ-FM (106.5, 7.4 kw) by June 15. Q-106 was previously on KKLQ-AM, which is now KOGO. KGMG currently plays nostaglia radio.

I am a lisenced ham and have played a bit with antennas and also worked in TV broadcast, regarding your problem, I have heard of simaler situations where there is more than 1 tv station on a channel , say in a rather remote area, hwawhat can perhaps be done is setup an arangment using 2 yagis such that the space between then is half the wavelength of the frequency you want to cancel and both of them pointed towards the desired station.
This would work well if the direction of the 2 stations happens to be different.
90 degrees between them is ideal, meaning 1 station may be to the north and the other to the west, in this case the offending station would be to the side of your array and the desired station you would point towards. The spacing between the 2 antennas wou
ld be a mulitiple of a 1/2 wavelenth. Or you could get cable!

1956. Channel assigns/Ireland

Newsgroup: rec.radio.broadcasting
Date: 1994-06-04 06:15:07 UTC
From: rah10@amail.amdahl.com
Message-ID: <2sp65b$jpj@vixen.cso.uiuc.edu>
Source record: 39711

Just a note on channel assignments in Ireland/Europe .
Our maximum deviation in FM is 75 kHz as opposed to 50 kHz in US.
So within any given service area there must be 300 kHz spacing between transmitters
Generally there will be a lot more . In the Dublin area the frequencies of
transmission of nationwide programs/stations are 600 kHz appart for the two
transmission sites serving the Greater Dublin area . However between stations
the frequency separation at any one site is 2.2 MHz . This means that we can end up
with a station on the East Coast on 103.8 , one in the Midlands on 103.9 and one in
the Southwest Coast on 103.7 ! I believe the same applies in the UK .
Rule of thumb we don't tune radios by channel no. on this continent .

: phones. He or the manufacturer can't tell me the exact frequency the
: thing operates on.

It's not the frequency but that he's 1/4 mile from your xmtr. It's his poor shielding. How far should you go? Tell him that's what the problem is, offer a list of parts for a filter, then tell him to call the FCC if he has further questions. In SF they have a voicemail message suggesting how people can get radio stations out of their phones and such. It's one thing to be a good neighbor and offer a solution, but it's quite another for him to be unreasonable about it.

From: tah@uclink.berkeley.edu
Message-ID: <2sp65d$jpo@vixen.cso.uiuc.edu>
Source record: 39713

Hi, I've posted this query to a few of the rec.radio.* newsgroups, and I was told that this is the most appropriate place for it.

I am trying to start a community station in rural Vermont, and I need to find a cheap way to remain within the FCCs guidelines. I do not a have a few thousand dollars to spend on a pre-built transmitter, or to have my homebrew properly tested by the boys in blue, so I would like to find a used transmitter either for cheap or as a donation (tax-deductible :). Please e-mail any suggestions/sources or offers. I've been told that I need 100W, but I think that a 20W with a good antenna will work fine.

Thanks
Andy Hooper

I don't think that it is fair to say that national spots indicate strong ratings and /or high advertising rates. I worked for a while at two stations (simultaneously, one on weekends, one during the week in a different market), both of which carried national spots. One had a strong sales force and lots of local spots, along with a rotton news network the PD would not let touch the airwaves. Our national spots were make-goods for the network.

The other station had little or no support from the community; it was starting up from a format change (light AC to modern country), and the only spots you heard were national ones from ABC news and Paul Harvey, and spots landed in trade for promotions.

Overnights are often viewed as throw-aways, but some sales managers see the value in pushing overnights to convenience stores, 24-hour gas station, and the like. Lower rates may have been a lure, but many business owners really saw the impact of overnight advertising.

Jus' my two cents.

Best,
Alan

1960. WBAL, WHP, WBZ info?

Carl K. Gorney (ag365@freenet.buffalo.edu) wrote:

<final words were:>
: -Comments,anyone?

Of course, anywhere in my vicinity, those are dangerous words regarding this topic! ;-) Though I have posted several articles about this topic and the Kansas City (and other Missouri) markets in the past, I will once again run the risk of beating a pre-beaten horse when it comes to alternative rock formats.

: Triple A is an oasis for the 25-to-45 crowd who are weary of the
: classic rock desert but can't make the leap to Garth Brooks and
: Wynonna Judd.

Or who would like to hear something *new*. What would it be like if an all-news station ran nothing but 20-year-old stories? That's the state of classic rock and AOR today. It is stale, dull, and turgid.

: "Any leap of faith in this day and age is suicidal",said John
: Casciani,owner of WNUC "New Country"(107.7 FM).

As is being stuck in a rut.

: There is hope,however,for boomer listeners weary of "A Whiter
: Shade of Pale". Triple A attracts what's called a "quality" audience-
: upscale,college-educated listeners ages 25 to 45. Record companies
: are pushing alternative bands like never before. A fledgling Triple A
: station has an advertising base in the boutiques and restaurants that
: are yuppie havens.
: In Buffalo in 1994,it still doesn't add up.

Nor in Kansas City. It's because the idiots at the ad agencies don't understand radio and how it should be bought. You can only do so much business with used-record boutiques, sellers of Doc Martens, and futon stores, and make a profit. The agencies are key.

Still, KLZR in Lawrence (Ks.) manages to sell time to at least some Kansas City businesses, despite a signal that is spotty, and despite little or no presence in the ARB.

: Right now,it's a Catch-22:The potential 25-to-45-year-old audience
: for alternative rock in smaller cities is largely unfamiliar with it,and
: you can't clamor for what you haven't heard.
: What's needed is a station owner with deep pockets and the smarts
: to recognize the music's potential niche. Such owners,unfortunately,
: aren't plentiful.

Likewise in this corner of the Central Time Zone.

: -Comments,anyone?

Somehow, people here *are* finding out about this stuff. Best Buy is even carrying imports now. Maybe they're picking it up on their toasters. And, of course, some people *can* hear KLZR. Of late, however, KLZR seems to have turned into merely an updated version of AOR. It should be noted that KLZR originally began positioning itself as a modern-rock station, not an AAA station.

Our local community-access station, KKFI, has been a poor supporter of alternative music. At one time, it tried to banish the genre to post-midnight periods. At the start of 1992, it shifted all the alternative rock programs around, causing a couple of excellent programmers to quit in the process. For a station trying to broaden the menu of choices available to the Kansas City audience, KKFI has been simply incompetent.

The closest thing to an alternative format that we had
was a nightly five-hour program called "Planet Q"
on KBEQ from late 1991 to August 1992. It was well done, albeit a bit conservative and thin on stuff you could dance to. Yet the station did not promote it, started it at an odd time (8 pm), and gradually cut back the time slot. Failure was guaranteed. And, of course, KBEQ is now "Young Country 104" doing battle with KFKF.

Many of us had high hopes for KLZR, but it has proved disappointing. Too many guitars. Too much reliance on a playlist based off MTV. Although the station *does* play music by local bands, many of those bands have been caught up in the regionally hyped Lawrence "scene" and the result is a certain amount of auditory pretense and sameness. And, again, nothing you can dance to occasionally. KITS (San Francisco) it's not. Much less KPNT (St. Louis).

AAA has been beyond the pale. Stations here seem to ensure success by making sure they *don't* play anything that wasn't around when President Ford was banging his head on helicopter doors. KCFX has *not* credited its carriage of Chiefs football for its recent success, for instance. It's credited its pruned-down playlist that's focused on AOR artists of the late 60s and early 70s.

And then take KYYS. Please.

I don't know what I can do about this, other than turn my radio off and listen to CDs and try to keep up the best I can, much like my rural ancestors who got their newspapers in the mail.

If a Kansas City advertiser wants to reach me, it won't be on the radio.

I should have issued a soapbox warning. Sorry, Carl!

I was in Atlanta when Power 99 switched to 99x, and having grown
tired of not finding the music that I personally enjoy
on the radio, hearing them play selections from what seemed to be a duplicate
of my CD collection was a welcome change.

At first, they had trouble getting advertisers, it does not seemd as if 99x
is having trouble now: their name is everywhere, I hear more people
talking about them or listening to them than I noticed before their switch.
For them, it was a good idea to change IMHO.

No, stupid (I take the liberty of calling you stupid because you posted wrong information while calling FDU a shit-ass colllege; it is a University and not a shit ass one either).

Here's the correct information: WNYU (New York University) and WFDU (Fairleigh Dickinson University, Teaneck-Hackensack campus) share 89.1

WNYU is on the air 1600-0100 M-F WFDU is on 0115-1545 M-f and all day/night weekends There is a 15 minute silence in between these periods. WNYU consistently violates these silent periods while WFDU does not.

WRSU is on 88.7 from Rutgers University in New Brunswick and therefore not subject to sharing time with stations on 89.1 If you have information on KBLA, KAJZ, or KCRW then you can go ahead and state things like an expert.

I produce a very popular show for an Italian station in Milan and I'm interested in doing a similar show (but in my native English). The thought of
syndication appeals to me and I'm wondering what the reservations would be from a US station. What format is needed? Is there resistance to receiving a show not from a big operation like Westwood One? My idea would be to have a half hour show. Is this unrealistic. Any thoughts from you domestic pros would be appreciated.

1030 in Sacramento pre-dates my arrival here (I just got here March 7th), but I recall reading Dan Vierria in the Bee musing over the possible restart of it, with a possible talk format. (Gee, just what we need in Sacto, a *5th* talk station. ;)

I dunno if Dan was just whistling Dixie, or if there is really someone ready to bring 1030 up...let alone cast it into a saturated format sea.

Some stuff better left unused...:

*Now,the latest episode in that turgid drama,"Where will Don & Mike land next?" Washington,D.C.'s duo called News radio/TV reporter Alan Pergament to say that they will be back on in the Queen City sometime in June(probably Monday). Among the stations bidding:WHTT-AM and WWWS-AM (1400,business/talk;3WS/Your Money 1400). Perg stated that both KB and D & M jumped the gun:KB for not sticking with the show(even though the latest Arbitrends said that the show only had a share in the 2's-good for 14th)and bringing in J.R. and Suzie Gach-via satellite;D & M for not having patience to see if the Gaches would last. Prediction:D & M will land on 3WS-for one major reason:3WS is a full-time station,WHTT-AM is a daytimer only.

*I can confirm that one show is coming to 3WS. David Lawrence wired me to say that his show "Online Tonight" will debut this Sunday(6/5) at 8 pm. I'll be heading home from Jim Kelly's Stargaze(a benefit to raise funds for children's charities,which will have media sumo wrestling, among other things)and I'll check it out. Memo to DL:how about using Stewart Copeland's theme from "The Equalizer" as an underbed? (Check his album "The Equalizer and Other Cliff-Hangers".)

*Rochester Red Wings radio voice Josh Lewin is now hosting Red Wings Magazine on the Empire Sports Network. The show debuted last night,and it wasn't bad. It'll air every other week.

*Speaking of Rochester,congratulations to Pete Dobrovitz,news director of Greater Rochester Cablevision's CNN clone,R News,for winning a Cable Ace award for local programming. Dobrovitz,a former reporter for WROC and WHEC,also does an eclectic show on WJZR-FM(105.9,jazz/rock/inst.; North Coast Radio)Sundays from 9pm-mid. with local musicians stopping by.

*The WGRF morning team of Norton & Stout called the Bisons game with Nashville last Friday(5/27). I didn't listen to too much,because I was flipping to the Arena Football game between Charlotte and Miami on ESPN2; but what I did hear wasn't good. The humor-or attempts at same-bit,including a lame Top 5 list of who'd be a better choice to do the game(how about Pete Weber or Darrian Chapman?).

>NEVER make a joke about the whole situation by saying, "Well, the station must
>be for sale."

Another in the great tradition of radio war stories. Let me add my own
from Friday (6/3):

Never complain on the air that the newsroom system ate your newscast 30
seconds before airtime thanks to a bug in Novell Netware Lite v. 1.1,
particularly if you serve the market that is headquarters to Novell and a
lot of their tech support guys listen to you. You'll spend the rest of
the day fielding two kinds of phone calls: Guys who know about the
problem but are mad at you for slamming their employer or management
types who ooze sincerity and are ready to solve "any problem you might
have," in spite of the fact that for most customers only the first 30
days of tech support is free and if you want more, you're welcome to pay
for it. Bottom line: I'm redfaced and I'm getting more response from
Novell than I ever wanted.

In this case, management could care less -- Novell doesn't advertise on
radio, and most of them are technophobes anyway.

Somehow I just don't feel like driving through Provo this weekend...

As a Canadian, I am not totally familiar with FCC regulations, particularly recently, but is it not true that the Part 15 section on personal low powered radio transmitters speaks to this situation?

If I recall, and I may be wrong here, Part 15 devices cannot cause interference to other devices and, more importantly, they have to accept ANY interference caused by other devices without recourse.

I think it is worded something like that. If I am wrong or it has changed then I apologize. I wish you good luck!

20 years in this business has taught me that:

A. Everybody trades. Bigger stations trade for better stuff.
B. Stations with aggressive sales management don't let avails
go unsold. They'll make special deals for low-budget
advertisers or plug in per-inquiry ads (Call 1-800-BUY-STUF)
to fill those holes late at night. So you might hear
the squirreliest ads on the station making the most money.
C. National agency buys for big-time clients are made by 24-year-
old media buyers fresh out of college who normally haven't
even visited the cities where they're buying radio.
D. Many local advertisers have the best feel for the power of
radio and they've done very well for themselves by staying
with consistent ad schedules on a number of stations in the
markets they serve. If you hear a lot of those local car
dealer/furniture store/supermarket chain spots on a station,
that's a much better gauge of its market position than
national agency buys.

God bless the clients who stick with us -- and there's nothing in
the world that feels better than topping your sales goal for the
month the first week in!

Dan Bammes

Hmmm. I'll bet the $500k/yr that he's being offered in Chicago (vs. $80k
in SF) has something to do with it, too.

I worked with this guy for a year or so at KDON in Salinas, Ca., where he
worked prior to KSOL (now KYLD). He is indeed a very nice person, as well
as *exteremely* talented and very dedicated to his craft. I find his on-
air persona a little grating & occasionally annoying, but I've never met
anyone in this business who puts more hard work into what he does on the
air.

As far as KYLD taking him back, I doubt it. He's accepted a gig with the
parent company of KYLD's biggest competitor (KMEL) - a move sure to hurt
KYLD's standing in the ratings. These sorts of things tend to be remembered.

1978. RE: MANCOW MULLER

Newsgroup: rec.radio.broadcasting
Date: 1994-06-04 17:37:42 UTC
From: sophia_ruiz@maillink.berkeley.edu
Message-ID: <2sqe56$39f@vixen.cso.uiuc.edu>
Source record: 39725

[In response to Matthew Kanzer's inquiry about Mancow Muller.]

I live the the San Francisco Bay Area and have listened the Mancow on Wild 107 for a year and a half. He is, without a doubt, the most talented radio personality to come along in a while. Now that he's in Chicago, there is no one else to listen to in the mornings. It's quite depressing; he made getting up and going to work enjoyable. Someone else mentioned that the stunt that made him most (in)famous was the stopping of traffic on the San Francisco Bay Bridge while he got a haircut. How true. Although I had listened to him before that event, I know many people who began listening to him BECAUSE of it. He's got a knack for attracting attention. I know The Blaze and the Chicago audience will not be disappointed. He has an enviable amount of charisma, is extremely quick- witted, finds humor that EVERYONE can relate to...what more can I say? We loved him in Northern California. And he will be missed terribly. Our loss, Chicago's gain.

As for his similarity to Howard Stern, I don't think people's guesses could be further from the truth. Although Stern has garnered a large audience, he also has managed to turn off millions with his sexist, racist, and basically, offensive speech. Is it an act? Probably. It's quite possible that he's a nice guy in real life--nothing like his radio personality. But the truth is, his techniques are old and cop-outs. It takes absolutely no creativity to be sexist or racist. Hell, anyone could do it. A bigger talent is required to appeal to all walks of life. Mancow Muller is capable of this, and has proven it, time and time again in San Francisco. He'll do it all over again in Chicago. When The Blaze catapults from the gutter into the Top Five (at least), don't be surprised, it'll be because of "The Man Who Would Be Cow" Mancow Muller. Watch out! Here he comes!!

GOOD LUCK IN THE WINDY CITY, MANCOW!

Oh, not to mention that he was frozen in a block of ice at a local car
dealer to break a "world" record or something like that...was a real
strange type of promotion to do, but he did it. He is a nice guy. When I
was driving for my job, I longed for a decent morning show and I wasn't
up to Alex Bennett on Live 105 <KITS> and Mancow seemed to fit the bill
nicely...BTW, it's Wild 107 now. <KYLD>, KSOL lives *on* at 98.9 :)

PERU: Three journalists sentenced for defamation

Originator: Federacion Internacional de Periodistas (OFIP, Lima)

The journalists Guido Falcon Nivin, Wilfredo Mendoza Flores, and Rony Flor Coayla were sentenced on 18 May 1994 to six months in prison each for defamation of government employee Guillermo Meza Beteta.

The three journalists had reported in the weekly paper "Moquegua al Dia" and on the radio station "Mineria" on the complaint filed by Luis Siveroni Morales against Guillermo Meza Beteta, accusing him of tax fraud, corruption and extortion in his capacity as Manager of the Moquegua sanitation services.

The journalists reported on the case in an objective and truthful way. They also accused Guillermo Meza Beteta of trying to silence them by paying $5,000 (U.S.) to the owner of "Mineria" radio.

In his ruling the judge also prohibited the journalists from reporting on this alleged case of corruption.

The Federacion Internacional de Periodistas (OFIP) has received legal opinions that the trial was flawed in its procedures and that the judge has violated the right to press freedom. OFIP also notes that there has been a flurry of charges against journalists by government officials in recent months in similar cases where journalists have reported on alleged cases of corruption.

RECOMMENDED ACTION:
Please write Peruvian authorities asking for a judicial review of the case of three journalists sentenced for defamation; pointing out that imprisonment is not a suitable punishment in cases of alleged defamation.

1981. Re: Subcarriers -- updated and corrected

Newsgroup: rec.radio.broadcasting
Date: 1994-06-04 17:37:44 UTC
From: fybush@world.std.com
Message-ID: <2sqe58$39j@vixen.cso.uiuc.edu>
Source record: 39728

I'll follow Mark with a list of 67khz subcarriers here in Boston (sorry...
my SR I doesn't have 92khz capability. Someday...):

88.9 WERS --- Talking Information Center reading for the blind
90.9 WBUR --- Foreign-language (some Asian language; can't tell which)
95.3 WHRB --- more foreign-language
102.5 WCRB -- Muzak
107.9 WXKS -- data

And that's IT! A lot less than I'd expect in a top-10 market...maybe
everyone's on 92 khz? The Talking Information Center is based at
WATD-95.9 in Marshfield. In addition to WERS, it's on the SAP of
public TV stations WGBX-44 Boston and WENH-11 Durham NH. WGBX-2 Boston
carries BBCWS on its SAP, and WBZ-4 carries WBZ-AM 1030 (sadly, they've
changed that over to the post-delay audio, rather than the predelay
that was on there when they turned on the SAP.)

1982. WIOQ Philadelphia format change?

Newsgroup: rec.radio.broadcasting
Date: 1994-06-04 17:37:50 UTC
From: Darius Filon <ST92J2GL%DUVM.bitnet@vmd.cso.uiuc.edu>
Message-ID: <2sqe5e$39q@vixen.cso.uiuc.edu>
Source record: 39729

Over the past 2 years Philadelphia has been subject to 2 radio stations with *the same* urban-contemporary music mix - Power 99 (WUSL) and Q102 (WIOQ). Now, I've just recently read that EZ Communications (the company that owns WIOQ) is buying WUSL from the bankrupt Tak Communications!

Now, am I correct in assuming that if a company owns two stations in the same radio market, we won't be hearing the same format on both stations? (After all, everybody would be listening to one station more than the other.. thereby making one station a waste of money, etc.)

2nd question: Does anybody know anything about this particular situation with these two stations? I have been listening to WIOQ a lot recently... and it does appear that they are beginning to phase in more "white pop" music (Celine Dion, Ace Of Base, The Goodmen, Big Mountain, and Gabrielle.. just to name a few).

I am a HUGE fan of radio...any discussion on this subject would be greatly appreciated.

-Darius

I sort of disagree with that. During that time you had WCWP/88.1,
WBGO/88.3, WVHC/88.7, (now WRHU), splitting the channel geographicly with
WRSU at Rutgers, WSOU/89.5, also splitting geographicly with WPKN in
Bridgeport, WKCR/89.9, WFUV/90.7, (still with 3500 watts and a CP for
50Kw), WFMU/91.1, spliting with WSHU in Bridgeport and WNYC/91.5. 91.9 was
in use by a well outside NJ station, (WNTI) and an application was in for
WSHR out in Lake Ronkonkoma to make a fourth geographic split, (of course
WLNG/92.1 fought them for a while). 89.1 and 90.3 were open for the entire
area and a surburban station respectively. In addition, since 88.1 was a
low power drop-in on a CT channel, it was open in that state as well.

>
It is more likely that WNYU was probably forced to beam directional due to
the Ryder application also being approved. Ryder Coll. had originally
wanted to build the station on the Staten Island campus, but somewhere it
got reassigned to Trenton. Probably also due to avoid a possable fight
with WNYU & WFDU. I believe the UN allocation was grandfathered for 100Kw.

Thanks for setting me straight on that. The rest of the history was very
interesing to say th least.

> 157 feet. Nassau went their own way. They were off the air completely for
> about two years, and finally built a new plant on the roof of their new campus
> administration building, broadcasting 500 watts from close to 200 feet.

What is strange here on the lower east side of Manhattan is that WHPC is
practically inaudible, but I used to get them when I worked accross from
the World Trade Center. I definately say it was due to water conductivity,
but it also means that their signal is heading south west and gets trapped
by the Upper NY Bay. WBAU's signal is more powerful in midtown than here,
but again that's where the problem from WHCR comes into play when you get
west of 3rd Avenue or north of E96th St.

> Actually, the move had nothing to do with that. Neither the old or current
> WBAU or WHPC coverage receives interference from (on paper) WHCR (Harlem

> WKCR. WFUV fought them, unsuccesfully, in the FCC. It was hard for us to fight
> them for interfering with WFUV and WKCR, when, at the same time we were
> applying for a waiver of interference to the same two stations!

I really don't see how asking for a wavier of adjacent channel would hinder
a battle against a co-channel. By now WFUV knows it's limitations and it's
advantages, the L.I. Sound pulls that signal all the way out, The
interference WBAU causes is restricted to an area where WFUV's signal is
already pretty bad. I'm sure they could have been persuaded to help. WFUV
lost before with the allocation of WKRB at 90.9, and the one in NJ at 90.5.
since they were forced to go directional north. Had they had the money to
stay omni, you could bet that not only would they not be there, but
probably WBAU would be a lot smaller in output power.

> Yes, but outside of our primary coverage area, where we are unprotected. There
> are times I've been mighty suspicious they have been using more than their
> licensed 7 watts, but its very hard to prove, at least enough to get the FCC
> to look. I've been tempted to attempt to get a "spy" to join their staff ;-).

Don't grin at that. I am well aware of the problem at 103.1 right now.
You can't tell me that the translater is running it's 20 watts directional
into Bergan Co. like it's supposed to. Not when so much of the signal is
audible in Queens. I can see water and fog being a conductor into my area,
and parts of Brooklyn and Staten Island, but not so much that they
obliterate WBZO. You shouldn't have any problem with WBZO in Hempstead
either, but you do on a foggy night. The primary channel, 88.5 is so full
of co channel noise and adjacents on 88.7 that there is no way that 5 watts
can be picked up that clear in Ft. Lee. He has to be using a line.

> (The FCC doesn't even bother to act against the Haitian pirate operating very
> openly on 87.9 (+/-) at about 200 % modulation. That station is even running

> paid commercials and call-in diccussion shows! They appear to be somewhere
> in Queens, and must be running 100 watts or so.)

I'm guessing Jamaca with a eastern direction to avoid detection on Varick street, but they show up on my car radio as 88.1. I was also getting a dead carrier, with stereo pilot, on 87.9 in parts of Brooklyn for a while too last year. Has WCWP complained? BTW, I did hear them give a made up call sign, but I don't remember it. Also my old car radio could only pick up 88.1 when tuned into 87.9 due to the stronger adjacent of WBGO at 88.3.

The FCC may be laying back on this, they had a real tough time busting WIBS in Flatbush a few years ago, but zapped the Bachi the students at Pratt were using at 87.9 within two weeks a few years ago. They then got a guy in Greenwhich Village at 91.9 within 5 days of his first broadcast right after that. I also know that a few Brooklyn and Nassau-Queens border pirates are back on with low power and irregular transmission times. If the time it takes to get them is proportional to the distance to the listening post, the Hatian station should be busted in June of 2013.

Hello, wondering if anyone has listened to the Wor Radio Network based out of New York, apparentely they are on satlite 24 hours a day, interested in the types of shows they produce. Just in case, is there a 1-800 number that people access the talk shows with? You may e-mail me the answer so as not to clutter up the group.

bookter@delphi.com wrote:

: It got me fired by a station manager/owner who is little more than a walking
: adrenal gland anyhow.

I once remarked on-air that the station was operating at lower power due to technical problems, thinking I was doing some great service to the community, even though this didn't significantly degrade the signal. The manager called me into his office during the news feed and simply asked me how the station made money. "By selling ad time." "Okay, and who pays the bills?" "The advertisers." "Right. And, if you were me and tried to get money out of paranoid advertisers who think their message isn't being heard, wouldn't YOU be mad, too?"

I think it was extreme to fire you, but don't forget that radio is a business. Complaining about missing headphones (you don't bring in your OWN?) at a radio station is like working in a restaurant and complaining about the quality of the rubber mats behind the counter.

If you are really interested in broadcast radio in your own area, you might wish to get involved in the AIRWAVES "RadioWatcher" project.

We are currently asking for individuals who are either active in the industry, or are very much involved in the happenings around their town/city/community and would like to become recognized as a "RadioWatcher" for AIRWAVES.

As a RadioWatcher, you will be responsible for reporting the goings-on in your locale, and will be, in effect, a staff reporter for AIRWAVES. While anyone can write an article for the Journal, RadioWatchers will be considered the de-facto correspondent in a given city.

As a RadioWatcher, you will be asked to keep an eye and ear out for news and schmooze about the broadcasting scene in your market. You are asked to submit at least one report per month (more if you choose) and will be kept on file here at AIRWAVES as an official member of the press.

The purpose of this program is to create a base of volunteer staff reporters who's job it will be to keep a steady flow of good information about various markets coming in to AIRWAVES. It does not mean that the pages of AIRWAVES are closed to any of the other posters in net-land. It is just a way to assure that the readers will have something good to read, when the more casual posters are not available.

Q: What do I need to do?

A: RadioWatchers are basically the same thing as reporters. To remain on the RadioWatcher program, you are expected to be involved with

radio in your market, either by profession, or by a strong personal interest. You will be asked to report on any interesting goings-on in and around your market. Such as format changes, station sales, interesting trends, market ratings, and whatever else seems appropriate. The depths to which you dig for information is up to you.

It is important, though, that you are a true fan of radio, and not merely a fan of one sort of format. Your reports can have personal commentary, but should be based on actual facts (as you know them) rather than how those facts match up with your personal opinions.

In general, we need good, solid reporters who will do the job based upon their love of radio, and desire for more exposure. AIRWAVES is not a profit making entity, and so salaries cannot be offered. If you are a budding journalism student, or a seasoned pro, this may be a chance for you to show your stuff to the world. Airwaves is read across the globe via the Internet, and is available to subscribers of CompuServe, GEnie, AOL and on a host of BBS systems, via email. Your input will not go unnoticed.

So if you are interested, drop me a line and tell me about yourself. I will be in touch by return mail. Those of you who expressed an interest in the past, are encouraged to get back in touch. Those of you who are already RadioWatchers, thank you and keep up the great work. As AIRWAVES expands, your contribution will be even more important.

William Pfeiffer Moderator rec.radio.broadcasting

It has been an interesting affair to those of us who are actually
running the D&M Show. It really seemed as tho they were getting strong results
in the Buffalo Market. Of course that was their word as spoken on the radio.
Tis a shame that it came to a little ugliness as the door closed on the former
affiliate for the Buffalo area.

We are doing quite well with their show in the Charlottesville Va
market. Listenership is up compared to what we had running sattelite oldies in
the afternoon drive. I know sattelite music is not much to be compared
with...but things have gotten better for us and sales are growing.

I personally had the pleasure of spending the day with the boys this
past Friday while they broadcast their show from King's Dominion Amusement
Park. In fact they put me on the show because I am the operations manager of
one of their affilites. If you heard the show...I was the guy they said would
look like Charles Manson if I'd only tatoo a swastka on my forehead.....
Pullleeezze NO!..We rode the rides and toured the park with a big gang of
contest winners...yup it was a hoot.

I hope they find a new home in the Buffalo area and kick butt when the
book finaly comes out... We only book once a year here in our market ..and
don't do trends...so I have no Idea where we actually stand....If the sales
are up...I don't really care what the book says...We sell RADIO..not numbers!

PEACE TO ALL!!

I am posting the following information to the benefit of those (mainly) in Europe interested in Radio Broadcasting. Enjoy.

Alfredo

>From Thursday June 9, 1994, till Saturday June 11 Montreux will host the 2nd Radio Montreux, with an interesting Symposium and Technical Exibition for those who are interested in Radio Broadcasting, especially in Europe. Montreux is one hour drive/train from Geneva, on the Lake of Geneva (Switzerland).

There will be three parallel sessions during the three days, divided on topics related to Radio Station Management, Programming, and Engineering.

Below I am transcribing the titles of the sessions, as they appear on the official program:

* THURSDAY JUNE 9, 1994 *
10:30 Opening Ceremony
12:00 Highlight Session: The future of Radio, followed by Wine Reception

Management: THURSDAY JUNE 9, 1994
14:30-16:00 The Co-existence of Public and Private Radio -
The rules of the Game (The Funding of Radio)
16:30-18:00 Open Discussion
18:00-19:00 Traffic and service information

Programming: THURSDAY JUNE 9, 1994
09:00-10:30 Continuity and Broadcast Operations
(also Automation, and RDS in BBC Radio Networks)

* FRIDAY JUNE 10, 1994 *

Management: FRIDAY JUNE 10, 1994
08:00-09:00 Workshop: Methods of Audience Rating
09:00-10:30 Who will pay for new technologies?
11:00-12:30 What will DAB change in Broadacsting Life?
14:30-18:00 Maximising Advertising, Sponsorship and Sales Income

Programming: FRIDAY JUNE 10, 1994
08:00-09:00 Workshop: Human Resources, How to Save your Job?
09:00-10:30 Changes in Musical Formats
11:00-12:30 The Future of International Programme Exchange
14:30-16:00 Is the Format Model Still Valid in Europe?
16:30-18:00 Is Automation Killing the Spirit of Radio?

Engineering: FRIDAY JUNE 10, 1994
09:00-10:30 Training
11:00-12:30 Transmission and Reception (Excluding Digital Radio)
14:30-18:00 Digital Radio
18:00-19:30 Workshop- Additional Data Services for DAB: Dynamic Range Control (DRC)

* SATURDAY JUNE 11,1994 *

Management: SATURDAY JUNE 11,1994
08:00-09:00 Workshop - The Future of International Radio Services
09:00-10:30 The Regulation of Radio in the Year 2000
11:00-12:30 Marketing and Promotion

Programming: SATURDAY JUNE 11,1994
08:00-09:00 Breakfast Session -
New Tools and Applications for Integrated Research
09:00-10:30 Planning and Positioning the Station
11:00-12:30 Winning with Consultants

Engineering: SATURDAY JUNE 11,1994
09:00-12:30 Production Environment and Acoustic Developements

and, to end, on Saturday:

FAREWELL EVENING: Concert and Buffet reception at the Auditorium Starvinski, Montreux.

The technical Exhibition is open daily between 10:00-18:00.

Any error or omission is mine, so check the source, and do not trust me :)

FINAL NOTE, AND DISCLAIMER: Needless to say that I have no relation with the organizers, and for any details you have better to check with them: Phone: +41-21-963 3220 or fax: +41-21-963 88 51. They can take care of Hotel reservation as they did for me, as well as for travel, and Conference registration.

I will be there, so if you plan to be there as well you may leave me a message at the desk, if you want. Please contact the 2nd Radio Montreux organizers for more information, *NOT* ME, please.

Does anyone out there have a comprehensive list of SCA/SCS broadcasts in
the Bay Area? Failing that, can anyone tell me of any they are aware of?
I know KPFA has a reading service on one of theirs...

1992. World Radio Transcription Services reports

Newsgroup: rec.radio.broadcasting
Date: 1994-06-05 05:49:25 UTC
From: wrts@web.apc.org
Message-ID: <2srp15$rcf@vixen.cso.uiuc.edu>
Source record: 39747

Since it was incorporated as a non-profit, fee-based service in December 1992, World Radio Transcription Services has been providing a timely, online source of news on economic policy, political/constitutional change, social policy, the environment and other human rights-related topics to thousands of nettors. As the name implies, WRTS' principal source is shortwave radio broadcasts which are consistently monitored from which verbatim country reports are prepared frequently within a day or two of the original date of transmission. Currently, those stations include Radio Moscow World Service (including its 20-minute feature news programme heard on weekdays, "Commonwealth Update"), China Radio International in Beijing, Radio Japan/NHK's half-hour programme, "News Round," also on weekdays and finally Radio Habana Cuba. In the past, however, others have included Radio Exterior de Espana, Radio Nederland and Swiss Radio International. In the future more will no doubt be added. In all cases, written permission has been given to WRTS to prepare the reports which total over 2000 to date.

In addition to receiving several files each week, subscribers will have free, unlimited access to WRTS' archives for the duration of the subscription. All news items have been indexed in an electronic database which supports boolean searching through a number of access points -- date and time of broadcast, source, nation(s) involved, region, general subject heading and keywords within the text. Upon receipt of a request, a report will be sent off within a week.

For those wishing in sampling this service, a trial offer lasting a week is available at no cost and with no obligation.

Regards,
Andrew Waldie.

SOME COMMENTS FROM READERS

We've had numerous favourable comments on the quality of the transcriptions produced by World Radio Transcription Services. The gen.shortwave conference is regularly in the top 10 conferences read on Web (the Canadian member of the APC), and has been for the past year and a half, since the conference was first set up.

Readers of gen.shortwave have let us know that they find the careful organization of the information, and how easy it is to find current reports on different regions, extremely useful.
(Maureen James, Web User Service Co-ordinator)

I have had gen.shortwave conference on my `visit list' ever since I joined the GlasNet about 18 months ago. Your reports have always been among the important sources of information. They are solid and frequent enough, the choice is representative and unbiased. Your timely and carefully focused attention to the developments in various regions of the CIS is particularly valued here.

Moreover, at times of crisis and ensuing information blockades, your WRTS, along with other services on the APC networks, have proved to provide for essential channels of communication for many organisations and individuals in the non-profit sector.
(Vassily Balog, GlasNet user, Russian Federation)

Take this as a note of thanks and support. I taught a course in Russian media (in Russian) this semester and I supplemented it with copies of items from your reports. I will no doubt continue to use them even more next academic year.
(Robert Beard, Program in Linguistics, Bucknell University)

Sorry to clutter the group, but I would appreciate someone explaining more fully the WOR radio network format. I loved listening to WOR-AM whenever I'd happen to be in New York City and I was wondering if the satellite was simply a simulcast of the AM.

1994. Boston Radio Watch 06-07-94

Newsgroup: rec.radio.broadcasting
Date: 1994-06-08 17:15:14 UTC
From: nhmas@gauss.med.harvard.edu
Message-ID: <2t4ub2$3lu@vixen.cso.uiuc.edu>

More moves in the # 9 market :

* On June 1st Pyramid Broadcasting recieved FCC official approval to take over WJMN-94.5FM from Ardman Broadcasting. The $22-milion deal was closed on the same day. This becomes Boston's fourth FM duopoly and a fifth on the way[can you stand it?!]

Immediate off-air changes :

Matt Mills, GM of sister stations WXKS-107.9FM and WXKS-AM 1430 becomes WJMN's new GM. He was imported from Cleveland radio earlier this year.

Alan Chartrand, former WJMN GM moves into a general sales manager position.

Cat Collins comes in from Pyramid's station(WPYX-FM) in Rochester to become 'JMN new PD.

WXKS' MD 'Cadilac' Jack McCartney moves to the same job at WJMN. He replaces Michael Colby who left WJMN.

More house cleaning is expected with some on-air moves. A format change(to Alternative/Progressive?) is strongly rumored for the CHurban 94.5. Many thing depend on how well 'JMN does in the current spring book which will be released in a couple weeks.

* A gain and a loss : As Pyramid was busy rearranging its new acquistion (WJMN). it lost its top marketing person at WXKS-FM. Beverly Tilden,40, who was with 'KISS-FM' since 1988 and was part of a two-person team that made that station one of the best CHR stations in the country.[The other person was John Madison,WXKS' former GM who left the station earlier this year for a high profile job with Polygram Records in NYC]. She moves over to become program director at all-sports WEEI 590AM which is undergoing some off-air housecleaning under new owners 'Back Bay Broadcasters'. Tilden has been in Boston radio for 17 years. Her previous stints included WBZ-AM and WHDH-AM. In the mid-80's she was in the sales dept. at WHDH where she worked together with Ross Elder, WEEI's part owner and GM.

As a result of this move, Phil Sirkin who was WEEI's PD for the last 5 years under the Celtics ownership was let go with 4 months left on his contract. He'll stay on as a consultant until the end of his contract.

This is a second major raid of Pyramid off-air talent in less than two months. As you would recall, American Radio Systems hired away John Gershorn, a very experienced radio pro from a Pyramid's station in Chicago to become its co-chief operating officer and head of its Boston's stations.

* Imus, who the other morning made reference to some station as 'W-F-U-C-K' on the air[I guess when you have the President of the US on your show every couple of months, you can get away with almost anything] will be broadcasting from Boston on June 22nd and 23rd[from WEEI's studios in Charlestown].

* American Radio Systems has officially made up its mind. The Celtics broadcasts will be heard on WHDH-AM 850 starting this fall. ARS was pondering a thought about having the Celts and the Sox share WRKO-AM 680 as their flagship which would have caused a few game-night conflicts in March and April. Now, each team will have its own flagship.

* A few weeks ago, spring Arbitrends('rolling averages') indicated that a new station will be on top of the AC race in the spring book -- Greater Media's long-time AC king WMJX-106.7FM('Magic 106.7') will finally be dethroned by ARS' 3-year old 'Hot AC' WBMX-FM('Mix 98.5')...

Source record: 39650

The following probably is evidence of excessive exposure to "Mr. Wizard" at an early age.

I have been curious regarding the compressed audio for the "talking book" service on subcarriers of KANU (91.5, Lawrence, Kansas) and KCUR (89.3, Kansas City). I think the compression may actually be a way of enabling noise reduction at the subcarrier receiver.

So I unpacked my Proton 740 cassette deck, which has dbx noise reduction. I recorded the 92 kHz KANU subcarrier at various levels from my subcarrier-equipped GE Superradio. I recorded the subcarrier with all noise reduction off, and then played it back with dbx noise reduction on.

The results are inconclusive. *Some* noise reduction does occur, as one would expect from an noise-reduction system that expands a compressed signal in order to push the noise floor down, such as dbx. However, the amount of compression and where the peaks occur do not seem to match. If noise reduction is being used, it does not appear to be the dbx system. Some other system may be in use.

The noise reduction that did occur did not reduce the crosstalk from the main channel into the subcarrier.

The crosstalk appears to be generated at the station. KCUR relays the 92 kHz KANU signal on its 67 kHz subcarrier, and one can hear crosstalk from *both* KANU and KCUR on that subcarrier.

****

According to a report in the May issue of the St. Louis Journalism Review, Rush Limbaugh was booed at Busch Stadium when he was introduced to the fans at a St. Louis Cardinals game.

Limbaugh was in St. Louis to promote his daily show, which now airs on KMOX (clear-channel 1120 kHz), much to the consternation of some St. Louisans, judging by letters published in the SJR, and other comments.

****

A couple of months ago, someone in AIRWAVES asked what happened to radio personality Johnny Rabbitt, who was at KXOK in St. Louis and KAAY in Little Rock (as Johnny King).

He's still in St. Louis. A St. Louis Journalism Review article describes him as a "media historian and air talent," but didn't say what he's doing now. His real name is Ron Elz.

Also in the "where are they now" department: Bruce Bradley currently holds forth with a midday talk show on WIBV in suburban Belleville, Illinois.

****

Also from the SJR, various results from the Winter Arbitron:

* Modern-rock KPNT ("The Point") has continued a ratings decline from 3.1 the previous winter to 2.1 (12+).

* Adult-alternative WFXB ("The Fox," LMA'ed with KPNT) has risen

from 1.2 to 1.8.
* Clear-channel talk powerhouse KMOX showed what's described as a
"small drop in overall listenership," but it still leads morning drive
25-54 with a 13.9 share, and is the overwhelming favorite in the 55-64
age group.
* Country music's listening share in St. Louis dropped 8% from the
previous book.
* The top station with St. Louis teens is urban-contemporary KMJM.
****
When Kansas City's KMXV changed formats the last week of March from
"hot AC" to CHR, a spirited battle was expected with the incumbent CHR,
rimshot KISF.
"Kiss 107.3" has fought back against "Mix 93.3's" onslaught with a
"Kiss That Car" contest, in which a Kansas City woman won a Hyundai
after kissing it for nearly a week (with breaks), and other promotions.
Meantime, KMXV seems to have forgotten to turn on the Mixmaster.
Its playlist appears to have been frozen since the format change on
March 30.
The station plays the same "hits," the same early-and-mid-80's crossover
oldies, and even the same groups of two songs back-to-back.
Perhaps the music director's dot-matrix printer ran out of paper?
Or someone just ran out of imagination, never in surplus in this market
anyway.

1996. Radio Watchers -- Central Missouri

Newsgroup: rec.radio.broadcasting
Date: 1994-06-08 17:15:21 UTC
From: Mark Roberts <transvox@tyrell.net>
Message-ID: <2t4ub9$3ne@vixen.cso.uiuc.edu>
Source record: 39651

Columbia station KTGR returned to the air Monday (June 6),
simulcasting the "young country" format of co-owned KCMQ(FM).
Before KTGR left the air early last year, it was programming a
nostalgia/easy listening format. The station, at 1580, suffers from a
weak signal (250 watts daytime, 10 watts nighttime), as well as its
location on real estate long coveted by a nearby lumberyard.
However, the station's place in mid-Missouri radio history is much
bigger than its signal would suggest. Before KTGR came on the air in
1967 with a rock-and-roll format, listeners wanting Top 40 music had to
tune to KXOK in St. Louis (630) or WHB in Kansas City (710).
During the 1960s, legend has it that many a University of Missouri
dormitory resident from one of the state's big cities would hang a
radio outside his or her window to hear the hits unavailable on
Columbia radio. Local full-service station KFRU(AM) filled the gap at
night with "Disc Derby" from 10.30 until midnight.
Tiger Hotel owner Lou Shelburne bought the market's other station,
an easy listening daytimer at 1580, upgraded its facilities, added an
FM simulcast operation at 96.7, and took the market by storm in the
summer of 1967 with a Top 40 format. The station's fortunes began to
decline after KTGR-FM failed to go to stereo when KFMZ(FM) came on the
air in 1971 with its own rock format.
In later years, KTGR-FM became KCMQ (in stereo) with a CHR/AC mix
while KTGR(AM) became "Tiger Country" with a country format. A
succession of debt-laden owners struggled to keep the stations on the
air until they were sold to Zimmer Broadcasting nearly two years ago.
Zimmer owns KCLR(FM) in the Columbia market, also programming a country
format.
****
Boonville station KACJ (93.9) is expected to begin broadcasting
within the next two weeks.
The 6,000-watt station will have studios in Columbia. Its signal
will reach that market from a transmitting site about halfway between
Columbia and Boonville.
KACJ owner Dick Billings hasn't revealed plans for the new
station's format, but broadcasters in the market are speculating he
will start out with an easy-listening format. Billings has been
advertising for employees in Columbia's daily newspapers.
Billings also owns Boonville full-service station KWRT (1370), and
formerly owned KDBX (99.3, now KCLR, rimshot to Columbia). KDBX
programmed an easy-listening format at night.

1997. RadioWatch-Buffalo/Toronto(6/7)

Newsgroup: rec.radio.broadcasting
Date: 1994-06-08 17:15:24 UTC
From: ag365@freenet.buffalo.edu
Message-ID: <2t4ubc$3o5@vixen.cso.uiuc.edu>
Source record: 39652

Organization : Buffalo Free-Net

News from the #40 market(according to Arbitron):

-Jay R. & Suzie Gach's gabfest on WWKB via satellite has had a time switch,getting pushed back an hour. It was on from 2-4pm,but it's now on from 3-?pm. The switch was to have been made yesterday;however,it was delayed(probably for satellite foulups)and they had to play about 20 min. worth of ads/promos,etc.,sometimes repeating the same ad a few minutes after it was played. Around 3:30,they were able to get the feed from the One on One Sports Network,which meant the duo didn't actually start until about 3:55pm.

-I mentioned in my last post that I would report on the media sumo wrestling that was a part of Jim Kelly's Stargaze '94(held at the Univ. of Buffalo's Amherst campus). Here it is:of the eight competitors,four repped radio:Janet Snyder(part of WKSE's morning team),Dale Mussen (sports anchor on WYRK's morning team),Marc Stout(WGRF)and Lori Love (CJXY-FM in Hamilton;Classic Rock Y95). None of them won;and as far as the $1 million shootout(where you have to throw a football 30 yards into a hole just a few inches wider than the ball is-a 2" leeway either way), the person who got it the closest was a rep from Continental Airlines-4".

-Did you know(yes,I'm a SportsCenter junkie)that a number of radio personalities handle PA duties for the area's sports teams? True.

*Bills:Stan Roberts(WBEN)is at the mike;for many years,Danny Neaverth was the PA man.(Roberts' voice is in a part of the Albert Achievement Awards video;if you see it,you'll understand.)
*Sabres:They have 2-Milt Ellis(general sales manager at WDCX) handles all game announcements(i.e.goals,penalities etc.)while Tom Schuh(PD at WHTT-FM)does everything else.
*Bisons:Duke McGuire handles PA most of the time;he's filled in on Bisons radio broadcasts.
*Blizzard(NPSL indoor soccer):Rob Lucas(half of WMJQ's morning show)is the PA man here.
*Bandits(MILL indoor lacrosse):Chris Swenson(no idea what he's done,but he's got the voice for it)
*Stampede(RHI roller hockey):Who knows?(I plan on going to the opener in 10 days,so keep waiting.)

-Sean Healy at U.of Guelph will send me the BBM ratings for the Toronto market in the next few days,and I'll post it soon after I get it.

-I've been conducting an informal poll on my home system to find out the best-and worst-of Buffalo radio,much like what was done with the Best of Chicago. Anyone in my area(and it does include southern Ontario)can take part. Just write to me with your thoughts.

-Who are the voices that do the sweepers on the area's stations? Here's some:
*WKSE/WWKB:Mark Driscoll(he did some WHTT liners briefly;he's also been heard on WPXY in Rochester and WBSU-FM in Brockport, which is near Rochester.
*WMJQ:Mitch Craig(was the voice of WKSE for a few years;he's also heard on CFTR(680 News)in Toronto.
*WGR:Uses a variety(Jim Pastrick and Tom Donahue among them)
*WBEN:Same as WGR(though its IDs seem out of town)
*WHTT:Jeff Kaye(ex-WBEN,now w/NFL Films)
*WUFX:unknown(though he also voices CING in Burlington,Ont.(top 40/dance)-known as Energy 108)
*WBUF:unknown(they use 2)
*WBLK:unknown

-Still waiting on who gets D & M-no change at 3WS yet.

-In response to the post about the WGRF to AAA rumors:I've reported that it might switch to ARROW. I don't think it would jump to Triple A;it does well with the 25-54 crowd,though it's dropped nearly 2 points since the summer book.

> donut@crl.com
>

Well, basically we seem to put channels just about everywhere. FM runs from 87.5 to 108.0. The BBC has control of from around 88.something to 95.8 on which it puts its local, regional, and three of its four national stations. >From 95.8 to 97.4 are independent commercial local stations. From 97.5 to 99.something you find Radio 1FM, the Beebs other national station. From 100 to 102 is Classic FM, Britain's first national commercial FM station, and from 102 to 103.4 there are more commercial local stations. From 103.5 to 104.9 there are more local BBC stations.

But yes, there is nothing at all from 105 to 108. Just last week the Radio Authority (our FCC) announced that they had chosen to give it out to small low powered (like 20W) community stations, which pleased me, as I am involved in student radio, which is very restricted at the moment.

Other options had been to let the local commercial stations, some of which run a Chart/Adult Contempory service on FM (or whatever sells the most advertising) and an Oldies station on AM, to switch their AM service to FM, thus killing AM once and for all, or to let Britain's other commercial station, Virgin 1215, which currently resides on AM, to go onto FM. This would have killed local radio. The RA (for once) have done the right thing.

In fact, their decision will make them lots of money anyway. The RA charge hundreds if not thousands of pounds for you to just APPLY for a licence. Is the FCC the same? Does it charge you money just to reject you (or not as the case may be)?

I just got back from a month traveling all around Europe. I took my
walkman with me, and luckily it allows you to hear both even and odd
decimals of frequencies (it's digital). This means I could hear a
station fine on 98.0 (versus trying to hear it on 97.9 or 98.1).
Unfortunately, it didn't pick up AM well, since AM has 9 kHz spacing
there instead of 10 kHz.
The number of FM stations received at locations in Europe varied widely.
Some rural areas in Scandinavia had no FM stations, but in Rome, stations
were receivable every 0.3 mHz, usually quite well, except that interference
from adjacent stations was often a problem. Also, if I held my walkman
up in the air in Rome, a loud buzzing noise occurred due to the overcrowding.
(No...it wasn't low batteries.) In Paris, there were stations every 0.4
mHz, usually with clear reception.
Some cities that had few stations included Budapest, Hungary (only 3 FM's),
Vienna, Austria (only 6 or 7 FM's) and Helsinki, Finland (6 or so). Berlin
had a good selection (maybe 20), and had the American and British forces
stations, which were English language and quite good for a CHR type station,
though they sort of mixed formats a lot (like the British forces station
had an oldies program from 9-10 AM, mostly playing specific years from the
70's or 80's).
Typically about 1/3 of the songs on CHR or AC type stations (I'll talk
about the formats in a bit) were in the native language of the country.
Rarely did say a German station play a French song, for instance, but
sometimes a non-native, non-English song would be played. Different
songs by a group were played vs. the US(such as "Have You Ever Seen the
Rain" <yes, a remake> by the Spin Doctors got a lot of airplay in
Europe, but "Cleopatra's Cat" is being played here). Formats were rather
interesting. Most places had about 1/2 their
FM stations having formats similar to National Public Radio (talk/news/
classical/etc.). There were a lot of CHR type stations, except that more
modern rock was usually played and more oldies too (even from the 50's/60's).
There were no stations that only played modern rock or alternative that I
found (bummer). There were not very many oldies stations (a few in the
German speaking countries). France and Italy had quite a few dance and
R&B stations. Adult contemporary stations seemed better there than here,
but I wonder if they're just continuously recycling different songs than
the usual AC repeat-meisters do here. The line between AC and CHR there
was a lot fuzzier than here since CHR stations played more oldies there
and AC stations were somewhat more adventurous than here.
Best of all...get ready to applaud...I hear *NO* full-time country stations
in Europe!!! A few stations would play country for a few hours and then
switch to other music (these stations were either AC or govt. all-purpose
FM mix stations- most common in Germany).
About commercials: Germany had none since radio is state run (at least

mostly). France and Italy seemed to have quite a few, but since I don't know the languages there, it was hard to tell what they were advertising. There was a lot of news...in Germany, for instance, even the CHR stations had it every hour. Some every half hour!
Barcelona, Spain had around 15 FM stations, but they seemed lower budget. On one station I heard "Kissing a Fool" by George Michael, and there were some scratches on the record (nope...not a CD).
Anyway...FM there went from 87.5 to 108.0 instead of 88.1 to 107.9...so I guess they have a different Channel 6 on TV...actually there was Channel 1 over there...and it was usually occupied too!
If I think of more stuff to tell, I'll post it...any questions, just ask!
Later...
Brandt

2001. Mexico radio & AIDS

Newsgroup: rec.radio.broadcasting
Date: 1994-06-08 17:15:59 UTC

LIFE IN THE TIME OF AIDS:
On the Airwaves of Mexico's Radio UNAM

In many respects, the struggle against AIDS is frequently confronted with bureaucracy and a lack of will, on the part of the authorities, to shed more light on the truth and provide the population with better information. How many more AIDS victims will it take before people realize the importance of disseminating all available information? This is the summary of the reasoning that moved scriptwriter Manuel Zozaya, who produces the radio series called "La vida en tiempos del SIDA" (Life in the Time of AIDS," to knock on every imaginable door in search of the necessary funding for his project. In most cases, Manuel ran into a wall of silence and indifference.

Originally scheduled to include 13 programs, the first series was so successful that the number of programs was doubled. Howver, the initial budget had already been spent when the first series ended. Therefore, Manuel and his team worked without any remuneration until three months later, when they found a new sponsor, the medical department of the Universidad nacional Autonoma de Mexico (UNAM). One year after their first prgram came on the air, Manuel Zozaya was categorical: "If, by listening to our program, just one person has become aware of what this disease can mean, then our efforts have been well worthwhile."

"Life in the Time of Aids" is not intended to be restricted merely to information on the disease itself. Instaed, its goal is to visualize everything related to the illness as an integral part of life: love, sex, death, etc.

The number of telephone calls and the continual flow of mail attest the outright success of the series. One year after its initial program, the series seem to have a guaranteed time slot on the university radio's schedule. The program is currently heard in Mexico City, but it will soon be broadcast in other Mexican states.

From: Lance Ballance (lancebkost@aol.com)

Ahem,
Mike Ward recently replied to a post of mine, saying that a Sacramento newspaper dude was thinking that the 1030-AM frequency in Sacramento would probably sign on as a talk station...

OH NO!!!!!

Let's hope not. Sacramento has one powerhouse talk station, (KFBK-1530) and 2 newcomers, (KHTK-1140 & KSTE 650). With KFBK's 11 share and the other guys combined 4 or so, I think that that is IT when it comes to talk in Sacto. Besides, what can 1030 do differently? Not much. (gee, lets hear EVERY syndie talk host around!)

There are many possibilities, Sacramento does not have a Big Band station anymore, nor a Country AM. Also, have they thought about "Radio AAHS"? It may not have big numbers, but you can sell it. Then again, as long as I can remember, Sacramento has been VERY non-creative in terms of radio. The "If it works in L.A. It'll work here" theory. Gee, how come the local Classic rock station hasn't picked up Howard Stern yet? (hey! Maybe THAT is something for 1030-AM! Now about the other 19 hours in the day.....)

Please excuse me for posting this here, but I tried to send the following message by private e-mail could not get it delivered. The message is a response to a posting in this news group.

Date: Mon, 06 Jun 94 20:15:26 EDT
From: Mark Poindexter <37PSVFB@CMUVM>
Organization: Central Michigan University
Subject: Radio in the UK
To: Simon Aulten <Brunel.Radio.B1OOO@brunel.ac.uk>
Message-Id: <940606.201526.EDT.37PSVFB@CMUVM>

Thanks for the great summary of what the various BBC program services consist of.
the descriptions will come in handy when students ask exactly what various services are.

One thing that I am not clear about from your summary that appeared in Airwaves, however, is exactly what the total choices are for most people on the various bands. Could you give me a list of what someone in London, would have to choose from if one included private stations, as well as the BBC and on which bands (LW, MW, SW) one would hear these stations?

In addition to the above, I'm very interested in noncommercial, community radio (along the lines of the lower power stations that got so much attention a few years ago in France and Italy). Does the U.K. have anything of this sort now?

Also, you address arouses my curiosity. What is Brunel Radio. (When I first saw this I thought it was Brunei and wondered why someone out in the Pacific was so well-informed about the Beeb in the U.K.!)

Thanks again for the great summary you posted to Airwaves.

2004. Re : Boston Radio Watch

Newsgroup: rec.radio.broadcasting
Date: 1994-06-08 17:34:07 UTC
From: nhmas@gauss.med.harvard.edu
Message-ID: <2t4vef$5oq@vixen.cso.uiuc.edu>
Source record: 39665

Rob wrote regarding WBCN's AM-drive :

>I'm willing to bet that they're planning to move Howard Stern to the morning
>slot from his current nighttime rebroadcast.

A year and three months. That's how long Howard has been in the Boston
market. Personally. I think WBCN has been waiting around a little too long
to move Stern to the mornings. It should have been done a lot sooner...
Why? Here a few major reasons :

1. Boston audience is completely out of tune with a morning show that's
broadcast on a 13-hour delay...

2. 4 to 5-hour show with frequent 10-minute ad breaks is simply way too
long for night-time. It's much better suited for a faster paced
morning-drive...

3. BCN's DJ line-up(preceeding Howard) needs a mini facelift :

Charles Lacquidara(5:30-10am) show -- He has been at WBCN forever.
You can tell Charles' best work is behind him when his producer and
writer(Lance Norris) gets more on-air time than Chuck during the
Big Mattress...

I would give him a DJ slot at WBCN's classic rock sister
station WZLX-100.7FM as they did with Ken Shelton(former long-time
midday WBCN personality).

Like I mentioned in my previous post, WBCN management hasn't made
any moves to resign him so there might be cooking up something come
September...

Bradley Jay(10am-3pm) -- The King of Mighty Mid-day he's not. Pure
and simple -- Bradley is not a day person. He is much better suited
for his old 7pm-12am slot(currently occupied by Stern). Since Bradley's
midday show is much more music-oriented than any other part of WBCN's
broadcast day, he can't do his old night-time schtick which made him
popular with his younger listeners...

Mark Parenteau(3pm-7pm) -- No change needed here. Probably one of
the best on-air talents in the country right now. As Stern puts it
in BCN promos,"Mark is a brave broadcaster". 'Nuff said...

I'm not sure if Stern will ever make it to the mornings in Boston now.
It seems WBCN people are quite content with his night-time numbers and
they have no problem filling 10-15 minute ad slots eventhough the show
is not really bring any serious coin(they're selling volume). Even
Stern himself is now less vocal about getting into the morning-drive

race in the #9 market. His desire to whip Imus on a competing station has subsided somewhat.

Regards,

-Mark

Hi,

Does anyone know what will happen to the german digital satellite radio
DSR (via Kopernikus,TVSat 2 and cable) ?
Will there be a second package of 16 channels in the near future or will
I have to make do with just one pack of 16 audi stereo channels ?

I bought my DSR receiver in august last year and am very satisfied with
the sound, but I noticed that some stations have better signal quality
than others.

ALso, will Antenne Bayern replace Radio Xanadu on channel 16 or will everything
stay as it is currently ?

If zou know about it, please drop me a line to this e-mail address :

blank@cip.informatik.uni-wuerzburg.de

Bye.

> same format on both stations?

Don't ever assume when it comes to radio. ;)

Actually, here's what could happen (with the built-in knowledge that
Philly is a major market) -

1) One of the two stations will change to an entirely different
format.

2) One of the two stations will change to a slightly different format
from the other co-owned station.

3) Neither of the stations will change much.

#2 seems likely, especially in light of what you said about WIOQ
changing its music orientation. This happens a lot in country
formats, where one station adopts a "traditional country" format, and
the sister station picks up a "hot" or "young country" format. We
have it here in Sacramento with KRAK-FM 98.5 and co-owned KNCI-FM
105.1... ironically, owned by the same company you're talking about,
EZ Communications. The two stations flipped call letters... KNCI is
"New Country 105.1" and KRAK is "Hot New KRAK 98.5"...not really
traditional country per se, but a much less current based playlist
(they say they play "the best of the past 10 years").

Since your two stations there are owned by EZ, they'll probably adopt
the "kissing cousins" format adjustments. ;)

This is why my station airs "TGI Friday's" spots, when the nearest Friday's
is 75 miles away, well outside our coverage area. If I had a dollar for
every listener that's asked me about it...

>It's not the frequency but that he's 1/4 mile from your xmtr. It's his
>poor shielding. How far should you go? Tell him that's what the problem

Most of the cordless phones still work on the 49 MHz band, and if he doesn't have interference from you, he'll have it from someone else.

A. these things have horrible selectivity and are very prone to overload. You can possibly install a filter on the handset antenna, but you'll still get huge amounts of signal leaking into the electronics because they aren't shielded at all. It's a wonder these things work even under good circumstances. If it's being picked up by the base set, adding a choke to the phone line might help.

B. The 49 MHz band is a zoo... even with the best selectivity, it's quite a nightmare to use. Everyone and his brother has a cordless phone and they all use the same little slice of bandwidth. Add on to this wireless microphones and baby monitors and you have trouble brewing.

C. At a quarter mile from your antenna, he's got a lot of signal out there. Not much you can do.

D. There are 900 MHz cordless phones available. Overload is less of a problem right now, because the 900 MHz frequency is a lot further away from your fundamental. They are expensive, indeed, but worth recommending to the user.

E. Just in case, get a spectrum analyzer and look at your signal for spurs. Now take it over to his place and do the same thing. I have seen cases where rusty gutters have been sufficiently nonlinear junctions to cause mixing products, and if your station is mixing with something about 45 MHz away... guess what happens? This probably won't do much, but it's not much work, will get you some goodwill, and you can never check your spectrum too often.

Remind the fellow that this unit is intended to be a radio receiver. That is it's purpose in life. It's just fulfilling that purpose better than it

is supposed to.

This is a simple question and it might plant a seed in the industry, Does anyone know of a AM/FM /SCA receiver that is on the market that is not professional equipment. Also why does the industry waste the FM-SCA channel. Just as most stereo TV's have a SAP switch why can't FM radios have the same switch, look at the possibilities of every FM station could have "FM-2". Satellite services, 24 hour traffic, CNN news, all with additional advertising.
I would like to hear comments !

Bud Kress (SBK-1230 @ AOL.COM)

>Does anyone out there have a comprehensive list of SCA/SCS broadcasts in
>the Bay Area? Failing that, can anyone tell me of any they are aware of?
>I know KPFA has a reading service on one of theirs...

SCA transmissions are not "broadcasts" but rather closed circuit
transmissions conducted by and for the station itself or for a third
party. While it is not "illegal" for you to listen to them, technically
speaking, if you are unaware of any particular SCA transmission, it
isn't for you anyway.

The other problem with a comprehensive list is that the material on
SCAs changes constantly. Clients come and go. Some of the material is
data, not audio. At the moment, the only SCAs I am aware of in the
south bay include some data service on KEZR, Interactive TV on KARA,
Iranian programming and Cue Paging on KBAY, and Chinese programming on
KBRG. KOME may soon have one or two foreign language programs in the
near future.

Not real exciting.

Version 1.0, June 1994

In this FAQ, I've assembled the net.wisdom on one of the most popular and (IMHO) best radios for AM (mediumwave) and FM DXing, the General Electric Superradio. There were three versions of the radio, and the latter two (II and III) are covered here.

Included are several Superradio mods that I know about; if you've modified *yours*, let me know about it and it'll be included here.

** What is the GE Superradio? Does it do shortwave?

The General Electric Superradio III (abbreviated SR III) is an AM (mediumwave)/FM radio designed for long-range, high-fidelity listening. It's the radio of choice for many AM and FM DXers.

It doesn't do shortwave. What it does do is tune the AM (mediumwave) band from 530-1705 KHz and the FM band from 88-108 MHz; it doesn't receive FM stereo (nor AM stereo either). There's a wide/narrow switch for AM reception. It has an excellent sound system, with a 2-way speaker and bass and treble controls. Unlike most AM/FM radios the SR III has additional RF stages, a big (200 mm) ferrite loopstick for AM, and an external antenna jack.

** Where do I find one?

The GE Superradio is available from many retailers, including K-Mart, Lechmere's and Costco, to name just a few. Bennett Brothers is at least one mail-order source for the radio; the address is at the end of this FAQ. Street price is between $35-55.

** I'm outside the US. How do I get a Superradio?

Richard Hunt:

"For UK residents, the easiest way to get a GE Superadio is to order one from one of the dealers who advertise in the World Radio TV Handbook, for example Universal Radio in Ohio. The easiest way of paying is to use your credit card. Most companies accept Visa, Access/MasterCard and American Express. The major added cost will be shipping: surface mail will add USD 20 or so (and may take 6-8 weeks), airmail up to USD 50 (delivery in 10-14 days). UK Customs & Excise

will add import duty and VAT, which will be collected by the post office when they deliver (they will charge GBP 5 for this "service").

Bringing a Superadio back from a trip to the US is also possible, but it is quite large, and you may have trouble with airline/airport security. DO NOT pack it in checked baggage. Carry it on in hand luggage and be prepared to demonstrate it working. Go through the RED channel at Customs and pay the VAT. Getting caught in the Green channel will most likely result in at least public embarassment and having to pay up anyway, at worst, confiscation of your Superadio, prosecution, a heavy fine and a criminal record.

The major problem is likely to be power supply. The mains transformer on the Superadio works off 110 volts, 60 Hz. The US plug molded onto the wire won't fit a UK socket - just as well as UK mains is 240V, 50Hz. Feeding 240V into a 110V device will damage it instantly beyond repair. There is no 9V dc input, so you have to rely on batteries, obtain a 240v-110v stepdown transformer or modify the radio internally.

[Bennett Brothers will ship the SR overseas; their address is in the appendix.]

** The Superradio III? What happened to II? Or I?

The SR III is the latest version of the radio. The SR II, which many people still own, had a different cabinet and AM coverage only to 1600 KHz; the SR III accomodates the expanded AM band (if it's ever populated...) The II does not have a AM wide/ narrow filter switch.

There are some technical changes as well; the III uses varactor tuning compared to the II, which uses a conventional variable capacitor.

Dave Markson has this to say about the II vs. the III:

"I have an original Superradio and just bought a SR3 (modified on FM with a 110/280 KhZ IF filiter, and SCA by SCS Radio Tech). As for MW, here are my findings:

1. The SR3 has much better sound.
2. Although the SR3 has a wide bandwidth position, it is almost useless, but does increase the highs on local stations. The normal position is close to the bandwidth of the original SR.
3. The SR3 is more sensitive (by a small amount)
4. The SR3 has about the same selectivity of the original SR, my findings show it a little bit less selective.
4. The SR3 workmanship is not quite as good as the original SR.
5. The SR3 is harder to tune. Where as the original SR band was spread out pretty evenly across the dial, the SR3 uses 1/2 the tuning dial to go from 530-1000kHz, then crams the rest on the right half of the dial. Tuning the upper portion takes a very steady hand! Calibration is terrible also.

Note: I bought a Select-A-Tenna, and it improves reception on both SRs
A GREAT DEAL. Well worth the $40-$50 (hmmm, same cost as the SR3)

As for FM, here are my findings:
1. The SR3 has much better sound.
2. The original SR is MUCH more sensitive than the SR3. It is possible
that this is due to the modifications, but I'm not sure. Anyone
comment on this?
3. The 110/280 kHz IF filter is a great idea. The SR3 has a stock 180kHz
filter.
4. Using SCA is great. I am a little disappointed that there are so few
SCA programs in the greater Boston area. Most stations are transmitting
data on their subcarriers. SCA requires a very clean local signal.
There is no DXing SCA stations.
5. SCS does a very clean, professional mod. [No relation to SCS]

** What kind of performance can I expect from the Superradio?

Compared to the average radio, you will get better reception.
Over a few weeks of listening, I compared the SR II to my Realistic
DX-400 (with an external antenna), listening both in the
day and at night; I live (directly) on the East Coast, 25 miles NE of
Boston, Massachusetts. The results:

Daytime AM (mediumwave)--I found a dramatic improvement. I can
regularly get several New Hampshire news/talk stations, including WNBU
900 and WZNN 930, that come in weakly with the DX400, if at all. The
SR's antenna really cuts down the noise that is ever-present during
the day.

Nighttime AM (mediumwave)--When the ionosphere is 'on', almost any
radio will hear DX. But the Superradio receives DX more consistently,
and with better selectivity than any other radio I've used.

Although the Superradio has only imprecise slide-rule tuning, I can
regularly resolve different stations 10 KHz away from each other. And
unlike so many shortwave portables, there's no overloading, at least
not on the internal antenna.

Also, as mentioned previously, the radio has excellent sound that'll
enhance your listening in almost any situation.

** What kind of outside/external antenna can I use for mediumwave?

People have spoken well of the Select-A-Tenna, an external loop
antenna, sold by Grove. This is about $50.

I've used the SR with my Carpet Loop antenna, with good results.
A few years ago, I had some very interesting results using that
antenna for MW with the DX400; I once was able to receive both
WJR and Radio Reloj on 760 KHz at will by flipping a knob on the
antenna.

In general, loop antennas are a good choice for mediumwave listening. The National Radio Club publishes loop plans; their address is in the appendix.

** What about those reports I hear of problems with the SR III?

Some people have reported poor sensitivity on the III when it was first released. Radio World (3/24/93) quoted a spokesman for Thomson Consumer Electronics indicating that some early models of the SR III have severe sensitivity problems.

These early models had the following date codes, a 4-digit code found on the box or in the battery compartment: (the first digit is ignored) x201 through x241.

** The dial calibration on my Superradio is off!

This is a common problem with slide-rule radios such as the SR. Many of us who are used to digital displays are thrown by this.

Andy Sennitt suggests using graph paper to plot frequencies of known stations versus the dial log, which is marked from 0 to 10, in tenths, on the Superradio. I'd suggest graphing small segments of the band (say, 800 to 900 kHz), until you get the hang of it. One can get within 10 kHz, which is good enough for most purposes.

(I last did this trick with a Realistic DX-160, which I used aeons ago. How soon I forget. :))

** Can the Superradio be modified for SCA reception?

Yes. Several manufacturers sell kits and assembled boards that can be used with the SR. SCS and Ramsey sell boards, while Bruce Elving sells complete Superradios with the modification. Here are Joe Jesson's comments on the SCS board:

"I recently ordered and received three SCA demodulator boards from SCS Radio Technology after noticing an advertisement in Radio News. Bruce Elving's SCA design uses a CA3089 IF/detector chip and a PLL (I designed his XR2211 PLL SCA demodulator) SCA. Bruce also sells FM receivers modified with the boards.

What was interesting about the SCS SCA board design, while it uses a CA3089E IF chip also, a multipole filter in front of the 3089 decreases main channel crosstalk interference (by 60 dB). David's board is of excellent construction, with no jumpers and small size to be inserted in an FM receiver's FM detector stage (before deemphasis attenuates the SCA signals).

Anyway, three pretuned boards are available from SCS, 57Khz, 67Khz, and 92Khz - $20.00 each, $60 plus $6.00 P&H for all three. I am satisified with the design and construction of each board. One area of modification I would make is to monitor the SCA signal's multipath and level with an x-y monitor. Use pin 13 of the 3089 chip for a signal level (scope y) output and pin 7 for the y axis

output. Of course levels must be set to set vertical and horizontal traces. A flat vertical line, max amplitude, is the ideal signal for tuning. A "wavy" line illustrates multipath. This is a great tool for tuning FM signals...

** Is a service manual available?

According to my SR II manual, service info is available from GE Publications Ordering at (502)-361-0987. To get service, GE recommends you write to:

GE Consumer Electronics Products
Manager, Consumer Relations
P.O.Box 1976
Indianapolis, IN 46206

The address for service manuals is:

Thomson Consumer Electronics Publications
Customer Service
10003 Bunsen Way
Louisville, KY 40299
Phone: 1-502-491-8110

Price of the manual in 1993 was $6 plus $3 handling; it's recommended you call first to confirm pricing. When ordering the manual, be sure to include the suffix, as the service data is revised with production changes. (My SR II is #7-2885F; the SR III is #7-2887)

Appendix A: Fixing and Modifying the Superradio

Disassembling the Superradio II

[Summarized from comments by Bruce Bacon, Ralph Brandi, R. Hardin, and Gregory Doerschler]

1. Remove ALL knobs in front, including the tuning knob, by pulling them straight off. A plastic fork is a good tool to use and won't bend the shaft. Be patient but firm--the knobs may be glued or taped on.

2. Remove the back screws, except for the antenna screw. Don't forget the screw in the battery compartment.

3. Remove the front cover by pulling it from the rear and _upwards_ so that it clears the power switch. The power switch is fragile, and a real bear to fix if you break it, so be VERY careful here. You may want to try removing the button from the switch *carefully*.

4. If you do break the switch, here are R. Hardin's instructions for repair:

"The power switch is very entertaining to reconstruct, especially if
you don't have all the pieces. Unscrew it, take off terminal plate
if it's still on (mine wasn't), find little metal slider thingy
that grips the terminals on the inside - it slides between terminals
1 and 2, or 2 and 3. There might be two of them, I only found one;
shake the radio over some surface where you can find it when it
falls out. Put it on terminals 1 and 2 (the off position).

The mechanical parts can be removed now for experimentation:
The button, switch case, and a plate with a funny wire in it
that's supposed to be in the back of the switch. There's,
what, 8 ways to try assembling it. Well, 4 ways if you
consider that POWER ON OFF has to be legible from the front
of the radio, and only 1 way if the plate is still in the case.
Put in plate with wire, put in button, and see if the button then
has two positions it's happy in, on and off.

(If you have a plate and a wire, instead of a plate with a wire,
there are more ways to try I guess.)

Leave the switch in the off position, which is the only one
it's really stable in without the terminals on, and put the
terminal plate on, the slider fitting into the slot in the
button. You may have to spread the fingers that were
supposed to keep the switch case together a bit.

See how nice the switch works now? Screw it back in, and
swing case back on, putting it on the top first and swinging
it closed. There's a little forcing past the tuning shaft.
Stress the tuning shaft, not the power button!

Fixing the Dial Calibration on the SR II
---

by Bruce Bacon:

I've had my SRII for a couple of years now, primarily tuning on the MW
side of the dial. The SRII is a great MW DX machine except for one
main drawback-dial resolution. Last weekend, I made a modification
which has made the resolution much more livable. If you're into
taking radios apart, give the following a try:

CAVEAT: If you haven't had an SRII apart before, be very careful with
the power switch. Take careful note of what it looks like before
removing it! I gave up and installed an NCR receipt printer rocker
switch (P/N 006-1050121). Much better, but a bit of a hack.

Remove the knobs from the front of the chassis (volume, bass, treble,
tuning). Remove the 6 screws from the back of the chassis. Remove the
screw from the battery compartment. Rock the handle and the chassis
should split open (watch out for the power sw). The speaker wires
connect both sides of the chassis, so be careful.

The pointer is a piece of plexiglass with an orange colored stripe in the middle. You won't be using the orange stripe anymore for frequency ident-ification, you'll use the left side of the plexiglass!

Find yourself a suitable scribe (I used an exacto knife). The receiver should still operate (careful with the power switch) even though it's opened up. I used batteries to reduce the chance of electricution.

Turn the dial shaft and start identifying stations. Using the scribe and the left side of the plexiglass, make a vertical mark every 50Khz (550Khz, 600Khz, 650Khz, etc). Be careful to tune the *center* of each station! I made a double vertical line for each 100Khz marker (600Khz, 700Khz, etc..) I guess you could get fancy and make a mark every 10Khz, but I think the dial face would get too crowded.

When you've finished with your scribe marks, you can button it back up. I've found by using the scribe marks in conjunction with the left side of the plexiglass, parallax is virtually eliminated. Frequency identification is much easier. The main thing is to take your time and make sure the frequency you think you are on *is* the frequency you are on!

Improved FM Filter Modification, SR II
---

by Ralph Brandi:

I've found it a worthwhile modification to the Superadio II to replace the stock ceramic bandwidth filter (230 kHz? 280?) with a narrow filter 150 kHz wide. It doesn't improve sensitivity, but it does wonders for selectivity. For instance, with the 150 in, I can now receive WXPN-FM in Philadelphia, 88.5, (not *well*, but well enough) right next to local powerhouse WBGO-FM in Newark on 88.3.

I got my filter from a friend, along with some articles in the hobby press from a couple of years ago. The source I have listed for 150 kHz ceramic filters operating at an IF of 10.7 MHz is:

Hosfelt Electronics, Inc.
2700 Sunset Blvd.
Steubenville, OH 43952
(800) 524-6464
Part # 27-109, $1

I understand there's a minimum purchase, but I don't know what it is, since I didn't get mine there. I'm lucky if I grab the correct end of the soldering pencil, but I installed mine this past weekend. I installed a Radio Shack IC socket in place of the old filter (8-pin wire wrap, cut in half and with one pin removed, then cut off the excess wire), then plugged the new filter into the socket.

The filter is a little tough to get to; it's on the second PC board under the dial. It basically involves disassembling the entire radio,

more or less. It's right next to a "square metal box-shaped thing" as my friend with the filters put it (yes, I'm electrically incompetent).

Things to beware of:

1. Don't break the power switch. It's a bear to put back together correctly.

2. Make sure you remove the tuning dial from the outside before you open the radio. Despite the radio's best efforts to fool you into thinking that it doesn't come loose, it does.

3. Don't mess with the dial cord. If it comes loose, it's a pain to get back on, if you can figure out how it goes.

Of course, you shouldn't infer from this that any of this happened to me.... :-)
--

Sensitivity Fix for some Superradio III's

From the March '93 edition of _DX Ontario_:

"Dave Maunder of Brigus, Newfoundland, has had some interesting experiences with his Superadio. He writes, 'Although an R-5000 is my 'workhorse', I've often used a GE Superadio II for medium-wave listening. When the Superadio III became available last fall, I ordered one from Universal Radio. Anxious to do a side-by-side comparison with the old model II, using only the built-in ferrite rod antenna for the test, I was disappointed to find that my new model III exhibited a high background noise level and much poorer sensitivity.

'So I disassembled the Superadio III to do a little 'tweaking', and was surprised to find that performance instantly improved when the 2 halves of the cabinet were separated by the length of the speaker connecting wires. The noise level dropped drastically, and the sensitivity came way up. I now could easily hear VOUS, a 50-watt U.S. Armed Forces station in Argentia, Nfld, on 1480 kHz, and St. Pierre-Miquelon on 1375 was easy. (This at 1:00 p.m. local time at my home about 40 miles from St. John's.)

'But when I reassembled the radio, performance deteriorated to the original level. There seemed to be some kind of interaction between the speakers in one half of the case and the circuitry in the other half. I suspected that it was the strong magnetic field saturating the antenna rod's ferrite core, so I wrote GE asking if they had a fix.

'They seem aware of the problem, and suggested simply reversing the two leads from the circuit board to the speaker unit. I was skeptical, but I tried it and their cure worked perfectly. Not only is the GE Superadio III a hot MW-band receiver, (British, German and many other European MW stations are audible nightly here on the edge of the North Atlantic, especially when using my 100-foot long wire)

but, on strong signals, the audio in the "wide" position is exceptional...indeed, very close to FM quality in range and clarity.

'Perhaps this tip might be useful to someone else who buys a GE Superadio III. Not all units may be affected, but if the noise floor seems high and sensitivity poor, try reversing the speaker leads!'"

APPENDIX B: Superradio Vendors and Related Accessories

Here's a list of vendors that sell the Superradio and related accessories:

Bennett Brothers, Inc., will export a Superadio for you; they have addresses in both New Jersey and Illinois.

Bennett Brothers, Inc.
30 East Adams
Chicago, IL 60603

Orders: (312) 621-1600
(800) 621-2626

Bennett Brothers, Inc.
211 Island Road
Mahwah, NJ 07430

Orders: (201) 529-1900
(800) 631-3838

SCS Radio Technology
5742 Fairoak
Springfield, MO, 65810
Phone: 417-881-8401

Manufacturer of add-on SCA demodulator board for the SR.

Bruce F. Elving, PhD
c/o FM Atlas Publishing
P.O. Box 336
Esko, MN 55733-0336

Sells Superradios modified for SCA on both 67 and 92 kHz subcarriers.

Universal Radio
6830 Americana Pkwy.
Reynoldsburg, Ohio 43068
(800) 431-3939
(614) 866-4267
SWL Catalog: $1.00

Sells the Superradio

NRC Publications
Ken Chatterton, Manager

P.O. Box 164
Mannsville, NY 13661-0164

The National Radio Club is a MW club that sells numerous plans and references for MW antennas, including the following:

NRC Antenna Reference Manual, Volume 1
NRC Antenna Reference Manual, Volume 2
Loop Antennas Design and Theory (ISBN 1-878994-06-9)

Send NRC Publications a 29 cent stamp and ask for the NRC Publication Catalog for current pricing.

Acknowledgments and Thanks

The following contributors had much to do with this FAQ. I thank them for their help and advice.

Ralph Brandi, Richard Hunt, Andy Sennitt, Mark Gilstrap, Joe Jesson, Paul R. Mount, Bradlee Beer, Dave Markson, Tim Flannery and Steve Byan. Special thanks to Chase Cotton for sending me over 300K worth of archived SR postings from rec.radio shortwave!

This FAQ is dedicated to my late mom, Jeanette. She owned a Superradio (which I bought for her) and liked it a lot.

Comments and Suggestions

I intend to keep up this FAQ and update it as needed. I'm looking for the following items for the next edition:

* Disassembly instructions for the SR III
* AM filter mods
* External DC power mods
* Any information on the original Superradio

Email your comments to moisan@bronze.lcs.mit.edu. I can be reached by regular mail at:

David Moisan
86 Essex #204
Salem, MA 01970-5225

Good listening!

2019. NEW: LA-RADIO - Metro Los Angeles Broadcast Radio List

Newsgroup: rec.radio.broadcasting
Date: 1994-06-13 23:33:06 UTC
From: Terry Eugene Knab <tknab01@services.dese.state.mo.us>
Message-ID: <2tiqbi$f6e@vixen.cso.uiuc.edu>
Source record: 39675

For those of you in the LA Area, this might be of interest
---------- Forwarded message ----------
Date: Wed, 8 Jun 1994 13:03:05 CDT
From: Robert L. McMillin <rlm@helen.surfcty.com>
To: Multiple recipients of list NEW-LIST <NEW-LIST@VM1.NoDak.EDU>
Subject: NEW: LA-RADIO - Metro Los Angeles Broadcast Radio

la-radio via la-radio-request@helen.surfcty.com

This is the la-radio mailing list. The purpose of this list is for
the discussion of broadcast radio as it exists in the metropolitan
Los Angeles area, including Orange County, and those parts of the
Inland Empire that can receive LA radio.

la-radio is an open list; anyone may join or leave at any time.
Privacy buffs take note: as part of the mailing list, your e-mail
address (dissociated from your name) may be retrieved by anyone.

This list is run automatically by the Majordomo mailing list server
software. That fact probably won't mean much to you unless you are a
Unix system administrator who has to maintain mailing lists.
However, it does mean you may subscribe or unsubscribe automatically.
All of the following commands are operated by e-mailing:

la-radio-request@helen.surfcty.com

To subscribe, send a message containing only the single line:

subscribe

To unsubscribe, send the single line:

unsubscribe

To get a complete list of commands available from the majordomo
server, send this:

help

Owner: If you have to contact a human being, send mail to

la-radio-owner@helen.surfcty.com

The la-radio list is run out of the surfcty.com domain, which at the
moment is one UUCP hop from the Internet. Because of this, messages
aren't mirrored instantaneously. On average, it seems to take about
30 minutes round trip, but this depends on a number of factors.
When/if surfcty.com becomes part of the Internet, this will go down
substantially.

2020. Need help with AM station ID's

Newsgroup: rec.radio.broadcasting
Date: 1994-06-13 23:33:08 UTC
From: martin@cod.nosc.mil
Message-ID: <2tiqbk$f6i@vixen.cso.uiuc.edu>
Source record: 39676

I need help with some AM station id's. At the Baltimore-Washington
airport, I received WBWI, a TIS station on 1160 kHz. Usually, TIS stations
are on 530 or 1610 kHz, with a few notable exceptions. They almost always have
four letters followed by a group of numbers as a call-sign. What is WBWI? How much
power does it have? Is this a short-form callsign for something
more typiical of a TIS station. They were advertising the Baltimore
zoo and aquarium.
I also got a station in Boston W??? on 1120 kHz, playing folk
music and identifying Concord (I presume NH) as the city of origin.
About a year ago I got WBIS, Bristol CT on 1120 kHz, or am I mistaken? Was WBIS
on 1120? Iss this Concord station new? When I called directory assistance in Ct,
they had no listing of a WBIS in Bristol.
On 1170 kHz, also from Boston, I heard either WBIS or WGIS.
What is this station? Are there in fact, two New England stations on
1120 kHz? And what about this W?IS on 1170?
I was also surprised to hear CHSJ from St. John NB on 700 kHz. What kind
of daytime power do they use? And what kind of directionality? This was a
mid-afternoon ground wave. Your help in answering any of these questions
is greatly appppreciated, preferably by email.
Doug Martin martin@nosc.mil

2021. Re: Bay Area Subcarrier List

>
>I just happen to have my SCA Radio here and I will tune it and
>give you the list.
>
> 67 KHZ Subcarriers

>100.3 KBAY Data.

Nope. The data you hear is from a 57 KHz subcarrier (phase-locked third harmonic of the pilot). I believe that the data you attributed to 67 KHz on KRQR is also from a 57 KHz carrier.

These are Cue Paging signals (the data is 202-style). The idea is that a signal such as this interferes less with the main channel than the "non-synchronized" subcarriers. In practice it seems to work.

2022. Z89 Syracuse

Newsgroup: rec.radio.broadcasting
Date: 1994-06-13 23:33:13 UTC
From: ar577@FreeNet.Carleton.CA
Message-ID: <2tiqbp$f7a@vixen.cso.uiuc.edu>
Source record: 39678

I am interested in what kind of a bite...listener wise...Z89 takes out of the Syracuse radio market. For those of you not familiar with Z89, it is a Hot, Fresh CHR that Syracuse University operates and, in the 15 or so years I have been going to Syracuse it has always been the freshest sounding Top 30 style station. So BTW I am curious to find out what sort of impact it has on commercial radio in Central New York.

Thanks.

2023. Offshore Radio Exhibition in Holland

Newsgroup: rec.radio.broadcasting
Date: 1994-06-13 23:33:19 UTC
From: juergenb@ecs.comm.mot.com

In article <2ol30k$agk@vixen.cso.uiuc.edu>, dzubai1@umbc.edu (Daniel Zubairi[I'M A PERSON]) writes:

>I would like a list of broadcast equip/production equip suppliers please.

Ditto. New community-based public radio station starting fulltime broadcasts this month needs studio equipment for first arts and cultural formatted station in greater San Francisco/North Bay area. Directories of audiophile equipment at discount prices for non-profits will be helpful. Donations greatly appreciated and acknowledged. We think radio can be an artform to bring an eclectic mixture of classical and other musics to communicate ideas and emotions to residents and visitors to California's wine country. Underwriting on-air credits and tax-deductions given for in-kind donations.

Send E-mail to my attention via AOL. Thanks, Tim Tattan

From: lukec@netcom.com
Message-ID: <2tiqc9$f9c@vixen.cso.uiuc.edu>
Source record: 39683

When does Mancow start up on the Blaze. I need to figure out a way
to get some tapes and see how well he does after a month off.

Also for KYLD listeners, did Luv Cheese leave? All I hear is Victor
and Big Lou. Man Morris and Jurome sucked! Victor and Big Lou are ok all
they do is sit around and hold contests, pretty boring. Well Mancow's
departure was convinent in that I was getting out of school so I just sleep
in now. It does feel like somethings missing though.

I'm sitting here with a stack of Mancow's pictures next to me
including a promotional one that I had him sign to my friend Jacob. It was
a bad picture of Mancow's face pressed against Big Lou's butt and says
"Spanks for listnin". Anyway he signed it "Jacob - are you Albino Boy's
(that's me) boyfriend", asshole I played like I was going to hit him with
and flicked it at him, he didn't even flench just a strand of hair moved.

Anyway thanks for the info!

From: qdecheval@aol.com
Message-ID: <2tiqcb$f9j@vixen.cso.uiuc.edu>
Source record: 39684

In article <2og12c$cf1@vixen.cso.uiuc.edu>, rrb@deja-vu.aiss.uiuc.edu (AIRWAVES E-PUBLISHING) writes:

:> ...it hit me that the FM
:> dial is noisy and downright crowded these days. Stations I used to
:> receive easily are now difficult if not impossible to get.

Indeed, with the addition of new local signals, it appears that something an engineer I asked has dubbed "RF white noise" or something like that is beating back the fringe area of a lot of FM signals. For example, in Santa Rosa, California, about 60 miles and a few mountains north of San Francisco, a few years ago you could get fairly good FM reception of most SF stations. Today, with only a couple of new FMs & translators added in the region, most of the SF FM signals are barely audible in a car radio and gone from home receivers (and it's not a problem with my car radio, thank you).

Of course, the new policy allowing new drop-in stations is allowing the group I am working with to start the North Bay's first public radio station on a very tight co-channel deal (when we're off the air, a more powerful station from about 75 miles south comes in, in stereo, in many parts of the county, thanks in part to the terrain and altitude; & creates some hellacious interference in some towns for both stations).

:> Is all that worth curtailing the coverage of big-city stations

:> that offer better-executed (one hopes) and more diverse formats?

Has everyone forgotten the wisdom of the Communications Act of 1942 (have I forgotten the correct year already?) which states that radio stations are licensed in the "_Public_ interest, convenience, and necessity," not to merely sell advertising and play tunes to enrich some quad-opoly which further reduces the few decent jobs in this industry? ("the rich get richer while the rest of us...") Licensing more stations are not generally resulting in a real growth of good jobs in the radio industry, since simulcasting, LMAs, and so-called duopolies have reduced the choices and management control of commercial radio stations to a fraction of what has been the number of distinct radio services and voices on the dial!

:> Docket 80-90 has downgraded FM to a strictly local service. While
:> this goes unnoticed by most listeners in metropolitan areas... listeners
:> in outlying areas have more local choices at the expense of no

longer
:> having access to a broader, regional spectrum of choices.

It's a shame that listeners, and broadcasters, in smaller markets aren't as able as they used to be to hear some examples of excellence in radio of many formats that they would tend to hear from larger market stations. It helps to develop a sense of how to improve local radio apart from signing onto a syndicated service and giving up on having local talent learn how to be good communicators. (ex: How many good talk show hosts learned some of their skills listening to people such as Larry Glick when he was on WBZ Boston?)

= As long as WOWO's nighttime service isn't impaired in its
primary
= service area, its ability to serve the market should not be harmed.

Isn't this what Class A FMs are for? Should all stations now be limited to serving no more than 30 miles from their transmitter sites? Why shouldn't there be some worthwhile clear channel AMs to serve motorists and others over long distances, especially based on the merit or quality of their programming (touchy subject, I know). Why not reassign some AMs with decent skywave coverage (directionals are very efficient) for some public radio operators, for example. This "marketplace" driven laissez-faire attitude to who gets the best broadcast licenses has contributed to turning an already mediocre medium into something less than a throwaway classified tabloid newspaper.

Is it so distasteful for the FCC to set some policies to _plan_ the use of the spectrum so that most everyone is guaranteed certain services, such as all-news, classical music, jazz, and variety public radio services?

BTW, please explain 80-90 for me.

2030. Articles, etc. needed for Radio Resistor's Bulletin #8

Newsgroup: rec.radio.broadcasting
Date: 1994-06-13 23:33:32 UTC
From: "Frank Haulgren - R.R. Bulletin" <haulgren@well.sf.ca.us>
Message-ID: <2tiqcc$f9s@vixen.cso.uiuc.edu>
Source record: 39686

Radio Resistor's Bulletin, a forum for the discussion of what ails non-commercial radio in the US and beyond, is soliciting articles and information for its next issue - #8.

Over the next few weeks I'll be trying to pull the next one together and as always I'll be relying heavily on supporters and readers to make it happen. The Bulletin needs articles and information.

Some ideas? I'd like a piece about goings on north of the boarder - Canadian college or alternative (Co-Op Radio, Vancouver??) radio or low-power licensing by the CRTC or even something on the state of the CBC. I know there has been talk in some quarters about underwriting and just how far US non-comms can push an underwriting announcement before it becomes a commercial. How about the myth of "liberal" bias on NPR? How about an update on all those micro cases pending with the FCC and in the courts? Commentaries and observations are welcome too. Or better yet you tell me what you want to write about...

As always ideas, information, letters, and even art work will be greatly appreciated.

Let's say the deadline is the end of the month (6/30) and that the Bulletin will come together by mid-July.

For those of you who are not familiar with the Bulletin the last issue (still available on paper or by e-mail) featured stories on London's all-women station Brazen Radio, KUNM-FM, Albuquerque, and the threat of local conservative activists, a personal piece on the more subltle mission of college radio, Rachel Goodman's "Arguing With Money:It talks, you listen", thoughts from Stepehn Dunifer of Radio Free Berkeley and more.

Looking forward to hearing from you,

Frank Haulgren

2031. San Diego Report

Newsgroup: rec.radio.broadcasting
Date: 1994-06-13 23:33:37 UTC
From: Chris.Carmichael@artecon.com
Message-ID: <2tiqch$fag@vixen.cso.uiuc.edu>
Source record: 39687

Greetings from north San Diego county:

Buzzline: The San Diego Padres have/are sold; and according to the press, they might move in 1999. As previously reported, XETRA-AM (690, 50kw, U) is making a grand-slam effort to be a flagship station for a professional team. The Nobel broadcast station has bid $17 million over five years. KFMB-AM (760 50kw U-D, DAII-N) is currently paying $1 million per year. With the potential move in mind, XETRA *might* soften their package; giving KFMB another five years. In two weeks the broadcast rights for radio will be known. (This doesn't effect XEXX-AM, Tijuana, B.C. Mexico, espanol rights.)

StarPower: KFMB-FM "Gee, what format today" approach the last fortnight is over. The former B-100 is now known as Star-100. The station plays music and hits from the 90s, and 80s.

The Best: From my vantage point in Carlsbad, California, I can get a majority of broadcast stations from Los Angeles, San Bernardino, Palm Springs, San Diego, and Tijuna. Here's my *list* of what I consider "The Best and Worst."

Best Local Talk Show:
No questions: "Ask Mr. KFI" on Saturday and Sunday, on KFI-AM Los Angeles. If you've heard him, you'll know that he is talented, quick-witted, and consistent. Followed closely with Stephanie Miller, weeknights from 7 p.m. to 9 p.m. on KFI.

Best Music: KKOS-FM 95.9 Carlsbad, California. This station is not afraid to play good local talent in regular rotation; plus with artists dropping in the studio (i.e. Al Stewart, Robert Vaughn, John Hiatt for example) it gives a local aspect to major recording stars.
The music is not from the past, but from the "now."

Best Sports: XETRA-AM 690 Tijuana. With studios in San Diego, and Los Angeles, coupled with ESPN radio on the weekends, the casual listener doesn't feel left out of converstations.

Best News: Again, KFI. This station staffs its own news department around the Los Angeles basin. The newscast include --LIVE-- cut-ins during the broadcast. Traffic reports are clear, and consise.

Best Syndicated Program: With Larry King official gone from radio, I'm partial to Jim Bohannon (sp??); but KCEO, Carlsbad, has him from 2 - 5 a.m.
Art Bell, from Las Vegas, is different. No clear winner here, in my opinion, but the nudge goes to Art Bell.

Worst Syndicated Radio: Michael Reagan. Why ask Why? Followed closely with Tom Leykis. (I know I'll get *flamed* on this, but Tom, get REAL.)

Worst Local Radio Show: Xavier Hermosillo on 710Talk, KMPC Los Angeles.
(Xavier, if you're worried about cross-town KFI/Stephanie Miller so much,
move your timeslot! Stick to radio-with-pictures KCOP!)

Wasted AirSpace: any radio station that simulcasts in the same market.

Un-used talent: KMPC's Steven Marmel. He answered the call in talk-show host
tryout, and he's good! His latest gig was Memorial Monday morning drive.
(Hey KMPC, if you don't want, it's your mistake!)

[Flame resistant keyboard and monitor hooked up; ready to receive . . . .]

Thanks!

2032. CKLW radio sounds uploaded to alt.binaries.sounds.misc

Newsgroup: rec.radio.broadcasting
Date: 1994-06-13 23:33:38 UTC
From: ao944@yfn.ysu.edu
Message-ID: <2tiqci$fam@vixen.cso.uiuc.edu>
Source record: 39688

The following is information on sound files I uploaded to the alt.binaries.sounds.misc newsgroup. I had originally cross-posted these messages to this group, but for some reason they didn't make it out, so I'll try again, combining both my original articles into one:

[This is on the CKLW news intro files. BTW, all of these are in .WAV format.]

If you lived in or near the Detroit/Windsor area in the mid-60's or early 70's, you are most likely familiar with the "CKLW 20/20 News" trumpet intro. This may have been (probably was) used in other radio markets as well. It makes a good error beep under Windows if you REALLY want to make sure that no one ignores the beep! Or use it for an alarm signal, or pretend you are Byron MacGregor and do your own newscasts... :-)

There are two variations on the sound, both in the archive. One is basically just the three trumpet notes. The other also includes a few seconds of the sound that came after the trumpets. I don't know how I was lucky enough to get a tape of this (what were the chances of having a tape from the one time the engineer screwed up and didn't turn on the announcer's mike immediately?), but I did and here it is. Use whichever you prefer.

You probably should know that this was not actually recorded in the 60's. Rather, a couple of years ago CKLW-FM tried to revive their original format, as an oldies station. Unfortunately, I didn't live close enough to Windsor to receive it, but a friendly person here on the net who did live close enough to pick it up rolled tape on it for about an hour and a half and sent it to me (thank you again if you are reading this!), and as I say, just happened to catch a nice long news intro with no announcer talking over it for the first few seconds! But it is the same intro that they used in the 60's (BTW, last time I was in Detroit CKLW had changed formats again... still playing oldies, but NOT the kind they played much in the 60's, and they aren't using their jingles and sounds anymore). :-(

I use this sound on my computer to announce when Windows is fired up. It sure gets the attention of anyone that happens to be around!

[The CKLW radio station ID's:]

After posting my news intro from CKLW, it occurred to me that someone might like the station ID's from CKLW. Here is a long one and a short one. The long one really was recorded back in the 60's and is a copy of a copy of a copy, so the audio fidelity isn't that great (it also needed just a bit of audio enhancement to sound right, but I'm not going to tell

you where so you won't be too critical). :-) The short one was recorded during CKLW's attempt at a comeback (on FM only) a couple of years ago (the same tape that I got the news intro off of).

Please don't ask me to e-mail individual copies of this if you don't get the alt.binaries.sounds.misc newsgroup. It's fairly difficult for me to post anything this large, and I really don't have time to fill individual requests. Thanks.

Jack

2033. CKLW radio station ID's

2034. WTIC-FM....Something's UP!!!

Newsgroup: rec.radio.broadcasting
Date: 1994-06-13 23:33:40 UTC
From: PGEORGE@WELLESLEY.EDU
Message-ID: <2tiqck$fao@vixen.cso.uiuc.edu>
Source record: 39689

Here's something you may want to watch..... I was doing my DX habit during
the very strong E-Skip opening on 6/11/94 at around 1830 and stumbled across
96.5 and heard to following.....
"February 5, 1940.....96/TIC-FM signed on the air as W1XSO. December 8,
1957....WTIC-FM produced the first dual stereo broadcast in Southern New
England. May 12, 1977.....WTIC-FM became 96/TIC-FM. Four days from now....
96/FIVE.....WTIC-FM in Hartford will take the next step in the evolution,
54 years in the making."
Something's up "on-the-air" at WTIC-FM in Hartford. Get your "Long
Playing VCRs" rolling. I wonder what is going to happen? This oughta be
VERY interresting. Details coming soon. Wednesday is the day, and according toDamon Scott
(the jock who talked to me), NOON is the time. See you later.
73's.

2035. Washington, D.C., RADIO WATCH

Newsgroup: rec.radio.broadcasting
Date: 1994-06-14 00:11:34 UTC
From: Tom Lacko <LACKO@ENH.NIST.GOV>
Message-ID: <2tisjm$icg@vixen.cso.uiuc.edu>
Source record: 39690

Sorry for the sporadic postings lately but as you can see from my sig, I've
been busy lately!

WASH FM 97.1 (Soft Rock format) is looking for a new night time personality to
replace Stan Reynolds who died on May 30 after suffering a heart attack.
Reynolds came to WASH from WMGF in Orlando 8 months ago. Mark Harris will
fill in on the "After Hours" show until a replacement can be found. Stan
Reynolds was only 43 years old.

WMZQ AM 1390/FM 98.7 (Country format) is losing morning drive personality
Sandy Weaver. Sandy's husband, Bob Carman, works for IBM and is transferring
to Atlanta. Sandy doesn't want a long distance marriage so, she's leaving her
top-rated morning radio show on June 22. Weaver has nothing lined up in
Atlanta yet. She plans to start looking as soon as they get settled down
in Georgia. The search is on for Sandy's replacement at WMZQ.

WWRC AM 980 (Talk format) announced that Joel A. Spivak has been signed and
will return to the station. Spivak, who was back on the air on Thursday,
June 9, comes back to talk about everything under the sun. Station management
hopes the high ratings he had at the station in the past also return to WWRC.

WBIG FM 100.3 (Oldies format) will carry Washington Redskins football this
Fall and Winter. Station owners, Colfax Communications, decided to switch
the 'Skins' FM outlet from their Classical station, WGMS FM 103.5, to WBIG
in an effort to reach a larger market share. On the AM band, Redskins'
football will be heard once again on Colfax's WTEM AM 570.

WXTR FM 104.1 (Oldies format) gets a new voice beginning Monday, June 13.
Popular sports voice Johnny Holliday will co-host the morning show with
Bobby Bennett. Holliday joins WXTR after a long stint at WMAL.

2036. Re: Aircheck exchange?

Newsgroup: rec.radio.broadcasting
Date: 1994-06-14 00:11:35 UTC
From: qdecheval@aol.com
Message-ID: <2tisjn$ich@vixen.cso.uiuc.edu>
Source record: 39692

In article <2od5ki$mjm@vixen.cso.uiuc.edu>, benjik@aol.com (BenjiK) writes:

::Is anyone interested in exchanging some airchecks via mail? I have quite a
::selection of Top 40 jocks from the last few years. Interested? Write back.

Personally, I'm not as interested in Top 40 airchecks as in personalities (ie., adult formats), especially local public radio & "full-service: formatted stations. I'd really like to hear some airchecks of all sorts of stations in Europe & the UK, Canada (especially French pop and adult music stations) or elsewhere.

I'd also love to hear what Larry Glick in Boston is up to. He was one of my inspirations growing up in the Midwest when he hosted the evening talk slot on WBZ. (Oh to hear some good radio worth DXing on AM anymore, without some cheesy religious or Mexican station interfering!)

I have some airchecks worth re-listening from CBC, RTE, and US stations, as well as some of my own of an unusual classical-folk-world "preview" program I've been hosting from the transmitter site for the imminent fulltime debut of a brand new public station in Santa Rosa, California.

Anyone in Quebec or Europe want to exchange airchecks of your better local stations? I'm in the San Francisco Bay area, and can get some reasonably interesting contemporary jazz, specialty public shows, such as West Coast Live (a good variety show), or talk programs for you on tape that would be quite different than what you can probably get from your local stations.

Send me E-mail thru AOL if interested.

2037. AUDIMAX

Newsgroup: rec.radio.broadcasting
Date: 1994-06-14 00:11:36 UTC
From: robert@manukau.ac.nz
Message-ID: <2tisjo$icj@vixen.cso.uiuc.edu>
Source record: 39691

We have a small low power fm MONO station and we have obtained a CBS AUDIMAX which loo
ks mint, but we have no Manual.
Inserting it in the audio chain it shows some small gain reduction and there are a num
ber of controls internally that will enable us to set it up but no one knows which do
es what.

what the setup routine is.
The level in and out looks like +4dbm native and the desk output looks like 0dbm
so obviously I have to re set the input level.
I want to use the audimax to ride the gains as the operators at our station
don't watch levels, and some are not sighted, so all they can do is listen
and hopefully I can use this device to ride shotgun.
We have a peak limiter as well, but the AUDIMAX should help us maintain a constant aud
io output.
The pots are not numbered and neither are the boards, so any info you provide will hav
e to refer to the first board from the right looking from the front panel top etc

NNTP-Posting-Host: news.cs.utexas.edu

The best AM radio I have used is the Delco AM/FM radio in my
car. I have found it superior to the GE Super Radio III, the Radio Shack
table radio and the JVC AM/FM stereo I have at home. I assume one could go
down to the local General Motors parts department at your local dealer and
order one. (I have no idea what the price would be, but I would guess it is
< $100) Of course you would either need a bench power supply, a 12 volt
battery or a car to power it.

I will say the GE Super Radio III is better than my other radios
at picking up distant FM stations, but I have been a little disappointed
as to its AM performance.

2041. REPORT: EUROPEAN FM RADIO

Newsgroup: rec.radio.broadcasting
Date: 1994-06-14 00:11:44 UTC
From: charles.hobbs@support.com
Message-ID: <2tisk0$ict@vixen.cso.uiuc.edu>
Source record: 39696

To:articles@airwaves.chi.il.us

N> Best of all...get ready to applaud...I hear *NO* full-time country
N> stations in Europe!!! A few stations would play country for a few
N> hours and then switch to other music (these stations were either AC
N> or govt. all-purpose FM mix stations- most common in Germany).

US country music would be a "specialty" format over there. You'd just as
soon hear a station playing all "Oom-pah" music, or all bagpipe music in
the US, as one would hear an all-country station in Europe.

2042. FCC tutorial (was: Re: WBAU/WHPC)

Newsgroup: rec.radio.broadcasting
Date: 1994-06-14 00:11:45 UTC
From: JOHN SCHMIDT <schmidt@auvax1.adelphi.edu>
Message-ID: <2tisk1$icu@vixen.cso.uiuc.edu>
Source record: 39697

Well, It seems about time to post a tutorial on the FCC rules concerning NCE station allocations, but to explain it in detail would take far more than 10 K, and you would all be to sleep after the first 2k, so I will try to simplify.

First the disclaimers: Don't use this as a basis for an FCC application, it's missing many of the final details, see 73.509 of the FCC rules, and the rulemakings leading up to it for more details. You have to have the actual coordinates and curves for the other stations involved (generally from their engineering filings) to do this, not some figures from M street or the Broadcasting annual. You are best off hiring someone who does this for a living, if you are staking the success of your application on it.

There is a basic difference in the way the channels below 92.0 are assigned from those above 92.0. Those below 92.0 (NCE) are assigned on demand, if the application meets certain interference criterion, which I will describe below.

Those above 92.0 are assigned after a rulemaking allocating a frequency to a community, where the mileage between transmitters must exceed certain distances based on the "class" of the station.

In both cases the rules concern stations on the same frequency (co-channel), 200 KHz. removed (First adjacent channel), 400 KHz removed (Second Adjacent), and 600 KHz removed (Third Adjacent) (The adjacent channels apply to frequencies both above and below the concerned channel). There are also mileage separation requirements for stations on frequencies 10.6 or 10.8 MHz apart (local oscillator radiation interference).

Stations on 91.9, 91.7 and 91.5 must meet the NCE demand rules for interference to/from stations below 92.0, and the "commercial" mileage separations for intrerference with stations above 92.0

NCE stations within 199 miles of the US-Mexican border have their own special rules.

There are also a special set of limitations for NCE stations at varying distances from TV channel 6 transmitters, ranging from 265 Kilometers for 88.1 to 154 Kilometers for 91.9.

Coverage Areas-- The coverage areas of stations (including NCE stations) are based on two things "Height above Average Terrrain" (HAAT) and "Effective Radiated Power" (ERP) HAAT is determined by determining the height of the antenna radiation center above the average height of the terrain in at least 8 directions (starting from North every 45 degrees), for distances of 3 to 16 KM (2 to 10 MI) from the transmitter site. There will be, therefore, at least 8 HAAT's for each station, one for each radial. The licensed HAAT is the average of the 8 required HAAT's, but the individual HAAT's are used to draw the coverage map. ERP is determined by taking the Transmitter Output Power,

subtracting the loss in the transmission line between the transmitter and the antenna, and multiplying it by the antenna power gain. Antenna Power Gain is determined by the manufacturer, and is related to the number of "bays" stacked vertically for the antenna. For existing stations, ERP is specified on the license or construction permit.

The coverage area we are most concerned with is called the Primary Coverage Area. This is the area predicted to receive a 1 millivolt per meter or stronger field strength. The distance from the transmitter site to the contour defining the edge of this coverage area is determined from a graph supplied by the FCC called the F(50-50) curves. You use this curve with each of the HAAT's calculated above and the ERP (or ERPs for directional stations) to determine the distance to the edge of the primary coverage area in each of the (at least) 8 directions, and connect the points smoothly to plot the "primary coverage area" If the HAAT is under 100 feet in any direction, you assume a 100' minimum. There are special rules if some or all of the radial is over a large body of water or outside the USA. (it's not that water affects VHF propagation particularly, its just that if a significant part of the coverage is over a large body of water, that coverage area is not serving any population.)

Stated in a somewhat oversimplified manner, a station shall not create interference to any other station within that station's primary coverage area, nor shall it receive interference from any other station within it's primary coverage area; when the stations concerned are co-channel, first, second, or third adjacent.

Interfering signal contours are figured using HAAT's and ERP's with another FCC supplied graph called the F(50-10) curves.

What is considered interference depends on the separation between channels:

For co-channel stations, there is interference if the interfering 0.1 mV/m contour crosses the primary coverage 1mV/m contour, i.e. if the interfering signal exceeds 1/10 the field strength of the protected station within its primary coverage area.

For First Adjacent stations, there is interference if the interfereing 0.5 mV/m contour crosses the primary coverage 1mV/m contour, i.e. if the interfereing signal exceeds 1/2 the field strength of the protected station within its primary coverage area.

For Second Adjacent Stations, there is interference if the interfereing 10 mV/m contour crosses the primary coverage 1mV/m contour, i.e. if the interfereing signal exceeds 10 times the field strength of the protected station within its primary coverage area.

Finally, for Third Adjacent Stations, there is interference if the interfereing 100 mV/m contour crosses the primary coverage 1mV/m contour, i.e. if the interfereing signal exceeds 100 times the field strength of the protected station within its primary coverage area.

There are special rules (and tons of case history) if stations have existing interference and one of them proposes a change in its facilities. There are

also various grounds to apply for a waiver of the interference. It is much easier to get a waiver to receive interference from others, than to create interference to others.

In the case of WNYU on 89.1, they must protect and be protected by 88.5, 88.7, 88.9, 89.1, 89.3, 89.5 and 89.7. In a large metropolitan area like New York, with lots of potential interferers, it takes quite a while to check all the potential interference situations.

My FCC rules service still lists 89.1 as reserved for the UN in NYC, with an allocation of 20 KW at 500 feet.

It also indicates that for NEW NCE stations, the minimum power is 100 watts at 100 feet AAT, i.e, no new 10 watters.

If you look at each station between 88.5 and 89.7, as it existed before WNYU went on, and plot their contours, you will see what directions WNYU was allowed to let their signal propagate. I suspect the direction their directional antenna points is chosen to allow them to run as much power as possible without interfering with or receiving interference from any of these stations.

Dan Bammes says:
>20 years in this business has taught me that:
>C. National agency buys for big-time clients are made by 24-year-
>old media buyers fresh out of college who normally haven't
>even visited the cities where they're buying radio.

Jim Grey responds:

>This is why my station airs "TGI Friday's" spots, when the nearest
>Friday's is 75 miles away, well outside our coverage area. If I >had a
dollar for every listener that's asked me about it...

I believe the reason your station (WZZQ/Terre Haute) runs the
"TGI Friday" spots is because you belong to the "ABC Radio Network" and
part of the agreement is that you will run all national commercials that
ABC provides to you in exchange for their services.

By the way, I've had the opportunity to hear you on WZZQ, keep up the great
work!

A different animal, a different keeper...?

Norman McLeod

A third of a loaf, they say, is better than no bread. Now we have 107 - 108 MHz reserved for low-power stations, according to the latest pronouncements from the Radio Authority. What this means is that - at least in the first instance - we should be spared the excuse "there are no frequencies available" when a plan to put a community station on the air is hatched.

But still we have the problem that no specific provision for community radio exists in law, and that would-be community stations still have to apply for licences in a context and under a system that is heavily weighted against them. The handful of stations that have made it to the air have done so in spite of the arrangements currently in place, not thanks to them.

The Radio Authority is aware of this deficiency, and we have been promised that they will be pressing for CR to emerge as a distinct layer of operation with is own licensing procedure and viability criteria when broadcasting legislation is revised prior to the BBC's charter renewal in 1996. But there is also going to be a problem with frequency assignment for the new crop of stations. They will need a system which is (a) seen to be fair and open (b) accountable to both existing and would-be spectrum users and (c) keeps the Government happy that the spectrum is being well managed.

These days, it is possible to conceive of a computer program which, given the aerial height and location of a proposed transmitter site, can work its way through the whole FM band calculating how much power could be radiated without upsetting reception from any other registered service on every frequency from 87.6 to 107.9 MHz in 100 kHz steps. In some cases the amount of power available would be so small that nothing useful could be done with it, but as soon as the figure gets to a handful of watts, we have the makings of a service that someone could make good use of.

In the early days of this scheme, quite a number of services would be possible. Gradually as the band fills up they will become fewer and of lower power. But this system lends itself to a very flexible market-led way of planning things. Instead of having an a-priori plan where all the station locations are planned in advance and nothing outside this plan is catered for, we have a system which looks at frequency availability in the established context FIRST and makes the best-fit assignments based on the requirements of the particular proposed service.

This system could - given the increasing cheapness of computer technology - be handled, maybe on a regional basis, by a contracted-out organisation accountable to users and Government alike. These sort of arrangements work very well for the administration of link frequencies by ASP, for example.

It seems to be that CR would be beat served by a frequency planning system that is responsive from the grass roots up, rather than from Whitehall down, and where a frequency scan can be available to any prospective group for low cost - the price of running a program for a little while on a computer system which is modest by today's standards.

Jeff Koerber <S72UKOE@TOE.TOWSON.EDU> writes
N> Does anyone know what kind of data is transmitted via subcarriers
N> such as this one? Has anyone tried to intercept the data with their
N> computer?

What kind of data? Mostly stock ticker services, sports scores, etc.,
transmitted to subscribers with special receivers.

The data is heavily encrypted in one of several "proprietary" formats, so
it's doubtful that the average joe with a pc could decode it (and even if
one did, that would probably be violation of ECPA!)

SBK1230@aol.com writes
N> Also why does the industry waste the FM-SCA channel.
N> Just as most stereo TV's have a SAP switch why can't FM radios have
N> the same switch, look at the possibilities of every FM station could
N> have "FM-2".
N> Satellite services, 24 hour traffic, CNN news, all with additional
N> advertising. I would like to hear comments !

Probably because most of the programming currently on SCA is not meant for
the general public, but for paying subscribers only.

>represented only on an FM or TV.

In Portland, there are still two AM's with three letters: KXL (750) and KEX (1190). KEX is clear signal, purportedly available from Vancouver, BC to Los Angeles. It plays reguritated Top-40, while KXL is largely syndicated talk (Rush Limbaugh, Tom Leykis, Bruce Williams, et al.)

KXL holds the distinction of being the only AM to share it's THREE letter call with it's FM (95.5).

Regrettbly, Portland's oldest AM call, KGW (620) is no more. After being sold with its TV (KGW, ch. 8) and FM (KINK 101.9), it assumed the call letters of KINK, whose programming it was simulcasting since the failure of KGW's experiment with local talk radio four years ago or so.

Actually, the FCC charges no fee for applying for or using frequencies in
the
U.S. They are more into regulating: modulation, power, coverage, *language
and content*, frequency assignment, band usage, etc. Like most government
agencies in the U.S., the FCC is supported by tax dollars.

>illegal. The rest of the station's deejays have followed Tony G's
>lead.
> "This is not about censorship," said Michael Carter, president of
>KPRS Broadcasting. "This is about being sensible."

This is an excellent example of a station that cares about its community
more than grabbing dollars or proving they know how to talk dirty.

KPRS deserves the applause of all professionals. One could hope it is
the start of a trend toward cleaning up the airwaves and offering
respect to the audience instead of a dropping of a station's "pants."

> "The issue of crime in Kansas City has hit an all-time high,"
>Carter says in the announcements. "And it is time the media take a
>stand on this rapidly growing problem.

Well stated.

> ...A mother of three sons ages 13, 14, and 18 wrote that gansta rap
>was "black exploitation at its worst."
> "As a result, black boys barely old enough to talk are calling
>black females (derogatory names," she wrote. "And believe me, ...the
>target audience for this debauchery is our black youth."

And as we're told at the end, this is a black owned station. Of course,
I also expected this...

> KPRS' ban on negative rap is another example of society's blaming
>its problems on gangsta rap, said Danny Alexander, the former
>president of the Greater Kansas City Coalition Against Censorship.

One can only wonder what Alexander's response would be if people kept
coming up and calling his wife a "xx" ...

> Silencing the music only silences the voices of many black people
>who, otherwise, would have no voice. That, Alexander said, isn't

Give me a major break. I don't allow visitors to my home to stand in the living room and defecate on the carpet. I won't allow them to do it aurally, not intentionally..

There are many ways to get a "voice" ... gangsta, etc. is not the way.

2054. WRMI/RADIO MIAMI INTERNATIONAL RETURNS

Newsgroup: rec.radio.broadcasting
Date: 1994-06-14 00:12:12 UTC
From: gst@gagme.wwa.com
Message-ID: <2tisks$idl@vixen.cso.uiuc.edu>
Source record: 39609

Here is a press-release I received the other day. I thought readers of this group would it of interest.

gst

********** begin **********

Date: 10 Jun 94 01:07:42 EDT
>From: Jeff White <71163.1735@CompuServe.COM>
To: George Thurman <gst@gagme.wwa.com>
>Subject: WRMI to Begin Regular Programming

The newest privately-owned shortwave station in the United States, WRMI, is scheduled to begin regular programming at 0100 UTC Tuesday, June 14, on 9,955 kHz.
Test transmissions of WRMI in April revealed a harmonic problem which was creating interference to aircraft near Miami International Airport. New harmonic filters were installed in WRMI's transmitter, and a new series of test transmissions began in late May. No more complaints have been received from aircraft, and the harmonic problem appears to have been eliminated. On June 8th, WRMI received authority from the U.S. Federal Communications Commission to begin regular programming.
The tentative schedule for initial WRMI broadcasts, beginning UTC June 14, will be 0100-0400 UTC Tuesday-Sunday, on 9,955 kHz. Transmissions are expected to expand in the near future. The initial program schedule will be: 0100-0130 Viva Miami! (English)
0130-0200 Viva Miami! (Spanish)
0200-0400 La Voz de La Fundacion (Spanish)
"Viva Miami!" will be WRMI's flagship program, with information, interviews, music and entertainment from and about Miami and the State of Florida. It will also include international travel features, a mailbag segment, occasional "DX" information for shortwave enthusiasts, and -- beginning soon -- regular tropical weather updates from the National Hurricane Center in Coral Gables, Florida (during the hurricane season from June to November). The first half-hour of the program will be in English, and the second half-hour in Spanish. Both segments will be hosted by Jeff White.
"La Voz de La Fundacion" is a Spanish-language program from the Miami-based Cuban American National Foundation. During the past four years that it has been on the air via WHRI (and for short periods on Radio Clarin in the Dominican Republic and WRNO in New Orleans), "La Voz de La Fundacion" has become one of the most-listened-to foreign radio programs by listeners in Cuba. It is hosted by Ninoska Perez Castellon.
WRMI transmits from Miami with 50,000 watts, using a corner reflector antenna directed to Latin America. Especially during its initial

broadcasts, WRMI would very much appreciate reception reports from listeners in any part of the world. Reports may be sent to WRMI, P.O. Box 526852, Miami, Florida 33152, USA.

FOR MORE INFORMATION: Contact Jeff White at the above address, or by telephone at (305) 267-1728, by fax at (305) 267-9253, or via CompuServe 71163,1735.

>
> Richard Hunt
> rhunt@cix.compulink.co.uk

As far as I know at least AFN will close its studios and transmitters. This will probably the case for BFBS and FFB as well. The new private stations are probably looking for those frequencies.
AFN already has closed its studios in Bremerhaven and Munich last year.

AFN, especially the FM service 'Z-ROCK' is quite popular here in the Frankfurt area, especially in some pubs and taxis. The main reason: no commercials, not much 'foreign' talk. (mostly music). The attraction has decreased however, due to the arrival of private radio.

Personally I consider the morning show of Z-Rock much better then any of the silly German radio shows. Sometimes I get the impression German radio does not really care for their audiences.
Z-Rock also changed its format slightly, you hear more grounge type of music now. 'Z-50' a syndicated show from the Z-Rock-Network in the US has been recently introduced. This makes it more interesting to listen too. A kind of refreshment!

Message-ID: <2tiu30$kbg@vixen.cso.uiuc.edu>
Source record: 39613

Germany is a Federal Republic made up of 16 states. Each of the states has its own regulations regarding commercial radio. Because of this, there is no national commercial radio network (Imagine the problems getting 16 permits). Most stations have what would be called in the USA "CHR" or "Full Service" formats; many carry syndicated overnight services. All the commercial stations broadcast on FM and many are also carried on Astra or DFS Kopernikus satellites. 10 years ago there was no commercial radio in Germany. There is considerable cross-ownership with magazines and newspapers.
This is a summary of the situation in each of the states as far as is known.Bavaria: One state-wide broadcaster (Antenne Bayern) operating with a network of high powered transmitters. Over 100 low powered local stations operating on FM. In the bigger cities, e.g. Munich, there are up to five local stations as well as Antenne Bayern.
Baden-Wurtemburg: Approx. 30 local and regional low and medium power stations operating locally and regionally. Radio 7 is a de-facto network.
Berlin: 6 medium power stations cover the city.
Brandenburg: Currently no commercial stations, but overspill from Berlin
Bremen: Currently no commercial stations, but overspill from Lower Saxony
Hamburg: 6 stations cover the city-state
Hessen: 1 statewide network (Radio FFH)
Lower Saxony: 2 stations (Radio FFN and Antenne Niedersachsen) broadcasting statewide on a network of medium power transmitters
Mecklenburg-Vorpommern: 1 station (Radio MV) broadcasting statewide on a network of medium power transmitters
North Rhine-Westphalia: over 40 local stations
Rhein-Pfalz: One station, RPR, with 2 networks, RPR-1 and RPR-2, broadcasting statewide
Saarland: One station (Radio SALU) on a statewide FM network with CHR 24hoursSaxony: One station (Radio PSR) operating on a statewide network
Saxony-Anhalt: 2 stations (Radio Brocken and SAW) broadcasting statewide on a network of medium power transmitters
Schleswig-Holstein: Two stations (RSH and Delta Radio) operating statewide on a network of medium power transmitters
Thuringia: One station (Antenne Thueringen) broadcasting statewide on a network of medium power transmitters.

(202) 785-2804 FAX
(202) 887-5718 FCC WORLD BBS

ANNUAL EMPLOYMENT REPORTS
DEADLINE EXTENDED

For years, all broadcast stations have been required to file an annual employment report (FCC Form 395-B) with the FCC on or before May 31st. On this year's deadline date, the FCC issued an "Interpretive Ruling" and extended the deadline for filing EEO forms or amendments to previously-filed forms until thirty days after the Interpretive Ruling is published in the Federal Register. (We estimate the deadline will be about July 15.)

In its "Interpretive Ruling" the FCC provides instructions on the way in which licensees are to complete the FCC Form 395-B if they are involved in time brokerage agreements or are involved in duopolies.

Employees hired in connection with time brokerages and LMA's should be reported on the Form 395-B submitted by the licensee that employs them. In the case of duopolies, the employment of more than one station cannot be reported on the same Annual Employment Report. A copy of the FCC's

Interpretive Ruling will be available on FCC WORLD a
free bulletin board service (202-887-5718) on
June 13th.

2061. D/FW ad salespeople wanted

Where can I find Internet sources of information on the history of broadcast radio? (I am on AOL, so I do not have ftp or telnet access).

Specifically, here are a few of my burning questions:

Why do KDKA and KQV have a K prefix?

What was the "Havana Agreement"?

What's the real story on KQW? Was it the first station to air regular broadcasts? When did it start?

I apolgize if these questions sound lame, but the history of radio has long been fascinating to me, and it only recently occurred to me that I could find the answers on the Net.

Thanks,

Rob Spencer

: According to a report in the May issue of the St. Louis Journalism
: Review, Rush Limbaugh was booed at Busch Stadium when he was introduced
: to the fans at a St. Louis Cardinals game.
: Limbaugh was in St. Louis to promote his daily show, which now airs
: on KMOX (clear-channel 1120 kHz), much to the consternation of some St.
: Louisans, judging by letters published in the SJR, and other comments.

So is he still drawing the same 3.0 ratings points for KMOX that he got
for WIBV?

Seriously, I don't understand why KMOX doesn't try to pick up Don Miller,
the ex-CNN anchor who now has a news interview show on WQXI-AM in Atlanta
from 9:00-10:00 a.m. weekdays. His show seems totally out of place on
WQXI-AM. But if Don Miller could be pulled away from WQXI-AM, I think he
would fit into the KMOX schedule as local talent much better than does
Rush Limbaugh, and be much better received in St. Louis.

2066. Limbaugh at Busch Stadium

Copyright, Pittsburgh Post-Gazette. Reprinted here
by permission. Republication prohibited in any medium.

Although promotions are a major cornerstone of the
radio business, they're not something this column
ordinarily delves into. But lately, some of them are
eliciting an involuntary rubbernecking response:
you look, no matter how much you don't want to.
WXRB-FM's (The Rebel) morning team has
taken out a $100,000 life insurance policy
on a seriously ill man. If nothing happens
to him, nobody's any richer. If something
does, the same could be said to be true.
In any case, the stunt got the station nationwide
attention and even a spot on the BBC's ``Live at
Five.''
Not as mind-boggling ethically, but still
extreme, is this Saturday's ``Beach Blast '94''
at the I.C. Light Tent, which is sponsored
by WWKS-FM (The Force). Events include the
``Lorena Bobbitt weenie toss,'' ``Amy Fisher
banana eating contest'' and others that make
the accompanying wet T-shirt contest seem like
pretty tame stuff.
Radio is a tough business, and there are advantages
to being the squeakiest wheel. Promotions like these
are designed to either make people wince and wonder
what kind of world we live in, or dive in and don
the wet T-shirt. It's less a matter of ``good'' or
``bad'' taste or even ``no'' taste, than ``Made ya
look.'' And in a business where imitation is the
sincerest form of flattery, if they're successful,
you can bet you'll be seeing them again. And again.

On a lighter note, merry pranksters Tommy Nyce
and Joe Nasti at The Rebel found a new twist on
the media blitz preceding the D-Day anniversary
celebration: an early morning surprise phone call
to retired General Norman Schwarzkopf at Walter
Reed Medical Center. How did they get through?
``We lied,'' Nyce said. ``Joe does a real good
impersonation of Dan Rather. ''
They reached the Desert Storm general in his
room at Walter Reed, where he is recovering
from surgery. Once cornered, Schwarzkopf chose

the genial path, praising the strategic planning
at Normandy and commending the inner strength
of every veteran of that moment in history.
When the morning crew offered to ``drop and do
40'' in return for his cooperation, Schwarzkopf
replied, ``I doubt if you could do 40.''

KDKA-AM will carry Penn State football and men's
basketball games, starting next fall. The Nittany
Lions' football season kicks off Sept. 3, with
an away game at Minnesota.

WYEP-FM is finetuning its programming schedule
with a move toward more music and more local
programming.
The station has shifted to a 6 a.m. to 6 p.m.
music mix, and has dumped the syndicated
``Pacifica Radio'' and ``World Cafe'' programs.
Program director Mikel Ellcessor says the change
was ``largely driven by consistent requests by
our listeners and subscribers'' for more music.
In place of the evening ``World Cafe,'' the
station has expanded its local night-time programming.

Country is the number one format nationally,
according to a recent survey by Arbitron and
Katz Radio Group. It's well ahead of the pack,
outnumbering other formats by nearly 2 to 1
with a 14.8 share. Next were adult contemporary
(8.3), urban (8.2) and full service (8.1).
The fastest growing formats were
alternative/modern rock and black adult contemporary,

Bruce Gilbert has been promoted to director of
programming for WTAE-AM/WVTY-FM. Gilbert has
been program director for WVTY for the past
three years, and has been acting p.d. at
sister station WTAE since Tom Clendening
left for KIRO In Seattle.

Overnights on WDSY is now a satellite show
originating in Hollywood. ``After Midnite
with Blair Garner'' is a mix of contemporary
country music, celebrity interviews,
comedy and entertainment news.
Bob Delmont, who did overnights at WDSY, has
moved to evenings.

It's mainly stock quotes. FNN Signal used to (and probably still does)
broadcast data on two subcarriers here in Chicago - one from Sears Tower and
the other from the John Hancock Center. They also broadcast from many other
cities in the US. Interested parties might be able to get a list from Signal.
They used to advertise in Barron's, WSJ, etc.

Hmmm. back when I worked for American Stores < the old Alpha Beta now
Lucky chain > we used to get Muzak on 99.7 KYUU. At nights, after the
store closed, all we did was move the RCA plug on the front of the
receiver from "SCA" to the "Local" plug and we got music throughout the
store. Even though most of us didn't like the format at the time,
anything is better than MUZAK.

2072. Subcarriers Revisited

Newsgroup: rec.radio.broadcasting
Date: 1994-06-14 00:37:23 UTC
From: Mark Roberts <transvox@tyrell.net>
Message-ID: <2tiu43$kg9@vixen.cso.uiuc.edu>
Source record: 39627

First Trenton, and now this.
My Tyrell newsfeed is running a day behind the (expensive) Delphi newsfeed, so I'll try to answer questions and make comments as best I can from memory.
To Jim Grey: The Superradio III in question has been modified with the installation of decoders for both 67 kHz and 92 kHz subcarriers. I had been looking for such a radio for some time and when another participant in AIRWAVES offered to sell his, I jumped at the opportunity.
The radio was modified by David Jackway, doing business as SCS Radio Technology, 5742 Fairoak, Springfield, MO 65810 (tel. 417.881.8401 or 800.944.0630). List price for the modified radio was $125 (two SCA decoders) or $95 (one SCA decoder). Available decoder frequencies were any two of 57, 67, or 92 kHz.
NOTE: Subcarrier use and technology is often referred to as SCA (as in the NAB engineering practices handbook, article 3.4), instead of the newer term, SCS. I will use the term SCA henceforth, since it seems more familiar.
To Don Coco: Thanks for confirming Bonneville's SCA activity on its San Francisco station.
To someone whose name I forgot (sorry): The present consensus seems to be that SCA listening is, for the most part, legal. The NAB, displaying the kind of foresight and stupidity associated with American auto manufacturers in the 1970s, has tried to restrict the sale of SCA receivers. Fortunately, it has not succeeded. According to information provided with the radio, since tunable SCA receivers can be used for reception of services aimed at the general public (e.g., reading services, NOAA weather, rebroadcasts of other radio stations), their sale and use cannot be made illegal.
To John Higdon: What's available on SCA seems to vary considerably from market to market. The Bay Area has an unusually rich diversity of formats available to the routine over-the-air listener. Most of us elsewhere don't have that range of programming available to us, not to mention distinctive, well-run, interesting stations such as KKSF, KITS, KFOG (sometimes), etc.
In Kansas City, overpopulated as it is with plain old country, young country, hot country, frozen-in-time hard rock, and stale "lite" formats, programmed by rote from the conspicuous overreliance on the excreta of consultants, SCA subcarriers could provide the opportunity to address the lack of service suffered by many specialized audiences. That opportunity has been taken only by one broadcaster, KKFI, which relays a Spanish-language service fulltime on its 67 kHz subcarrier. One could argue that such a service would be better placed on some faltering AM station (and I would agree that's a good place for

it), but the AM dial here is overpopulated with John Birchers and Bible-thumpers (on some stations, one and the same).
To someone else whose name I forgot, regarding SCA data transmission: As of 1992, no standard protocol had been published by anyone in the industry, according to the NAB handbook. The lack of a public protocol hence limits accessibility of transmitted data to subscribers (who may not need all the bandwidth provided). This may be intentional and/or merely shortsighted. The NAB handbook cites 9600 baud as the highest practical limit for frequency-shift keying systems. Higher baud rates are possible with phase-shift keying, but more bandwidth on the subcarriers would be required, according to the handbook.
NOTE: The placement of the narrow-band FM subcarriers at 67 kHz and 92 kHz is customary but not legally mandated. Other schemes are legal, including SSB-AM subcarriers, subcarriers at other frequencies, etc., as long as baseband modulation limits are observed.
GENERAL COMMENTS: From a general programming perspective, SCA will be limited by lack of publicly accessible receivers, lower fidelity (5 kHz typical bandwidth) and a higher noise floor than the main FM channel, and considerable difficulty in minimizing or removing crosstalk from the main channel. Some of that crosstalk apparently is due to multipath which, of course, screws up FM stereo, too.
However, I find it interesting that at least one Kansas City-area service (the reading service from KANU and KCUR) is attempting some form of noise reduction. Alas, it does not seem to reduce crosstalk, judging by my little experiment the other day, but performance in terms of noise and perceived fidelity could be improved with such a system, and could certainly be as acceptable as medium-wave AM radio.
It's the last undeveloped piece of real estate on the FM block.

SBK1230@aol.com wrote:

: professional equipment. Also why does the industry waste the FM-SCA channel.
: Just as most stereo TV's have a SAP switch why can't FM radios have the same
: switch, look at the possibilities of every FM station could have "FM-2".

Because they sell these services to companies. SCA is private, not
public. It was originally begun as a way for FM stations to make a
little cash to stay in business during the lean years. There are little
SCA receivers which are pre-tuned to a particular station and to one of
the SCA carriers (there are others, but 67 and 92 are the most
prevalent). The non-English programmers sell or rent these receivers to
their subscribers. In San Francisco, a company called Sinocast does this
in Chinese markets around the city.

Jeff,
There are several types of services carried SCA. For example, in the LA area we have paging, stock price information, and Port Authority cargo information. Typically these services are encrypted and are not easily decoded.

Regards,
Mike

You sure keep up with the market up here, don'tcha? :)

I know...I work for one of them, KFBK (weekend/fill-in news)... Dan
V. had a huge article in the Sunday paper about the Sacramento "talk
radio wars". With 4 signals fighting it out (including sports-talker
KSAC-AM 1240), putting a talk signal on AM 1030 would be downright
suicidal.

> There are many possibilities, Sacramento does not have a
> Big Band station anymore, nor a Country AM.

There is nostalgia KCTC-AM 1320 (ex-KGNR). I'm not an aficionado of
the format, so I dunno how close they could be considered to "Big
Band". And the lack of a country AM is due to KRAK-AM 1140 flipping
to KHTK "Hot Talk 1140". Though I've heard them on overnights, and
they still carry the Interstate (Truckers) Radio Network, with all
the country you can stand (!). I'm not sure how they can justify
that with their new format, but heck, it's not my job. ;)

> Also, have they thought about "Radio AAHS"? It may not have
> big numbers, but you can sell it.

But on a 50KW station? :)

> Gee, how come the local Classic rock station hasn't picked
> up Howard Stern yet? (hey! Maybe THAT is something for
> 1030-AM! Now about the other 19 hours in the day.....)

I think Howie gets cranky if he goes on AM anymore. Maybe it's
fallout from the mess in Chicago with WLUP-AM 1000. (Comments, Bill?
;) Anyway, Sacto has a classic rocker (KSEG-FM 96.9/The Eagle) and
an album rocker (KRXQ-FM 93.7/93 Rock). Curiously enough, they're
owned by the same people now. I don't think they've been rumored to
have any interest in hooking up with Stern.

2076. Re: Estimating "health" of a station from the commercials it airs?

Newsgroup: rec.radio.broadcasting
Date: 1994-06-14 00:37:34 UTC
From: alo2@po.CWRU.Edu
Message-ID: <2tiu4e$kgr@vixen.cso.uiuc.edu>
Source record: 39631

Remember, kids, that it's really tough to figure out if a spot is PAID or TRAID. (Or is that PADE or TRADE??)

Trade-out (barter) advertising is a fact of life in radio. It can be a real lifesaver when the bottom line just bottomed out and you need office supplies, a spring book prize, work on the station promotional vehicle, or the morning guy threatened to leave and you dont have any money to offer him to stay.

In the above cases, trade would be arranged with (typically) a mom&pop stationery store, a local car dealer, a local car repair garage, or a apartment complex respectively. Makes most sense when you're light on cash buys and heavy on inventory.

However, I have been intimately involved with stations (one locally quite recently) that were literally run into the ground with trade advertising.

In each case, the station was over 33% trade time, a situation we called "tradio ga-ga" (see the Queen song by a similar name). The cause? A GM\ owner that saw a golden opportunity to get more "free stuff" without the need to actually pay for it. The examples range from the merely annoying to what i would call criminally fraudulent. Ethics prevent me from listing them here; they're quite specific, and I doubt they've been duplicated elsewhere. One example to illustrate, the GM traded a LIMOUSINE RIDE back to college for his kid....college was more than two hours away.

The effect? First, there was no inventory left for cash buys. The "sold out" condition is illusory; they were really "traded out". Second, the station sales people were dispatched to arrange for these trades. They were paid no commission (this is ILLEGAL, folks...they MUST be paid for working even if the station sees no cash, but I digress) and this severely curtailed the sales staff's ability to sell time for cash. Third, the station got a reputation for being a "trade pig" shop, and no one wanted to execute cash. Fourth, while the GM was whining that there was no cash for raises, badly needed equipment repairs, promotions, etc., literally tens of thousands of dollars worth of merchandise and services were being hauled out of the station while the bottom line whacks you in the butt. This created widespread resentment among the staff and you can extrapolate this situation to its ultimate effect.

Gm's will argue that they are underpaid and that that's how they get fair compensation. Balderdash, I say, when the boardop makes $4.25 an hour and the GM's family eats on station trade most nights. Also, EVERY PENNY of this graft (can you say ROSTENKOWSKI??) is TAXABLE as income, and it's the rare GM that will be honest enough to 1099 himself on it.

The best possible scenario? A large, prestigious broadcast concern that I was fortunate enough to work for had STRICT corporate guidelines regarding trade advertising, Essentially, it was regarded as an expense, and it came off the bottom line. THis is great when there's CFOs, CEOs, a board and stockholders to asnwer to. But when the powers that be is the GM/Owner, and his wife wants a new stereo, car, curtains for the den, christmas dress, etc, the moral imperative is as imperative as covering a yawn at a baseball game.

The point? You can have a radio station that is saturated with ads that is losing money by the bucketful.

Frequent readers of my contributions to AIRWAVES know that I often excoriate album-rocker KYYS (102.1) for having a "Procrustean playlist" that hasn't changed since the Carter Administration. Those are some of the nicer things I have had to say about a station whose most worthwhile programming resides on its 67 kHz subcarrier.

You don't have to take my word for it any more. Check out these quotes from local writer David Cantwell in THE NEW TIMES (June 15 issue):

> On New Year's Day 1981, I sat in my room and listened to
> KY102's Top 10 Albums of 1980 countdown. A rock critic even
> at 18, I dutifully wrote down each release, then filed the list
> away in my tri-fold Marvel Comics Organizer. Last month, I came
> across that notebook, and that list, and two things became
> immediately clear: first, my handwriting has deteriorated
> considerably in 14 years and, second, so has KY102.
> A cliche among people my age is to gripe that KY's the same
> as it was when we woke up to Dick & Jay or enlisted in Gen. Max
> Floyd's Rock 'N' Roll Army, but that's only because it's true:
> the day I found my list, I heard cuts from half of KY's '80 Top
> 10 (from LPs by The Police, AC/DC, Van Halen, Tom Petty and the
> Stones) and I wasn't even trying.
> <...>
> Today 102 is a fraud. While it still calls itself album rock,
> the truth is that KY's an oldies station and a damn lousy one--
> its oldies are publled, generally, from a tiny seven-year stretch.
> <...>
> A recent KY promo blasted 98.9 The Rock's (KQRC) Memorial Day
> 500 that KY dubbed "the same old boring songs over and over."
> [KQRC is a "hard rock" station that predated New York's WAXQ--MR]
> Young 98.9 fans can tell you that "the same old boring songs"
> is what 102's been programming their entire lives. (And
> puh-lease don't tell me about KY's "alternative" Radio Free Westport'
> it's a miniscule part of 102 [four hours Sunday nights--MR] and
> nothing to shout about anyway. KY's a lumbering dinosaur.
> Evolve or die.
> That's especially necessary since our other rock lumberer,
> the classic rock KCFX [101.1] ... makes 102 redundant. Not
> that The Fox is a *good* station. While it boasts Kansas City's
> largest music library, it doesn't play much of it. ... As a local
> talk radio caller recently wondered, "If they have to play
> the same bands all the time, couldn't they at least play
> some different songs?" ....
>

Not that any of this will make a bit of difference. Oh well,

the world is divided between people who have the brains and people
who have the money.

After 6 months on the air WAXQ has finally hired a morning man. Trent Tyler from KQRC in Kansas City has arrived. Their weekday line-up is:

Trent Tyler - AM Drive
Heidi Heiss - 10 AM
Mark Razz - 3 PM
Candy Martin - 7 PM
Mark Logan - Midnight

WDRE now has a local marketing agreement with WWCP in the Albany, NY area. It is also simulcast on WMRW (98.5) from the Hamptons and WIBF (103.9) in the Philadelphia area. Its weekday lineup is:

Donna Donna - AM Drive
Malibu Suw 10 AM
JOhn Loscalzo 3 PM
Gary Cee 7 PM

2080. AM Stereo listening, using Sony radio and Radio Shack "Silent Play".

Newsgroup: rec.radio.broadcasting
Date: 1994-06-16 03:32:25 UTC
From: wa2ise@netcom.com
Message-ID: <2toh49$2df@vixen.cso.uiuc.edu>
Source record: 39635

Here's a way to listen to an AM stereo station (in my case, KBBT Portland)
while using the computer (a PC). The Sony SRF-A100 stereo AM radio is
connected to my big stereo system in the living room, but my PC is in
a bedroom upstairs. Rather than move the Sony (besides, the computer stuff
RFI's the AM band badly), I got at Radio Shack a "Silent Play" device.
This thing is intended to be used with Nintendo video games so one
can play a game without the rest of the house hearing it. It's a small
stereo FM transmitter, and the receiver is a rather deaf FM walkman.
connected the silent play to the tape out of the stereo system, and
selected an empty FM freq, looks like 92.7 has nothing on it in this
town. (checked it with good radios to be sure). Set up an old stereo
set I had since high school next to the computer on the table, and
aside from lesser frequency response and a bit of noise, it sounds
like a FM stereo station. And no computer RFI. The silent play has
a range of about 30 feet at most. Pico-broadcasting :-)

> Subject: community produced radio series on GATT and South Asia
> From: pchakrav@students.wisc.edu (Pauline Chakravartty)

Hello out there,

A community radio program collective in Madison, WI is putting together a six part series on GATT and its implications for third world countries, with an emphasis on South Asia. Each part will consist of a 15-20 minute feature including interviews with academics and activists involved with this issue, as well as analysis of the GATT agreement itself.

We will be critically examining the GATT issue in terms of its effect on the environment, intellectual property rights, labor rights, industrial growth, poverty, etc.

The series is being produced by a volunteer collective which works on a weekly South Asia public affairs program called *Chingari* on Madison's community radio station, WORT.

If your community radio station, or organization would like to get copies of the series, and/or more information, please contact me either by email or phone.

Hope to hear from community radio folks involved with third world programming!

Bye for now.

God, I wish situations like this hadn't been duplicated elsewhere. I've seen at least four stations that I either worked for or was affiliated with run into the ground exactly the same way.

What's worse is when a cash client won't pay and management decides to take part of the bill in merchandise. Then they turn around and try to sell it to the staff at retail prices. (I wish I was kidding.)

Again, I'm lucky enough to work for a reputable outfit that has pretty strict controls on trade -- every time the GM or anybody else uses a trade account, we have to fill out a voucher and sign our names to it. Actually, our GM is pretty good about schmoozing the staff with trade stuff -- just a few things now and then to make you feel good.

PDXAndy (pdxandy@aol.com) wrote:

: KXL holds the distinction of being the only AM to share it's THREE
: letter call with it's FM (95.5).

If you mean in the United States, that's not quite the case.

KSD (550) and KSD-FM (93.7) in St. Louis have the same calls; they didn't until Gannett sold the combo to EZ Communications earlier this year. The AM call letters during most of the time Gannett owned the stations were KUSA. The KSD call letters, of course, originated from the AM station.

KWK (1380) and KWK-FM (106.5) were around for a while in the mid-1980s in St. Louis; these are now WKBQ (simulcasting 104.1) on the AM and WKKX on the FM. WKBQ and WKKX swapped frequencies January 1 as part of the Zimmer Broadcasting duopoly.

And then there's WIL-FM (92.3), currently represented only on FM; the AM (1430) call letters are now WRTH.

This is also in response to Luke Chastain's question about when Mancow starts in Chicago. I've heard he'll start in mid-to-late July. Can you please E-mail me and let me know how you plan to get tapes of his show--I'm interested in doing the same. Yes, Wild's morning show is pretty boring. Does anyone know when the new people (the REAL ones) are starting? Just curious.

I know there are lots of people out there who really enjoyed Mancow's morning antics. Is there anyone interested in joining the Mancow Fan Club? Let me know, I'd be glad to start it from my home base. He's great. You guys wait and see (and I know others agree), he'll be as big (but better than) Howard Stern. Really! He's got the talent and balls to do it.

LONG LIVE THE MANCOW, IN CHICAGO OR ELSEWHERE!!!!!!

Fanatically yours,
sophia_ruiz@maillink.berkeley.edu

Tell that to the people paying thousands in filing fees. There is a fee
for filing an application. There may some day soon also be a spectrum fee
(has been proposed by both republican and democratic administrations).

2090. WLS <Chicago> Splits AM and FM formats...almost.

Newsgroup: rec.radio.broadcasting
Date: 1994-06-16 03:32:48 UTC
From: janik@spss.com
Message-ID: <2toh50$2e0@vixen.cso.uiuc.edu>
Source record: 39645

WLS has split the AM and FM stations...well, almost. They still
simulcast right-wing windbag Rush Limbore from 11a-2p, but the
lineup on the FM is: Robert Murphy mornings, Richard Roper 9-11,
Rush 11a-2p, Jay Marvin (anti-choice pseudo-liberal) 2-6 pm,
Turi Ryder 6-10pm (talks a lot about sex, aerobics and nothing...),
Johnny Vonn 10p-2a, not sure about 2-6a, I was sleeping ;-).

The A.M. remains a right-wing powerhouse, 24 hour Clinton bashing
with Don Wade & his wife Roma 5-9a, Rush 11-2, Roe Conn 9-11a and 2-3p
(he was a Clinton supporter until...I'm guessing the p.d. Drew Hayes
told him he was otherwise), Ed Vrdolyak and Ty Wansley 3-6p (Ed V. was
a Chicago politician who switched from Democrat to Republican when the
Democratic party nominated a black man for mayor...Harold Washington...who
won and became the city's first elected black mayor). Tom Roeser, a
far-right Republican heavyweight from Du Page county often sits in when
Ed is on vacation...6-10 p.m. Catherine Johns...I predict she will become
a Perot supporter before long..she seems to spend more time bashing
Dems like Rostenkowski, but clearly she doesn't trust anyone in politics...
no, she did say some nice things about Harris Fawell, a moderate Republican
representative from Du Page County. I'm not sure who replaced Jay Marvin
10p-2a, but you can bet it's not a liberal... I believe they still
rebroadcast Rush L. overnights. They play the "best of Rush" (should
be pretty short, I'd think ;-)) Saturdays 11-2, and Drew Hayes *refuses*
to carry John Hightower's show (he claims it's because he isn't
entertaining...but Drew admitted to me that he is a lifelong Republican...
I'm sure his politics affect his programming decisions as much as mine
affect the wording of my posts ;-)).

2091. WTIC-FM goes to Adult CHR

Newsgroup: rec.radio.broadcasting
Date: 1994-06-16 03:32:48 UTC
From: Paul Richards <72212.441@CompuServe.COM>
Message-ID: <2toh50$2e1@vixen.cso.uiuc.edu>
Source record: 39646

Per messages on Prodigy and here, WTIC-FM-96.5 Hartford was supposed to announce some kind of change on Wed 6/15 at noon.

(TIC-FM had been declining in the ratings and had even lost to its competitor
95.7 Kiss FM (WKSS) in the last several ratings periods (contrast to a 6.8-4.7
victory over kiss F92).

You'd probably heard the rumor they'd considered going country (or Arrow).

I tuned in around 1145 and they seemed to already be doing whatever they're going to be doing, positioning as "The Best Music on the Radio the New 96-5

TIC-FM" and less frequent "Today's Top 40" and the telltale "Today's top 40

without the Rap" with Brit Jeff Windsor on in midday.

>From about 1150 - 1235 here's what they played - (tape will roll till 1320)

Rod Stewart - Reason to Believe
(Prince) - The Most Beautiful Girl...
U2 - Mysterious Ways
Lisa Loeb - Stay
Pet Shop Boys - West End Girls
John Mellencamp - Wild Night
(:20 - spots)
Mariah Carey - Without You
Peter Gabriel - In Your Eyes
Gin Blossoms - Found Out About You

So, it's all top 40 hits, so far nothing more than 8 years old, no rap, nothing
'dance/urban' that hasn't crossed over. At least listeners are spared the dreadful
"decades" liners ("the best music of the 80's and 90's" every 15 minutes.)

Can someone more familiar with the station describe if/how this constitutes
a change from what they were doing before - were they trying to out-dance Kiss? (I am over 100 air miles away and glad I didn't take off work to listen
to a no-big-deal format change from under the tower. If it weren't summer,

I wouldn't be able to hear them at all)

Hi Robert--
Yes, it was Steve Corlett, better known as "The Fatman." From what I read in the papers, he solicited a woman he thought was a prostitute and exposed himself, not realizing that the woman was actually an undercover cop. A number of other would-be customers were also arrested, I believe. The last I was heard, he was back on the air, and the station is sticking with him for the time being. Of course, the court details remain to be seen.

Source record: 39648

KCMO(AM) talk show host Freddy Mertz, on leave for the past month, was officially fired June 7. Mertz began at the station in January, shortly after it was taken over by Bonneville International in a duopoly with KMBZ(AM).

Mertz's afternoon drive-time listeners were told that he was taking vacation time, but Mertz told the Kansas City Star that he never took a vacation and was yanked from the air without explanation.

KCMO general manager Ron Carter and program director Mike Elder did not return phone calls, according to a Star article June 10.

KCMO promoted Mertz as "tough, brash and aggressive ... unafraid to question authority or to challenge the status quo." Mertz told the Star the station broke a one-year contract when it fired him.

KCMO's duopoly partner, KMBZ, has a secure place in radio history, earned by firing Rush Limbaugh in the early 1980s. Limbaugh's syndicated talk show is now the centerpiece of KMBZ's daily schedule.

*****

In its June 9 issue, the M STREET JOURNAL made an excellent point about reportage of audience share. The Journal stated that too often people talk about relative share positions without providing a breakdown of the number of people that share represents. Such a breakdown is useful in comparing absolute levels of listening among different markets.

One market given was Kansas City, market #30. Using the figures given for WDAF, I extrapolated a total Kansas City listening audience of 228,040, and used the shares as previously reported in the Kansas City Star to calculate absolute listening for all stations, formats, and duopolies:

Format Winter Shares by Format:
Category 1994 Population
Winter
K WDAF AM 10.7 24400 1994 Population
B KPRS FM 8.8 20068
K ^KFKF FM 8.4 19155 Black B 8.8 20068
S *KLTH FM 6.7 15279 Class C 3.2 7297
R KCFX FM 5.3 12086 Relig G 3.1 7069
T *KMBZ AM 5.3 12086 Hits H 3.4 7753

Format Categories: B (Black), C (Classical), G (Religious), H (Hits),
K (Country), N (Nostalgia), O (Oldies), R (AOR or Classic Rock), S (Soft
Rock), T (News and/or Talk). A (Alternative, Modern) not listed

I don't know what you can conclude from all this except to say that
absolute listening numbers in a medium-to-large market such as this
place great pressure on stations to achieve at least a 4.5 share to
garner *at least* 10,000 listeners over all demos. This is bad news
for any speciality formats one might consider. This may be one reason
even increasingly mainstream formats such as "modern rock" (that must
mean KYYS and KCFX program "obsolete rock!") and AAA aren't considered
even for the 30th largest market.

2094. Radio Watchers -- Central Missouri (6/13/94)

Newsgroup: rec.radio.broadcasting
Date: 1994-06-16 08:13:35 UTC
From: Mark Roberts <transvox@tyrell.net>
Message-ID: <2tp1jf$nst@vixen.cso.uiuc.edu>
Source record: 39649

The general manager of community-access station KOPN(FM), Columbia, Mo., has resigned after two years on the job.
P.T. Martin cited a desire to spend more time with her family as the reason for leaving the station. She said she was not asked to leave the station.
At the beginning of the year, Martin spearheaded what was described as a "format change" for the stations' weekday daytime programming, introducing an adult-album-alternative style playlist for those parts of the day.
Some longtime volunteer programmers at the station departed, saying the station was not being true to its original mission of being a free-form outlet.
In reality, the format "change" has been more in the nature of an adjustment. Key programming blocks were relatively unaffected, including the station's service to Columbia's African-American community.
For more than 20 years, the only minority-oriented medium in Columbia has been KOPN's Saturday afternoon block of black programming.
Martin told the Columbia Daily Tribune this week that the programming changes have paid off. She said more than 250 new subscribers came on board during KOPN's spring pledge drive, bringing the station's total number of subscribers to almost one-thousand.
KOPN board president Betty Roberts (not a relative of mine) told the Tribune that she hopes to have a new general manager by August 1.
****
As long as there's been KOPN, there's been KCOU. Earlier this year, the station run by students at the University of Missouri changed call letters to KEJJ amid a controversial shift in the station's programming direction toward a mainstream modern-rock-style format.
The call letters were supposed to be used in conjunction with an "Edge" slogan; however, the station learned just before it changed calls that the slogan was copyrighted. Instead, the station just called itself "88 FM."
KEJJ has retrieved the KCOU call letters, a shift that may signal a return to the station's former direction.
Station critic Neil Swanson wrote in the Columbia Daily Tribune on May 8 that "the station should begin sounding more like the KCOU of old," quoting DJ John Meyers, who said "Anything that's worth its salt gets into format." Meyers is also quoted as crediting Residence Halls Association president Andy Genet as one who "respects the quality of the station." The association is the licensee of KCOU.
****
George Davison reported a couple of weeks ago on plans for a new automated country station licensed to Gallatin, Mo., by the owners of

KTTN-AM/FM, Trenton, Mo.
The station was on the air Sunday afternoon (June 12). The slogan is "Hot Country Z-101.7;" the service appears to be SMN's Hot Country. Another slogan is "Hot Country for North Missouri."
I did not catch the call letters. By the top of the hour, I was in the Kansas City suburb of Blue Springs, and Ricky Van Skelton was wailing on and on about some lost love, and didn't finish until I drove past a hill and lost the signal just when the station was giving its legal ID.
Ricky clearly never would have made it in all-news radio.
****
Another source for SCS/SCA reception equipment is SMC International, Inc., 13726 C Street, Omaha, Nebraska, phone 402.334.3243. This company sells single-frequency SCA receivers.
Interesting to note: SMC's literature states that "VHF TV frequencies are also available." Does this mean some TV stations are running SCA-style subcarriers (*not* the standard SAP)? The FCC rules on this subject do not seem to prohibit such operation, as far as I can tell.
Both tuners and portables with built-in speakers are available from the company. One of the tuners features switchable audio bandwidths as a form of noise reduction. However, I saw no indication of any compression-expansion noise reduction scheme, similar to what appears to be in use on the subcarriers of KANU and KCUR.
****
And now, it's time for a subcarrier list for central and west-central Missouri. I tried for St. Louis stations also; no luck, conditions weren't good enough. Might be a good excuse for a cross-state train ride.
This is an area laden with rimshots atop what amounts to a two-headed market. Columbia and Jefferson City are not yet combined for radio ratings, but they have been for TV ratings.
Although Jefferson City signals get into Columbia and vice versa, what seem to be impenetrable are the cultural differences between the two sizable cities of mid-Missouri.
I can get into that some other time. Here's the list, sorted by frequency:
==========
91.3 KBIA Columbia, upbeat background music (67 kHz), poor audio quality
92.7 KTOZ Eldon, background (67) and upbeat background music (92 kHz)
93.5 KLTE Kirksville (translator), background music (67 kHz)
95.7 KWWR Mexico, background (67) and upbeat background music (92 kHz)
100.7 KMZU Carrollton, background (67) and upbeat background music (92 kHz)
(This was verified at the I-70 rest stop near Concordia, Mo. Fortunately, no one noticed.)
101.5 KARO Columbia, relays KFRU(AM) (67 kHz), high levels of crosstalk
106.9 KTXY Jefferson City, background music (67 kHz)

The KTOZ, KLTE, KMZU, and KWWR services all are identical. KWWR has
been a purveyor of the Muzak service from the station's earliest days
in 1966.
Not included because it is a data service is the 92 kHz subcarrier
of KRES (104.7, Moberly, Mo.) This service transmits market data to
farmers. It is also broadcast on one of the subcarriers of KGRC (92.9,
Hannibal, Mo.).
The KBIA subcarrier was at one time used for a reading service;
funding ran out sometime in the late 1980s and it shut down.
The KTXY subcarrier was first installed in 1979 on behalf of the
Missouri Network, which was experimenting with subcarriers in an effort
to avoid having to spend so much on phone lines. (This was before
radio networks were making extensive use of satellites. The
Missourinet phone lines in particular were an embarassment.)
The experiment was written off as a failure when KFRU in Columbia
reported consistent problems in getting a clean signal because of
power-line interference. The FM antenna at KFRU aimed directly into a
three-phase 160-kilovolt power line going to the city power plant.
There was no way to avoid *that*; the power line was south of KFRU, and
so was Jeff City!

2095. Santa Fe, NM Question.

Newsgroup: rec.radio.broadcasting
Date: 1994-06-16 08:13:36 UTC
From: dkvasish@gibbs.oit.unc.edu
Message-ID: <2tp1jg$nt5@vixen.cso.uiuc.edu>
Source record: 39500

I'd like to know about FM signal propagation in the Santa Fe, New Mexico area. Considering that it's at such a high altitude and in the middle of a very mountainous area, what kind of distances can you get signals from there?

I have Radio Shack's $16.95 rooftop FM antenna, which they rate at 110 miles for flat, open terrain. In Austin, Texas, I could pick up most of the Houston market just about 'round the clock. In Jacksonville, Illinois, it would get me a 50,000-watt station in suburban Chicago, about 190 miles by crow's flight. In Wilson, North Carolina, it gets some Greensboro/Winston-Salem radio, and only sometimes--and that's about 130 miles west by crow's flight, while it gets two Washington stations almost 24 hours a day--and that's 210 miles north.

(The point of the preceding paragraph was to give you an idea of what I can get now, and a general idea of where I've been using the antenna, etc.)

Anybody out there that can help translate this to what I might be able to expect in Santa Fe? I know that things can get pretty interesting at high altitudes; I'm just wondering /how/ interesting. Thanks in advance.

The DJ Without A Name
WESQ 90.9 FM * Rocky Mount, NC

In article <2tiu3f$kc4@vixen.cso.uiuc.edu>, spencerob@aol.com (Spencerob) writes:

->Why do KDKA and KQV have a K prefix?

The simple answer is "by mistake." KDKA was the first licensed broadcast station (which is not the same as the first station--see below), and the Dept. of Commerce hadn't decided to split call signs geographically yet. Same thing aplies to KYW in Philidelphia--which was originally in Chicago.

->What was the "Havana Agreement"?

->What's the real story on KQW? When did it start?

KQW (now KCBS) started in 1909 in San Jose, three years before the Radio Act of 1912, which required licenses and call letters. It identified itself as "This is San Jose calling." Other early calls included FN, SJN and in 1921, KQW. It was operated by Charles "Doc" Herrold

->Was it the first station to air regular broadcasts?

Depends on how you define things. The first broadcasting station was probably Fessenden's Christmas Eve 1906 hour-long transmission of voice and music. And Lee de Forest was doing some things that could be called "broadcasting" pretty early, too. The four stations that are contenders for "oldest" (not the same as "first") are KCBS(KQW), WHA Madison Wisconsin, WWJ Detroit and KDKA Pittsburgh.

Your best source for a comprehensive history of American broadcasting is the three-volume set of books by Erik Barnouw, published by the Oxford University Press.

: regular broadcasts? When did it start?

April 1, 1909, by Dr. Charles David Herrold, who owned the Herrold School, an electronics school in downtown San Jose. The station was in the Garden State Bank building at 1st and San Fernando. Herrold's station had many firsts. The big differentiation between his station and others of the era was that he specifically had set it up to reach the public, not point-to-point (such as ship-to-shore) as others had done. His wife was also the first DJ, trading records from a local store for air mentions. Barry Mishkind can point you to a great FAQ which is in the works about the history of broadcasting.

Oh, and today, the direct successor of that first broadcast station is in San Francisco. It's called KCBS.

>(or anyone else, for that matter) explain what this is about, and tell
>me how I can find out whether my SRIII can pick this stuff up?

Has your radio been specifically modified for SCA? If not, it can't get
SCA, period. No SR's (or any other radio for that matter) can get SCA
right out of the box.

If you'd like your SR or other radio modified for SCA reception, one
good source is Bruce Elving of "FM Atlas" fame. He has a catalog of
SCA chips, or he'll modiffy your radio himself. He can be reached
at PO Box 336, Esko MN 55733-0336, +1 218 879 7676.

Cross-posted to: rec.radio.shortwave,rec.radio.broadcasting

In <2t9ikf$gcv@bronze.lcs.mit.edu> Dave Moisan states:

|The SR III is the latest version of the radio.

Since the receiver is availible in New Zealand/ Australia, which use
220-240V AC, does the schematic diagram/ parts list show a power
transformer with 120/240V capability i.e. centertapped primary?

| 4. The SR3 has about the same selectivity of the original SR, my

It's been reported that the "Wide" position places a resistance across
some 455Khz IF LC circuits, thereby screwing up the "Q" and making
the skirt selectivity quite broad.

| 4. The SR3 workmanship is not quite as good as the original SR.

The SR3 is made in the People's Republic of China; the SR2 was made
in Malaysia, etc.

|People have spoken well of the Select-A-Tenna, an external loop
|antenna, sold by Grove. This is about $50.

Perhaps someone could rig up a miniature phone jack that would
disconnect the ferrite antenna and use an external wire loop as
the L? Of course, how well the RF stage will track is another matter.

[AM sensitivity problem]

|'They seem aware of the problem, and suggested simply reversing the
|two leads from the circuit board to the speaker unit. I was
|skeptical, but I tried it and their cure worked perfectly.

Has ANYONE tried this alleged 'cure' for the sensitivity problem?

| * AM filter mods
| * External DC power mods

One ARRL staff member purchased a SR III after all the hype here,
and took it back for a refund. He called it a 'Heterodyne Special'
in that it sure did generate a lot of whistles when tuning. Apparently,
the Local Oscillator generates strong harmonics. Don't know if there
is any cure as apparently the radio is supposed to a 1-IC special
insofar as the RF/IF section is concerned... indeed, WLS-AM (890Khz)
has two tuning peaks in Chicago...

Also, since the receiver is tuned via varactor diodes fed from a
variable DC voltage form the tuning potentiometer, one person said
they were going to work on a spectrum analyzer conversion. This would

have been similar to what showed up in "73" magazine some years back, where they used a SONY (SW-20?) receiver modified to use varactor diodes for tuning, which was then swept with a ramp generator.

So, in the Superadio III case, you would take sweep from an oscilloscope, feed that to the tuning diodes, and feed the audio output into the Y-axis of the scope... has anyone attempted this? Might make an interesting AM-DX (FM-DX?) band monitor...

2101. Sabotage of Howard Stern's Cleveland Broadcast

Newsgroup: rec.radio.broadcasting

(about z-89 in Syracuse)

Despite their relatively poor signal (a few hundred watts ERP,
vs.
97,000 watts for their closest format competitor 93Q) they actually
hold their own in the Syracuse market...I've seen Arbitron reports
that show them with shares in the 3 to 3.5 range and about 7th
or 8th place overall in a 20 station market. Not bad for a station
with limited range and limited budget in a top-75 market. It's not
unusual for a student-owned station to do well in a smaller college
market (witness WVBR-FM/93.5 in Ithaca which always leads in
18-34 and never finishes worse than second in 25-54 in the Ithaca-
Elmira Arbitrons). But a larger metro? What Z-89 is doing is almost
unique in that context.

>

While Z89 is located on the Syracuse University campus, and their transmitter radiators are colocated on the tower of Syracuse University's WAER-FM 88, Z89, (WJPZ), is *not* operated by Syracuse University. It is licensed to the Student Government Association at SU.

Z89 takes a big chunk of the market, competing heavily with WNTQ-FM, (93Q); WOLF; and to a lesser extent with WYYY-FM, (Y-94 FM), and WAQX, (95X). While I can't cite numbers, I can say that Z89 pulls very good numbers book to book, and is serious competition to the commercial stations cited above.

A NEWBORN IN AFRICA: ZAIRE'S RADIO MAENDELEO

Only a short time ago Zairians informed us of their newborn rural radio in Bukavu, in the eastern province of Sud-Kivu. Radio Maondeleo, meaning "development," is the result of efforts by twelve non-governmental development organizations that have worked together in the province since 1987 to create this new communication tool. Its first programs were broadcast in September.

Radio Maendeleo currently employs eleven people, including five journalists. It broadcasts on FM for about six hours every day. Due to its location in the mountains, Radio Maendeleo can also be picked up by listeners in neighboring Rwanda, Burundi and Tanzania.

Radio Maendeleo's broadcasters would like to establish contacts with other radio stations for the purpose of sharing information, programs, documents and experiences.

: N> stations in Europe!!! A few stations would play country for a few
: N> hours and then switch to other music (these stations were either AC
: N> or govt. all-purpose FM mix stations- most common in Germany).

: US country music would be a "specialty" format over there. You'd just as
: soon hear a station playing all "Oom-pah" music, or all bagpipe music in
: the US, as one would hear an all-country station in Europe.

Unfortunately this situation is due to change: a licence has been granted
to London Country Radio (name might be provisional) for fulltime
country on 1035KHz in London. I'm holding my breath.

2113. New station in Cincinnati??? (WJYC Delhi Hills)

Newsgroup: rec.radio.broadcasting
Date: 1994-06-17 05:19:27 UTC
From: ROBERT BOSKEN <RBOSKEN@DESIRE.WRIGHT.EDU>
Message-ID: <2trbov$55q@vixen.cso.uiuc.edu>
Source record: 39518

Greetings from South West Ohio

In the May issue of (shudder) Popular Communications, I saw a brief mension concerning the call letter change of WAEH to WJYC. In the previous month,
WAEH was listed as a new station being constructed in Delhi Hills OH, (my community... I think). As I recall, the station was alocated for 91.1MHZ with 15 KW. If this is true, I have a few questions:
1. WNKU (Northern Kentucky University) operates on 89.7MHZ from Highland Heights KY with 12 KW. Since Delhi and Highland Heights are less than 25 miles apart, and because the channel spacing is so close together, is this possible?
2. Because of its frequency, WJYC will have to b non-comertial. As we all know non-comertial in the U.S. means public, educational, or religious. Can Cincinnati support yet another of this type of station? [Cincinnati already has 88.3 WAIF, 88.7 WOBO, 89.7 WNKU, 90.9 WGUC, and 91.7 WVXUplus the rimshot 88.5 WMUB in Oxford as public or NPR, and 93.3 WAKW, 104.3 WNLT, 1050AM WTSJ, and 1560AM WCNW as religious.[
I am in a quandry and need some radio-wise netter to help me out. Send to the above address, or post to RRB, (I'm flexable) .

Oh, before I forget, I'd like to put in a plug for Cincinnati's fine public radio... In this area, at least, Cincinnati is still a leader. The next time you find yourself in the "queen city" be certain to check-out one of the public radio stations I've listed in this post... you should be surprised and delighted
RAB

2114. Duopololy is coming to New York

It looks like New York City will be finally getting its first real
duopoly. Technical since Infinity owns WFAN (660 AM) and WZRC(1480 AM)
ther is a duopoly, but the latter is being leased to a Korean organization.

New York Newsday reports Emmis Broadcasting who owns WQHT (Hot 97) is
offering $68 Million to Summit Communications for WRKS (98.7 Kiss).
Let's wait and see what happens.

I think your receiver is not very sensitive or the antenna was not correctly
directed. Or you did not know what is audible.

In Northern Scandinavia you must really have been in very remote areas
because you should have at least in the Finnish Lapland three YLE national
channels and one regional channel audible everywhere. Plus some private
stations in several areas. In Norway and Sweden the system is almost
identical. In Helsinki you should be able to hear 12-13 stations, half
of them various YLE services and the rest private or community stations.

No no no no... Even the state channels in Germany run commercials,
usually in blocks before the hour and half hour. Maybe you just happened
not to hear any. Perhaps I'll post an article on German broadcasting to
rec.radio.broadcasting :-)

Also, most dedicated oldies stations, in Britain anyway, are on AM.

Every 0.3 milliHertz??? That means there were 68333333333 stations on the
band (87.5-108 MHz)? You must have very selective receiver or you are
mixing millis (m) with megas (M).

2118. Public Radio in Germany

Newsgroup: rec.radio.broadcasting
Date: 1994-06-17 05:19:42 UTC
From: Richard Hunt <rhunt@cix.compulink.co.uk>
Message-ID: <2trbpe$568@vixen.cso.uiuc.edu>
Source record: 39523

The radio landscape in Germany is diverse. There are national, local and regional broadcasters, both state funded and commercial.
Germany is a Federal Republic. The national radio service, Deutschlandradio, broadcasts two programs Deutschlandradio from Berlin on FM, which is culture oriented, and Deutschlandfunk from Cologne on mediumwave and longwave which is news/politics/talk oriented. At times both carry the same program.
Germany has 16 federal states or Laender. Each of the states either has its own public broadcasting network or participates in a network with adjoining states. The networks (Anstalten des oeffentlichen Rechts) usually have 3 or 4 radio programs and two tv channels. Here is a list of corporations, their programmes and coverage areas.
Bayerischer Rundfunk. Covers: Bavaria. 5 programs, all on FM. Also uses mediumwave and 6085kHz shortwave.
Hessischer Rundfunk. Covers: Hessen. 4 programs on FM. Also uses mediumwave.Mitteldeutscher Rundfunk. Covers: Saxony, Saxony Anhalt and Thuringia. 4 programs, 3 on FM and 1 on AM.
Norddeutscher Rundfunk. Covers: Lower Saxony, Hamburg, Schleswig-Holstein and Mecklenburg-Western Pommerania. 4 programs on FM, mediumwave also used.Ostdeutscher Rundfunk Brandenburg. Covers: Brandenburg. 4 programs on FM, one of which is shared with SFB.
Radio Bremen. Covers: Bremen and Bremerhaven. 4 programs on FM, mediumwave also used. Shares a shortwave transmitter on 6190kHz with SFB.
Saarlaendischer Rundfunk. Covers: Saarland. 4 programs on FM. Mediumwave also used.
Sueddeutscher Rundfunk. Covers: Northern Baden-Wuertemburg. 4 programs on FM, mediumwave also used. Has a shortwave transmitter on 6030kHz.
Suedwestfunk. Covers: Southern Baden-Wuertemburg, Rein-Pfalz. 4 programs on FM, mediumwave also used. Has a shortwave transmitter on 7265kHz.
Westdeutscher Rundfunk. Covers: North-Rhine Westphalia. 5 programs on FM only.

Programming: generally, each Anstalt has a serious music/culture channel, a pop/youth channel and an easy listening channel. The larger Anstalten will have one channel which is further split into local segments, at least part time. Usually, both the pop channel (CHR) and the easy listening channel carry commercials, which supplement the licence fee.

Satellite distribution: many of the programs are distributed by satellite, particularly ASTRA and DFS Kopernikus.

FCC ANNOUNCES NEW MASS MEDIA USER FEES

In establishing Section 9 of the Communications Act (47 U.S.C. 159) the Congress ordered the FCC to collect fees to cover the cost of certain "regulatory activities" e.g., policy and rulemaking and enforcement. These annual fees are assessed on commercial broadcasters, common carriers, private radio licensees and CATV operators. Non-profit operators are excepted from such fees.
Failure to pay the annual fee on time will result in the assessment of a penalty of twenty-five (25%) percent of the amount due. While the FCC can revoke a license for non-payment, the FCC's most efficient collection weapon is the 25% penalty.
The annual regulatory fee is to be paid in the same manner as application filing fees, with one exception. In most cases a single filer cannot pay multiple filing fees using a single form. This is not true with regulatory fees. In the case of a licensee of multiple broadcast stations, e.g., 6 FM and 3 AM stations a single filing can be made for all regulatory fees. Since different dates for filing Television, FM and AM fees have been set, the FCC's public notice states that in the case of a single filing for multiple dates, the later filing fee date applies.

Payments on a new form, FCC Form 159, are to be made at the lock box
at the Mellon Bank in Pittsburgh.
The regulatory fee is assessed per license or permit held on
October 1, 1993. Thus, if a station went on the air after that date or
the license issued later, or is not yet issued, the fee is for the permit.

The FCC's Order does not contemplate the responsibility of a licensee who
acquired a license or permit at a closing which occurred after
October 1, 1993. The seller would presumably be responsible, but in the
case of a corporate seller the corporation may already have been dissolved.
The following dates for filing and fees due for Mass Media entities
have been announced:

AM RADIO (47 CFR, Part 73)
DUE: 8/29 - 9/2

1. Class D Daytime $ 250
2. Class A Fulltime $ 900
3. Class B Fulltime $ 500
4. Class C Fulltime $ 200
5. Construction Permits $ 100

FM RADIO (47 CFR, Part 73)
DUE: 8/8 - 8/10

1. Classes C, C1, C2, B $ 900
2. Classes A, B1, C3 $ 600
3. Construction Permits $ 500

TV -- VHF COMMERCIAL (47 CFR, Part 73)
FIRST INSTALLMENT DUE: 7/26 - 7/29
SECOND INSTALLMENT DUE: 8/26

1. Markets 1 thru 10 $18,000
2. Markets 11 thru 25 $16,000
3. Markets 26 thru 50 $12,000
4. Markets 51 thru 100 $ 8,000
5. Remaining Markets $ 5,000
6. Construction Permits $ 4,000

TV -- UHF COMMERCIAL

1. Markets 1 thru 10 $14,400
2. Markets 11 thru 25 $12,800
3. Markets 26 thru 50 $ 9,600
4. Markets 51 thru 100 $ 6,400
5. Remaining Markets $ 4,000
6. Construction Permits $ 3,200

LOW POWER TV, TV TRANSLATOR, $ 135
TV BOOSTER (47 CFR, Part 74)
DUE: 7/26 - 7/29

BROADCAST AUXILIARY $ 25
DUE: 7/26 - 7/29

INTERNATIONAL (HF) BROADCAST $ 200
DUE: 8/29 - 9/2

FCC's complete schedule for payment and copies of the new FCC Form 159 -
you can connect via computer and modem to our FCC WORLD BBS at 202-887-5718.

2120. Museum of Broadcast Communications

Newsgroup: rec.radio.broadcasting
Date: 1994-06-17 05:19:43 UTC
From: garyb@ins.infonet.net
Message-ID: <2trbpf$569@vixen.cso.uiuc.edu>
Source record: 39525

In Chicago yesterday, I decided to take a look at the Museum of Broadcast Communications for the first time. It's located in the Chicago Cultural Center, in the old main library building.

First of all, let me preface my remarks by saying I'm glad someone's trying to preserve our broadcasting heritage, and I applaud MBC for doing that. Also, I am an affecionado of "the golden age of radio", and have had a large collection of old radio drama and comedy programs.

The Museum is divided into three sections-a Radio Hall of Fame, a Television Hall, and an Archive section, along with a television recording studio where for $19.95 you can star as anchor in a newscast.

Antique buffs should be salivating when they enter the Radio Hall. 95 percent of the displays are simply old radios from the days of crystal sets to current times. Each radio is tied to an old radio program that a sign says "you would have heard" on that appliance. There's a recording of clips from the expected programs-Fibber McGee & Molly, etc. and a special "Jack Benny Vault" that plays a loop of Benny show archives.

My problem with the radio exhibit is that's all there is to it...except for a tiny display case taking about the Radio Hall of Fame, you'd hardly know that it existed...or that radio survived beyond 1960. Isn't it time to revamp the display...to take us into the Age of Music...then the Age of Information? I would think they could tap into WLS's archives as a perfect example of the metamorphosis of radio from early times to the present...really put it all into perspective. The other thing...the TV side is mostly devoted to commercials...with two viewing rooms where you can watch the "best of" spots by BBDO and international award winners. Nary a word is said about some of the creative radio advertising that's been developed over the years.

Perhaps the best way to register a complaint is to join MBC...which I intend to do...and I'm urging any of you who care about preserving our heritage to do the same. I'd like to see more attention paid to the radio side to make it an exciting place to visit...and if we all push them for change, there's a good chance it will happen.

Comments? Suggestions?

Source record: 39528

Is there a way to get a comprehensive list of transmitter powers, ERP's, SCA %modulations, tower locations, and tower HAAT's for San Francisco Bay Area stations? I am trying to do a rough coverage analysis for an SCA traffic information system (TravInfo) that ESL is developing with Shadow Broadcasting.

I've discovered that many station GM's won't lease subcarrier because they are afraid of coverage area reduction. The engineers tell me it actually is a question of "loudness", due to the lowered modulation of the main signal when a subcarrier is used. Can someone explain if the GM's are paranoid, or is loudness a real listener issue? I know the technical aspects of radio communication, but I am still new to the commercial/marketing side!

- Thanks, Lloyd Matthews (Lloyd_Matthews@SMTP.esl.com)

2123. Radio-contest computer fraud

>From the Orange County Register; and Oceanside Blade-Citizen, June 15

"A man accused of using his computer skills to rig radio contests
has pleaded GUILTY to seven federal charges, including conspiracy; and
computer and mail fraud.
Kevel Lee Poulsen, 28, now faces a maximum sentence of up to 40-
years in prison; and a $1.75 million fine.
Poulsen originally was charged with 19-counts involving a string of
incidents that ended in April 1991, when he was arrested at a Van Nuys
supermarket.
Those incidents involved the rigging of radio station contest in
which Poulsen fraudulenty won two Porsches from radio station KIIS-FM
(102.7), $20,000 in cash fro KPWR-FM (105.9); and at least two trips to
Hawaii and $2,000 cash from KRTH-FM (101.1), according to prosecutors."

Hello out there in net land. Today I heard there were riots in Vancouver after the hockey team didn't win the STanley Cup, the New York fans didn't riot, even though there team had won. Would be interested to see what Vancouver broadcasters think, as to how they put the story out. A talk show on CHQR this morning said that Canadians were just trying to copy the US and there riots, since we are not known for riots usually, except for when Toronto won the World seriese. Well what do you all think?

What is the legality of unauthorized listening to SCA subcarriers on FM since the Electronic Communications Privacy Act of 1986? Is it legal to listen to these broadcasts?

2127. World Cup Soccer radio info/schedule for US and Canada

Newsgroup: rec.radio.broadcasting
Date: 1994-06-17 05:19:58 UTC
From: okt1@crux4.cit.cornell.edu
Message-ID: <2trbpu$56p@vixen.cso.uiuc.edu>
Source record: 39532
Cross-posted to: rec.sport.soccer,rec.radio.broadcasting

This article is being cross-posted to rec.sport.soccer and
rec.radio.broadcasting.

Since One-on-one Sports Radio Network did NOT publish a schedule of World
Cup Soccer broadcasts and a list of stations that will carry the matches
in the June 16 of _USA_Today_ as promised, I decided to call One-on-one
Sports Radio Network in Northbrook, Illinois (1-800-771-6631).
"Heather" at One-on-one Sports told me that the list of radio
stations have NOT been finalized so she did not want to fax me
the list. I asked her for the radio stations serving the
9 World Cup Soccer venues and she gave me a small list of
stations. I was able to look up the frequencies of these
stations except for the one in Dallas:

WEEI 590 AM Boston, MA

WCBR-FM 92.7 FM Arlington Heights, IL (Chicago area)

KTCK ??????? ???????????? (Dallas, TX area)
(Someone from Dallas please help me out with this one. My 1994
_M_Street_Radio_Guide_ does not list a KTCK. I suspect this
station recently changed its call letters. I would not be surprised
if someone tells me that this station is an "all-sports" radio
station with the nickname "The Ticket").

WWJ 950 AM Detroit, MI
CKLW 800 AM Windsor, ON, Canada
(WWJ and CKLW will split the games. CKLW uses the slogan
"AM 800: Windsor's News, Weather, and Sports Station"
and has stopped using call letters on the air.)

XETRA 690 AM Tijuana, BCN, Mexico (serves Los Angeles and San Diego)
KWNK 670 AM Simi Valley, CA (simulcasts XETRA)
(XETRA uses the slogan "XTRA Sports 690". The official identification
"X-E-T-R-A Tijuana" is in Spanish but the station broadcasts in English.
XETRA's studios are in San Diego and the San Fernando Valley but
its transmitter is in Tijuana.)

WPAT 930 AM Paterson, NJ (New York area)

WWNZ 740 AM Orlando, FL

KNBR 680 AM San Francisco, CA

WTEM 570 AM Bethesda, MD (Washington, DC area)

One-on-one Sports will broadcast 26 matches. However, most of these stations will not broadcast all the matches. Check with the stations themselves to find out which of the matches will be carried. All broadcasts except for the opening match begin 30 minutes before kickoff. The broadcast of the opening match begins 1 hour before kickoff.

No it doesn't; it's purely for the US market. But in UK I replaced
the transformer with a standard miniature 9-0-9V 100mA (240V) one
in two SR IIIs and (so far) they worked perfectly.

In article <2toh4h$2dm@vixen.cso.uiuc.edu>, transvox@tyrell.net (Mark Roberts) writes:

(what is KMOX doing)

KMOX's PD Tom Langmyer (whom I've known since we worked together at WBEN in Buffalo almost 15 years ago) has told me they're trying to attract a younger audience to talk while still holding on to the overall 12+ AQH lead (although other sources have said Limbaugh was not his idea, but the current GM's; Tom hoped to develop locally based talent). Trouble is, Limbaugh is apparently not doing as well in 12+ as his locally originated predecessor for KMOX. Word has it from various sources that he''s blown away some of KMOX's traditional listenership, withoutt replacing it with enough younger listeners to make the change worthwhile. And the Limbaugh station in any market always has to overcome a partisan image that can scare away a lot of potential local spot business. They'd have been better off hiring and developing their own host to appeal to the baby-boomer crowd, especially that large portion of it that doesn't sympathize with Limbaugh. WXYT in Detroit already has decided Limbaugh's becoming more of a liability than an asset...wonder if KMOX will soon eat the contract and decide the same? Or if CBS's O&O division management in NYC will decide it for them?

>
Actually, I wasn't entirely correct there. What the RA is actually doing (as
far as I am aware) is to give 105-107 to the local commercial stations we have
already (ILRs as they are known) and give 107-108 to the low powered ones,
which should be just about enough space for most of us, though there could be
a mass pile-up in London, where competition for licences will be fierce.

>without the Rap" with Brit Jeff Windsor on in midday.

This sounds a lot like the format that WEZF (92.9, Burlington, Vt.)
appears to have changed to. RRB regulars Scott Fybush, Sid Whitaker,
and (not-so-regular) I took a trip to northwestern Vermont earlier
this month, and the change was quite noticeable compared to what I had
remembered from six months previous. They were using the tag ``The
best songs on the radio'', and it sounded to me as if, for the first
time in that station's history, they actually had a live jock on.

This appears to complement the move at WXXX (95.3, app. 95.5/25kW,
Burlington) towards a more ``Urban'' variation on their customary CHR.
(It would not surprise me if one was in response to the other, but
don't ask which order.)

The dividing line between WEZF and WBOS (Boston) while driving up I-89
in New Hampshire was quite sharp. Something tells me it was around
Lake Sunapee, but my memory isn't all that good. (Scott?) There was
a similarly noticeable switchover between 107.9s as well.

[During the trip, we visited the Mount Mansfield transmitter site which
WCAX-TV, WEZF, WVNY-TV, WVPS, and WETK-TV all call home. We chatted
for some time with the WCAX engineer on duty (they are the only
full-time staffed shack); he said that previously, when WCAX left the
air earlier than it does now, some of the engineers would hook up a
receiver and watch WFSB from Hartford.]

2136. Z89 in Syracuse

Newsgroup: rec.radio.broadcasting
Date: 1994-06-17 05:20:18 UTC
From: "Michael Black...WEOS-FM" <BLACK%HWS1%HWS.BITNET@UBVM.cc.buffalo.edu>
Message-ID: <2trbqi$57t@vixen.cso.uiuc.edu>
Source record: 39541

Z89 is a 100 watt FM station licensed to SU student Governments. There is a long and rich history behind this, including the reason for getting the station on the air. Rather than the "traditional" college format, they choose CHR as the main format and do indeed make a dent in the Syracuse market. When looking at other non-commercial statiosn in the Arbitrons for Syracuse, they are FAR above the AQH and cume. We do not get a Syracuse book, only the Rochester one, so I do not know how they compare to the commerical statiosn. The big dent is in the 12-25 age group. The station is very tight in its format and is programeed just like a commercial station, with sweepers, etc. Last time I heard the morning show, it was "Zooish" in sound. I was told by a staff member that they were doing a service that most college stations do not: provide REAL training for their students in commercial radio. Ironically, other than fringe reception from either WEOS (not really a factor) or from WICB in Ithaca, there is no "college" or modern format station in Syracuse.

Z89, WJPZ, is 100 watts at 89.1FM. There may be more of a limit on their signal in the future, as WDWN in Auburn, licnesed to Cayuga Community College, has a construction permit for 3KW directional on 89.1FM from their present transmitter site.

By the way, WVBR, affiliated with Cornell (kind of), is one of those IVY stations. I remember reading about the history of these ago, and there are still many of the IVY's that still own or have ties to commercial FM stations (Princeton, Brown, Dartmouth). WVBR runs an AOR/Classic Rock format, with some modern rock songs thrown in, especially at night. They run specialty shows on the weekends.

>loudness a real listener issue? I know the technical aspects of radio
>communication, but I am still new to the commercial/marketing side!

The benefit of an SCA to a station is the several grand a month in extra income.

But the disadvantages are many.

1. Signal degradation is one. For each percentage point of modulation the
station transmits in subcarriers, it is allowed to increase its total
modulation one half a percentage point above 100% (75 KHz deviation), up to
a maximum of 110%. This means that a station with two subcarriers at 10%
injection each takes a hit of 10% loss of modulation of the carrier with
its own programming. One 10% subcarrier causes a net loss of 5%.
Admittedly, this is not much of a hit (less than 1 db, max). However, in a
highly competitive market, each db of loudness counts.

In addition to the loudness hit, activity in the 53 KHz to 99 KHz region of
the carrier can, depending on the nature of the subcarrier, interact with
the main signal. These are the famous "birdies and whistles" that used to
plague stations with SCAs. With modern exciters and RF amplifiers, these
artifacts are no longer a part of the station's transmission. But multipath
and crummy radios can make these noises apparent to the listener. Any SCA
will damage (even if it is just slightly) any station's fringe performance.

2. Broadcasting of an SCA requires more rigorous tuning of the transmitter.
Reduced bandwidth caused by mistuning can cause audible problems in the
presence of one or more subcarriers.

3. SCA lessees have a tendancy to act as if they own the station. I get
more calls (mostly junk) from the subcarrier operators expecting me to
chase ghosts than from the radio stations themselves. As an engineer, I
tack a hefty surcharge on my services when an SCA is involved with a
station. The extra engineering is trivial; the political nonsense and
bother is usually substantial.

Over the years, I have had great relations with a few SCA providers.
Indyses, now defunct, had great, knowledgable people. They were very
conscientious about the quality of their product and were most respectful
of the host station. Cue paging is another well-run, non-intrusive
operation. And some tests run recently with DCS indicated that that company
would probably be easy to deal with. In general, the data services are OK

and the audio services are horrible.

An exception was a company called Broadcast Data. These people wanted to use one of my stations to broadcast stock report data. They arrogantly insisted that a passive bandpass filter be inserted in our composite signal line. Not a chance! I was not going to take a hit in separation just to accomodate their own weenie system bandpassing. I ultimately prevailed and they went elsewhere. Fortunately, management was also unwilling to suffer such degradation.

My general advice to station management is to stay in the business of broadcasting and forget leasing the SCA. I look at most SCA people as wannabe broadcasters who feel that for the pittance they pay each month to the station, they have a right to impose, infringe, and in general make everyone's life (especially mine) a living hell.

Here in Stockholm Sweden we have 8 commercial stations on the air, two more are about to start. Then there is at least 15, fairly low power, community stations. Four national stations in the domestic network, all with 60 KW. A local station serving every "county", also with 60 KW. On top of this Radio Sweden's outlet also on FM. (On this channel you can also hear BBC and NPR).

Not exactly sure why K and W were chosed but they help represent which half of the country a station is in. I might be wrong but I'm pretty sure the dividing line is the Missisippi River. K is the western half while W is the eastern half. The thing is that there are potentially 17,576 valid callsigns and never forget the distinctins between AM, FM and TV. So all total there are 105,456 in the United Socialist States of America.

They differentiate whether the stations are east or west of the Mississippi river - as near as I can tell from history - an arbitary line used to separate the United States for call letter assignment purposes. The Commission was asked a few years a go to scrap the method but it refused. Why they used "K" and "W" is a mystery too. Maybe some of you broadcast historians out there may know - I am only 30 and was never told why they chose these two letters way back in the thirties when studying the subject of broadcast history at UMASS.

Source record: 39548

In article <2trbpl$56c@vixen.cso.uiuc.edu>, neil@realtime.demon.co.uk writes:

(Why K & W prefixes for US stations?)

It really was a decision made by the International Telecommunications Union early in the century, to assign each country its own distinctive call prefixes. Ships and land based commercial stations were dreaming up their own 2, 3 and 4 letter calls before that, and often several stations would adopt the same call and create massive confusion, which had to be sorted out on a worldwide basis. Britain got call signs beginning with G, France exclusive use of F, Russia got R and U, Canada got a lot (but not all) of the C's. The USA was assigned call signs beginning with the letters N, K and W, and also most of the A's. Each government was given power to assign stations individual calls with those prefixes and whatever other combination of numbers and letters they saw fit.N and A calls are given only to amateur, military and international shortwave broadcasting stations. W and K callsigns are given to everything, in number-letter combinations for nonbroadcast services, and letters only for domestic radio and TV broadcasting stations. Early on, the Federal Communications Commission further subdivided things by assigning calls geographically...callsigns starting with W for stations east of the Mississippi River (or in communities straddling the river) and K calls for those west of the Mississippi. A few very early stations, mostly K calls in the east, don't fit that pattern which was established around 1922. The US is actually one of the few countries where the legal callsign has generally come to be used as an on-air identifier for the station (often in conjunction with other slogans denoting format or dial position or both)...and just about the only one where the legal call sign and city of license MUST be announced on-air at the top of the hour. Many, but not all, Canadian and Mexican stations also weave their legal call signs into their on-air identity, but their legal ID requirements are not so strict as ours. In other countries, if a call sign

is assigned at all to a broadcaster, it's only administrative and rarely if
ever heard on the air. Don't know why we take call letters more serious-
ly than other countries, except that we got so many radio stations so
soon (500 in over 100 different cities by 1922, over 10,000 AM and FM
stations in thousands of different towns today) that those three or four
letters in the callsign became the most convenient way to tell one
station from the other. Broadcasters here have always lived in a very
competitive environment right from the start and something that sets
you apart from everyone else becomes especially crucial. Sometimes
the call sign means something like those that spell words, eg. Syra-
cuse's WHEN. Others may refer to the city of license like WNYC in
New York City (which also refers to the owner, the city government of
New York). Some have another significance unique to the station
like our WXXI, which stands for our TV station's dial position---the Roman
numeral for channel 21---since we signed our TV service on first before
opening an AM or FM. Some spell out a station's original slogan, like
Buffalo's WGR, "We're Great Radio", Nashville's WSM, "We Serve
Millions" (also the slogan of their owner, a major life insurance comp-
any), or Chicago's WLS, "World's Largest Store" (for it's original owner,
Sears Roebuck). Some stand for the original owner's name, like
Buffalo's WBEN (Buffalo Evening News), or the current owner--New
York's WABC or WCBS, owned by the ABC and CBS networks re-
spectively. Some may refer to the station format, like WFAN in New York
(an all-sports station devoted to the sports "fan"). A majority mean
nothing much, except perhaps the founder's initials...and some, including
the earliest, were either assigned purely at random (Pittsburgh's KDKA,
the oldest licensed station of all) or just picked because the owner thought
they sounded good or made an attractive logo on his station's letterhead.
A station owner can change the last 2 or 3 letters of his callsign just by
asking the FCC, which will normally honor the request for a fee providing
no one else already has it and it doesn't spell (or suggest) something
offensive or obscene, forwards or backwards. The W and K prefixes
themselves mean nothing except that an international agency handed
them out to identify stations of US origin about 80 years ago.

>
>

(I've been waiting for this to be brought up!)

Howard talked about it Monday, and played some tape from the Cleveland TV stations. It seems to have been a junior engineer and he was caught red-handed by a cop on the scene. They didn't say if they knew who was busting into their siginal earlier in the morning and shouting obscenities. Howard feels that the cutting of the transmission cable is a felony, and that the FCC should be investigating clipper-wielding engineers instead of his rantings about penises and lesbians (GGG)!

2147. 95.5 WBRU Providence; was re: Z89 in Syracuse

Newsgroup: rec.radio.broadcasting
Date: 1994-06-17 19:04:51 UTC
From: ST000414@brownvm.brown.edu
Message-ID: <2tss4j$9mb@vixen.cso.uiuc.edu>
Source record: 39552

Another station similar to - in fact better than Z89 - is my station, 95.5 WBRU in Providence, where I work as a news broadcaster and late-night DJ. WBRU is staffed completely with Brown students with the exception of our PD, the sales staff, and a receptionist. We broadcast New Rock/Alternative similar to KROQ in LA, WDRE in New York, or WFNX in Boston. Our main demographic is 18 to 34 - we're second, behind AOR WHJY in that market. I think we're the sixth or seventh highest rated station in the city. We have been voted one of the top 5 stations in America, medium market, in 4 of the last 5 Rolling Stone readers polls, and this year we were NUMBER ONE. We have also been known to break bands nationally - like Utah Saints. And we provide an active radio environment; BRU graduates include Alison Stewart of MTV News, Chris Berman of ESPN, and Alexa Tobin, who PD's a station in Vermont/Albany only 5 years after graduating. Most of our listeners aren't even aware that we're Brown students, since we don't talk about Brown on the air.

The number one rated "Van and Connie" morning program on WHO-AM is about to come to an end...sort of.

Co-host Connie Murad has tendered her resignation, effective sometime in July. Murad is leaving the station after her husband, Mike Smith, who is Production Manager of WHO-TV secured the Production Manager's job at KSTP-TV in Minneapolis, MN.

In announcing the change, program director Van Harden says they expect to announce a replacement soon.

From: "A.J. Janschewitz" <p00445@psilink.com>
Message-ID: <2ttucj$om1@vixen.cso.uiuc.edu>
Source record: 39554

Please forgive the use of bandwidth for retelling this, but all the replies I got to this got lost in a mail crash. If you wrote before, please do so again.

I have two Ampex reel-to-reel audiotape decks for TRADE. One is an Ampex 351, full track, with tube electronics. The other is an ATR-700, which was manufactured for Ampex by TEAC. It is 1/2 track stereo, with a front panel and rear connector configuration very similar to the Otari MX5050. The 700 has less than 20 hours on its heads. The 351 is a workhorse, and a superb machine if you're still into razor blade editing, with an editing block built onto the head nest.

I am looking to acquire a microphone or two for my collection in trade for these machines.

Both have been in clean storage, and both will require the routine maintenance (oiling, switch cleaning, etc.) that would be expected of a machine that has been in storage.

You pay shipping, or pick up in the Hartford, Connecticut area.

I am open to *any* trade offers; not really seeking a cash deal.

Please reply by email to me at aj@aj.com, or int0009@char2.vnet.net and thanks for reading.

The following was posted on rec.radio.shortwave by Jonathan Marks, head of English Language Services of Radio Netherlands. It may be of interest to the domestic broadcast community.

- - - - - - - - - -
Newsgroups: rec.radio.shortwave
Date: Thu, 16 Jun 1994 14:52:00 EST
>From: Jonathan P Marks <0003382983@MCIMAIL.COM>
>Subject: Radio Netherlands Gets Awards in NYC

New York: June 16th. Radio Netherlands was awarded four prizes in the prestigious International Radio Competition at a special presentation held in New York today. This is the third year in a row that the station has picked up medals at the festivals which this year attracted 1298 entries from 31 countries. But this year was different as Radio Netherlands decided to compete in categories which are traditionally won by domestic radio stations in the USA and UK. Jonathan Marks, producer of one of the prize winning programmes and the new Head of Programmes at Radio Netherlands says the result comes at an important phase of re-organisation within Holland's external broadcasting service. "It is clear that we can not only report developments in The Netherlands but also cover subjects that directly concern our listeners. This mixture of European and regional information is important. As a public station we're sharing Holland's ideas with the world in a different way to the government broadcasters. It's a policy that works in all our language services. We can't afford to make the same quantity of programmes as the BBC or the Voice of America. But these awards are an independent sign that we provide quality in what we do".

"Children Without Dreams", which won gold in the category 'Social Issues/Current Events', examines the phenomenon of child labour in the Indian subcontinent. Up to 100 million children work long hours in poor conditions and receive as little as 5 dollars a month. Producer Eric Beauchemin is delighted with the award: 'There's mounting pressure in industrialised countries, including The Netherlands, to ban the import of products manufactured by children. But the documentary shows that the issue is not that simple. Several Dutch development aid organisations are funding projects to tackle poverty and illiteracy which lie at the root of child labour. We decided to take the time to explain the complex issues, highlighting how Dutch organisations are trying to tackle issues that should concern us all.' (Technical production: Rick Kingma)

AIDS is an issue which Radio Netherlands covers regularly. 'The Next Battlefield' - which won silver in the 'Health/Medical' category - focuses on the ever-growing threat that AIDS poses to India. Some experts estimate that 30 to 50 million Indians could be infected by the turn of the century,

making India the country with the highest number of HIV/AIDS cases in the world. According to Eric Beauchemin, the producer, 'AIDS is developing in India along the same lines as in Africa. Yet, the Indian authorities procrastinated despite mounting evidence which showed the impact AIDS would have. A program is now being put in place, but precious time was wasted.....with tragic consequences.' (Technical production: Floris van Hoorn and Rick Kingma)

"Wartime Deception", an hour-long documentary researched and produced by Jonathan Marks won a bronze prize in the history category. Radio Netherlands is producing several documentaries covering the latter part of the Second World War in this part of Europe. This programme examined the clandestine radio operations which operated from Britain, including Radio Oranje. The programme also explored archives only recently released. Both Germany and Britain ran clandestine stations which pretended to coming from different countries. "Gustaf Siegfried Eins" pretended to be a political pirate station near Hamburg, but in fact came from a transmitter in the English Midlands. Archive material from Britain, Holland and Germany was used to compile the programme. (Technical Production: Arjan de Reus)

"They Call Her Madam" produced and presented by Dheera Sujan and Maggie Ayre was a finalist in the category "Best Talk Show". Women in India usually get a bad deal as far as their image in the world's press go - they're always portrayed as the underdog - victims of abuse and forced marriage, and the lowest on the salary chain. However it is the women of India who keep the country going. This programme looked at five remarkable Indian women who have excelled in their own fields and truly deserve the title of Madam. Shenaz Sheikh, for instance is a Muslim activist who has struggled for the rights of Muslim women against Sharia law. Shabnam Ramaswami has started a school for street children in one of New Delhi's largest slums; her aim is to teach her children to walk tall and live with pride and dignity. Shobha De is the first (and so far only) woman to have brought sex out into the open in India. Her books have outraged the moral right in the country, but they are the first to talk about women's sexuality, and they sell like hotcakes. These women have often had to struggle against their own community to get where they undoubtedly are - the top. (Technical Production by Frank Meijer).

2151. Canadian Religious Broadcasting/Question

Newsgroup: rec.radio.broadcasting
Date: 1994-06-18 04:49:28 UTC
From: Al Siebring <siebring@dordt.edu>
Message-ID: <2ttuco$om6@vixen.cso.uiuc.edu>
Source record: 39555

I left Canada almost 2 years ago for a 3-year stint at a Non-Comm/Educ.
station here in Iowa.

I understand the CRTC has made some major revisions in its prohibition
on explicitly "religious" broadcasting in Canada since my departure.

Apparently, Jimmy Pattison's former CJOR/CHRX in Vancouver is now doing
some kind of "Christian" programming. I also hear thru the grapevine
that the defunct CJCA Edmonton (off the air in December, what a shock!)
is now up and running again with some kind of Christian format.

Can anyone in Canada give me the lowdown on the CRTC's change of heart,
or has there even been one? What's going on up there??

>> Just a curious question... what do the K & W in american radio
>> station call signs stand for.....

This is the kind of thing that will bring numerous, and undoubtedly colorful responses/guesses.

This version, as told to me, many moons ago...

"K" and "W" were chosen to represent two of the pioneering broadcasting companies in the United States, and for that matter, by dint of their technical leadership, in the world. Specifically, Kaiser Broadcasting and Westinghouse Broadcasting.

As I said, these are the ruminations of a mentor of mine early in my career. I make no guarantees of their validity, however creative.

Any other takers?

I am gathering material on some of the well-known (possibly) apocryphal radio and TV stories that pop up in these groups with some regularity. If you have witnessed, or know someone who has witnessed, any of the following incidents, I would appreciate hearing from you via e-mail. I would like you to include as much detail as possible. (Who witnessed the event? When did it take place? Who was involved? Exactly what was said? What was the public reaction?)

Rest assured that your responses will not be used to poke fun at you, nor will they be re-posted to any USENET group. I'm just trying to gather material without the interference of two groups arguing with each other about whether or not these events really took place.

The descriptions are deliberately vague, because I want to avoid influencing anyone's response as much as possible:

o Children's show host signs off, not knowing that the microphone is still live, by saying "That ought to hold the little bastards."

o Host of talk show makes rude remark to female guest who appears on the show with a cat on her lap.

o Contestant on _The Newlywed Game_ comes up with an unusual answer when asked about the strangest place where the couple has ever engaged in sexual activity.

o Child makes rude remark to TV clown after failing to win a prize.

2155. QSL cards

Newsgroup: rec.radio.broadcasting
Date: 1994-06-18 04:49:36 UTC
From: barry@coyote.datalog.com
Message-ID: <2ttud0$ome@vixen.cso.uiuc.edu>
Source record: 39560

In my research on pioneer radio stations, I am looking for good logos and slogans from the stations over the years.

Anyone that has QSL cards they would like to share would be appreciated. Would you like to clear out the cupboard? Or, just lend some interesting examples ... even good photocopies.

I may be able to trade some software or aftermarket books in return for some of the materials...

thanks
barry

2156. "Keyboard Connection" - FOR JUNE 1994 Radio World

"Keyboard Connection" - FOR JUNE 1994

HOME GROWN UTILITIES FILL NEEDS

BYby Barry Mishkind

RG] It often seems as if there is a computer program out
there to fill every need. Yet sometimes the best way to accomplish a task
is a custom utility written on the spot. Let's see how easily used tools
can help us get our work done more easily.

If you're a bit worried already about not being a computer nerd, don't be.
Most of us are neither computerphobes nor gurus. We're somewhere out in the
middle; we can boot up and run our normal programs, but tend to get a bit
perplexed when trying to do something out of the ordinary.

Yet, let's see how a computer can take the hassle out of power output
calculations.

Since most disc jockies couldn't multiply three numbers to save their
lives, the practical engineer attaches a chart to the transmitter log
clipboard. In the deep dark pre-computer days, a desk calculator might
be used to make the chart. (OK, some of you may remember slide rules!)

However, the job was a time killer. And if the high voltage changed enough,
the chart might no longer cover all possible parameters, chasing you back
to the calculator for another joyless afternoon.

Computers allow the process to be automated. But not everyone knows how
to write programs. So, stations often adapt one of the popular spreadsheet
programs to build a table of possible values. The problem is, you have to
remember where the program is, and then reload the basic parameters. There
has to be a better way.

If you have some sort of BASIC interpreter in the computer, a short series
of commands will print the calculations desired on the screen.

It's not hard. For example, here's the essential core for most versions of
BASIC:

```
100 INPUT "Efficiency factor = ";EF
110 INPUT "Plate Voltage = ";EP
120 INPUT "Plate Current = ";IP
130 TPO = EP * IP * EF
140 PRINT TPO; "watts"
```

For Plate Voltage of 2700 V, Current of .605 amps, and an efficiency
factor of .88 (88%), the program will print something like "1437.48 watts".

That's a bit more precise than necessary, but easily fixed with these two lines:

```
125 IP = INT((IP + .0005)*1000)/1000
135 TPO = INT((TPO + .05)*10)/10
```

Which will then return "1437.5" watts. Your numbers will depend on your licensed power level.

However, this is nearly as cumbersome as using a calculator, since only one answer appears at a time.

One enhancement would be to change the command "PRINT" to "LPRINT", which send the output to the printer, saving the results on paper. We can make another improvement by adding the following lines which makes a "loop" calculation over a range of voltages and currents. Suppose you wanted to cover situations where plate voltage could range from 2400 to 3100 volts, and the current from .58 to .62 amps.

```
Replace 110 with: 110 FOR EP = 2400 TO 3100 STEP 100
Replace 120 with: 120 FOR IP = .580 TO .620 STEP .005
Replace 140 with: 140 LPRINT EP; "Volts", IP; "Amps", PO; "watts"
```

Add the following:

```
150 NEXT IP
160 NEXT EP
```

Now you get a whole series of numbers on your printer. You can transcribe them to a chart, or adding a few more lines, depending on the computer, to format the output into tabular form.

Some readers will notice these commands aren't in strictly numerical order. For BASIC users, this is not important, since the computer puts things in order automatically. On those other hand, those of you who have the newer versions of MS-DOS(tm) have QBasic(tm) instead of the older GWBasic(tm). While numbers are optional in QBasic, you must be careful to enter the lines in the proper order.

If you want more "features," just a few more lines will calculate transmission line loss and antenna gain, resulting in your ERP (Effective Radiated Power). Or, make the efficiency factor a constant so you don't have to enter it each time.

While these little "features" are nice, each time you want to use them, you have to reload BASIC or QBasic, then the program, and then fiddle with the numbers you want. How about a program that comes up with your normal operating numbers, lets you select any range, and then prints out the results? You can do just that easily in BASIC.

Having written your first program, perhaps you'd like to share it with someone. The easiest way is to print out the listing, such as above, and give it to them. That way, it will run on most any computer BASIC. This is normally true even if your friend has a Macintosh(tm) or Amiga(tm) instead

of a PC.

Nevertheless, longer programs can be tedious to type in. But, if your friend has the same type of computer you are using, you can copy the program to a diskette as long as he has the same generation of BASIC you used, GWBASIC or QBasic.

If you don't know what your friend has, it may be best to use a compiler. For example, Microsoft QuickBasic(tm) or a similar program, PowerBasic(tm) allow you to turn your code easily into an .EXE file that can be run on any PC.

You'll find many uses for little utility programs. Maybe sports remotes would be easier with a program to do statistical averages on the fly. Or, perhaps the sales department could use a program similar to the power output calculator. A salesman could quickly compare different rate structures for spot packages. Another little utility will help the bookkeeper analyze phone bills. Look around, the possibilities are endless.

Still nerveous about writing a program? Hang on, more help is coming!

>would think they could tap into WLS's archives as a perfect example of the
>metamorphosis of radio from early times to the present...really put
>it all into

I don't disagree with you at all, Gary. But you should be aware of one important factoid. It's Bruce DuMont's baby....lock, stock and barrel. I don;t know the man personally, but I do know some other folks who do...and from what I understand, any such changes would have to have his active support. I've also heard he'll listen when you talk....and he's pretty fair minded.

There are vast resources the Museum could tap. For one, I know every entry to the Nebraska Broadcasters Association yearly awards for the last 30 plus years are sitting at the University in Lincoln waiting for something like this.....sounds like an excellent project for some junior and senior Alpha Epsilon Rho'ers to dub and transmit these to Chicago.

I did several 'history of broadcast news' projects when I returned and finished my degree in 86-88. Once you start asking around....people have ALL sorts of interesting things piled in unused garage and basement corners that ought to be saved.

Tell Al Setka Hello from me when you see him next!

Lloyd Matthews (lloyd@pebbles.esl.com) wrote:

: Can someone explain if the GM's are paranoid, or is
: loudness a real listener issue?

I'll give you a great example, since you're in the Bay Area. Tune in KQED-FM at 88.5 during "Morning Edition". Then switch over to KALW at 91.7 during that time. Both are airing this program at that hour, so it's an excellent test. Which signal sounds "bigger"? If you're in SF or driving around much of the north-central Bay Area, KALW will sound louder and interference-free. More power? No. KALW has only 1900 and KQED-FM has 115,000 watts!

It's that KALW has only 1 subcarrier, a Chinese language station called Sinocast. KQED has data signals spread over nearly all it's SCA bandwidth. At times when KALW had to turn off its SCA carrier for technical adjustments, its signal could be heard in parts of Pacifica where it wasn't even heard before.

It's a question of where the power is going. Is it going into the main signal or into a subchannel? Also, and it is *big* problem, is multipath. The more subcarrier stuff a station is carrying, the more chance there is for the receiver to be hit with out-of-synch phase distortion. Listen to KQED-FM and hear it whine, go "sh-sh-sh-", and watch your signal indicator fluctuate. So, in short, GMs are not paranoid. They know what they're talking about.

In a previous article, siebring@dordt.edu (Al Siebring) says:

>
>Can anyone in Canada give me the lowdown on the CRTC's change of heart,
>or has there even been one? What's going on up there??
>
On 3 June 1993 the CRTC released a new Religious Broadcasting Policy (Public Notice 1993-78). Formerly the CRTC would not license undertakings (over-the-air or cable) that were devoted to the views of a particular religion, denomination or sect. It was prepared to license inter-faith services and it regularly renewed the licences of several Newfoundland religios stations that were already operating when Newfoundland joined Canada in 1949.

It will now license single-faith services, but these have to meet some stringent tests. Their programming has to be "balanced", which means that they must expose listeners or viewers to "a spectrum of differing views on issues of public concern within a reasonable time". Token expressions of alternate views are not acceptable; however broadcasters do not have to give equal time to all views. Licensees must also "guard against egregious intolerance and exploitation" in their programming.

As with other services, programming must be "predominantly Canadian", meaning that the CRTC will not license re-broadcasts of foreign (e.g. US) religious programming.

While they seem to have opened the door somewhat, potential licensees should keep in mind that six commissioners issued a dissenting opinion as part of the Public Notice. This indicates that future applicants for single-faith services may have tough sledding at licensing hearings!

Gary, the Chicago Broadcasting Museum's radio display is pretty much limited to the Golden Age because (and this is a guess) it was put together by Chuck Schaden, who does an old-time radio show every night at midnight on WBBM-AM. The Jack Benny vault was entirely financed by $39 contributions by listeners to Chuck's program, and Jack's daughter Joan was there at the Grand Opening. As you noticed, there is no admission charge, and hence little money for expansion.

You neglected to mention the Edgar Bergen case, which houses original Charley McCarthy and Mortimer Snerd dummies--one of the highlights of my visit last summer.

Anyway, you might want to get the ball rolling by contacting WLS or WGN and see if you can find someene eager to create a 50's-60's display, such as Chuck Schaden has done with the earlier days.

In article <2trbq5$57d@vixen.cso.uiuc.edu>, talk1370@aol.com
(Talk1370) writes about Rush and changes at KMOX:
> KMOX's PD Tom Langmyer (whom I've known since we worked to-
>gether at WBEN in Buffalo almost 15 years ago) has told me they're
>trying to attract a younger audience to talk while still holding on
>to the overall 12+ AQH lead.

That philosophy is what has turned KOA/Denver from a credible news
station into a "cutting-edge, off-our-medication" entertainment
medium and hard-news joke since it made the switch in 1987.

>. And the Limbaugh station in any market always
>has to overcome a partisan image that can scare away a lot of
>potential local spot business.

I really, honestly don't believe stations care about that, given that
their local owners or GMs are generally pretty chummy with much of
the local business community, which is traditionally conservative,
and that the large corporations which own many stations also tend to
be conservative. Since the Fairness Doctrine died (coupled NOT
UNCOINCIDENTALLY with the legislation that allowed duopolies), they
see the opportunity to advance their political agendas, not to
mention getting a lot more slaps on the back at the chamber of
commerce breakfast and country club. Since the FD died, KOA shed
nearly all its liberal -- or even moderate -- talkers except during
the wee, nobody's-listening hours. And at our Colorado Springs
duopoly, KVOR/KTWK, no liberals need ever apply. It's not just small
markets either; same goes for powerhouse WLS in Chicago.

>>> Just a curious question... what do the K & W in american radio
>>> station call signs stand for.....

>This is the kind of thing that will bring numerous, and undoubtedly colorful
>responses/guesses.

The way I read it in Barnow's trilogy was then Sec. of Commerce Herbert Hoover had no clue how to handle Westinghouse's first request since the Radio Act of 1919 had nothing in it concerning commercial voice broadcasting. Hence, The Commerce Department issued KDKA's call as though it were a shore station (ship-to-shore service ala Marconi Wireless) in November 1920, just in time for the Presidential Election returns from the local newspaper. WHA (University of Wisconsin at Madison, Wisconsin) appears to have the next best claim to first licenced station since it was origirnally part of the School of Engineering's amateur radio operation and had a previous callsign.

In all but a few cases, "W" indicates stations licensed EAST of the Mississippi and "K" WEST of the Mississippi. The anomolies like WJAG in Nebraska, KDKA in Pittsburgh and a few others seem to relate to getting offical licenses before the International Radio Union (I.T.U. forerunner) met to assign letters to countries in the mid 20's.

That's recall from an imperfect memory....so don;t be ashamed to call me to task!

Too bad the FCC doesn't use the N calls for broadcast stations. We could have:
NERD
NUTS
NUFF
NVER (never)
NUKE
NIFE
NACK
NARK
NPLE (nipple)
NAP
NICE
NOPE
NON
NIKL (nickle)
NOW

well, you get the idea.

Tony Pelliccio (Anthony_Pelliccio@brown.edu) wrote:

: Not exactly sure why K and W were chosed but they help represent which half
: of the country a station is in.

It was part of an international agreement among countries. Japan has J,
Canada has CH through CL (I think) and part of V. Mexico has XE and XH.
Great Britain has G, part of V, etc. I'm probably a little off on some
of those. Usually, the callsigns are selected to identify somewhat
phonetically with the country. In the case of the USA, it's likely that
K and W were chosen because they don't exist in most other languages.
The USA also has all the N and part of the A alphabet. These are used
for non-broadcast purposes. For instance, you'll note that all planes
have license numbers which look like "N123456". It doubles as a
callsign. Air Force and Army tend to use the A alphabet; Navy and naval
stations tend to use N; also Novice Class ham operators use N.

Yep. Sure is cool to beat Mark Roberts on something Missouri oriented.

Tonight (actially 1AM) the 19th of June, I was tuning around and caught an unusually strong signal ay 630. Knowing that the St Louis station was dark, I listened further and heard that it was KJSL Christian talk radio for t Louis. They had some telephone talk show going and on the break they kept talking about how great it is having Christian talk radio in St Louis.

Dont know when they went back on, but it couldn't have been too long ago because I scan the bands regularily here. Sounds a lot like a Family Radio kind of thing. No preachers, just telephone call-ins. No heavy message either. Probably hoping to catch a lot of nopn-Christians scanning the band for a different talk show.

They said they were a Crawford Broadcasting station and had a strange positioner. "KJSL ... Talk Radio Hell Hates". I wonder if they are satellite fed or local.

Anyone else know what is what?

Bill

2174. Radio Watchers -- Kansas City (6/19/94)

Newsgroup: rec.radio.broadcasting
Date: 1994-06-20 04:23:20 UTC
From: Mark Roberts <transvox@tyrell.net>
Message-ID: <2u35jo$h0p@vixen.cso.uiuc.edu>
Source record: 39578

Kansas City will be the home of a new talk-radio show dealing with agriculture and rural social issues.

About 100 stations have agreed to carry the new program, "AgriTalk," which will air daily from 10 to 11 am (Central) from studios in Kansas City. The nearest station that has agreed to carry the program is KFEQ (680) from St. Joseph. The show is scheduled to begin in July.

The president of AgriTalk, Mark Perrin, told the Kansas City Star that farm broadcasting traditionally has focused on market reports; however, he added, most farmers can now get up-to-the-minute reports through data services.

(NOTE: This is often through SCA services. KRES in Moberly, among others, has them, and as I can attest, the station's coverage has not been harmed one bit.)

Each Monday, rural psychologist Val Farmer will take calls regarding issues relating to farm life, as the Star described it, "such as substance abuse and the transfer of family farms to the next generation."

The host of AgriTalk will be Ken Root, a former ag broadcasters and chemical company executive.

Perrin told the Star, "This finally gives farmers and those in ag-related industries a voice. We hope over time we will be *the* voice of rural America."

> WBZ
> Soldiers Field Road
> Boston, MA 02154

Please don't post unless you have at least a vague idea of what you're
talking about. The correct address and name is:

Mark Maunelian
WBZ Radio
1170 Soldiers Field Road
Boston MA 02134

The 02154 post office is in my hometown of Waltham MA, 6 miles
west of WBZ, and since 02154 is bad enough about handling mail that
actually *belongs* in Waltham, lord only knows what they'd do
with misdirected mail.

I have seen letters addressed simply to "WBZ, Boston" get through
to us, BTW.

>It will flip to 'adult album alternative' July 1st; Chris Douridas
>of KCRW/Santa Monica's "Morning Becomes Eclectic" will be on-air.

Not true. The _L.A. Times_ was apparently forced to issue a retraction in
Saturday's paper.

The truth is this: Chris Douridas was *approached* by KLIT, and that's it.

No discussions, no deals, no talk of money, no job offer, no job acceptance.
This is what Chris said on the air Wednesday in response to the item in
that morning's paper.

The _Times_ was, at best, premature, and in general was very
irresponsible to have run that story as a done deal.

I heard a report from our Music Library and Tracking manager at the
station that _Radio & Records_ ran a similar story a couple of days earlier.
Chris Douridas was not mentioned, but another DJ in Boston was. It
wasn't true in her case either, but it seems she was fired anyway. Can
anyone confirm this?

And may I remind any potential _Times_ or _R&R_ writers that when you
print things like this without confirming your facts, you're potentially
endangering someone's career and livelihood? Don't be irresponsible.

Source record: 39584

From: Lance Ballance (LanceBKOST- America On-Line)

Word came down this past week about the pending format change of KLIT-FM (K-Lite 101.9) in L.A. They are to change from Adult Contemporary, to a Progressive format (AAA-Adult Album Alternative) KLIT hasn't risen above a 1 share in about 6 months.

In a nutshell.....(Uncontrollable Laughter!!!!!) Fine. Yet another format that'll be gone in a couple of years. KLIT has no money to market the station, and NO SIGNAL!! Sure, they are on Mt. Wilson with everyone else, but they have almost as much power as the PC that I am using right now.

I'm sure that they will execute the format well, and sound good.
However, this is a niche format on a station that is a prime candidate for a duopoly. They truly are struggling. Gene Autry would be wise to sell the station, he's already sold off KMPC (now 710 Talk), which at one time, was the jewel of his chain.

I wish them well over there. I'll keep all of their old listeners company, (all 13 of them....)

'til next time,

Lance Ballance

One of the digital sca signals is from a company known as Mainstream - a service provider to customers who want news, etc. delivered through broadcast wireless. many FM stations carry Mainstream's signal through SCA - most large metro areas are serviced by Mainstream as they cut deals with FM stations. Here are some details, but demodulating and decoding is not for the faint-hearted:

o Amplitude-shift keying modulation. Apparently, phase shift keying is suject to a higher error rate as an SCA digital signal.

o A data rate of approximately 25k (extensive forward error rate correction lowers the data throughput to approx 19.2kbps)

o A multichannel protocol similar to X.25 - Mainstream offers SEVERAL HUNDRED news wires including AP, Reuters, Dow Jones' Wall Street Journal, etc, etc. ALL over a single SCA channel!

Lorenzo Milam's book has been reprinted by "Mho & Mho Works" of San Diego. This reprint has a publication date of 1988. I found it at our local branch of Borders. There are a few corrections and, Milam states in the foreward, one or two deletions. I have access to the original, purchased by a friend who bought his copy at a Canadian Government bookstore in Toronto (would that our government could be like that), and I have not been able to find any deletions.

He also failed to correct one error, in which he rendered the name of my hometown as "Columbus, Mo." (He got it right elsewhere; KOPN in Columbia was listed as one of "a few honest broadcasters in the U.S." in 1975. KOPN's second transmitter and antenna came, in fact, from KDNA in St. Louis, enabling KOPN to upgrade from 10-watt status in 1974.)

There is also an introduction by Tom Thomas who, I believe, may still be in St. Louis.

The address of "Mho & Mho Works" is:

Mho & Mho Works
P.O. Box 33135
San Diego, California 92103

ISBN is 0-917320-01-8. Price was $12.95.

Message-ID: <2u35ki$h3i@vixen.cso.uiuc.edu>
Source record: 39589

Actually, WJAG in Norfolk NE is *not* an anomaly!

See, when the lines between K and W were drawn in 1921, they were initially placed not along the Mississippi, but along the western state lines of the Dakotas, Nebraska, Kansas, Oklahoma, and Texas.

The line was not changed for several years, hence:

WDAY Fargo ND
WNAX Yankton SD
WJAG Norfolk NE
WOW Omaha NE
WOI Ames IA
WMT Cedar Rapids IA
WOC Davenport IA
WHO Des Moines IA (hi Gary!)
WSUI Iowa City IA
WIBW Topeka KS
WREN Topeka KS
WMBH Joplin MO
WDAF Kansas City MO (hi Mark!)
WHB Kansas City MO
WEW St. Louis MO
WIL St. Louis MO
WWLS Norman OK [an odd case; originally WNAD and allowed to change to another W call for some reason]
WKY Oklahoma City OK
WTAW College Station TX
WRR Dallas TX
WOAI San Antonio TX
WACO Waco TX

These are all stations that date back to the earliest days...1921-24 or thereabouts. After that, the line was moved to the Mississippi River, although it still remains a bit fuzzy in areas like northern Minnesota, the Quad Cities, the St. Louis area, and southern Louisiana.

As for why "K" or "W", this was one of the very first threads when r.r.b started up in 1991. The definitive answer that came out of that thread was:

K and W far predate companies like Kaiser and Westinghouse. They were assigned as part of an international agreement circa 1909, made by the ITU's predecessor organization. And they are completely, utterly random.

2186. Former Cinci talk show host in Indy?

Newsgroup: rec.radio.broadcasting
Date: 1994-06-20 19:02:03 UTC
From: markm@kgw2.xetron.com
Message-ID: <2u4p3b$mbj@vixen.cso.uiuc.edu>
Source record: 39592

Hello -

I posted sometime back about the takeover of Cincinnati's WCKY by Jacor Communications (owner of WLW, WLWA (formerly WKRC), and various FM stations).

When Jacor took over WCKY, they let go Jeff Katz, who had (that same month) moved to CIncinnati from Connecticut to host the afternoon drive time talk show.

I was flipping the dial Friday night (10:50 PM EDT) and heard who I believe to be Jeff on WIBC (1070) from Indianapolis. Can anyone confirm this?

This sounds much like what Bonneville-owned KCMO(AM) has been trying to do. In the process, Bonneville has trashed what little news image was left from the ruin that Gannett made it. Twelve years ago, if you wanted news, you tuned to KCMO. Great call letters for a news and talk station. Great 50,000-watt signal in the daytime. Great tradition. Then Gannett got a hold of it, and so did its smarty-pants consultants. Bonneville is continuing the dastardly tradition.

Bonneville seems to want to confine the news image to its other AM property, KMBZ. Not that it is any great shakes either. We are left with the bizarre situation (for a market with three locally programmed news/talk stations) of an AM hot country station being the place to tune for news. This reflects (1) the fact that WDAF(AM) is a well-managed, well-programmed station that still beats its FM competition and (2) the penny-pinching way in which Bonneville has run its stations.

Oh, yes, they do, if they can't sell spots to them!

I don't know how well Rush is doing in Kansas City. Our local, not-quite-so-strident conservatives, Mike Shanin and Jerry Fogel, still hold forth on "Mr. Microphone," KNHN(AM), 1340, and seem to have a devoted core audience, yet the station remains stuck in the ratings cellar. Free-market advocacy can't overcome signal problems.

KFRU in Columbia carries Rush because it feels it has to, in order to keep any would-be competitor from snapping up the market's other AM and trying a talk format there. But the station does have trouble selling local spots during midday. One of the owners told me a couple of weeks ago that he *wants* to find a liberal talk show but isn't able to. He has liberal talk show hosts, but he wants a nationally syndicated show to fully counterbalance Limbaugh. His dream is to have Jim Hightower as Larry King/David Brenner's replacement.

One thing about the country-club crowd: while they may be conservative, they also tend to insist on a certain level of decorum. The kinds of conservatives Rush Limbaugh appeals to tend not to be that well-off, or they often are just confused libertarians, so I have found.

The People's Radio Network (available here on KBEQ, 1030) would be more appealing to libertarians than Rush, I would think. That's just my opinion.

> The surprisingly anemic performance of N/T stations in the winter
> book
> DESPITE bad weather conditions across the country was a wake-
> up call for a lot of stations...

A lot of the people I work with -- even those who are somewhat conservative -- are tuning into "Talk of the Nation" on NPR.

And, up in Omaha, KFAB does very well WITHOUT Limbaugh, as I wrote back in February.

And also keep in mind that people *know* where to go when the weather gets bad. I wrote about my experience tuning across the dial during a surprise February snowstorm, and finding that our (then) three N/T stations were all talk and no news. WDAF, country music and all, was the best place to find out what was happening. And still is.

KXOK (sorry, I am going to have a hard time with those new call
letters. It would be as though my mother decided to change her first
name) shoots a nighttime lobe right in your direction. A source in Fort
Smith, Arkansas tells me it is virtually a local there at night. But
when I was a dorky adolescent in O'Fallon, Mo., just 40 miles or so due
west of the tx site, I could not get KXOK at all at night. (Of course,
in the daytime, it slammed right in.)

And it is not present at all in Columbia (ironic, since KXOK swiped
KFRU's 630 dial position back in 1940) or Kansas City.

Now that I am a dorky grown-up, the lack of westward nighttime coverage
was one reason I think KSLQ (98.1, now KYKY) made such an impact so fast
with its Top 40 format when it came on in early 1973. KXOK couldn't be
received in the western reaches of the St. Louis metro area, because of
the null toward Denver's KHOW.
>
> They said they were a Crawford Broadcasting station and had a strange

Crawford is a chain, so it could be. It also bought KSTL at 690,
forming a little duopoly of faux-Christian hate radio, one supposes.

> Chicago.

> -- Dallas in Colorado Springs

How did the ratings of the "liberals/moderates" compare with what the "conservatives" are getting now in the same time slots? There are those who say that the conservatives are crowding out the liberals because no one listens to the liberals. Others indicate that the choice of programming is based primarily on the political leanings of the station management, with no concern for ratings. It would be interesting to see some hard data that would tend to comfirm one way or the other. Are there currently any markets in which a daytime liberal competes head-to-head with Limbaugh? How do the ratings compare?

In a previous posting, Bob Smith, WXXI/1370 Rochester NY writes about
the meaning of certain calls in Western New York:
> Some spell out a station's original slogan, like
> Some spell out a station's original slogan, like Buffalo's
> WGR, "We're Great Radio"

'GR used that as a slogan for a while in the 1960s, but when it
signed on in the 1920s, GR was chosen because George Rand was an
original owner. George Rand is also the namesake of the Rand Building
in downtown Buffalo, which, by the way, includes the studios of
several Buffalo radio stations (but not WGR!). Bob mentions WBEN, which
was originally owned by the Buffalo Evening News (=BEN). The late
WEBR was owned by the now-defunct Courier-Express newspaper. No idea
if WEBR stands for anything in particular, but when the calls changed
to WNED last year, some stories said that WEBR stood for "We're Excellence
in Broadcast Radio". The WEBR call letters were in use since the
station signed on in 1924. The other famous set of calls in Buffalo
is WKBW (now WWKB on the radio side, channel 7 kept the WKBW call
letters when Capital Cities sold them during the ABC purchase).
Channel 7 uses them now to say "We Know Buffalo's Watching", but
they originally stood for "Well Known Bible Witness", since the
Rev. Churchill was the original licensee, and he used the frequency
for his religious broadcasts (can you imagine Jackson Armstrong on
that format? "Danny moves your fanny in the morning, praise the Lord!")

The old top-40 folks are gone from WLS just like the format (they're all hard-right talk these days...flagship show is Rush Limburger). I would recommend calling WJMK/WJJD (312) 977-1800. Dick Biondi, evening radio personality on the A.M. side was on WLS and WCFL in the old days... Clark Weber (who has gone to great lengths to distance himself from his old rock jock days) is on WJJD mornings, does a very informed and fair talk show (about the only one in the city that fits that description). Bob Hale is also on WJJD. WJMK 104.3 is a '50s '60s and early '70s oldies station with the emphasis on the 60s. WJJD plays MOR oldies...Pat Boone, Patti Page, Englebert, etc. The big boss is Gary Price.

>already (ILRs as they are known) and give 107-108 to the low powered ones,

I believe the RA are adopting a population-weighted approach, which means
cities will typically get a sprinkling of small community stations, plus 2
or 3 city-wide services; then less populated areas get one or two
large area coverage stations.

105-106 will be allocated to "city-sized" services (not as big as the current
ILRs, which typically serve a whole county) with up to about 1000 watts;
107-108 will go to the low power broadcasters (up to 100 watts ish); and
106-107 will be allocated last to fill in the gaps.

2197. WIYY-Baltimore

Newsgroup: rec.radio.broadcasting
Date: 1994-06-20 19:02:31 UTC
From: "Rick Smith, Media Equipment Manager, x4383" <AAAF%CATCC.BITNET@VTBIT.CC.VT.EDU>
Message-ID: <2u4p47$md9@vixen.cso.uiuc.edu>
Source record: 39452

Chris had mentioned that WIYY has misleading commercials regarding their song selection. I'm not sure I agree. 98Rock no longer plays cheesy songs such as Bon Jovi or Europe. They have evolved to a harder sometimes even alternative format. They will still play Ac/Dc or Judas Priest, because these are classic hard rock songs. But they are just as likely to play Biohazard, Collective Soul, Rollins Band, Danzig, Mama I'm Scared, Eddie Veder's Phlegm, Toad the Wet Sprocket, Counting Crows, and Lemonheads. A true listener will notice the difference. They have not completely changed their format, but have revised it.

OTHER BALTIMORE NOTES:

--WPOC has continued to be one of the countries most innovative country station. The station appears to even have a slant towards female singers over men. And since I don't like too many male country singers this is true find.
--Still in the country. WXCY-103.7, Havre De Grace is also a good discovy in the country vein. If you like a better mix of classics and new material you will like this station. They are also the only area source for MRN/ The network of NASCAR.
--Still not sure what direction 103.1/Graysonville is heading for. it appears that they are playing whatever the Dj wants. Makes for an interesting listen , but I can't believe that it would make much money for owner Jake Epstein. You may recognize him as the former owner of alternative WHFS99.1.
--Speaking of 99.1. This is another station in need of a direction. Sometimes they sound like a classic rock station(The Police, Floyd), Heavy Metal(Motorhead), reggae, besides the usual alternative fare. Sometimes this mix comes out real good, but often times it sounds real bad. Also having ex-98Rock announcers such as Johnny Riggs and Aquaman on staff, make it difficult to believe them as a true progressive modern rock station.
--WBAL(1090am) has continued to get flak from their carriage of the Rush Limbaugh show. But the ratings appear to be strong, so don't expect a change anytime soon.

WELL HOPEFULLY I CAN UPDATE LATER WHEN, OR IF REAL NEWS OCCURS.

>DATE: 16 Jun 1994 03:32:48 GMT
>FROM: Paul Richards <72212.441@CompuServe.COM>

>Per messages on Prodigy and here, WTIC-FM-96.5 Hartford was supposed to
>announce some kind of change on Wed 6/15 at noon.

A good idea, since Hartford Police central dispatch was catching up
with them in the Arbitrends.

>I tuned in around 1145 and they seemed to already be doing whatever they're
>going to be doing, positioning as "The Best Music on the Radio the New 96-5
>TIC-FM" and less frequent "Today's Top 40" and the telltale "Today's top 40
>without the Rap" with Brit Jeff Windsor on in midday.

Yawn. Old wine, new bottles. I'm psyched, another station playing some
overconsulted variation of ACHR/Hot AC. Working up the dial, we lucky
Hartford radio listeners now can hear the same music, but with
different liner cards on WHYN-FM (93.1, Springfield); WZMX (93.7,
Hartford); WMAS-FM (94.5<?>, Springfield); WTIC-FM (96.5, Hartford);
some dollar-a-holler toilet from Willimantic at 98.something; WEZN
(99.9, Bridgeport), WRCH (100.5, Hartford); and WYSR (104.1, Waterbury).

Yee-hah. Pump up the volume.

>(:20 - spots)

This was one of the longest stopsets I have ever heard. Maybe it was
just an illusion created by the heat, and a cluttered sound (lots of
multi-voice spots), but I'll swear that break had a half-dozen :60's in
it, followed by yet another innovative "look, ma, I've got a digital
audio box and it makes neat sounds" canned positioner, which said that
they were in the middle of 52 (I think) minutes of <place slogan here>.

"In the middle"? Yikes!

Is it a departure from what 'TIC-FM has been doing? Not really. They
had always been more adult than WKSS. Their morning show is still lame,
and the man whose firing arguably started 'TIC-FM's slide down the
slippery slope, Gary Craig, is still cooking in the morning at 'KSS ---
not my cup of bile, but a well-executed CHR morning show with a lot of
energy. When Gary was canned at 'TIC-FM, he waited out his noncompete
(since WTIC's parent company looks at lawsuits as bloodsport), and came
back to the air ready to kick some serious butt. It worked.

Will this "change" bolster 'TIC-FM's sagging share? Probably not. IMO,
someone in this berg has to do something different ... we have no jazz,
no commercial classics (although Connecticut Public Radio comes close),

no urban FM, no alternative, and no real classic rock (except for WAQY in Springfield). And I'm not holding my breath.

Hartford is one of those mid-sized cities where the owners are in it for the safe bucks, and that means that only the tried and true (read: shopworn) makes it to the air.

Greetings from America's Finest City:

Q-106 morning team of Jef and Jer (KKLQ-FM 106.5, 7.4kw, KGMG-AM 1320 [Ocean-side]) got Jack Nicholoson's home phone number and called him on Friday. While he didn't answer the phone, Jack did return the phone call and howled like a wolf. [I heard a tape of it this weekend, it was . . . a howling success . . .]

While America watched the falling from grace of O.J. Simpson on Friday, the best reports came from radio. KFI (640 AM Los Angeles, 50kw) took the lead with play-by-play reports, and fielding calls from drivers on the freeway. At times the duo of John and Ken played the audio of channel 5, KTLA (Tribune Broadcasting); but never lost focus on their audience, and O.J.'s "not-guilty" until his court date.

I did several random airchecks, and found that XETRA-AM (Tijuana, B.C. Mexico, 690, 50kw, U) also had KTLA's audio feed. KFMB (AM 760) dumped into KNX`s (1070 L.A.) feed, but gave commentary with San Diego ties.

Side note: Mr. KFI, Saturday and Sunday night host of "Ask Mr. KFI" will be on ABC-TV's "Day One" on Monday, June 20.

Thanks!

For many years Madagascar had a state broadcasting democracy. Now it suddenly has private stations, little or no regulation and is in the process of trying to establish a pluralistic system that combines state and private broadcasting.

I will be meeting with state and private radio broadcasters in Madagascar in July and early August and would like to share with them as many examples as possible of what many different types of markets in different places offer in the way of stations and programming, especially when there is a mix of licensee types.

A number of the people I will be visiting also have a special interest in putting together longform (yet lively) news features. They are working with low budgets and limited equipment and staff, but want to venture out of the studio to try to make their news more relevant to the audience.

If you would like to help in providing examples of what various pluralistic markets sound like, I would appreciate the following:

(1) Very brief descriptions of the stations serving specific markets of various sizes. I am particularly interested in small markets. These can be sent to me by e-mail, if you like, until June 24. I am looking for just one or two sentence descriptions that go a little beyond naming the format and provide detail in particular about the mix of news and music. Anything that seems very unusual about a station's programming would also be good.

(2) Examples of news and news features done on a low budget.

(3) Cassettes of "dial scans" that offer a minute or two or each station in the market as one tunes from one end of the FM and MW dial to the other.

If you would like to help with this project, material can be sent to me in Madagascar in care of Marcia P. Bosshardt, Assistant Public Affairs Officer, U.S. Embassy, Boite Postale 620, Antsahavola, Antananarivo, Madagascar. Mail takes about two to three weeks, so it would have to be sent no later than around July 10 to be helpful while I am there.

I will try to post an overview of the current radio situation in Madagascar when I return.

Source record: 39457

What do people think of David Brenner? How do you think the show sounds?

Also, what do people think of Tom Leykis? Can a non-conservative make it in talk radio these days?

John

If they are really basing their programming on their own political beliefs,
that seems really stupid...since the goal of running a radio station is to
make money. I think there are a lot of angry people out there just looking
for the easy answer and someone (liberals, gays, feminists, whoever) to
blame...kind of like Germany in the 1930s.

WLS seems to have quasi-liberals on the FM and neoconservatives on the AM,
but they simulcast Rush on both bands...so we have no comparison.
Unfortunately, I have a feeling Rush would beat a liberal on the FM in this
market. Hate sells.

I hope someone can help me. I have lost the little yellow card I got from the
FCC which allows me to go on the air (you know my FCC Liscense card!) My
questions:

1. Do I have to re-apply to get a replacement or can I write or call the FCC and
request a replacement? What is the address or phone?

2. Is it legal for me to operate a station even though I do not have physical
possestion of the liscense card? My station manager at the college station
I work at wasn't sure. He thought that I should have my liscense
card with me or posted at the station for me to be legal.

If you can help answer these questions, please E-mail me or post here.

Thanks, Mike

: Crawford is a chain, so it could be. It also bought KSTL at 690,
: forming a little duopoly of faux-Christian hate radio, one supposes.

I just drove through St. Louis on my way to Atlanta and, believe it or not, I saw a billboard on the Illinois side of the river advertising that slogan to anyone on I-64 who bothered to look up.

They seem to use it a lot on the air. Can you imagine what people would think if a bolt of lightning took out their transmitter just before they were able to get out the last word of their positioner?

[Moderator's Note: I usually stay out of this sort of thing, but after listening for a couple of nights to KJSL, the words Hell and Hate are appropriate for them. Sheesh, I always thought Jesus was supposed to be into forgiveness ands such. Sad that today's Christian media is so full of venom, judgement and hatred. I wonder if Jesus would recognize his words as presented today? Bill]

Of course, the ironic thing about this is that this station WAS a 'adult album alternative' format for several months back about '87-'88 or so. J.J. Jackson was the Manager/main DJ. The call letters started as KMPC-FM, and they just got them changed to KEDG when the rug was pulled out to become KLIT. Probably the strongest challange that KROQ has faced to it's 'alternative' throne.

In article <2ttucu$oma@vixen.cso.uiuc.edu>, janik@spss.com (Ed Janik) writes:

"I thought WLS...referred to Marshall Fields..."

I used to think that was the case too, until I ran across an old Sears catalog from the mid-1920s which made it clear that Sears (rightly) considered itself the World's Largest Store and owned and operated the radio station as a means of institutional advertising.
Sears dumped the station off to the publishers of the Prairie Farmer newspaper around 1929, and that company in turn merged (for whatever reason) with the newly-forming ABC network in the 1940s, plopping WLS squarely in ABC's lap. (ABC already had inherited WENR from the old NBC Blue network; it shared the 890 frequency on a halftime basis. When the two merged under common ownership the WENR call was dropped---wouldn't you rather be known simply as WLS than have your callsign pronounced as "wiener"?) Chicago radio veterans say they bought the magazine specifically and only to get the station, but the paper proved very profitable and it's still part of the publication division of Capital Cities/ABC even now. WLS was joined by a sister TV station that ABC built on Channel 7 in Chicago around 1948, and an FM soon after. News and talk are the signature of all 3 stations today, with the AM anf FM each broadcasting separate all-talk programming schedules with separate lineups of local talk personalities at 890 and 94.7 respectively...and the TV serving as the flagship outlet for Oprah Winfrey, as well as operating the city's most successful local news operation. (WLS is also home base for Paul Harvey, who has dethroned Rush Limbaugh as the most listened-to radio personality in North America according to the most recent Arbitron national surveys.) That's the full story of the station that Sears once used as a clear-channel PR tool.

2209. Re: K & W Calls

Newsgroup: rec.radio.broadcasting
Date: 1994-06-21 05:13:23 UTC
From: WCHSNews@aol.com
Message-ID: <2u5stj$ebh@vixen.cso.uiuc.edu>
Source record: 39463

Recent discussions have centered around the "K" and "W" callsign designations. I saw it estimated that there are about 107,000 possible call signs available in the United States. But, this is somewhat misleading.

Remember, the US has also been allocated part, or all of "N", "A", and "V" (I think), so this raises the stakes significantly.

In other oddities: note that AM stations are not always separated by 10kHz, even within the United State's boundaries. KGUM has been allocated 5,000 watts on 567kHz, KBQN is on 585kHz, KTWG is on 801kHz and WVUV is broadcasting 10,000 watts on 648kHz. The lesson: all rules can be broken, even with the FCC.

I've been looking for an old friend named Bob Mitchell. We lost touch a few years back. It's a fairly common name, so I'll add a bit of his resume: The person I'm looking for was PD at KBFM in McAllen,TX, WCOL in Columbis, OH, WKSS in Hartford, CT, 95.5 (forgot the calls) in Washington, DC, the B/Z Communications station in New Orleans, and I believe most recently a CHR in San Francisco.

If you know his address, please pass it along, or if he's on the net, let him know mine: mikedow@gate.net

2211. North County Report

Newsgroup: rec.radio.broadcasting
Date: 1994-06-21 23:07:34 UTC
From: Chris.Carmichael@artecon.com
Message-ID: <2u7rrm$jqe@vixen.cso.uiuc.edu>
Source record: 39466

Greetings from North County San Diego:

Dr. Laura Schlessinger, popular KFI-AM (640 50kw, U, Los Angeles) psychologist, is now syndicated to KFMB-AM (760, 50kw, DA-1, San Diego). The show runs from 9 a.m. to 12 p.m.

Does anyone else know where she is syndicated too??

KFMB's popular morning team of Hudson and Baurer now have three hours of morning drive. In the San Diego Union-Tribune, it was reported the commerical time has de-creased from 20-minutes per hour to 16-minutes per hour. This was -- as reported -- to give the morning crew more exposure in prime time.

95.9/KKOS, Carlsbad, (3.8 kw) is broadcasting from the Del Mar fair this week. The eclectic station, one of the first on the AAA bandwagon, is co-sponsoring the "Pretenders," "Dr. John," and others at the fair.

With the sale of the San Diego Padres, the final decision to who will get the English-broadcast rights have been tabled. KFMB-AM, the current holder, is trying to keep the rights. But, this is on the heels of XETRA-AM (690, 50kw, U) strong desire to be a major league flagship station. It's been reported that XTRA-Sports is talking to the California Angles for broadcast rights. Since KMPC's sale to Cap Cities/ABC, most of the sports programming have been dumped. XETRA's coup was the package that included UCLA basketball and football.

XEXX-AM, 1420, the espanol station from Baja California, is broadcasting the `futbol' (soccer) games of the World Cup. XETRA-AM is covering the soccer games in English. (And there is a station in the LA basin doing it in Arabic.)

Thanks!

We want to hear your radio...

We want to hear what people around the world are listening to. We're Brand X, a two hour audio magazine heard across Canada on the CBC radio network. We're thinking of putting together a new segment with the wierdest, most fascinating, compelling, stran ge or interesting radio heard worldwide. It could be commercial or college, network or pirate, whatever you find interesting. It could be talk, it could be comedy, it could be music, it could be commentary. We want to hear what you listen to. We're es pecially interested in stuff from outside North America, but that doesn't mean that we don't want stuff from the US and Canada. Just make sure it's either in English or of some value to an English speaking audience.

What do you get out of it? Well, the joy of knowing that you've shared something that you find interesting and amusing, and on a more material level, a Brand X t-shirt. So, you want to be in on this? Well, record us 15 minutes or less of radio on a sta ndard cassette. Try to make it as high quality a recording as possible. (For example, try to aviod just holding mic up to a speaker in a room of noisy people.) Then, write down what it is you've recorded, when it aired, on what station, in what city an d in what country. If you happen to have a phone number for that station handy, that would be great too. Once you've got all that done, mail it to us at:

Brand X
CBC Radio Winnipeg
PO Box 160
Winnipeg, Manitoba
R3C 2H1
CANADA
Attn: Chris Boyce

Questions? Send me email: boycec@winnipeg.cbc.ca

Thanks for helping us out, we look forward to hearing from you.

2213. Re: David Brenner and Leykis. Opinions?

Date: 1994-06-21 23:07:36 UTC
From: talk1370@aol.com
Message-ID: <2u7rro$jqg@vixen.cso.uiuc.edu>
Source record: 39468

In article <2u5st2$e97@vixen.cso.uiuc.edu>, John Wharton
<jwharton@delphi.com> writes:

(what do you think of David Brenner?)

David Brenner is facing an unenviable and maybe impossible
task...and I don't know how well he's handling it because the
closest station carrying it (WACK in Newark, NY) doesn't really
put a decent signal into the heart of our metro.
I say unenviable, and maybe impossible, because he's got to
meet two irreconcilable and impossible expectations. One, created
by his background as a stand-up comic and stand-in for Carson, is to
be funny for three hours a day...and no one, not Howard Stern, not
Robin Williams, can ever consistently do that. The other, will be to
satisfy what's left of the Larry King constituency with a witty, hip
but very well-informed and issue-driven 3 hours of talk...and though
Brenner is a smart guy he really doesn't have the background you
need to meet that expectation. So he's really in an impossible
position and had I been in his shoes, with his background, I probably
wouldn't have taken it on.
Leykis is a different story. If he's marketed at all well, he
can and
should make it. He's going to be appealing to a talk-hungry audience
with an act that's hip, and well able to handle both heavy issues and

light subjects...and it's an act developed on, and for, large market
talk
radio. Lots of potential nighttime talk listeners drift to music or
to sports
talk by default because Bruce Williams doesn't grab them and sports
is the only other non-music alternative. Leykis can grab those
people.
He's good and he's got an ability to connect with 25-49s. We're com-
mited long term to a local host, but I'm convinced someone in Western
NY will pick him up sooner or later and do well with him...
Bob Smith, middays WXXI/1370 Rochester NY

2214. computer controlled broadcast monitoring?

Newsgroup: rec.radio.broadcasting
Date: 1994-06-21 23:07:37 UTC
From: hunter@work.nlm.nih.gov
Message-ID: <2u7rrp$jqk@vixen.cso.uiuc.edu>
Source record: 39469

I have an application where I need to create inexpensive, computer controlled AM/FM receivers for broadcast monitoring. I need to be able to turn the receiver on and off, select a band and a frequency from a cheap PC.

I first thought I could find a <$300 radio with a serial port, but the cheapest one I can find so far is the Kenwood RZ-1, which is >$500 and is really far more broadband than I need.

My next thought is to get a computer interface to the remote control of an inexpensive commercial receiver. Does anyone know of existing interfaces from PCs to any inexpensive commercial receiver?

If I have to roll my own, I'd like to run the interface through the wired remote connections available on most recent home receivers. These are present to daisy chain multiple devices (e.g. cassette decks, CD players, etc., usually from a single manufacturer) so that they work from a single remote. Can anyone tell me where I can find documentation of the signals and codes used in these connections, or provide other useful material?

Also, if anyone is interested in taking this relatively simple project on commercially, I will probably be interested in buying several hundred units in the next 3 months or so, so please feel free to contact me with proposals.

Larry

N> Also, what do people think of Tom Leykis? Can a non-conservative make
N> it in talk radio these days?

We get Tom Leykis on 710-KMPC in Los Angeles, between 3 and 7 pm.
"Liberal Rush" he's not. Leykis seems so deadpan serious, even bitter at
times to me. He comes across more like a liberal Bob Larson (without all
the funding appeals). . . .

I've also heard Jim Hightower, on Sunday mornings on KGO San Francisco.
His show is more "Rush-like", with parody music, humor and the like. (He
picks on President Clinton about as much as Rush does, too)

------ ------

One thing that I will agree with you on is that programmers generally don't
program a station to suit their own taste. Radio is a business and General
Managers would program 24 hours of dogs barfing if it would make the
station money. Stations program Limbaugh because he gets the
ratings..Period.

Here's where we differ: Don't you think you're being a bit of an extremist
by essentially calling conservative talk radio "Hate Talk?" The reason
Rush Limbaugh has listeners is because he is stating the beliefs of a large
percentage of Americans; not because he is pushing "hatred" on the country.

And comparing the American Conservative movement to Nazi Germany is totally
irresponsible on your part. Not one Conservative that I know of has ever
been for exterminating an entire race. (As a matter of fact, it was the
"Conservative" Abraham Lincoln that set an entire race free.) I don't have
a problem with any race, gays, or even Liberals for that matter, and I'm a

Conservative.

You obviously have never bothered to listen to Rush Limbaugh, because if you did then you would know for a fact that he does not preach hatred. True equality exist when you don't give "preferential" treatment to someone based on their sex, race, sexuality or creed (something that the Liberals do all to often.) It is dangerous to label someone a "hate-monger" or "Nazi" just because you don't agree with their beliefs.

<transvox@tyrell.net> writes:

(about Limbaugh and right wing talk radio)

What I'd like to propose for this particular thread, is for
broadcasters
in various markets to check in and report---objectively---on whether
or
not either carrying Rush, or one of the current flowering(?) of Rush
wannabes, is actually winning either listeners or advertising dollars

for the stations that try that route. There is clear evidence in
Western
NY (a pretty moderate and tolerant part of the country) that it is
not.
Apparently that's also the case now in the rest of the Great Lakes
region and the Midwest. So what's going on out there, America? Are
the dittoheads still running talk radio, or is it dawning on folks
that this
is no longer the way to win listeners and make a buck?

Bob Smith, WXXI/1370 Rochester NY (gaining listeners by the day
because we DON'T run Rush and his clones)

In article <2u4p3l$mc3@vixen.cso.uiuc.edu>, "Chris Gay"
<KU4A@LEXVMK.VNET.IBM.COM> writes:

(conservative vs. liberal hosts)

There are a few interesting head to head comparisons between
Limbaugh and a more liberal local host...Tom Leykis on WRKO in
Boston knocked Limbaugh's block off and got rewarded with a gig
at ABC-owned KMPC in Los Angeles (fed to the nation on West-
wood One/Mutual). In LA and San Francisco, the Limbaugh station
is now being beaten in each market by the more balanced and
moderate ABC O&O (KABC and KGO, respectively). WXYT in
Detroit is now losing to non-partisan WJR and is reportedly going to
let its contract with Limbaugh lapse this summer. The news is a
LITTLE better in Chicago, where Limbaugh on WLS loses 12+ to
WGN but leads 25-49 (though he's not as strong as he used to
be). On WABC in NYC, he's also seen better days although
he still clings to a format lead. The interesting thing in our market
(where we're throwing non-partisan talk/interview programming ag-
ainst him) is that while we're not in the lead, we are clearly
GAINING
on Limbaugh book to book. So the question should not just be, is
Limbaugh still leading against alternative talkers with different
view-
points, but is he watching his lead in the markets where he still has
one, gradually eroding? Almost anywhere you look in the top 50
markets, the news based on the Fall '93 ad Winter '94 books can't
be terribly encouraging to him, to say the least.

Tell that to the person who lost her job. Fucking up, i.e., making a
mistake, is one thing. Irresponsibility is another. Confirm your facts
before you report them, or if you're unable/unwilling to do that, find
another line of work.

Confirming the facts in this case would have been easy and painless.
Apparently nobody bothered to make a phone call to find out.

Chuck

to:articles@airwaves.chi.il.us

WCHSNews@aol.com writes:
N> Remember, the US has also been allocated part, or all of "N", "A",
N> and "V" (I think), so this raises the stakes significantly.

"V" is allocated to British (former and current) possessions, not the US.
This includes Canada, Australia, etc.

N>
N> In other oddities: note that AM stations are not always separated by
N> 10kHz, even within the United State's boundaries. KGUM has been
N> allocated 5,000 watts on 567kHz, KBQN is on 585kHz, KTWG is on 801kHz
N> and WVUV is broadcasting 10,000 watts on 648kHz. The lesson: all
N> rules can be broken, even with the FCC.

The reason for this is: all these stations are in Radio Region 3.

The world is divided into three regions by the International
Telecommunications Union:
Region 1: Europe and Africa
Region 2: North, Central, South America
Region 3: Asia, Pacific

R1 stations have always been on a 9kHz spacing, although the frequencies
of all stations were shifted 1kHz around 1978-79.

R2 stations have always been on a 10kHz spacing. There was some effort to
convert these stations to the worldwide 9khz spacing, but it just didn't
happen.

R3 stations were on 10kHz spacing until 1979, when they moved to the new
9kHz spacing they use today.

2224. THe old W & K question

Newsgroup: rec.radio.broadcasting
Date: 1994-06-21 23:08:03 UTC
From: barry@coyote.datalog.com
Message-ID: <2u7rsj$jrn@vixen.cso.uiuc.edu>
Source record: 39479

>From time to time we read of those who don't know where W & K came from,
and call letter meanings.

There is a tremendous amount of misinformation out there, and from time
to time we read of posters who "seem to recall" something. Perhaps the
best suggestion I can make to such is to check their local resources
before posting.

The original calls were assigned a lonnng time ago.

...From "The Principles Underlying Radio Communication," also
titled, "U.S. Army Signal Corps Pamphlet No. 40," 2nd edition,
revised to May 24, 1921, p. 563:

"STATION CALL LETTERS

"All radio stations throughout the world under the
jurisdiction of any contries adhering to the London International
Radiotelegraph Conference of 1912 are assigned station calls
consisting of three or four letters. Practically all countries of
importance have adhered to this convention. There is no
duplication of calls. Groups of call letters have been assigned
to each of the countries under the authority of the convention.
The calls assigned cover both land and ship stations."
[...]
"_United_States_Government_and_Commercial_Calls_-- The
call letters assigned to the United States are all three and four
letter combinations beginning with the letter N and all beginning
with the letter W, and all combinations from KDA to KZZ,
inclusive. All combinations beginning with the letter N are
reserved for United States Government stations, and have in most
cases been assigned to stations of the United States Navy. The
combinations from WUA to WVZ and from WXA to WZZ are reserved for
stations of the United States Army. Calls assigned to the United
States beginning with K abd W, not assigned to Government
stations, are reserved for commercial stations open to public and
limited commercial service. In addition to calls consisting
entirely of letters, certain Army and Navy stations use calls
consisting in part of numbers.

.....

The missing KA-KCxx calls were assigned to GERMANY.

There was some original differentiation between the maritime services
and land services, but eventually the line was drawn in the West for
K & W separation. As the number of stations increased, the line was

moved further east, hence the so-called "misplaced" calls.

KDKA was assigned a four letter call by random chance in a period where it was the only land station in the block, the DOC then reverting to three letter calls.

KYW started in CHicago and migrated east.

WLS indeed was Sears ... not Marshall Fields.

An FAQ of call letter meanings is available from Bob Nelson. Now in version 11 or 12, it lists over 1000 meanings, slogans, etc.

.....

regards
barry

2225. Re: Lost FCC Liscense

>2. Is it legal for me to operate a station even though I do not have
>physical possestion of the liscense card? My station manager at the college
station I work at wasn't sure. He thought that I should have my liscense
>card with me or posted at the station for me to be legal.>

Head out to the library and ask the librarian to point out the CFR collection.
These are the Codes of Federal Regulations. You're looking for Volume 47, part
73. Look up Paragraph 73.1230. Or, if you feel like showing off, ask for
47 CFR 73.1230. Any way, you'll get the salient verbage.

I don't have the time to retype it all, but it basically says that you not
only must have it, but have it posted with the other station licenses. And
boardops have been threatened with $500 fines (that's the boardop, NOT the
station) fro having it in their wallets, instead of on the wall where they
belong. Exception: Inside a folder conspicuously marked as "LICENSES" and
posted equally conspicuously.

I'm flabbergasted that ANY operating station does not have a copy of
47CFR parts 0 to 19 and parts 70 to 79. (two volumes). They're available
from the Superintendent of Public Documents, U. S. Government printing office,
Washington, DC, 20402. Each volume (you really need both) is around 20 bucks.

I maintain personal copies since stations are generally outdated. They stay
in my briefcase and NEVER leave my side while on duty. They've saved the
station manager's butt more than once, and itsy
'^"#IjPQebeally great to win arguments.

: Thanks, Mike

Mike, first, what kind of college station is it? If it's not open air
(ie carrier current, cable, or just broadcasts over campus) then you
don't need an FCC license. Second, you should have the license posted,
because the FCC can drop by anytime and ask for it (but do they ever?),
but if they drop by now, you can tell them your ordering a replacement
and they should understand. I'm sure they have a record of it. As far
as their phone number, I don't have it, but if I can find it, I'll
e-mail it to you. For now, try FCC in Washington DC - Call information
at 202/555-1212 - Ask for Federal Communications Commission in Northwest
DC. When you get a new one, photocopy it and keep that as a backup
incase this ever happens again. You must post the original at the
station. Good luck, let me know what happens!

2227. Tom Leykis ; reactions

Newsgroup: rec.radio.broadcasting
Date: 1994-06-21 23:08:11 UTC
From: Chris.Carmichael@artecon.com
Message-ID: <2u7rsr$jrv@vixen.cso.uiuc.edu>
Source record: 39482

John Wharton sent out the following question:

>what do people think of Tom Leykis?

I sent out a message to the "la-radio" group. Here it is:

Attention Tom Leykis FANS:

I have a question: On Tuesday, June 14, I was listening to his show on KSDO-San Diego, California. He started the show saying how he wasn't going to talk about O.J. Simpson, and would reserve comment. He then said that he had "dirt on KFI" the cross-town rival.

I'm confused here, and point out the mearly obvious: Tom Leykis is a national syndicated show, right? So, if a listner in TwoForks, New York, is listening, and says, "Why do I care about KFI?" because he can't get KFI. His sophomoric antics and crying about the cross-town powerhouse really drive me away. I stayed with him for 90-minutes. All he could do was say he wasn't going to talk about O.J. (which he did for most of the time) and say he had dirt on KFI; and told callers they were idiots after a few comments if they didn't agree with his politics.

I heard him say he threw away the book on talk-shows. Tom, apparently you haven't read it.

This is the second time I heard Leykis; and the second time I heard him do the opposite; and complain about his former employer. I've been flamed on another forum for bringing this out (about his crying/antics on KFI); but also have had alot of e-mail saying, "Hey, you're right."

Mr. Leykis, if you are capable of reading this, you're the IDIOT. I invite you to e-mail me, or even *GASP* call me.

I still stand on my belief; and have support: If you flame the cross-town competition, it'll only comeback on you.

Oh, by the way Tom; what is the real reason you left Boston???

Here's a sample of the replies . . . .

David Dobbs <ded@netcom.com> wrote:

I would have to agree with you about Tom Leykis; he wasn't interesting when at KFI and I'm sure being fired by them may have a little something to do with his animosity. His vapid OJ ploy was really tedious, he wasn't going to immitate everyone else and talk about, so went ahead and blathered ad nauseum. But hey, he was right - he didn't have anything to say...Dave.
p.s. - duck, I thing I hear an incoming...

markwest@netcom.com offered:

>I still stand on my belief; and have support: If you flame the cross-town
>competition, it'll only comeback on you.

I wholeheartedly agree. Tom spends far too much time on a nationally syndicated show ragging on a local Los Angeles Station. Seems like he could do more to interest his listeners across the country. Maybe he is aware that he isn't on in too many large markets and is "compensating" for that in some way.

The other thing that bugs me is that he says that he is doing his show in a way no one else is doing it. What is this revolutionary new technique that he is using? Seems to me like he is taking calls and using sound effects where appropriate (or not). His topics are the same as everyone else's. He sat on the lawn across from O.J.'s house just like his competition, John and Ken. What gives? Surely this isn't hype...say it ain't so!

Take care...

Mark West | "We'll Fix it in Post"
Complete Post, Inc. |
Hollywood, CA | 06/20/94 12:36:13

Paul Nagai: [tori@netcom.com] shared his words of wisdom:

[snip, part of my original post deleted]

If I listened to Leykis on a non-LA station, I'd certainly agree with you. I'm concerned on the other side of the coin, however. I'm afraid that his show going national will detract from the show I grew to love on KFI. I still listen to a few people on KFI, but I do like to hear Tom slam them all around, too. Sorry, maybe I'm sophomoric ;-)

[snip, part of my original post deleted]

Tom announces his AOL address on the air: TomLeykis@AOL.COM. Write him direct. I'd be curious to hear if you get a response. I've sent him mail suggesting a show topic and welcoming him back to LA. I didn't get a response. I wasn't surprised.

> I still stand on my belief; and have support: If you flame the cross-town
> competition, it'll only comeback on you.
Here, you may be right. Let's hope it's dirty and on air!

Hmmm. Have I been suckered into an ad?

Paul Nagai: tori@netcom.com

Michael Westfall [mwestfal@iris.csci.csusb.edu] added

[snip, part of my original post]

Hey, what's with all these talk show hosts being so rude to their callers anyway? It's not just Tom Leykis. These kind of antics don't make me want to continue listening; if the talk show is supposed to be some kind of forum

for discussing different viewpoints and ideas that purpose is defeated when the host cuts off the caller and calls him an Idiot just as soon as the caller's viewpont starts to differ from the host's. Why do people continue to listen to this crap? For entertainment, I guess, certainly not for enlightenment. It's sad to realize so many people think hearing someone call others idiots all the time is entertainment.

The best, most objective and fair talk shows I know about are on KBRT. But most people wouldn't be interested in them. Too thought provoking.

+++end posts+++

I took Paul Nagai's advice and sent him my original post, and furnished my phone number. He hasn't responded, and from what I gather from the la-radio group, he doesn't respond to non-AOL postings.

Thanks!

Some of you may have been left scratching your heads yesterday when you saw my line about the former "state broadcasting democracy" in Madagascar. What the phrase should have been was "state broadcasting monopoly." I did a hasty editing job and deleted part of a line about the monopoly being replaced in the new democracy by competition, including private stations. I hope nobody spent too much time trying to figure this out.

-> That's the full story of the station that Sears once used as a clear-channel PR tool.

Well, not really the full story. Check your library for a book called "Prarie Farmer and WLS: The Burridge D. Butler Years" by James Evans, published in 1969 by The University of Illinois Press.

Sears started WLS as part of its commitment to the farmers who were their major mail-order market. The radio station was inteneded to provide agricultural service and news for those listeners through something called the Sears Roebuck Agricultural Foundation. Yeah, it was PR for the store, but more of a service than that--of course Sears knew that successful farmers would order more stuff.

Anyway, the book is worth your time--it's one of the better single station histories of American radio I know about.

2234. History of broadcast radio

Newsgroup: rec.radio.broadcasting
Date: 1994-06-22 05:08:11 UTC
From: spencerob@aol.com
Message-ID: <2u8gvr$ffu@vixen.cso.uiuc.edu>
Source record: 39489

Recently, a discussion with a friend rekindled an old interest in the history of broadcast radio. This interest led me to discover rec.radio.broadcasting. I was soon impressed by the large number of knowledgeable and well-spoken correspondents to be found here--far larger than in the typical newsgroup.

After lurking for a while, I posted a plea for assistance in my search for information. This was kindly answered by David A. Kaye and a certain "JohnR46132" on AOL, and their answers were so intriguing that I was motivated to continue my search at the local library.

I was shocked at the dearth of information on the history of broadcast radio, and at the many contradictions in what I was able to find. I thus decided to set down in writing the following narrative embodying the most plausible information I have found so far. I offer it to this newsgroup in the hope that it will engender a lively discussion on the subject.

I acknowledge gratefully the contributions of the aforementioned Mr. Kaye and "JohnR," as well as the following people whose posts on the "K & W" thread were very informative: Bob Smith, Scot Witt, David A. Kaye (again), Scott D. Fybush and Norman R. Nithman. Other sources include Compton's Encyclopedia, the 1947 ARRL Radio Amateur's Handbook, and my father (a card-carrying member of the KQW Listener's Club).

Rob Spencer--spencerob@aol.com
Montrose, California
June 21, 1994

* * *

A Short History of Broadcast Radio

Part 1: "This is San Jose calling"

The first known radio broadcast occurred on Christmas Eve, 1906, when Reginald A. Fessenden transmitted an hour-long program consisting of phonograph music, a live violin solo and a short speech from his experimental station in Brant Rock, Massachusetts. Voice transmission by radio had only recently become feasible, courtesy of early radio innovators Lee de Forest and Edwin A. Armstrong. Both men continued to make significant technological contributions throughout the following several decades, and the de Forest family continues to have a small presence in the broadcast media: Calvert de Forest, David Letterman's befuddled minion, is Lee's grandson.

The early history of broadcast radio is not well documented, and the question of which station is the oldest is still rather controversial. The station with the strongest claim to the title, however, is unquestionably KQW San Jose (now KCBS San Francisco). It was founded by Dr. Charles David "Doc" Herrold, owner of the Herrold School, an electronics school in downtown San Jose. Broadcasting from the Garden City Bank building at First and San Fernando streets, it commenced operations on April 1, 1909.

Still in its infancy, radio in 1909 was already employed extensively in point-to-point (mainly ship- to-shore) communications. Herrold's station was however the first to dedicate its transmissions to programming designed for public consumption--the first to "broadcast" in the modern sense of the word. At first identifying itself by the words "this is San Jose calling," the station adopted the call letters FN in 1912, later changing its call to SJN. Herrold's wife was the first "disk jockey," trading records from a local store for advertisements.

The Radio Act of 1912 established licensing requirements for all sea-based stations, and mandated the use of a unique alphanumeric identifier for each station. It placed these stations under the jurisdiction of the Department of Commerce, which was given the authority to grant licenses, assign transmitting frequencies, and reserve portions of the spectrum for the specific use of sea-based radio. While the Act did not address land-to-land stations specifically, most of them adopted call letters as well.

Broadcast activity increased over the next few years, driven by hobbyists ("hams") and educators such as Herrold. When America entered the Great War in 1917, many of these early radio experts were called into service as the government commandeered the airwaves for military use. The war effort accelerated the technological development of radio and produced many skilled technicians. By war's end, conditions were ideal for the rapid growth of broadcast radio.

Interest in radio was growing world-wide. To avoid potential confusion, the International Radio Union adopted a convention assigning call prefixes according to country of origin. Canada was assigned C, Mexico XE, and so on. The U. S. was assigned N, K, W, and part of A for its various uses.

Although Congress for a time considered retaining government control over the radio spectrum after the War, the dedicated radio enthusiasts who had served their country so admirably prevailed upon their legislators to return it to civilian control in the Radio Act of 1919. The enthusiasts were joined in this effort by farsighted American businessmen, who saw in radio vast potential for profit. Electrical equipment manufacturers were especially interested, for they envisioned a burgeoning market in radio receivers. Many of them started experimental stations, such as the one operated by Westinghouse in Pittsburgh.

Soon convinced of radio's commercial viability, Westinghouse decided to convert its station into a commercial enterprise. Simply as a good business practice, the company applied to the Department of Commerce for a license, although one was not then required. Unsure of how to handle this unprecedented request, then-Secretary of Commerce Herbert Hoover decided to issue them a standard civilian shore-station license, with the K call prefix then in use for such stations nationwide. Thus did KDKA Pittsburgh come into existence on November 2, 1920, just in time to broadcast the election returns. Doc Herrold in San Jose had anticipated Westinghouse's action, but although SJN's license request pre-dated KDKA's, the application was delayed in the mail, and the station did not become licensed as KQW until the beginning of 1921.

While KDKA is not the oldest broadcast station, it was unarguably the first successful one. It broadcast the first sports play-by-play, the first remote, the first religious service and the first prizefight--all in its first year of existence. KDKA showed what radio was capable of, and its success spurred the medium's growth: the number of licensed stations grew from 30 in 1921 to over 500 a year later.

Faced with such explosive growth, the Department of Commerce became concerned that they would eventually run out of call letters, so in 1921 they drew a line along the western boundaries of the Dakotas, Nebraska, Kansas, Oklahoma and Texas, assigning the W call prefix to new stations east of this line. The K prefix's much-smaller area seems to indicate that broadcast radio flourished earlier in the West, although the fact that the line was moved east to its present position along the Mississippi River in 1925 suggests that the East caught up quickly. At any rate, 23 W-prefix stations remain today west of the Mississippi, but only three K-prefix stations to the east. These three are KDKA, KQV (also Pittsburgh) and KYW (now Philadelphia, originally Chicago).

While the West may have had more stations early on, it was the eastern stations, led by KDKA, that drove the growth of broadcast radio in the early Twenties. WEAF New York (owned by AT&T) broadcast the first paid commercial in 1922. WGN Chicago (owned by the Chicago Tribune; the call letters stood for "World's Greatest Newspaper") aired the first political convention in 1924. The first attempt at networking commenced on January 4, 1923, when WEAF and WNAC Boston began to feed programs to each other over telephone lines for simultaneous broadcast. Networking was ultimately the key that unlocked radio's true potential. Not only did it make the production of sophisticated programming affordable, it also turned the medium into an advertising venue of unprecedented scope.

On November 15, 1926, the National Broadcasting Company was established as the first national network by the Radio Corporation of America, General Electric, and Westinghouse Electric. Two stations acquired by RCA became the flagships of NBC's two semi-independent

networks: the Red Network, based on WEAF (later WNBC), and the Blue Network, based on WJZ Newark. The two networks differed in tone: NBC Red's programming was glossy and star-laden, while NBC Blue's was of a more humble nature. David Sarnoff, who first envisioned publicly the possibility of a radio in every home in 1916 as an employee of General Electric, was NBC's guiding force.

United Independent Broadcasters was incorporated in 1927, with William S. Paley as its president and chairman. The company's name was changed to Columbia Broadcasting System in 1928. Small at first, by the mid-thirties it had grown to be a significant rival to NBC. A fourth national network, far more modest in scope than the others, was the Mutual Broadcasting System, formed in 1934.

By the mid-Twenties, broadcasters reluctantly admitted that some form of regulation had become necessary to insure radio's continued growth. Unregulated rival stations were staging dogfights over the airwaves, competing for frequencies and interfering with each other's transmissions. To address this, the Federal Radio Commission was formed in 1926. This was superseded by the Federal Communications Commission in 1934.

Whereas earlier administrations had been reluctant to regulate radio, FDR's FCC pursued the job eagerly. It viewed the radio spectrum as a valuable national resource, regulating actively to insure that broadcast radio served "the public interest" first and foremost. Because this is a highly subjective standard, whether the FCC has been successful in its stated mission remains an open question.

One of their first goals was to limit the influence of any one broadcasting entity. To this end, it ruled in the late Thirties that no company could own more than one network. This forced NBC to sell the Blue Network in 1943 to Edward J. Noble, owner of the Life Savers candy company. Noble already had his own fledgling network--the American Broadcasting System--and in 1944 he merged the Blue Network into it, creating the American Broadcasting Company.

By the early Forties, two new broadcast technologies were emerging--frequency-modulated radio and television--which would in time come to dominate the industry. The glory days of AM radio, however, were far from over.

2235. Call letter meanings

2236. More Call Letter Slogans and Silliness

Newsgroup: rec.radio.broadcasting
Date: 1994-06-22 05:08:13 UTC
From: Mark Roberts <transvox@tyrell.net>
Message-ID: <2u8gvt$fg1@vixen.cso.uiuc.edu>
Source record: 39491

Relating to the recent call-letter discussions on AIRWAVES, here are some real call letter slogans -- plus one or two I've, er, retrofitted to certain stations over the years.

In Kansas City, KCMO stands, of course, for Kansas City, Missouri. These are marvelous call letters that at one time represented a great station. The station's still there; but its reputation has been tarnished and it does not serve as a symbol of Kansas City any longer.

When Meredith Broadcasting sold KCMO radio in 1983, it changed the call letters of Channel 5, which it still owns, from KCMO-TV to KCTV. The station persuaded a San Angelo, Texas station with those call letters to apply for another set. Playing off those calls, the TV station uses the slogan "Kansas City's Television."

Strangely, the calls KCFM have rarely been in Kansas City. In the early 50s, KCMO-FM went by those call letters for a year or so. From 1954 until 1982, the call letters were on a St. Louis station, now KSD-FM. The "CFM" stood for "Commercial Fine Music;" for most of its time it was an easy listening station that also had a Muzak subcarrier. The calls later appeared on a station at 97.1 licensed to the St. Louis suburb of Florissant. That station is now KXOK-FM.

An FM station at Lexington, Mo., just east of Kansas City, at 107.3 had the KCFM call letters from about 1987 until 1992. The station is now KISF.

The old KMBC call letters stood for "Midland Broadcasting Co.," the corporate name under which Arthur B. Church operated his stations. When the combination was split up in 1967, Bonneville chose the call letters KMBZ for the AM and KMBR for the FM. (I maintain that the call letters KMBR stand for "Keep Making Bad Radio.") Channel 9 still is known as KMBC-TV.

Local folklore has it that KPRS stands for "Kolored People's Radio Station," call letters chosen by the Carter family, which has owned it since 1950 (one of the oldest minority-owned broadcasters). KCKN (now KNHN on AM and KFKF on FM) stood for the Kansas City Kansan, a daily newspaper still published in Kansas City, Kansas.

St. Louis folklore maintains that the call letters KMOX stand for Missouri (MO) and Christmas (X) -- it went on the air Christmas Eve 1925, a project of the St. Louis Chamber of Commerce to promote the city.

When Stephens College brought KFRU to Columbia in 1925, college president James Wood tried to popularize the station's slogan as "Kindness Flows 'Round Us." Later KFRU employees rendered it as "Kinky Fools Running Unchecked."

KFRU shared time with state-owned station WOS in Jefferson City. WOS also aired dispatches for Missouri Highway Patrol troopers, causing it to be known as "Watching Our State." The station was shut down in

1936, so the tale goes, because it aired speeches critical of Kansas City political boss Tom Pendergast, who controlled much of state politics at that time as well. KWOS in Jefferson City at 1240 is a latter-day reference to those call letters, i.e., "Keep Watching Our State."

In Columbia, AM daytimer KTGR refers to the University of Missouri Tigers. It also refers to the Tiger Hotel, whose owner bought KCGM in 1967 and moved it downtown and added KTGR-FM. The Tiger Hotel is now a retirement home.

Before 1961, the station was KBIA -- which are now the call letters of the University of Missouri's FM station. The abbreviation for Columbia Regional Airport, COU, appears in the calls for the other FM station based at MU, KCOU. KCOU forwent those calls in March of this year; new station management in May successfully retrieved those call letters (much to the relief of this alum of the station).

Phonetic call letters abound in northern and central Missouri: KAAN in Bethany, KWIX and KRES in Moberly, KLIK in Jefferson City, KOKO in Warrensburg, KIRK-FM in Lebanon. When it first went on the air in 1982, KARO in Columbia also went the phonetic route, but the FM station is now known merely as K-102.

In the St. Louis area, there's KIRL in St. Charles. The station began with the calls KADY, for owner Frank Cady. He also put an FM station on the air as KADI-FM. The subsequent owner of the FM kept the calls until the mid 80s. KADI now are the call letters for an FM station in Republic, Mo.

Combining the phonetic and the symbolic is Topeka's WREN, which was originally owned by the Jenny Wren Co. of Lawrence, Kansas. The station kept the call letters even after it moved to Topeka in the late 1940s. Right after WREN left the air in 1990, a friend in Topeka drove me by the just-vacated WREN building -- with big concrete wren on top of the roof. The station is now back on, relaying a country gospel satellite service. The wren appearently has gone to the giant concrete nest in the sky.

The station at 860 in Pittsburg, Kansas, now KKOW, was known for many years as KOAM -- referring to the station's location near the borders of Kansas, Oklahoma, Arkansas, and Missouri. Channel 7 in Pittsburg is still known as KOAM-TV.

Farther south, legend has it that Houston's KPRC stood for "Kotton Port (and) Rail Center," referring to southeast Texas' major cash crop of the time and to Houston's extensive transportation facilities. KTRH ostensibly stood for "Kome to (the) Rice Hotel," whose owner, Houston political kingpin Jesse H. Jones, bought the Austin station and moved it to Houston in 1930.

During a period of turmoil in 1986 (during which I and ten other people lost our jobs at KTRH when a Group W washout tried to impose his ideas of all-news radio on the station), at a farewell party for some of us, I got a little looped and maintained the station's calls *really* stood for Keep Those Resumes Handy. Houston Post columnist Paul Harasim later used that line, without attribution, in one of his columns.

Likewise, Kansas City's heritage call letters have occasioned some comments on my part. For instance, based on its reputation for spot news, WDAF should stand for "We Dig All Fatalities." WHB, which at one time said it stood for "The World's Happiest Broadcasters," now should stand for "We Haul Beef," based on its present farm-oriented format. And based on its weak signal, talk station KNHN really should stand for "Kan Not Hear Nearby."

You mean like Rush's term "FEMINAZI"? Or his constant scapegoating of
liberals, feminists and gay-rights advocates...or environmentalists...
or Amnesty International...or prison watchdog groups...or the ACLU?

Yeah, I DO listen to Rush...that's why I feel quite confident in
describing what he does as HATE radio.

And for his time, Abe Lincoln was a FLAMING liberal like me...regardless
of what modern day Republicans would like you to believe. Part of
Republican propaganda is the distortion of history...not unlike the
historical revisionists who claim the holocaust never happened.
George Bush even had the balls to claim that if JFK was alive today he'd
be a Republican. Feh.

2240. Johnny Holliday's comeback comedown

Newsgroup: rec.radio.broadcasting
Date: 1994-06-22 05:08:21 UTC
From: syael@aol.com
Message-ID: <2u8h05$fg6@vixen.cso.uiuc.edu>
Source record: 39495

Thought you might enjoy the account of Johnny Holliday's very limited comeback as a morning announcer, as recounted by Jeffrey Yorke in the Washington Post:
DEEP SLEEP FOR 'WAKE UP'
If you slept late and missed last week's debut of Bobby Bennett and Johnny Holliday's "Wake Up Washington" on WXTR-FM (104.1), don't worry, it was a nightmare for those who heard it. And if you did hear it, don't fret, because it's over.
Following Wednesday's show, Holliday and management at the oldies station agreed to reconsider their relationship before they got in too deep. Bennet helmed the show by himself the rest of the week, and a search is underway for a new host. . . .
Bennett and Holliday had never worked together before last week's debacle; indeed cracks in the new team were evident within the first hour on the air Monday morning. They talked over each other, with the discussion sometimes veering off in different directions. Between 7 and 8 a.m., radio's prime time, Holliday spent an inordiate amount of time chattering about the previous evening's Tony Awards. . . .
Then there were the missed cues and the repeated mispronunciation of prominent advertiser Vie de France. . . ."

Too bad, I was looking forward to seeing how Billy Biceps translated to the 1990s.
Seriously, Holliday was the high point of the early 70s for me, when he did AM drive on WWDC-AM. Oh, well. I guess you really can't go home again.

My wife and I mourned the passing of KEDG at the time and still miss it.
There hasn't been anything in the radio morass of L.A. since that
comes close to what it was--quite a mix of music, new, classic, rock, blues,
jazz. Maybe some of that KEDG crew might find their way back on the air???

The International Telecommunications callsign prefix blocks
allocated to the USA are as follows:

AAA-ALZ
KAA-KZZ
NAA-NZZ
WAA-WZZ

The FCC has not used the A or N series for commercial broadcast calls.
Amateur and military callsigns (plus others, I'm sure) are prefixed
with all of the above.

I think we need a slightly better reason than this. I'm no linguist, but
I do speak English and Korean. Korean has three forms of the consonant
"K," and about five ways to represent the sound made by "W" in English.
I've studied French; it has both sounds and both letters. I took a
language aptitude test in Kurdish once -- it has both letters as well.

Tony may be right about Tongan -- it has the K sound, but no W.

I will buy the argument that it's utterly random and makes no sense.

If memory serves, the name of the Old Philosopher was Eddie Lawrence (I'm guessing he's dead, but who knows?) His patented routine started out sounding "whiny," kinda like Andy Rooney, ending by asking his listeners "is that what's bothering you, bunky?"

Then you'd hear some blaring marching music and he'd say some upbeat, positive stuff, ending with "never give up, never give up, never give up!"

Then there'd be a drumbeat or two and he'd have some kind of ironic punch line... but I can't think of any examples offhand.

And sorry.. I don't have any recordings.

Hey, there's a name I haven't heard in a while! What's he up to now?
How many times has he "lost [LA, Denver, Detroit, Philadelphia,...]"?
What amazes me about this guy is many of the stations he's on are
commercial, so why he doesn't get a national sales agent is beyond me.
Even USA Radio News, whose broadcasts appear both on comm and non-comm
stations, has national advertising. (non-comm stations just cover it w/
PSA's and the like.) It is also a fundamental Christian-oriented
broadcast, so I really can't imagine Larson would have any fundamental
(excuse the pun) opposition to advertising.

Oh well... Such is the MO of evangelists w/ questionable motives.

Overview: **********

This is the weekly schedule for West Coast Live, San Francisco's Live Radio Show to the World (actually just public radio).

Dick Dale's Tour Schedule by FTP: ********

Yes, it's true. Dick Dale is on the road to another West Coast Live. For those of you (like myself) that need more than 3 or 4 live numbers every 6 months or so, I've posted his tour schedule on our Anonymous FTP site.

Last month we announced our Anonymous FTP site. For those of you that don't have FTP available, you can FTP by email. For complete directions, send a note to;

FTP-Request@netcom.com
and ask for "HELP" in the message body.

The upcoming schedule: **********

Our producers work overtime booking talent onto the show. Sometimes they're so busy on the phone, they don't have time to keep the rest of us up to date. So join our audience at a live show. You too may be pleasantly surprised.

June 25th: **********

Dick Dale (King of Surf Guitar) and the Deltones.

Blues by Zekiya Hooker and Oza.

Naturalist, Claire Peaslee.

Susan Cleaver, author of "A Woman's Life".

July 2nd: **********

The Declaration of Independence.

Bill Barich, author "Big Dreams: Into the Heart of California".

Josh Kornbluth, monologist and screenwriter.

Whitfield Diffie, cryptologist and computer privacy expert.

July 9th: **********

Cabaret duo, Weslia Whitfield and Mike Greensill.

Susan Streitwieser Trio, whiskey voiced rocker.

Jim Houston, author "The Men in My Life".

July 16th: **********

The Bobs.

Jazzy vocals and rhythm by Pastiche and their band.

July 21st: **********

Jambay, playfully progressive original music.

Chris Smither, renowned blues songwriter.

Special Offers: **********

Drawing for Free Tickets!: *****

This week marks our 23rd West Coast Live show. Be the 23rd person to email (see rules, below) the moderator at;

Owner-West_Coast_Live@netcom.com

and you will win two (2) free tickets to this week's live show. Runner-ups are allowed to buy tickets at list price.

Rules: **********

The contest begins each week as soon as the moderator sends this notice to the West Coast Live email subscription list, so code up those PROCMAIL auto-reply recipes.

The winner will be selected based on the time the entry was sent (as opposed to the time the entry was received), no sooner than 1 hour after the moderator receives the minimum number of entries, and no later than 48 hours prior to the live show.

The email must be addressed to;

Owner-West_Coast_Live@netcom.com

The email's header subject must contain the phrase; "Win Ticket Drawing".

One entry per person.

The winner will be notified by email.

If the winner can't attend this week's show, the winner must assign the tickets to a couple of friends.

The moderator's (PROCMAIL's) selection is final.

Free Coffee: **********

Wear an official West Coast Live shirt at the show, and you are entitled to free coffee.

Rules: **********

Official West Coast Live T-shirts or sweat shirts only.

For a limited time, this offer is extended to shirts from that old radio show, that are upgraded with an official West Coast Live Shirt Upgrade Kit.

This offer is good for free coffee only from the West Coast Live java bar. If anyone else offers you free coffee for wearing a West Coast Live shirt, let us know.

T-shirt Drawing: **********

On the last live show of each month, we give away an official West Coast Live T-shirt.

Rules: **********

To enter this drawing, you must drop a business card into our fish bowl. Any scrap of paper with your name, address, and phone number may be substituted for a business card.

One entry per person. You must be present to enter.

The drawing is held following the last live show of each month. You need not be present to win.

Tip of the Week: **********

See "Endless Summer II": *******

I'm stoked. I saw Endless Summer II on Sunday, and got Dick Dale's new CD "Unknown Territory" on Monday. Hey, it's summer. Come to the show Saturday morning. After the show, either follow Dick Dale up to Novato, or head out to the beach. Then after sunset, catch the movie.

Downloading Additional Information: ******

You may download an information document giving background information on the show and the show's Internet service, by sending the following email message to;

LISTSERV@netcom.com

Message Contents:

Chris Paulus (cpaulus@clark.net) wrote:

: 97.9, 98 Rock in Baltimore, MD claims: "Times have changed, and so have
: we...Listen." But you hear the same songs they've played from before...The
: commercial plays a few tunes, and they say, "This isn't 98 rock any more."

Chris, you are 100% wrong. I have seen monitors from 98 Rock and the
station's music is radically different from 2 years ago. I would
estimate that less than 25% of the music they played in 1992 is still on
the radio station. The station is *much* harder than they used to be.

: Do they think the listeners are so stupid as to not know if there's
: difference, or if they're just playing the same stuff?

Maybe you should listen a little more closely.

Date: 1994-06-22 17:17:55 UTC
From: Jack Schnapper <jss@nrc.gov>
Message-ID: <2u9ro3$diu@vixen.cso.uiuc.edu>
Source record: 39403

Does anyone know where I can buy a copy (not necessarilly current) of Broadcasting magazine?
As I assume it is a trade magazine I don't expect to see it at my local grocery store newsstand. The issue I am particularly interested in is probably last week's with Don Imus on the cover.

Thanks,

Jack Schnapper

In article <2u8gvt$fg1@vixen.cso.uiuc.edu>, Mark Roberts
<transvox@tyrell.net> writes:

(on call letters & their meaning)

There is a different story about the call sign at KPRC in
Houston, and a more prosaic one...folks from that area say it
actually stands for Post Radio Co., an arm of the Houston Post
newspaper which put it (and its sister TV station, Channel 2)
on the air, and at last word, still owned it (although I understand
the radio station has gone on the block because of recent
ratings declines and may have been sold by now).
Some other stations have interesting stories behind their
call signs. WKBW AM/TV in Buffalo were founded (in 1925
and 1958, respectively) by Rev. Clinton Churchill, a pioneer of
the breed of preacher/entrepreneur we've come to know so
well recently. He operated the radio station as a commercial
operation from the start (it was an early CBS affiliate, and later
a charter ABC affiliate in 1943). The ONLY religious programming
was his own Sunday morning church service from his Buffalo
Tabernacle on Main St. next to the radio studio...but the
call sign nevertheless had a religious significance because it
originally stood for Well Known Bible Witness. When he put
the TV station on in 1958 (as an ABC affiliate) it had no rel-
igious programming at all, and still has very little. And Rev.
Churchill actually closed down the church permanently so he
could use the building for the TV studios. Both stations have
changed hands several times since the Churchills sold them for
$14 million to Capital Cities/ABC in 1961. 'KB was later the
real life model for the TV series WKRP in Cincinnati (original
plans were for the show to be set in Buffalo) because writers for
the show had been 'KB personalities some years before..
The AM call-sign has changed to WWKB (meaningless but still
allows the owner to call it "KB Radio"). TV is still WKBW-TV...
and is now owned by Queen City Broadcasting, in turn partially
owned by America's most famous inmate, O.J. Simpson. I won't
get into all the radio legends who've worked at "KB" over the
years...
but they're stations with a story to tell even now...
Bob Smith, WXXI/1370 Rochester NY (and 'KB alumnus)

Ed Janik writes:

>> Hate sells.

You're wrong. Hate doesn't sell -- that's why you can only get it on shortwave. Rush is a tame little kitten compared to some shortwave personalities. But that's for another newsgroup...

Mark Bianchi writes:
>General >anagers would program 24 hours of dogs barfing if it would
>make the station money.

Hey, network television isn't a topic for this newsgroup, either. :-)

>Here's where we differ: Don't you think you're being a bit of an extremist
>by essentially calling conservative talk radio "Hate Talk?" The reason
>Rush Limbaugh has listeners is because he is stating the beliefs of a large
>percentage of Americans; not because he is pushing "hatred" on the country.

Rush has this way of touching a nerve with people, and I don't disagree that he gets a lot of people riled up and stirs up _their_ emotion, so one may dislike Rush for being such a catalyst. But THAT'S what sells. If he evoked no response whatsoever, he'd go the way of Larry King. But he does what a tear-jerking movie or a good symphony or a rousing sermon from Billy Graham or Bill Clinton will do to you -- HE EVOKES EMOTION. And the advertisers just LOVE it when Rush gets talked about in newsgroups like this... Publicity is good, whether it is positive or negative.

>
>How did the ratings of the "liberals/moderates" compare with what the
>"conservatives" are getting now in the same time slots?`

I don't know about the individual timeslots, but consider the rise
of Rush, G.Gordon Liddy, and Pat Buchanan on the air. On my vacation
this spring, I had no problem getting either Rush or G.Gordon wherever
I was (SE US). On the flip side, where's Larry King these days? Now he's
got a comedian in his former time slot. I would say this is a pretty
good indication that the conservative shows are pretty much trouncing
the liberal ones in ratings (overall -- your individual market
may vary).

>There are those
>who say that the conservatives are crowding out the liberals because no
>one listens to the liberals.

That's not "crowding out", that's "tailoring your product (station
programming) to your customer base (listeners)".

>Others indicate that the choice of
>programming is based primarily on the political leanings of the station
>management, with no concern for ratings.

Maybe true of a non-profit station (NPR, Christian stations, etc.), but
certainly not for commercial stations.

It would be interesting to see
>some hard data that would tend to comfirm one way or the other. Are
>there currently any markets in which a daytime liberal competes head-to-
>head with Limbaugh? How do the ratings compare?

Larry King, once the King of the AM dial, is no longer on radio. I don't
understand your confusion. It's obvious to me that the conservative talk
attracts advertisers and the liberal talk doesn't (as much). I gather
that this may not be to your liking, so turn on NPR.

2253. Liberal Rush.... NOBODY

Newsgroup: rec.radio.broadcasting
Date: 1994-06-22 17:18:05 UTC
From: "Michael Black...WEOS-FM" <BLACK%HWS1%HWS.BITNET@UBVM.cc.buffalo.edu>
Message-ID: <2u9rod$djj@vixen.cso.uiuc.edu>
Source record: 39408

Perhaps I can submit a person in the vain of a liberal Rush. NOBODY. That's right, NOBODY, the host of The Nobody Show, is a freelance writer, author, playright and liberal. "Bringing the Gospel of Hope" to the listeners of the Fingerlakes, and recently was a guest on a "Rush like" talk show in Indiana (the name escapes me), Nobody touches on the issues and presents a fresh, and different slant on the news. He is not Jerry Brown or Jim Hightower. He is more liberal that that. The Rochester Democrat & Chronicle did a feature story on him, and he was a guest on WHAM (the staff there likes to call it G.O.P radio, and I think Bob Smith will agree). He wants to syndicate the show, and is looking for outlets. It is a call in and discussion. He has an ad in the latest talker, challenging Rush, and others to a debate. It could be interesting to see the response. If you have an interest, let me know. We air it live every Wednesday night, 8PM EDT. If you want to talk liberal, you can call in at 315-781-3897 during that time (we also have an 800 # and if you really want to call in, write ME, and I will give it to you . He goes after Clinton as much as Rush does, but for different reasons. Korea, Health Care, the Religious Right, BVH, Domestic issues, and more are tackled.

> N> Also, what do people think of Tom Leykis? Can a non-conservative make
> N> it in talk radio these days?
>
>We get Tom Leykis on 710-KMPC in Los Angeles, between 3 and 7 pm.
>"Liberal Rush" he's not. Leykis seems so deadpan serious, even bitter at
>times to me. He comes across more like a liberal Bob Larson (without all
>the funding appeals). . . .

Tom Leykis has been doing talk radio for a while. In the last
few years he has been in Phoenix, LA, Boston and now LA again. He has
done some guest host stuff on WLUP.

Whatever you think of Leykis' personal style, he is considered
to be of the "Libertarian" persuasion.

He and Larry King seem to be having a contest to see how many
wives they can get through. Rush Limbaugh is now on Wife number 3, so
maybe he should be in the "most married talk show host" contest too.

Leykis follows the successful formula of the "angry man" host.
This seems a successful strategy as it is controversial. The best
exponent of angry man in LA is Bill Handel (KFI Mornings).

>2. 1410/KQV Pittsburgh
>3. 1060/KYW Philadelphia

>Just wondering, because no one seems to know for sure that i've talked to.

Simple...they predated the existence of any line. When KDKA was granted its callsign in October 1920, the Commerce Dept had no idea what sort of license or call to grant it, so they dipped into the pool of commercial ship-to-shore licenses, and in between two ships with the callsigns KDJZ and KDKB came KDKA!

KQV and KYW were licensd in 1921, also before the Commerce Dept. got serious about an east/west line. I have heard, but have not confirmed, the the original calls Westinghouse obtained in East Springfield MA were in fact not WBZ, but _K_BZ!

BTW, KYW started in Chicago, and Westinghouse did not move it to Philadelphia until 1934. The KYW sags from there is an odd one that will have to be told at another time...

Thank you for your report.

Isn't it odd that there is no "San Diego north" County in CA.

It's one of these markets Arbitron made up, and M Street follows suit.
Oneof those markets within another market. The towns M Street
lists are Oceanside/Escondido/Carlsbad, which are on the coast
in the same county as San Diego (San Diego county).

It's like the "Morristown" (NJ) market within the NYC market.

My take is that someone noted the high per capita income in the region
(this is the case with Morris NJ) and decided "WE HAVE TO MAKE A
MARKET OUT OF THIS!"

Say, friend . . .
You say you're driving down the road and it starts to rain and you can't get the top back up and your girl's screamin'--she's scared of the dark--and a bolt of lightning splits your motor in half and you both get out of the car and fall down in the mud and a wild animal comes over and runs away with your shoes and the mud's coming up to your nostrils and you don't hear your girl screamin' anymore? Is that what's troublin' you, kid?
Eddie Lawrence, The Old Philospher. I haven't heard that in over 35 years! Don't know if any of it is still in print. A masterpiece of timing and delivery.

Hi. A friend and I will be travelling to the US and to UK/Europe at the end of the year. We both have a lot of radio experience (I'm Station Manager of our campus station and he's advertising manager - we're both DJ's as well) and would like to work on an overseas station (either commercial or community) for a month - probably January next year.

We are very flexible and will travel anywhere for the job. Our intentions are to work and save a bit of money before travelling. WE WILL DO ANYTHING from washing coffee cups to sweeping floors - hours don't matter - South Africans aren't scared of work.

So if you have space for a couple of enthusiastic, talented and hard-working graduates we'd love to hear from you. So we don't clog this group up (he said hopefully) you can e-mail me on :G91L4576@warthog.ru.ac.za

Thanks in advance.

In article <2u8gvs$ffv@vixen.cso.uiuc.edu> you write:
>
>Just to add to the discussion, KMPC in Los Angeles was named for the
>McMullen Petroleum Company, its first owner.
>
>Disclaimer: I may not have the first name exactly right.
>
>Rob Spencer
>
Rob,

Since it was MacMillan ... you're right, you're wrong.

While it is really appealing to post these things "on the fly" as you
think you remember them, why not take just a moment, log off, and
check it out. Then when you log back in, you can post correct information,
not just the sort of partially correct material that seems to flow from
many people.

This is not to dampen enthusiasm for the industry or history. But, after
a few days of seeing material like this ... like WLS being Marshall Fields
... WIND being misidentified TWICE ... and more, it gets real boring
for those of us who have worked in the industry over the years. Reading
the breathless "and XXXX means yyyy" is a waste of time if it's wrong.

Since there are resources like Bob Nelson's "ORIGINS" and other listings
including those in OLDRADIO, there really is little excuse for not
doing at least a "little" research before posting.

Likewise, I think your other post asserting the date and content of
the "first broadcast" can best be described as a nice effort that
brought many sighs to the mouths of people who have done a lot more
research. But, please ... please ... verify before posting.

best regards
barry

: Just to add to the discussion, KMPC in Los Angeles was named for the
: McMullen Petroleum Company, its first owner.

Let's see what I can remember:

California
KNBR after NBC Radio, its owner (formerly KNBC)
KGEI (shortwave) General Electric International
KDIA after WDIA Memphis, first all-black station, named
after one owner's daughter, Diana
KGO apparently not named after General Electric Oakland,
but sequentially issued instead
KQW "King's Quickening Word" -- yeah, sure
KRON after the SF Chronicle, its owner
KOVR because channel 13 used to be on Mt Diablo and with its
signal could "cover" 2 TV markets (SF and Sacramento)
KRED Eureka, after the Redwood Empire region
KABL Oakland/San Francisco after the cable cars
KOIT San Francisco, after Coit Tower monument
KBRG Fremont, after a SF station with that call
KBRG SF, after the bridges which link the city
KXOA Sacramento, after KXO in El Centro (KXOB was Stockton)
KECA now KABC after Earle C Anthony, its owner
KIIS Los Angeles, after dial position, 115(0)
KIOI and KIQI, both SF but now separate, after dial positions
KFWB LA, apparently sequentially issued, not standing for
its owner, Warner Brothers
KDON Salinas/Monterey, after Don Lee (yes, *that* Don Lee, but
the call once belonged to the station on 1240.

Oregon
KWJJ after Walter J. Jerman, owner in the 1920s
KOAC Oregon Agricultural College
KPDQ after PDQ Oil Company, though they didn't own it, an
employee was hoping to sell the station to them

In article <2u7rsj$jrn@vixen.cso.uiuc.edu>, barry@coyote.datalog.com (barry mishkind) writes:

(on K & W calls)

Just a couple of additional points...during the mid-1920s the Germans lost the KAA-KCZ block of call signs, which the ITU reassigned to the US. That's why if you see a radio station today whose call sign begins with KA, KB or KC (examples; KABC Los Angeles, first licensed 1927 and first operating under that call sign in 1953; KCBS San Francisco, purchased by CBS and moved from San Jose to San Francisco after World War II) you are seeing a station first licensed from 1927on, or an older station which changed ownership and/or call letters after the spring of 1927.
Also, the call sign blocks in the Ws that were once reserved for government services are now open to all, since most govern-ment stations now use no callsign at all, or use a letter/number combination (eg. KKN255) which can begin with a letter prefix anywhere in the K's or W's but cannot be confused with any broadcast call sign. There are now plenty of stations begin-ning with WU through WZ. (In our town, the Fox TV affiliate is WUHF and Detroiters are familiar with WXYT-AM/1270 and WXYZ-TV Channel 7, opened in 1927 and 1948 respectively; Rochester, NY talk radio listeners are hopefully equally familiar with our WXXI callsign; we signed on in 1984.) They all either began operation or changed callsigns after the first part of 1927, when the current system including the final W-K geographical dividing line was established by the Federal Radio Commission.

Source record: 39420

Hello, I am hoping someone can answer these questions for me:

1) Is there a newsgroup dedicated to college radio? Would anyone be
interested in one?

2) We are facing the threat of a translator being built ona first adjacent
frequency by Family Matters, Inc. It's just outside of our curve...
anybody have to deal with this before?

3) Are there any listservs for college radio? I know there was a list for
DJ's specifically at one point. Anybody interested in a list specifically
on college radio?

Please email me if you have time, and I would really appreciate it!

2266. Computer-Controlled Radio

Newsgroup: rec.radio.broadcasting
Date: 1994-06-23 04:15:46 UTC
From: Robert Carpenter <rc@itchy.ncsl.nist.gov>
Message-ID: <2ub29i$hqt@vixen.cso.uiuc.edu>
Source record: 39421

I've lost the original request for info or hints on a computer controlled radio, but here goes.....

1) You shouldn't expect to get LEGAL specially built equipment in 3 months. Aside from the effort required, I think that you will find that such a COMPUTER peripheral would require FCC approval (for incidental RF radiation), which itself would take quite a while.

2) A possible solution is to use WIRELESS remote control, which is available on some AM/FM broadcast band receivers. There is a product on the market "Video Director" which controls VCRs by infrared remote control, and is already FCC approved. While the associated software is all wrong for your radio application, you might be able to work something out with the Video Director supplier. They are:
Gold Disk
PO Box 789 Streetsville
Mississauga, Ontario L5M 2C2
I can't lay my hands on the manual, only the box, so I can't find their phone number just now. The Egghead price was about $100 for the VERY FANCY software and the hardware "Smart Cable".

No endorement, just a possible lead.
endorsement

Good luck, Bob Carpenter w3otc@amsat.org

Spencerob (spencerob@aol.com) wrote:

: no company could own more than one network. This forced NBC to sell
: the Blue Network in 1943 to Edward J. Noble, owner of the Life Savers
: candy company.

When Noble sold his interests in ABC in the 1950s he didn't go out of broadcasting. Instead he shifted operations to Mexico. I believe the famous XETRA in Tijuana is one of his family's stations.

When ABC needed to capitalize in the 1950s they formed partnerships with Walt Disney and with Warner Brothers. Much of ABC-TV's prime time TV programming during that era were made up of Warner and Disney programs. In turn, ABC promoted Disney and his new theme park, Disneyland. Since Walt Disney himself mortgaged everything he had, since he was poorly capitalized, too, it can be said then that there would not be a Disneyland nor a Disneyworld today without the help of ABC.

2268. FM DX'ing on 6/21

Newsgroup: rec.radio.broadcasting
Date: 1994-06-23 04:15:47 UTC
From: speg@alliant.backbone.uoknor.edu
Message-ID: <2ub29j$hqv@vixen.cso.uiuc.edu>
Source record: 39423

On the evening of 6/21, I had a rather good episode of
DX'ing on FM. From my car in Norman, OK, I was able
to pick up at least a half a dozen stations from an
area stretching from SE Virginia through Eastern
North Carolina. Some of these were on frequencies that I
usually get stations 50-70 miles away. Among others,
I received:
WUNC 91.5 Chapel Hill, NC
93.7 Elizabeth City, NC
WRNS 95.1 Kinston, NC
97.3 Newport News, VA (1200 miles away)

Did anybody else notice any similar conditions, and does
anybody know any references about conditions that would
give this sort of phenomenon?

Also, I don't know if it is related, but I work for the
National Weather Service in Norman. For almost a week,
we have been detecting very low reflectivity signals
in a layer between 10,000 and 20,000 feet on our WSR-88D
(10 cm) radar. These returns are noticed to the east
and west of numerous radars in the southern plains and
southeast U.S. The persistence of these returns for days
and during thunderstorms make us believe that these are
not a biological target such as insects. It is unkown though
if these are other meteorological targets such as a haze
layer or some kind of EM target.

If anyone had any FM DX'ing conditions on Tuesday or know
of any good refernces, I'd like to hear about them.

2269. Re: K & W in station names in USA

Newsgroup: rec.radio.broadcasting
Date: 1994-06-23 04:15:53 UTC
From: talk1370@aol.com
Message-ID: <2ub29p$hrb@vixen.cso.uiuc.edu>
Source record: 39424

In article <2u8h0d$fga@vixen.cso.uiuc.edu>, dannyb@xmission.com (Dan Bammes) writes:

(about K&W calls)

The only way we can really settle this thing (as to why we in the US got the Ws and Ks) is to go back to the call sign divisions made, for whatever reason, by the ITU at a radio conference in 1912 in London and slightly altered at a followup ITU session in the 20s. I've seen a few of the reports on the US side from the Department of Commerce (which handled radio matters until 1927) and they seem to indicate the only US concern was to get a big block of calls somewhere in the alphabet to accomodate anticipated demand. Since the US had the biggest industrial economy in the world even then, it wasn't hard to prove need for the biggest block of call signs, so from those two con-ferences we got all the Ks, Ns and Ws and the first half of the As (thru ALZ). That's more than 1/7 of all the available calls in the world.
The government initially took the N calls for the military (N for Navy or Naval Aviation) and the available A calls as well (for Army) leaving the Ks and Ws for us civilians. These days N calls are also used by amateurs and civilian aviators, and are reportedly available to shortwave broadcasters. Some A calls are available for Advanced and Extra Class hams. We needed all the calls, if only for the more than 13,000 AM, FM and TV broadcast stations now on the air on a daily basis in the USA. That is probably a majority of the stations on the air worldwide, or close to it.

"AROUND THE WORLD WITH MARCEL ROMMERTS" is the title of a six-week series
of reports to be aired on WRMI (9955 kHz) beginning UTC Wednesday, June 29
during the "Viva Miami!" program from 0100-0130. The series of telephone
interviews follows Dutch DXer Marcel Rommerts on a trip around the world,
stopping off in Japan, Fiji, Tonga, New Zealand, Tahiti and Los Angeles.
It focuses on Marcel's impressions of each country from the viewpoint of a
Dutch tourist, and includes traditional music from each location. The
series will air each UTC Wednesday during "Viva Miami!" for six weeks.
Each edition will be repeated the following Tuesday at 2000-2100 UTC on
Radio Miami's station in Honduras, Radio Copan International (15675 kHz).

FIRST CUBAN EXILE PROGRAM IN ENGLISH - The National Association of
Pedagogues of Cuba (in exile), known as the "Colegio de Pedagogos" in
Spanish, has begun an English segment within its twice-weekly program on
Radio Copan International in Honduras (15675 kHz). The program, called
"La Voz del Educador Cubano Libre" ("The Voice of the Free Cuban
Educator"), airs each Tuesday and Friday at 1900-2000 UTC. Approximately
the first 10 minutes of each program is in English, intended to explain
the Association's views about Cuba to an international audience. This is
believed to be the first Cuban exile radio program in the English
language. The Pedagogues are offering to send a copy of a newsletter in
English to shortwave listeners around the world who write them at P.O. Box
451751, Miami, Florida 33245 USA.

For more information, contact:

>lists are Oceanside/Escondido/Carlsbad, which are on the coast
>in the same county as San Diego (San Diego county).

I read in Billboard this week or last that Arbitron has decided to drop
both the North County San Diego and the Orange County markets, and just
lumping them in with San Diego and Los Angeles Metro areas, respectively.

The performer of the Old Philosopher was Eddie Lawrence. Hunt down
that name in record collection magazines and you should be able to
find something.
Mr. Lawrence is still alive and still pops up on the odd radio
commercial from time to time. He also voiced a lot of Paramount
cartoons in the 1960's.

I was astonished to see a Dr. Demento anniversary concert on TV a few
years ago where Eddie Lawrence himself came on stage and started
doing The Old Philosopher. Amazing to see someone (besides George Burns)
who did a routine that venerable was still alive and pitching it!

Where did Eddie Lawrence first start doing this routine? Was it part
of a classic radio show? Was this the basis of his stand-up act?
Did he make an album or two of these bits for DJs to parcel out?
Has he done anything else? Was he one of the participants in the
classic "I wanna fix my watch" routine? Does anyone know? Does anyone
care?

Julian Macassey (julian@bongo.tele.com) wrote:

: Whatever you think of Leykis' personal style, he is considered
: to be of the "Libertarian" persuasion.

Yeah. I like him when he's telling personal stories, but not when he goes off on a tirade. The talk host I'd like to see go national (and I think it's in the works at present, too) is Joe Crummey, formerly of KFI, and now probably on KMPC in LA. Intelligent nice guy, liberal (as much as any broadcaster dares to be today, which isn't all that liberal), and he's easy on the ears. Crummey is a good contrast to the brash Leykis style. There's also Jim Hightower, and while I agree more with him than anyone else in national talkradio, unfortunately, the folksy style won't get him many affiliates.

(claim conservatism sells)

If conservatism is the overwhelming choice, let me ask you this question; in my market why did one right-wing competitor of mine on midday radio here in Rochester just get the boot, and why did I trounce G. Gordon Liddy on another station by a 5 to 1 margin in the winter 1994 Arbitrons? Why is a moderate local host thrashing his conservative format competitor in Buffalo by a 2 to 1 margin? Why did Tom Leykis thrash Limbaugh so thoroughly in Boston that Mutual/Westwood One spotted his success and give him a national show out of Los Angeles? Why are Limbaugh and his affiliate stations now being beaten in LA as well as in San Francisco, Boston, Chicago, Detroit, Seattle, Minneapolis-St. Paul, Milwaukee, and more? And why have both the Arbitrons and the early billings for Limbaugh's new affiliates in St. Louis and Denver proven disappointing to the stations
concerned?
There can only be one answer to all these questions. Stridently conservative, partisan radio just isn't a big draw any more...if it ever
was. Even Rush has forgotten that it was his STYLE and his ENTER-TAINMENT value, not his message, that originally made him a star.
Bob Smith, midday host WXXI/1370 Rochester NY

In article <2u9ro6$dj9@vixen.cso.uiuc.edu>, markm@kgw2.xetron.com
(Mark Malson) writes:

(Rush Limbaugh sells?)

The reality is Rush Limbaugh sells...NOT! The Florida Citrus
Commission is re-evaluating its seven figure commitment to his
show after orange and juice sales went DOWN in the first few
months of their relationship. (Check the AP wire this week for
the full story.)
On the local station level, many stations are either dropping
the
show (WXYT Detroit) or re-evaluating it, because the combination
of high carriage fees with declining ratings and low or non-existent
local spot billings has caught up with many of the large market
affiliates. In cities like Boston, Chicago, Los Angeles and San
Francisco he and his affiliates are now being beaten by their
format competitors of a less strident and partisan persuasion, and
even where he still holds a format lead, in markets like ours, that
lead is eroding quickly. Rush has stopped being just an entertain-
er with a point of view and an attitude. Now, he's a wannabe pundit
and politician, and his appeal is fading as a result.
Bob Smith, midday host WXXI/1370 Rochester NY

: On the flip side, where's Larry King these days? Now he's
: got a comedian in his former time slot. I would say this is a pretty
: good indication that the conservative shows are pretty much trouncing
: the liberal ones in ratings....

This assumes that it's because of the political bent that people are
listening. I don't agree. Larry King put on a bad show. He used to
have hundreds of stations, but he even *said* on-air that he didn't care
about doing a radio show any longer. I also notice that in the national
ARBs Paul Harvey has overtaken Rush Limbaugh in total listeners.

I suggest that if people think NPR has a liberal bent, they might want to
look at the the total listenership count in their market (including
non-commercial stations) and see how high the numbers are for the local
NPR station(s). In the SF Bay area, one local NPR station comes in at
#3. There are people who like a variety of viewpoints, not just dogmatic
conservatism.

2282. alt.fan.greaseman FAQ

Newsgroup: rec.radio.broadcasting
Date: 1994-06-23 09:19:33 UTC
From: jcastro@mason1.gmu.edu
Message-ID: <greaseman-faq_772362450@rtfm.mit.edu>
Source record: 39437
Cross-posted to: alt.fan.greaseman,rec.radio.broadcasting,alt.answers,rec.answers,news.answers

Archive-name: greaseman-faq

The Greaseman is a radio personality on the Infinity Broadcasting network. He broadcasts from Los Angeles to New York City, Washington, Atlanta, Philadelphia, and San Jose. He is known for his bits and song parodies. He also has his own vocabulary which he uses to avoid trouble with the FCC. Before, he broadcast out of DC on DC/101 where he competed and beat Howard Stern on a consistant basis. The Greaseman is on by himself most of the time, though sometimes you hear his producer, Bill Scanlan cackling in the background.

Q: What is the Greaseman's real name?

A: Doug Tracht. He prefers to keep his radio life and his personal life separate. His radio name is Nino Greasemaneli.

Q: Why does Howard Stern hate the Greaseman so much?

A: Howard worked for DC/101 until he got fired. When the Greaseman was hired to take Howie's place he not only held on to Howie's audience but increased it. Then when Howard syndicated in DC he competed with the Grease until the Grease moved to Infinity where they now are co-workers for the Broadcasting Giant. Now, mentions of the Greaseman on the Howard Stern show appears to be just an act in part of Stern.

Q: Which one was the Grease in the Village People?

A: He was not really in the Village People. But in the bit, he was the construction worker.

Q: What is this Bingo that the Grease dislikes so much?

A: The Greaseman's college nick name... Ask him about it.

Q: How can I get in touch with him?

A: Call him between 1730 and 2200 EST at 1-800-544-9294 and 1-213-850-0986 (FAX) and BTW do not address him as "dude".

Q: What bits does the Greaseman do?

A: Fudgeman- Fudgeman and his chicken assistant throbin

Watch out Alex Trebek, here comes the Greaseman
Hobo-doo-ga-ga Handbook-

Methods to which recieve ingus.
Damien- The Grease has occasion to run into the "dark master"
while he is trying to perform his duties.

Q: What is the alarm that is sometimes heard in the background when the
Greaseman talks?

A: The Geeze alarm. This goes off when the greaseman starts geezing.

Q: What other gigs did Grease do on the radio?

A: Like any other up-and-coming DJ, Grease worked at other stations in
other markets to develop his unique style. They include:

Washington DC (WRC-AM 980) 1974 - 1976
Jacksonville, Florida (WAPE) 1976 - 1981
Washington DC (WWDC-FM 101.1) 1981-1993

Q: Did he always leave on good terms?

In almost all cases, yes. The one notable exception was WRC, when
management decided his morning personality wasn't quite right, and gave
him a choice between dropping the "Greaseman" character and leaving.
Grease chose the latter. If you ask about it today, he will joke about
the time he was collecting unemployment insurance in DC and would "stay
up to watch the moon rise and CURSE THE NIGHT!" although I'm sure at the
time it was somewhat unsettling.

Although he left Florida voluntarily to take the better offer at DC-101,
he did offend some bible-belt types during his stay. The Florida gig
was important to developing the Grease as a "god-fearing, truck-driving
redneck," though. The Florida station has since gone to religious music
("From Grease to Grace" was their motto for a while). Their loss.

Q: Are there any good biographies or other comprehensive stories about
the Greaseman?

A: Grease is a very private person, and spent a number of years in DC
before finally consenting to an in-depth story about him in the
Washington Post Magazine Fall 1987. It's a good resource to summarize
his past gigs and overall life story. Also the Washingtonian Magazine
did an article on him in the January of 1993 in commemeration of his
departure from DC.

Grease also appeared on the Larry King Show (early to mid-80's) to talk
about morning radio in general. The only down side was that he was
teamed with a "Morning Zoo" DJ as a co-interviewee, a format that has
become annoyingly ubiquitous on the radio landscape. Transcripts may be
available (don't know how to get them, sorry). This is the old
Mutual show that ran all night (Grease probably got up early to do it :-),
and not the current CNN TV talk show.

Q: Are there any albums or compilations of Grease bits?

A: There was a 4-part "Best of Grease" compilation, available on cassettes. These became unavailable shortly before he left DC-101. They are now prized collectors items and can only be obtained from private owners. Part of Grease's popularity on a national basis before he went into syndication (and hence part of the motivation for this newsgroup) was the creation and exchange of bootleg tapes among an extended network of fans. Some of his best work has never been republished (although you can occasionally talk him into doing them again on his current show).

Q: Did Grease ever serve in the military?

A: Like John Wayne, Grease has a deep and abiding respect for everyone who serves in uniform, but never served himself. During the Vietnam war, he was attending Ithaca College in New York, and his draft number never came up.

Q: But Grease did serve as a policeman?

A: Yes, he did. While working at his gig in Florida, he worked as a reserve police officer on the night shift. Morning staffers would be jolted out of their bleary-eyed state by the sight of Grease doing his show in full uniform with a 44 Magnum strapped to his belt.

Q: Is Greaseman a bigot/homophobe?

A: Certainly not. Like the program "In Living Color" or even rec.humor.funny, Grease parodies what's funny in everyone, and winds up defusing hatred as a result. Grease respects all of his fans, and wishes well even those who don't like him.

Q: But there was that "Martin Luther King, Jr." incident in DC?

A: Yes, sometimes there's a fine line between parody and cruelty, and Grease crossed the line only once during his otherwise unmarred broadcasting career spanning over 2 decades.

Sometime in the late 80's, he was noting the passing of Martin Luther King Jr.'s birthday (which had then only recently become a national holiday). Grease said something about "killing 4 more and getting rest of the week off." Grease was suspended, and apologized for the incident on an "Editorial Rebuttal" on WRC-TV in DC.

Haven't the rest of you made mistakes or are you all perfect?

Q: What does AMF mean?

A: Adios my friend.

Q: What is the "Bit without an Ending?"

A: When Grease was working in Florida, he would be prevented from getting a good day's sleep after his morning gig by thoughtless model-airplane enthusiasts who would buzz their models outside his window.

Grease came up with a revenge skit with a model plane of his own that would shoot the others out of the sky. The plane became posessed by Damien and started chasing after him. Grease then got too deep into this bit without a way out (and tried to incorporate this into the bit). After fumbling with the sound-effects, and trying a foray South of the Border, and then calling in Big-Dick Brannigan, he finally gave up groping for a punch line. Grease can usually be counted on to do some of the most impressive ad-libbing and improvisation on the radio today, but at that time his talents failed him. The bit originally aired in the Fall of 1982 from WWDC FM Washington, DC/101.

It's considered a classic, and is on Vol. 1 of the "Best of Grease" tapes. He owns the rights to all his bits, and may rerun it on his current show from time to time.

Q: What stations carry the Greaseman?

A: City Station Time

2283. "Alternative" music on the AM dial.

Newsgroup: rec.radio.broadcasting
Date: 1994-06-24 08:17:53 UTC

Source record: 39438

Lately, I've run across 3 AM stations playing such music. The first
was WDJX (1080 kHz) from Louisville, KY, which I discovered one night last fall
while in college in Rochester, NY. I think the station must have accidentally
not switched to their night pattern that evening because WTIC is normally heard
on 1080 at night in Rochester. Here, in Auburn, AL, WDJX can be heard nightly,
although somewhat intermittently (there is a station from Texas on that
frequency that can be nulled out by proper positioning of the receiver's
ferrite rod antenna).
There is this other station I discovered on 1430 kHz that IDs as
"14-X". Its format is similar to that of WDJX, but I don't know what its call
letters are or its city of license. The signal can only be heard
intermittently, and it never seems to completely overcome all the other signals
on that frequency.
Also, a couple of nights ago (the same night I discovered 14-X), I
heard techno music on 860 kHz. Mostly, though, what I heard on this frequency
was a strong bassline under a CBC broadcast (yes, the SRF-42 has good frequency
response at the low end of the audio spectrum, too, but that's another story!).
The reason for putting quotes around the word alternative in the
subject heading is that both WDJX and 14-X play the MTV version of alternative
music (i.e. Nirvana, Smashing Pumpkins, et al...No independent label stuff). I
don't know that much about the music on 860, though.
If you know about any alternative AM radio stations or you have one in
your area, please don't hesitate to share the information with us.

Cross-posted to:
rec.audio,rec.radio.noncomm,rec.audio.misc,rec.audio.tech,rec.radio.amateur.antenna,rec.radio.scanner,rec.radio.broadcasting

I'm writing an article for my station here in Washington. What I want to know is if there is a "better" design for an antenna than the "Sterba Curtain" antenna. What I'm looking for is an antenna that can be built by the average joe/jane that is tuned to a specific frequency that can be used to pick up a station say, thirty or fourty miles away (we're only a 100 watt station, soon to upgrade to a 500 watt transmitter). From what I've read, the best design is this "sterba curtain" design, with the base measurement of 62.5 inches (our frequency is 89.9 FM). But this design may be a bit to large for some people to build.

I'm also curious as to the effect of grounding. That is, where placement of an antenna is adversely affected by its enviorment (i.e. putting your antenna on the outside of your aluminum-sided house!). How could these effects be canceled, and how far should an antenna be away from these "grounded" materials before the signal will come in? How far up should an antenna be from the ground? How far away from your reciever can the antenna be?

A lot of questions I realize. But what the hell, I'm curious! If anyone could direct me towards a good book on the subject I'd like that too.

Hello all, Charles Addler I think that's right, used to be here in Calgary for a while a few years or so back, then he went off to Toronto Ontario and well from what I heard he was then doing a afternoon slot on a Fla. radio talk network. Any of you know if 1. He is still in the business?
2. If he has an e-mail adress, understand from some who worked with him locally here he wasn't much into computers. Well, if any of you know anything could you post it to me in e-mail? Thanks. He was a loud mouth, so you cant miss him. He then left the afternoon drive slot in Fla. and went, I don't know where. That's all I know for now. Not new, been around for about 10 years I'd guess or more.

2286. Broadcast

In response to my recent post regarding the meaning of the call letters KMPC, Barry Mishkind wrote:

> While it is really appealing to post these things "on the fly" as you
> *think* you remember them, why not take just a moment, log off, and
> check it out. Then when you log back in, you can post correct information,
> not just the sort of partially correct material that seems to flow from
> many people.

> . . .after a few days of seeing material like this. . .it gets real boring
> for those of us who have worked in the industry over the years. . .

I must apologize if I have bored anyone in this group. This certainly was not my intention. I was quite sure of the essential truth of what I had said, having heard it from Johhny Magnus on the air over 25 years ago. I was merely unsure of the spelling, which as it turned out was indeed incorrect.

> Since there are resources like Bob Nelson's "ORIGINS" and other listings
> including those in OLDRADIO, there really is little excuse for not
> doing at least a "little" research before posting.

I wish Mr. Mishkind had responded to the request for such information I posted to this group some time ago. If he had, not only would I have avoided the above error, I would also have avoided ground that this group evidently has already covered.

I would appreciate it if someone were to E-mail me directions to such information as Mr. Mishkind cited, so that I may avoid similar public flogging in the future.

Rob Spencer

[Moderator's Note: I'd like to see that file ORIGINS too, perhaps keep it around for FTP. Anyone want to send me a copy of the most recent issue? Bill]

2288. Re: Canadian calls (was Re: K & W in station names in USA)

David A. Kaye wrote:

Canada has CH through CL (I think) and part of V.

Actually, CF through CK; also CY, CZ, VA, VE, VO, and VY; and I think something beginning with 2 as well (I don't have my references handy).

Most commercial TV and radio stations here have calls beginning with CF or CH-CK. I've seen CG on aircraft, but there are Canadian aircraft with other (non-CG) calls too.

The V calls are used for hams in Canada. Most are VE, but new Ontario hams recently started getting VA3 calls (likely to be a bit confusing for a while -- VA sounds too much like VE).

VO belonged to Newfoundland when it was a British colony (didn't become part of Canada till 1948). Hams in Nfld. get VO calls, and a handful of old Nfld. commercial radio stations still have their original VO calls.

Stations owned by the Canadian Broadcasting Corporation (CBC) have calls starting with CB. CB actually belongs to Chile, not Canada. I've read in an information circular from the Department of Communications (now part of Industry Canada) that some special agreement was reached allowing the CBC to use CB calls, but I don't have specific info on this.

2289. Cassette Culture programs

Newsgroup: rec.radio.broadcasting
Date: 1994-06-24 08:18:03 UTC
From: Bruce Girard <resystom@web.apc.org>
Message-ID: <2ue4rr$58i@vixen.cso.uiuc.edu>
Source record: 39444

The following is reposted from the amarc.radio conference on
the APC Networks.

For more information, email CFRU@WEB.APC.ORG

==========

The following programs have recently been added to the catalogue
of programs available through "Cassette Culture":

THE ENVIRONMENT AND HUMAN RIGHTS
4/15/94 In an increasingly interconnected global economy, even the
simplest actions -- from plugging in the radio to brewing a cup
of coffee -- involve an intricate chain of social and
environmental relationships touching people in far flung points
in the world. Barbara Johnston is the editor of Who Pays the
Price? a new book examining some of these connections through
case studies from around the world. In this interview she explains
why new approaches to human rights and environmental activism are
needed to forge a broad-based international movement for social
and environmental justice. She also talks about the mulitple
impacts of uranium mining and nuclear weapons testing on
indigenous territory in the United States and the south Pacific.
Runs 29:55 with intro and extro.

THE POLITICAL ECOLOGY OF THE ZAPATISTA UPRISING
4/13/94 The Zapatista uprising that began in the south of Mexico
on January 1 has helped highlight the widening gulf between the
rich and the poor in the restructured North American economy.
Lourdes Arizpe, a Mexican rural sociologist, has worked with
indigenous women and other peasant farmers in the Lacandon
rainforest where the Zapatista uprising began. In this interview,
she talks about some of the social and economic conditions --
both recent and longstanding -- that have contributed to the rise
of a rebel movement whose soldiers are one-third women and mostly
beneath the age of 25. Runs 29:30 with intro and extro.

FREEING THE NARMADA
4/10/94 For two decades, the Indian government has been planning a
massive irrigation project for the Narmada River. But in all this
time, neither the Indian government nor its international backers
has come up with a way to protect the livelihoods of the tens of
thousands of Indian peasants and tribal people who will be
displaced by the flooding and ecological destruction caused by
the large dams. The Indian government's failure to defend the
rights of the poor has resulted in the growth of a powerful,

broad- based movement to assert popular control over the resources of the Narmada Valley. Smitu Kothari is the editor of the Indian journal Lokayan and has written numerous articles on popular movements and the failure of industrial development. In this interview he discusses the broader context of the Narmada struggle, including the re-emergence of Gandhian social philosophies and the impacts of structural adjustment programs on Indian society. Runs 29:55 with intro and extro.

LAND AND LIBERTY
3/17/94 Seventy-five years after the assassination of Mexican revolutionary Emiliano Zapata, his most famous slogan -- tierra y libertad -- is resounding in the villages and barrios of Mexico. In this program, Salvador Peniche, a Mexican social worker and a member of the Mexican Action Network Against Free Trade (RMALC) discusses the impact of NAFTA on rural communities in Mexico and the Zapatista's proposal for overhauling the Mexican state. Runs 29:55 with intro and extro.

CHIAPAS WITNESS
3/7/94 Suzanne Rumsey, the Associate Director of the Inter-Church Committee on Human Rights in Latin America, was part of the first international delegation to enter the Mexican town of Ocosingo when the Mexican military first relaxed travel restrictions on January 13. In this interview she talks about the massive state assault on indigenous communities that followed the Zapatista uprising, about the long-standing pattern of human rights abuse in the south of Mexico, and about the importance of international solidarity efforts. Runs 27:00 with intro and extro.

TAKING ON PROCTOR & GAMBLE
10/8/93 Proctor & Gamble is a $30 billion international empire which has been steadily increasing its profits for more than 35 years. But the economic health of Proctor & Gamble has been purchased at the price of environmental destruction in the communities where its factories are located. In Taylor County, Florida, for example, P&G's cellulose mill is the source of one of the state's worst environmental disasters. Dioxins and furans, by-products of the bleaching process, have made the waters of the Fennhalloway River hazardous to the community. Joy Towles Cummings, a resident of Taylor County, has been speaking out against P&G since 1989. In this interview she discusses the intimidation, harassment and violence she and women have faced for participating in the P&G boycott campaign. Runs 30:00 with intro and extro.

CASSETTE CULTURE is an offshoot of CFRU-FM, the not-for- profit campus and community radio station at the University of Guelph. Established as an independent working group in 1990, CASSETTE CULTURE has produced and distributed more than 50 radio programs for broadcast across North America and around the world. Topics

have included indigenous land rights, ecological restoration, biotechnology and intellectual property rights, alternative agriculture, gender and development, and the impact of structural adjustment programs in West Africa.

With the exception of literary performances, all of the programs and features in this catalogue are available to not-for-profit organizations, community groups and individuals, in addition to not-for-profit broadcasters. The price is $9.00 per program. "Subscription series" of 13 programs are available for $99.00. The price for libraries and other institutions is $18.00 per program or $180 for 13 program sets. Whenever feasible, we are also interested in exchanging tapes for comparable programs or printed materials.

The CASSETTE CULTURE catalogue is updated as new programs are produced. To receive future editions of this catalogue, please contact CASSETTE CULTURE c/o CFRU-FM, Level 2, University Centre, University of Guelph, Guelph, Ontario, N1G 2W1, (519) 824-4120, ext. 8341, EMAIL: cfru@web.apc.org

2290. Help/Suggestions for setting up an AM radio staion for the community

Newsgroup: rec.radio.broadcasting
Date: 1994-06-24 08:18:04 UTC
From: ranjeev@gibbs.oit.unc.edu
Message-ID: <2ue4rs$58k@vixen.cso.uiuc.edu>
Source record: 39445

I want to know as to how difficult it is to try setting up a community AM station. Primarily I am worried about cost, FCC license, and other related information.

Could someone point me to the right information sources?

Thanks,

Ranjeev Singh

ranjeev@gibbs.oit.unc.edu

2291. Congo Kurt, on mornings at KYW, Cleveland?

Newsgroup: rec.radio.broadcasting
Date: 1994-06-24 08:18:10 UTC
From: martin@cod.nosc.mil
Message-ID: <2ue4s2$58p@vixen.cso.uiuc.edu>
Source record: 39446

Regarding old Cleveland radio, KYW/WKYC in the mid 60's had a morning team
of Martin and Howard. One of them, I believe Harry Martin, ended up at WXYZ-.
Detroit. Anyway, almost every morning they did a comedy
routine called Congo Kurt. Does anyone remember this? Does anyone
know if tapes are still available? The intro to each episode was:
"Listen while the drums beat up adventure. Listen while the
drums beat up excitement. Listen while the drums beat up our most
beat up hero ever-- Congo Kuuuurt." They were some of the funniest
bits I've ever heard, rivaling Chicken Man!

The only possible lead I've had to Congo Kurt recordings
came from Mike Michaels, a guy doing all kinds of radio
engineering in Honolulu. He used to be "Mike Music" along with
"Phil Music" on the Jerry G. show in the evenings on KYW/WKYC. Jerry G. (Bishop)
now owns several restaurants in San Diego, but I think he's out of
broadcasting. He always ended his shows with,
"Be Good. Stay calm. and try to adjust." with a fade-up into
the instrumental version of the Beatles "And I Love Her".
Does anyone remember this??? anyway, Mike Michaels told me
in Honolulu that he was sure that the Congo Kurt
episodes would be archived somewhere, but the present staff
at WWWE, the same station as WKYC, doesn't know what I'm talking about.

Strangely, most of the talent from KYW, Cleveland left at the same time,
and ended up all on WCFL, Chicago for awhile. Anyway, fun remembering,
but if anyone knows about Congo Kurt, please let me know.
Doug Martin martin@nosc.mil

Paul Harvey is an ultraconservative. During the '88 elections, he came right out and told people that the race was really about who gets to appoint supreme court judges, then reinforced several conservative points of view on controversial topics...it was clearly a plug for the Republican party and George.

Who is trouncing Rush in Chicago? The only talk alternatives are
G. Gordon Liddy on WJJD and whoever is on the octogenarians' favorite
station, WGN (that's not fair...I think it's Judy Markey and she's
a pretty hip woman in her late 40's...my dad who's 68 can't relate to
her).

BTW Could someone post the Chicago arbitrons?

2294. URGENT - Ecuador radio closed

Newsgroup: rec.radio.broadcasting
Date: 1994-06-24 08:18:12 UTC
From: Bruce Girard <resystom@web.apc.org>
Message-ID: <2ue4s4$58u@vixen.cso.uiuc.edu>
Source record: 39449

```
:=================:
:RadioAction Alert:
:=================:

SOLDIERS OCCUPY RADIO STATIONS IN ECUADOR

ECUADOR, JUNE 1994 - At 4:30 in the morning of Wednesday June 22, 1994,
soldiers occupied and closed Radio Latacunga, the station of the
Cotopaxi provincial Diocese in Ecuador.

The soldiers entered the radio station through the roof, broke a
glass door leading to the offices and arrested Gonzalo Granda and
Norma Arroyo, who were on duty at the station.

On learning of the break-in a few minutes later, station director,
Sister Alma Montoya, arrived on the scene. She was also arrested
and taken to the military base of the Patria Brigade. Sister
Montoya is a Colombian citizen and there is concern that she will
be expelled from Ecuador.

At 9:30 the same morning Alonso Guerrero, an employee of the
station, went to Radio Latacunga to investigate the events. He was
also arrested. Other employees have reported being harassed.

Another station, Escuelas Radiof�nicas de Ecuador (ERPE), in
Riobamba was also occupied at 11:30 in the evening of Tuesday June
21. The radio station remained on the air, but with music
programmed by the soldiers.

These events are taking place at a time when the government has
mobilized the military in response to widespread protests by
indigenous peoples against a new law governing agricultural
development. Native people have closed all the roads of the central
mountain area, leaving some cities isolated.

Organized into the Confederaci�n de Nacionalidades Ind�genas del
Ecuador (CONAIE - Confederation of Indigenous Nations of Ecuador),
native people are opposed to the new law which they claim will
breakup communal structures and permit a concentration of land in
favour of large companies and plantation owners. According to
CONAIE, the new law will wipe out the land reforms gained over the
past years.

The Declaration of Santiago, proclaimed during the Seminar on
Communication Media and Democracy organized by UNESCO in Chile last
month, states that democracy cannot exist without freedom of the
press. The attacks against Radio Latacunga and ERPE are attacks
```

against democracy.

AMARC's Solidarity Network is requesting that faxes protesting the occupation of Radio Latacunga and ERPE and the arrest of the employees of Radio Latacunga be sent to President Dur&#65533;n Ball&#65533;n at fax 593-2-580735. Faxes in solidarity with Radio Latacunga and its workers can be sent to 593-3-802239.

Please send copies of your faxes and letters to AMARC's Solidarity Network at the address below.

::

2295. Re: History of broadcast radio

Newsgroup: rec.radio.broadcasting
Date: 1994-06-24 08:18:18 UTC
From: spencerob@aol.com
Message-ID: <2ue4sa$58v@vixen.cso.uiuc.edu>
Source record: 39350

In article <2ub29j$hr0@vixen.cso.uiuc.edu>, dk@crl.com (David A. Kaye) writes:

> When Noble sold his interests in ABC in the 1950s he didn't go out
> of broadcasting. Instead he shifted operations to Mexico. I believe
> the famous XETRA in Tijuana is one of his family's stations.

I thought that there may be some connection, but I didn't mention it because I could not verify it, and I did not want to annoy Mr. Mishkind.

2296. Programmer wanted (job announcement)

Newsgroup: rec.radio.broadcasting
Date: 1994-06-24 08:18:18 UTC
From: jrusby@darkwing.uoregon.edu
Message-ID: <2ue4sa$590@vixen.cso.uiuc.edu>
Source record: 39351
Cross-posted to: misc.jobs.offered,alt.radio.digital,rec.radio.broadcasting

The following job announcement is posted as a courtesy. If you chose to
respond, use only the listed instructions. Do NOT reply via e-mail or
your message will never be seen again. There is no affiliation between
CBSI and the originator of this message.

>From CBSI, Reedsport OR

Position Available:
We are looking for a Windows Programmer to help us complete
initial development of a hardware and software product for use
in the Radio Broadcast industry.
Specific experience would be in developing Windows programs using
MFC and Visual C++. Additional experience or knowledge of Windows NT and
SQL Server would be helpful.

This is a long term position with significant future growth as
the product family continues to expand. We look at the evolution of
digital audio as the future in the industry and are committed to being
a leader in that arena.

This position is a replacement for a programmer who has moved on to
other challenges.
We are located on the beautiful Oregon coast in Reedsport.
We offer competitive compensation and a wonderful lifestyle.
If you are interested, please contact us directly at:

CBSI, PO Box 67,
Reedsport, OR 97467.

Please do not reply via e-mail. This announcement was posted by a third
party who has no affiliation with CBSI.

> Larry King, once the King of the AM dial, is no longer on
> radio. I don't understand your confusion.

His plodding style didn't make the transition well from overnights to afternoon drive (EDT). I don't remember the specifics, but I believe it was his decision to pull the plug on the daily radio grind... oddly enough, the audio of his CNN "Larry King Live" show is now being fed to radio.

To:articles@airwaves.chi.il.us

markm@kgw2.xetron.com (Mark Malson) writes:
N> I don't know about the individual timeslots, but consider the rise of
N> Rush, G.Gordon Liddy, and Pat Buchanan on the air. On my vacation
N> this spring, I had no problem getting either Rush or G.Gordon
N> wherever I was (SE US). On the flip side, where's Larry King these
N> days? Now he's got a comedian in his former time slot. I would say
N> this is a pretty good indication that the conservative shows are
N> pretty much trouncing the liberal ones in ratings (overall -- your
N> individual market may vary).

I think Larry King just burned out on radio. He's on CNN television, I think. . ..He was the "King" of late night radio for several years, then I think he moved his show to the daytime to compete with Rush. . . just didn't work.

I'm not quite sure he did the same thing as Rush, etc. anyway. Most of King's show revolved around his guests, and his own opinions, even when he expressed them, seemed rather unimportant. Occasionally, on his "Open Phone" segment, he'd argue with a caller on some political issue for a while, but there was never, as I remember, any monologues detailing his opinions, unlike the more current talk show hosts (Rush, Liddy, Leykis, etc.)

2299. BOB LARSON

Newsgroup: rec.radio.broadcasting
Date: 1994-06-24 08:18:26 UTC

To:articles@airwaves.chi.il.us

N> >He comes across more like a liberal Bob Larson (without all >the
N> funding appeals). . . .
N>
N> Hey, there's a name I haven't heard in a while! What's he up to now?
N> How many times has he "lost [LA, Denver, Detroit, Philadelphia,...]"?
N> What amazes me about this guy is many of the stations he's on are
N> commercial, so why he doesn't get a national sales agent is beyond
N> me.

He's been on and off various stations over the years. I believe he's using commercial stations more, since several of the religious stations/networks (Family Radio, for one) have discontinued his program on their stations.

Over on the Fidonet BROADCAST echo, someone had stated that he was going to start a new talk show, oriented more towards secular radio stations, and without all the fundraising appeals. I haven't heard much more about it. . ..

N> It is also a fundamental Christian-oriented broadcast, so I really
N> can't imagine Larson would have any fundamental (excuse the pun)
N> opposition to advertising.

He did have some ads on his show (and probably still does), generally for religious products of some sort or other.

2300. DR. LAURA

Newsgroup: rec.radio.broadcasting

> It's obvious to me that the conservative talk attracts advertisers and
> the liberal talk doesn't (as much).

> - Mark Malson
> markm@xetron.com

This matches my observation as a broadcasting outsider. But several people here seem to lament the lack of liberal airtime in many places ("no liberals need apply"). So, I wondered if my perception was really correct. I thought perhaps "non-market" forces sometimes prevented liberals from really having a chance to "show their stuff". Of course, none of us will ever be totally satisfied with some of the programming decisions that are made (our personal preferences are not likely to be met exactly).

julian@bongo.tele.com (Julian Macassey) writes:

N> Whatever you think of Leykis' personal style, he is
N> considered to be of the "Libertarian" persuasion.
N>
I've heard him describe himself as a "left-leaning Libertarian". Once on KFI, though, he said that we should "tax the rich". Doesn't sound too Libertarian to me. . .

N> He and Larry King seem to be having a contest to see how many
N> wives they can get through. Rush Limbaugh is now on Wife number 3, so
N> maybe he should be in the "most married talk show host" contest too.
N>
How about the *least* married talk show host? Bruce Williams? Bob Larson? Laura Schlessinger? :-)

N> Leykis follows the successful formula of the "angry man"
N> host. This seems a successful strategy as it is controversial. The
N> best exponent of angry man in LA is Bill Handel (KFI Mornings).

I'd consider Handel more of a Libertarian than Leykis.

2303. Re: David Brenner and Leykis. Opinions?

Newsgroup: rec.radio.broadcasting
Date: 1994-06-24 08:18:33 UTC
From: John Wharton <jwharton@delphi.com>
Message-ID: <2ue4sp$59h@vixen.cso.uiuc.edu>
Source record: 39358

Nice to see you here Bob!

With regards to Leykis, we should have a Buffalo station online soon and who know, maybe a Toronto station as well. (Is Canada ready for Leykis?) But regardless, thanks for the feedback.
I'm curious about the Brenner comment. His "background" is not only stand-up. Before becoming a comic he was a director and producer of documentaries. Several hundred of them as a matter of fact. Brenner's viewpoint is that we have a bajillion serious talk shows out there. He doesn't have to be funny for three hours. You're right, nobody could do that. All he has to do is not be serious and that's not hard.

Not to be a corparate flack, but I found it strangely refreshing when every talk show in the country (probably even Bruce too!) is talking O.J., O.J., O.J., Brenner is talking to a woman making a 250 lb butter sculpture of Garth Brooks for the Iowa state fair. Callers lit up the phoone lines! To talk about butter sculpture?! Does life have to be so serious?

Anyway, thanks for the feedback.

John

2304. LEYKIS

Newsgroup: rec.radio.broadcasting
Date: 1994-06-24 08:18:34 UTC
From: charles.hobbs@support.com
Message-ID: <2ue4sq$59i@vixen.cso.uiuc.edu>
Source record: 39359

To:articles@airwaves.chi.il.us

N> I have a question: On Tuesday, June 14, I was listening to his show
N> on KSDO-San Diego, California. He started the show saying how he
N> wasn't going to talk about O.J. Simpson, and would reserve comment.
N> He then said that he had "dirt on KFI" the cross-town rival.
N> [....]
N> His sophomoric antics and crying about the cross-town
N> powerhouse really drive me away. I stayed with him for 90-minutes.
N> All he could do was say he wasn't going to talk about O.J. (which he
N> did for most of the time) and say he had dirt on KFI; and told
N> callers they were idiots after a few comments if they didn't agree
N> with his politics.
N>
N> This is the second time I heard Leykis; and the second time I heard
N> him do the opposite; and complain about his former employer. I've
N> been flamed on another forum for bringing this out (about his
N> crying/antics on KFI); but also have had alot of e-mail saying, "Hey,
N> you're right."

A few points:
a. I don't think anyone (outside of KFI) knew the reason Leykis was fired from KFI; to my knowledge, that was never disclosed.

b. *Everyone's* talking about OJ now, it's just about the only thing most talk shows are doing. (Some of them are doing segments on domestic violence and tying it in to the OJ theme)

c. The KMPC (710 Talk) program day is peppered with Leykis "taunting" KFI with promos directed at Rush, John and Ken (hosts on KFI at the same time that Leykis is on KMPC), etc. Obviously, to be an effective *national* talk show host, Leykis is going to have to do something besides whine about KFI, eventually.

(Since KMPC carries Angels baseball, they even run this promo "We're the talk station that's not afraid to play with its balls!".)

d. Rudeness. He's been known to call callers names, and even "blow them up" with an explosion sound effect at times if he *really* disagreed with them.

N> I took Paul Nagai's advice and sent him my original post, and
N> furnished my phone number. He hasn't responded, and from what I
N> gather from the la-radio group, he doesn't respond to non-AOL
N> postings.

Shades of Rush and his "I don't respond to the xxxxxxxx's on Internet"
attitude of a few years back . . .

Here in East Texas, Rush does quite well. In the last book we have (Spring '93) Rush is number 2 25-54, behind a country station that does quite well. Our market is Tyler-Longview and the Rush station is KEES/KYZS, an AM/AM combo that is 100% simulcast.

It's interesting to see people's reaction to Rush...people seem to fall into two basic groups: they worship him or they hate him. Frankly, as a General Sales Manager who sells Rush (and quite well, I might add) and a real live anti-war, never voted for a republican for president, still kinda like Clinton liberal, it seems to me that the real truth about Rush is somewhere inbetween.

Here's the real Rush deal: He's found a schtick that works for him. His is an entertainment program...not a source for the answers to life. If you listen to Rush and believe every word he says is ultimate truth...get a life! HE doesn't believe everything he says. As far as hating Rush is concerned, again, get a life! It's a radio show...not a system of beliefs. When a comedian makes a joke that defames a minority group, or all men, or all women...do you call him a hate-monger? Robin Williams makes light of certain behaviors of gay men and women...is he a hate-monger? Rush may be a pig...so was Andrew Dice Clay...so what?

This is not a liberal vs. conservative thing...it's an issue of entertainment. I listen to Rush and find him entertaining and thought provoking. I disagree with most of what he says he believes and I laugh at his callers for being boneheads. From the perspective of a radio station, the point is not "do they agree" but "do they listen". None of us at KEES are here to preach or change minds...we are here to entertain and inform (yes, we do real news as well as Rush). Our station kicks butt from a revenue perspecitve as well. This is a conservative area which explains some of Rush's appeal, but generally businesses buy advertising from media and stations that deliver a qualified audience.

By the way, we dropped Larry King last summer...not because he was a liberal, but because we got complaints about how rude he was to his callers. Rush may be an overpaid buffoon, but he treats his callers with respect and kindness on the air...even those who disagree.

I don't live my life according to song lyrics, slogans in commercials or statements made by talk show hosts...I listen, I enjoy, but I don't take it too seriously!

Don Backus, GSM, KEES Talk Radio, Longview Texas

At my station we've got a pretty innovative program going. We sell trade on the air. Basically we get a client, for example Mary Jo's hair salon, to give us X amount of value in trade. We sell "Gift Certificates" on the air at a discount to the listeners. The listeners get a deal, the client gets advertising on the best station in town and we get cash. It's so simple I don't know how come everyone isn't doing it. call Brian Phoenix for info if your curiosity is piqued. we do three thousand bucks some weeks.

New York Newsday reports that John R. Gambling of WOR may be shopping for another station. His contract expires 12/31/94, but reports say his relationship with WOR management has soured. WOR's ratings have lagged behind those of talker WABC. There is still speculation that the New York Yankees will leave WABC for WOR and that WOR will become an all sports station. John R. Gamblings father and grandfather (with the same name) are legends in New York radio.

WRTN 93.5 FM licensed to New Rochelle (Westchester County) has adopted a satellite R & B oldies format. I listened for about a half hour ND and they played a mixture of traditional jazz, big band, Motown, and other R & B oldies. It sounded a lot different from the R & B oldies played on KRKL
oldies played on KRLA in Los Angeles.

2310. Radio Watchers -- Kansas City (6/24)

Newsgroup: rec.radio.broadcasting
Date: 1994-06-25 07:01:00 UTC
From: Mark Roberts <transvox@tyrell.net>
Message-ID: <2ugknc$2ra@vixen.cso.uiuc.edu>
Source record: 39366

Contemporary-hit station KISF(FM) participated in Kansas City's gun buy-back program Friday (June 24) with an afternoon drive-time remote broadcast.

The buy-back, sponsored by the Southern Christian Leadership Conference, was scheduled for Friday and Saturday at the Truman Sports Complex.

Each 25 dollars worth of guns earned one ticket to any of several events, including Janet Jackson concert tickets sponsored by the station, in addition to the money paid for weapons. Payments ranged from five dollars for each BB gun to 100 dollars for high-quality pistols and assualt rifles.

Handgun-related murders have become such an issue in Kansas City that a WDAF(AM) billboard promoting its newscasts became controversial among some civic leaders, many of whom have financed or participated in suburban development in Johnson County (Kansas) that has damaged Kansas City's traditional urban core.

The billboard, which said, "We'll Tell You What Happened Last Night," had see-through holes made to look like giant bullet holes. Aforesaid civic leaders called on WDAF to withdraw the billboard, saying they feared for the city's image.

The billboard is still in use, although it has been moved to various locations away from Interstate 35 near the Southwest Trafficway, where it could be easily seen by suburbanites going home to Kansas each night.

Urban-contemporary KPRS(FM) has also addressed the issue by active participation in programs designed to reduce violence, and by airing frequent editorials asking listeners to "put down the damn guns."

An odd juxtaposition of remotes: on Friday evening, "Kiss 107.3" had another remote broadcast, this one from Crazy Harry's Fireworks in Riverside, a north Kansas City suburb.

*****

Dismissed KCMO(AM) talk show Freddy Mertz has taken his former employer to task. Mertz wrote a blistering letter to the "Pitch Weekly." The letter was published this week.

In it, Mertz wrote, "this out-of-town conglomerate, which professes to symbolize 'core values of integrity,' and hides behind the supposed good faith of the Mormon Church when convenient, is very willing to renege on over seven months pay in an employment contract."

KCMO(AM) is owned by an arm of the Latter Day Saints, Bonneville International. Bonneville also owns news/talk station KMBZ(AM), as well as KCMO-FM and KLTH(FM).

When Mertz suddenly left the air in May, listeners were told he was on vacation. This situation prevailed for nearly one month until Mertz was fired.

Mertz accused KCMO general manager Ron Carter of getting rid of him because Carter wanted him "to change the structure of a particular benefits package."
In his letter, Mertz urged disgruntled listeners to write the president of Bonneville, Rodney Brady.
*****
A documentary on the Stonewall riots airing on public radio stations this weekend has a Kansas City connection.
Kansas City resident Dave Buell was technical director for the project, "Stonewall: Myth, Magic, and Mobilization." The Public Radio International documentary covered gay-rights battles in the past and today's struggles with radical "Christian" fundamentalists pursuing a political agenda.
NPR affiliate KCUR(FM) and community station KKFI(FM) in Kansas City have or will have aired the program (depending upon when you read this). KKFI incorporated the program into its plans for a day-long "Gay and Lesbian Radio Day" on the 25th anniversary of the Stonewall riots in New York June 26.
Also announcing plans to air the program were community station KDHX(FM) in St. Louis and NPR affiliate KANU(FM) in Lawrence, Kansas.

Happenings in the #40 market:

*WBEN(NewsTalk 930)mid-morning talker Dave May will be leaving
his 9-11am show as of July 11. May will continue to do his daily
commentary,as well as working on the producing end of Bills broadcasts
(John 'The Pearl' DiMerle will also be involved)and act as a fill-in
for the WBEN Good Morning Show(when either Bill Lacy or Kevin Keenan
can't make it). Stepping in will be area native Gary McNamara,who
has worked at WJJL in Niagara Falls;he's not new to talk,having
handled its morning call-in show,"Viewpoint" for about 2 years before
the station was sold to John Phillips,an electronics store owner in
the area-who later converted to an oldies station. The handle I get on
the two is that they're in the middle. (BTW,I had an interview with
Gary a few years ago regarding a board-op position-I didn't get the job,
FWIW.) He arrives from the Chicago area(which station,I don't know-though
Alan Pergament said it was WLS;nice try,but I can get WLS on DX at
night-and,as far as I know,he wasn't there. Can someone in the Chicago
area confirm this?)
Also on the 'BEN side:Larry King is back!...sort of. The audio feed
of his CNN show "Larry King Live" will begin on NewsTalk 930 beginning
July 17 at 9pm,which either gives Gil Gross only 1 hour or removes him
entirely off 'BEN-if so,Jim Bohannon(whose show now starts at 10pm
nationwide,'BEN's on a 1-hour delay or doesn't pick up the 10pm hour.)

*As for WGR's Rich Michaels,I'm reminded of the quote that Texas
Governor Ann Richards made at the 1988 Democratic National Convention
regarding George Bush,"He can't help it. He was born with a silver
foot in his mouth." This week's edition of the Am-Pol Eagle(a paper
geared to area Polish-Americans-which is where my ancestry mostly
is,BTW)noted that in a discussion of the Seneca Nation and its lawsuit
with the state over Grand Island,he said that all of us have to pay
taxes,"even the Polacks". Really nice,Rich-especially when you
consider that a good portion of the area's population has Polish roots.
On yesterday's(6/23)he had Frank Massiah(VP of the Buffalo NAACP
chapter)on to discuss the O.J.Simpson case and how the press has handled
it. Massiah noted(around 11:10am)that when he walked in,all the on-air
staff is white and wondered why the station hadn't made an effort to
get more minority staffers. Michaels said that Massiah's statement was
"bullcrap" and said that the station had tried to find them. Evidently,
they haven't tried hard enough;WBEN,as an example,has two blacks on its
news staff(Claudine Ewing and Winston Brown)-so don't tell me you're
trying. (BTW,as far as what station call letters go,I'd like to suggest
a few-WGR might stand for We're Gross(or Grandstanding)Radio(for what it
does on-air these days),or-if one is concerned with better minority
representation-White Guys(or Gals)Rule. :>)

As far as its sister station(WGRF-97 Rock)goes,the article notes
that its morning show team of Norton & Stout created a character called
Stan Jasinski for its show. One problem:there IS a Stan Jasinski(who
does a polka show for WHTT-AM on Saturday & Sunday at 12noon,with the
assistance of Mark Wozniak & others). I can't speak for Stan,but if I
were in his shoes,I'd nail the 97ers to the wall and talk some smack
(for all you Talk2 buffs).

*I tried to note some other things,but it musit have gotten chewed
up,so here goes:
-Colleen Brannigan(part of WBUF's morning team)has returned to
western New York. She's teamed up with Jennifer Michaels on WVOR
(Variety 100.5)for AM drive.
-CJXY-FM(95.3,Hamilton;Classic Rock Y95)held its second annual
Future Classics contest recently,which aired as a special on CHCH-TV
(ch.11,indep.). Only 4 bands were chosen as finalists this time around,
with Roadside Attraction making it to the finals again. However,the
Redeemers won and got over $25,000 in cash and prizes($10,000 cash,music
equipment,a recording session and a video).

All for now....
==========
C.K.G.-RadioWatcher-western New York-southern Ontario
Media reporter-Alternative Press(Buffalo,N.Y.)

A quote and a joke:
"You got a lot of morons in your family? Because that could be genetic."
-Det.Andy Sipowicz,NYPD Blue
(use for any radio person you can't stand)

Q:How does the 60 Minutes stopwatch and some talkshow hosts differ?
A:Unlike the stopwatch,the talkshow hosts careers don't keep ticking.
(use for a talk show host you hate.)

>ing the CBC to use CB calls, but I don't have specific info on this.

A cursory inspection of my WRTH suggests that Chilean calls are
generally of the form CB999; perhaps the agreement puts this
arrangement in writing. To my knowledge, all CBC CB calls are of the
form CBx[y][T][n], where X indicates the hub city and sometimes network
(French or English); Y indicates a satellite city or region, T
indicates a television station but is not always present, and N is a
number.

There seem to be a growing number of exceptions, however. The
best-known is probably CJBC, the French service on 860 in Toronto. (I
can regularly hear CJBC here in Boston despite the 50kW WHDH on 850.)
I saw a reference to CJBC's former identity as a `CB' station, but
don't remember what the X letter was.

My source for the scheme has been listening to and watching listings
of CBC stations in Quebec, most particularly the satellites of CBM and
CBMT. Sadly, the twenty-minute historical sign-on they used to use
disappeared last year and was replaced with a rather generic sign-on
which appears to be in use CBC-wide. (This was before I moved to
Boston.)

Nice piece of thinking -- I like it. I've been using stereo videotape
for airchecks for years. Changing the station has been my only headache
-- but obviously you thought of that.

Now who's got the algorithm for distinguishing between music and talk in
an audio signal?

I'd like to hear about some of the clever hardware hacks out there --
I've done airchecks for out-of-town services using a simple timer that
starts and stops the tape recorder. It records 10 seconds out of every 2
minutes. Good, I suppose, for compiling a playlist, but I don't think it
gives you the flavor of a station. Who's done better? (Or differently?)

> HE doesn't believe everything he says.

That USED to be true of Rush before the Presidential election. But during the election, he thumbed his nose at affilitates who had to deal with equal time and put Bush or Quayle on his show several times (only notifying affils hours beforehand...and here in Iowa we had around 15 presidential candidates!). He also threatened to use the "power of his show" to "bury" Gov. Florio. These were not said with tongue in cheek...he said this in the middle of a rather impassioned speech.

He has forgotten about the entertainment value of his program...which is why moderates like myself used to tolerate the excesses. It's another case of someone in this business taking him or herself too seriously...and you just can't do that and survive. Larry King took himself too serious...thought he was the "king of radio" no matter what timeslot, and booked himself into a time that most affils have local programming and booked guests most people weren't interested in hearing outside of DC (and since they didn't have a toll free line, most of the calls were Beltway area listeners-so why should an Iowan even pay attention). His ratings took a nosedive and affils bailed out. Rush is at a plateau right now on a lot of stations...including mine. To keep from dropping, he should avoid his colleagues' mistakes.

>It's a radio show...not a system of beliefs. When a

>
That's not a valid analogy. Neither Robin Williams or Andrew Dice Clay bills themselves as "THE REAL equal time", urging the audience to "flood the mailboxes of the Clinton klan" (a Rush quote of recent days)

(about why he feels Rush is successful)

Don Backus' remarks about Rush Limbaugh and his entertainment value, IMHO, were certainly right on target for the first few years of his national show (1988-92) when, agree or disagree, you had to admit the guy was entertaining. However, he seems to have changed after that fateful night spent at the White House. He now seems to take himself much more seriously as a pundit, and he's become a strident partisan---and frankly, that's NOT entertaining. I check him out frequently (it always pays to check out your competition) and hear a lot more preaching, a lot less satire and humor. The numbers for his stations in most of the country, especially those that have run him the longest, show the impact...in top 50 markets from Rochester and Buffalo to Boston, LA, San Francisco, Detroit and Seattle, Rush and the stations that run him are showing definite and strong signs of erosion in both AQH and billing based on the Fall '93 and Winter '94 Arbitrons. And stations that made the mistake of surrounding him with radical Rush wannabes are paying the price even more heavily. If Rush wants to maintain what he still has, his best bet is to ease off on the partisan preaching and lighten up. Frankly I don't think he's going to do it...which means stations running him now had better start thinking about alternatives and be ready to put them in place within the next year or two. Just like Larry King, Rush is forgetting what got him to the top, and he's going to lose it all if he's not careful.

I guess you don't listen to Harvey all the time (I work for a station that carries him 6 days a week, so I hear it a lot more)...but during the election, Paul Harvey did not openly embrace Bush. In fact, Harvey often took the President to task. You see, Harvey is more aligned with the Christian Coalition than anything else and those people were really not all that excited about Bush. Surprisingly, during Carter's reign in office, Harvey criticized the President less than he did Congress.

Very interesting.

On tuesday evening, at 10PM, the DJ here comes to me and says "John, I'm getting this strange sound when I monitor WBAU off the air. When I went in the control room and listened, it kind of sounded like microwave fade, white noise fading in and out, on top of our signal. A quick check indicated the signal was clean leaving WBAU, and the transmitter and STL appeared to be normal. I then called the General Manager who lives about 2 miles from the transmitter. (the studios are a little over 3 miles away in the opposite direction.)

He said he heard nothing wrong, while the modulation monitor was still getting the static.

Next I went to my car radio, and thought I heard some of the same interference, but it was hard to tell. I decided to check the transmitter, but heard no more noise while driving there. When I got there, I called the studio, and the DJ said he had continued to hear the interference until a couple of minutes before I called. A check of the transmitter and STL receiver indicates all is normal.

At this point I am getting suspicious of an interfering signal causing the problem. I sat at the transmitter for about 30 minutes, but the DJ heard no more interference. If he had, I would have dumped the transmitter for a brief period to see if we could identify if it was interference and if so, from where.

On my way back to the studios, I tuned my car radio to 87.7, which is (almost) the channel 6 TV audio frequency. Normally I get nothing, as the nearest channel 6 is well over 100 miles away. Much to my surprise, I got at least 3 different signals, "picket fencing" back and forth. One was Philadelphia, one was Providence Rhode Island, and I never did figure out what the third, weaker one was.

Based on this, I figured what we were getting on the modulation monitor was interference, but that must have really been some signal to have been bothering a 1100 watt signal 3 miles line-of-sight away, with a yagi antenna on the receiver! I wish I knew what station it was.

My comment to the DJ was that his regular audience might have had a little trouble picking him up, but that he probably was being received in places he never got before.

Incidentally, if you look at rec.radio.shortwave, you will find two posts by people in Europe (one in France, one in the UK) who got strong FM dx from Portugal on the 22nd.

I wonder if this was sporadic "E"? Ducting is generally more localized than this.

John

> any references about conditions that would give this sort of
> phenomenon?

> Doug Speheger

The phenomenon is a form of ionospheric propagation known as "sporadic E", abbreviated "Es". It occurs when small areas of the E layer of the ionosphere become intensely ionized. These areas reflect (or, more accurately, refract) radio waves at frequencies (such as FM broadcast) much higher than are commonly refracted by the ionosphere. Es is most commonly observed during two "seasons" of the year. The seasons are centered around the two solstices. The summer season in each hemisphere is typically the better of the two, and lasts from around early May to mid-August.

The June 21 opening that you mentioned was one of the better openings of the season. As near as I could estimate, there was a huge, intensely ionized E "cloud" approximately over the state of Tennessee, which matches with your location and the stations you were hearing. Propagation was observed on frequencies as high as 150 MHz. (and possibly even higher).

As far as references go, many amateur radio related books cover various forms of propagation. The "Radio Amateur's Handbook" is one that covers the subject. The magazine "Popular Communications" frequently will have an article about Es in the Spring as we approach the beginning of the summer season.

Source record: 39375

In article <2ue4rs$58k@vixen.cso.uiuc.edu>, ranjeev@gibbs.oit.unc.edu
(Ranjeev Singh) writes:

(about setting up a community AM station)

Some costs, like setting up a basic studio complex with master
control, air studio, news booth and production control room, will
be the same no matter what frequency and power you get. That
can run you $50,000 or more by the time the control boards, tape
decks and CD players, digital recording/playback gear, mikes,
soundproofing, and satellite dishes for network programming are in.
How much it's going to cost beyond that depends on what kind
of station you establish. FCC minimums for a fulltime AM station
(they
aren't licensing daytimers any more) will depend on the channel you
select. On a "graveyard" frequency you'll need a 250 to 1000 watt
transmitter, hooked up to a tower at least 150 feet in height and
sit-
uated on a plot of land large enough to accomodate a transmitter
shack and an adequate ground system to meet FCC requirements
for field strength. That's going to be at least a 300x300 foot square
hunk
of land.
If the area you want to cover is larger, you're talking about a
regional (Class 3) channel and up to 5,000 watts power around the
clock with a directional antenna system for nighttime operation.
That's going to require several towers 200 feet in height or more, a
phasing system, transmitter, and shack all located on several acres
of land close enough to the city of license to provide adequate field
strength in the center of town. That can add up to a million dollars
or
more before you're through, in addition to studio construction.
I won't even get into the millions it takes to license and build
a
wide-coverage 50,000 watt clear channel operation, since you appar-
ently don't have that kind of station in mind.
These are construction costs for putting a new station on the
air.
You can get away with a price that's only a fraction of that amount
if
you look for a financially troubled, bankrupt and/or temporarily
silent
existing station, as well as saving the hassle of proving to the FCC
that your new operation will not cause excessive interference to
other

existing stations (that will have been done for you). Depending on the
size of the town, buying a dark 5,000 watt fulltime AM and putting it back on the air can cost as little as $75,000 or (in our case back in 1984, with a transmitter site in a top 50 market that is also prime suburban real estate) as much as a million...but certainly a small fraction of a startup. Good luck.

Actually, for a long time novice class amateur licenses were WN#...
where the # is a digit. They never used N as the first character.

For the past few years, the WN format has been abandoned, and a novice will
get the next availiable group d callsign. (In California, probably something
like KF6ABC.)

> with all of the above.

Military and diplomatic communication stations for all countries are not assigned call signs of any kind by international agreement. This is for security reasons, the comm's are anonymous in origin.

In the US, the A prefix is used for some Amateur Radio calls, but always for Army & Air Force MARS stations, but the AF prefix is used for military run broadcast stations administered by AFRTS.

Similarly N is also used for some Amateurs, but is always used for Navy and Marines MARS stations. BTW, MARS is the Military Assistance Radio Service, a voluntary service run by amateurs, both in and out of the service, under the authority of the branch of service. MARS relays mesages and phone calls from service members overseas to their familys at home via shortwave frequencies just outside of the regular ham bands.

In addition, all aircraft are, by international agrement, assigned one or more of their radio prefixes as the prefix of their tail numbers. This is because in order to register a plane, you must have a type approved radio. The aircraft license automatically serves as your radio license. In the US N is the most common tail prefix, but A is also used a lot. I have even heard of some W and K aircraft numbers.

I doubt that Arbitron "made up" the name North County San Diego. Two examples to the contrary:

a. Pacific Bell has a separate phone book for the region, named (surprise)

"San Diego North County"

b. There is a bus operator in the area called "North County Transit District", totally separate from the "San Diego Transit" operating in the city of San Diego and environs.

I'm sure there are other examples. . . .

(On Canadian radio station calls)

One thing I've often wondered...what are the rules (if any) for on-air station ID's on Canadian broadcast stations? As a frequent visitor in Ontario, I've noticed that most of them don't use the classic American style call and city of license ID at the top of the hour, or for that matter at any point in the hour. Some use the callsign and dial position (like CFRB 1010)...some use a slogan and dial position only without ever mentioning the call sign on the air, or even the city they're broadcasting from. CBC stations never seem to use their specific station call signs, just calling themselves "CBC radio (dial position), (city of license)...like "CBC Radio 740 Toronto," never mentioning their assigned CBL callsign. Most commercial stations are as vague as the Hamilton FM which never refers to itself as anything but "Y95." (I don't know for the life of me, after listening to them off and on for several years,
what their actual legal callsign is.) Did the CRTC loosen up on ID rules some years ago?

Fred: Is this the same Victoria Jones with somewhat of an accent?

She was here in the \Detroit area two years ago. Had a late evening
slot on a talk station, mostly political stuff (late evening
being around 8 or 9 to 11 pm). I wasn't impressed. Then she took a job
on the East Coast (I think it was Boston) and the station here(WXYT-Am 1270)
was suing
her for breach of contract, etc. It was in the local news.
Maybe you'll get lucky and she'll jump ship from WBZ.

I occasinally have tuned in WBZ late nite and listened to the hosts you
mentioned.They do have a good show for the time slot.
Whatever became of John Keller, the Sunday night host|? Two
years ago, several weeks before election '92, he quit the radio program.
I really liked his political coverage, both national and lo/state
coverage.

Thanks and bye!

Tim Bohr
